

## **Raspadskaya mine has resumed mining in full**

**03 May 2023** - Raspadskaya Coal Company announces full resumption of coal production at the Raspadskaya mine.

All necessary technical and organizational measures have been taken at the face where the incident took place earlier in April 2023 in order to resume operations.

Raspadskaya Coal Company is actively implementing digital projects at its mines to effectively monitor mining operations and ensure safe working conditions. A video surveillance system as well as digital machine vision technologies help monitor technological processes. For example, the Raspadskaya mine has implemented a digital project to monitor dome formation, video analytics of conveyor transport, and monitoring of drifting faces.

## **About the Company**

Raspadskaya Group comprises eight underground mines, two open-pit mines, three enrichment plants, one underground mine and one underground mine in the Kemerovo Region and the Tyva Republic of Russia.
