Table 1 - EU KM1 - Key metrics template

During the second half of 2023, total own funds for NEK increased by EUR 83m. CET1 capital increased by EUR 75m, AT1 capital remained stable, and the T2 capital increased by EUR 8m. Total REA increased by EUR 240m over the period, CET1 ratio increased by 0.2pp to 26.0% and TCR increased by 0.2pp to 27.5%. The leverage ratio decreased slightly by 0.1pp to 5.8%.

Table 4 - EU OV1 - Overview of total risk exposure amounts

The table provides an overview of the total REA for 2023. Credit risk was the largest risk type accounting for approximately 96% of Pillar I REA, followed by operational risk which was the second largest risk type. REA decreased by EUR 0.3bn during the period (from EUR 7.6bn to EUR 7.3bn), mainly driven by a decrease of EUR 0.3bn in credit risk.

Table 5 - EU CR1 - Performing and non-performing exposures and related provisions

Total gross carrying amount of performing and non-performing loans and advances amounted to EUR 30bn at the end of 2023, of which non-performing amounted to EUR 67m. Allowances in stage 3 for non-performing loans and advances were EUR 14m at the end of 2023. The coverage ratio, including loans and advances fair value through profit and loss (FV through PL), was 22%.

Table 6 - EU CR1-A - Maturity of exposures

EU CR1-A discloses net exposure values for on-balance and off-balance sheet exposures. For exposures classified as loans and advances, about 89.7% were in the >5 years bucket, whereas for exposures classified as debt securities, 100% were in the >1<=5 years bucket. At the end of 2023, the total exposure amount for both groups amounted to EUR 34.1bn.

EURm	a	b	С	d	е	f	
	Net exposure value						
	Ondomand	1 voor	> 1 year <= 5	> E vears	No stated	Total	
	On demand	<= 1 year	years	> 5 years	maturity	Total

2 Debt securities			944			944	
3 Total	175	314	3,661	29,739	224	34,113	

Table 7 - EU CR2 - Changes in the stock of non-performing loans and advances

The final stock of non-performing loans and advances amounted to EUR 67m at the end of 2023. The net increase of EUR 9m was driven by inflows (EUR 75m). This was partly offset by outflows of EUR 66m, of which EUR 0.3m was driven by write-offs.

EURm	a
Q4 2023	Gross carrying amount
010 Initial stock of non-performing loans and advances	58
020 Inflows to non-performing portfolios	75
030 Outflows from non-performing portfolios	-66
040 Outflows due to write-offs	-0.3
050 Outflow due to other situations	-66
060 Final stock of non-performing loans and advances	67

Table 8 - EU CR3 - CRM techniques overview: Disclosure of the use of credit risk mitigation techniques

In comparison to the last reported quarter (Q4 2022) there were no significant changes for loans and advances and debt securities. In Q4 2023, 96% of total exposures had at least one Credit Risk Mitigation (CRM) mechanism (collateral, financial guarantees), the majority of which were secured by real estate collaterals.

EU-5 Of which defaulted

Table 9 - EU CR4 - standardised approach - Credit risk exposure and CRM effects

The total exposure amount before CCF and CRM for the standardised approach amounted to EUR 2.3bn in Q4 2023. The on-balance sheet exposure in Q4 2023 amounted to EUR 2.2bn (compared to EUR 2.8bn in Q4 2022). The decrease in on-balance exposures was mainly driven by decreased exposure in the Secured by mortgages on immovable property exposure class. The REA density decreased by 5 percentage points (from 32% to 27%).

Table 13 - EU CQ1 - Credit quality of forborne exposures

Forbearance refers to eased terms or restructuring of credit terms and conditions due to the borrower experiencing financial difficulties. The intention of granting forbearance for a limited period of time is to ensure full repayment of the outstanding debt. Examples of eased terms are changes to amortisation profile, repayment schedule and customer margin, or eased financial covenants. At the end of 2023, total forborne loans and advances amounted to EUR 40m. Non-performing forborne loans and advances amounted to EUR 3m and performing forborne loans and advances amounted to EUR 3m.

Table 16 - EU LIQ1 - Quantitative information of LCR

Nordea Eiendomskreditt AS' short term liquidity risk exposure measured by Liquidity Coverage Ratio (LCR) remained on stable level throughout 2023. Average LCR increased by 332pp between Q4 2022 and Q4 2023 mainly due to increased liquid assets. Main drivers of Nordea Eiendomskreditt AS' LCR results are outflows from wholesale funding which are counterbalanced by high quality liquid assets. During 2023 there was an increase in cash inflows from mortgage loans and an increase in liquid assets resulting to higher average LCR ratio. Liquidity buffer in Nordea Eiendomskreditt AS is composed mainly of government related entity and high quality covered bonds. Nordea Eiendomskreditt AS' main funding sources in 2023 were internal funding from Nordea Bank Abp (36%) and issued covered bonds (57%). Nordea has a centralised liquidity management function where Group Treasury is responsible for the management of the Eiendomskreditt AS' liquidity positions, liquidity buffers, external and internal funding, and Funds Transfer Pricing. In terms of liquidity regulation, Nordea Eiendomskreditt AS does not have other significant currencies than NOK. Possible mismatches from minor exposures in foreign currencies are actively managed and monitored. Nordea Eiendomskreditt AS' derivative exposures, potential collateral calls and their impact to LCR is closely monitored and managed.

Table 17 - EU LIQ2 - Net Stable Funding Ratio

Following Regulation (EU) 2019/876, the introduction of a minimum Net Stable Funding Ratio (NSFR) of 100% applicable since June 30, 2021 in EU, which entered into force June 1, 2022 in Norway, requires banks to maintain a stable funding profile in relation to the composition of their assets and off-balance sheet activities. NSFR is defined as the amount of available stable funding relative to the amount of required stable funding. All liabilities and capital instruments are assigned an ASF weight, while assets and certain off balance sheet positions receive an RSF weight. The objective is to reduce funding risk over a longer time horizon by requiring banks to fund their activities with sufficiently stable sources of funding in order to mitigate the risk of funding stress. The NSFR was 115.1% at the end of Q4 2023. It represents a 2pp increase compared to the Q4 2022 (113.1%), primarily driven by a decrease in RSF weighted amount of mortgage loans over the period. The following table sets out the unweighted and weighted value of the NSFR components of the Nordea Eiendomskreditt AS at December 31, 2023 (i.e. quarter-end observation).

Table 19 - EU LR1 - LRSum: Summary reconciliation of accounting assets and leverage ratio exposures

Nordea has policies and processes in place for the identification, management and monitoring of the excessive leverage. The leverage ratio is also part of Nordea's risk appetite framework. The leverage ratio decreased from 6.2% in Q4 2022 to 5.8% in Q4 2023. The decrease was mainly driven by decreased Tier 1 Capital

Disclosure of mean values		_
28 Mean of daily values of gross SFT assets, after adjustment for sale accounting transactions and netted of amounts		
of associated cash payables and cash receivable		
29 Quarter-end value of gross SFT assets, after adjustment for sale accounting transactions and netted of amounts		
of associated cash payables and cash receivables		
30 Total exposure measure (including the impact of any applicable temporary exemption of central bank reserves)		
incorporating mean values from row 28 of gross SFT assets (after adjustment for sale accounting transactions and	32,544	32,800
netted of amounts of associated cash payables and cash receivables)		
30a Total exposure measure (excluding the impact of any applicable temporary exemption of central bank reserves)		
incorporating mean values from row 28 of gross SFT assets (after adjustment for sale accounting transactions and	32,544	32,800
netted of amounts of associated cash payables and cash receivables)		
31 Leverage ratio (including the impact of any applicable temporary exemption of central bank reserves)		
incorporating mean values from row 28 of gross SFT assets (after adjustment for sale accounting transactions and	5.8%	6.2%
netted of amounts of associated cash payables and cash receivables)		
31a Leverage ratio (excluding the impact of any applicable temporary exemption of central bank reserves)		
incorporating mean values from row 28 of gross SFT assets (after adjustment for sale accounting transactions and	5.8%	6.2%
netted of amounts of associated cash pavables and cash receivables)		

Table 21 - EU LR3 - LRSpl: Split-up of on balance sheet exposures (excluding derivatives, SFTs and exempted exposures)

Out of total on-balance sheet exposures EUR 31.0bn, EUR 31.0bn or 100% are related to Banking book exposures. The biggest part of banking book $exposures is \ related \ to \ secured \ by \ mortgages \ of \ immovable \ properties \ (85\% \ of \ banking \ book \ exposures) \ and \ retail \ exposures \ (11\% \ of \ banking \ book \ exposures)$ exposures).
