#### *Amounts Due*

The Company’s previously owned Swedish subsidiary, Hydro66 Svenska AB (“Hydro AB”), had been under a tax review regarding parts of its recovered VAT for the period 2016-2020. The Company had given the buyer of Hydro66 Svenska AB an indemnity to be liable for tax rulings attributed to periods before the transaction date (March 4, 2021). The Swedish Tax Authorities expressed an intent to recover a portion of the VAT recovered by Hydro AB on grounds that Hydro AB is mining crypto currencies for its own use. The Company and Northern Data did not share the Swedish Tax Authorities opinion and an appeal was filed. On July 8, 2022 the Swedish Tax Authorities rendered their decision rejecting the appeal and, as a result SEK 19,858,205 was paid by Northern Data, of which the €1,213,544 escrowed funds were released to Northern Data and €708,125 remained payable to Northern Data as at December 31, 2022. During fiscal 2022 the Company recorded a loss of \$609,623 on the difference between the provision as at December 31, 2021 and the actual settlement with the Swedish tax authorities.

As at December 31, 2023 management considers that the Company has adequate resources to maintain its operations and investments and repay indebtedness as they come due.

The requirement to hold the shares of Northern Data expired in March 2023. Management believes that the upcoming halving of Bitcoin presents an attractive opportunity to take direct exposure to the price of Bitcoin over the coming 18 months and during fiscal 2023 has therefore rebalanced its asset portfolio by reducing the holdings of Northern Data shares and purchasing shares in other investments in cryptocurrencies.

## **Financial Instruments and Risk Management**

### *General Objectives, Policies and Processes*

The overall objective of the Board is to set policies that seek to reduce risk as far as possible without unduly affecting the Company's competitiveness and flexibility. Further details regarding these policies are set out below. The Board reviews its monthly reports through which it assesses the effectiveness of the processes put in place and the appropriateness of the objectives and policies it sets. All funding requirements and financial risks are managed based on policies and procedures adopted by the Board of Directors.

### *Categories of Financial Assets and Liabilities*

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 - Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 - Inputs that are not based on observable market data.

The principal financial instruments used by the Company, from which financial instrument risk arises, are as follows:

- (i) Cash
- (ii) Investments
- (iii) Accounts payable and accrued liabilities
- (iv) Advances and convertible debentures
- (v) Amount due

Book values and expected cash flows are reviewed by the Board and any impairment charged to the condensed consolidated interim statement of comprehensive income (loss) in the relevant period.

The fair value of the investment in equity security is measured based on level 1 at the quoted market price of the related common shares at each reporting date, and changes in fair value are recognized in comprehensive income (loss).

Accounts payable and accrued liabilities are measured at book value. The book value of financial assets and liabilities equates to their fair value.

Accounts payable and accrued liabilities principally comprise amounts outstanding for trade purchases and ongoing costs.

The Company's non-derivative financial liabilities have contractual maturities (including interest payments where applicable) as summarized below:

	As at December 31, 2023			
	Current		Non-Current	
	Within 6 Months \$	6-12 Months \$	1 - 5 Years \$	Over 5 Years \$

### ***Cash and Cash Equivalents***

Cash and cash equivalents are currently held in Canadian Dollars (\$) and United States Dollars ("USD") and placed on deposit in Canadian banks.

### ***Risk Exposures***

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

#### ***Credit Risk***

Credit risk is the risk that a counterparty fails to discharge an obligation to the Company. The Company is exposed to credit risk from financial assets including cash and cash equivalents held at banks, trade and other receivables. The credit risk in respect of cash balances held with banks is remote as they are held only with major reputable financial institutions. The Company is mainly exposed to credit risk from credit sales.

#### ***Liquidity Risk***

Liquidity risk is the risk that the Company will not have the resources to meet its obligations as they fall due. The Company manages this risk by closely monitoring cash forecasts and managing resources to ensure that it will have sufficient liquidity to meet its obligations.

Short-term liquidity risk arises from the Company's management of working capital. It is the risk that the Company will encounter difficulty in meeting its financial obligations as they fall due. The Company's policy is to ensure that it will always have sufficient cash to allow it to meet its liabilities when they become due. To achieve this aim, it seeks to maintain cash balances to meet expected requirements for a period of at least 30 days.

Longer-term liquidity risk is the ability of the Company to continue as a going concern. This risk is managed by the preparation by the Directors of cash flow forecasts and the strict management of expenditure.

### *Market Risk*

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. These fluctuations may be significant.

(a) Interest Rate Risk

The Company is exposed to interest rate risk to the extent that the cash bears floating rates of interest. The interest rate risk on cash and on the Company's obligations are not considered significant.

(b) Foreign Currency Risk

The Company's functional currency is the Canadian dollar and major transactions are transacted in Canadian Dollars, Euros and US Dollars. Management believes the foreign exchange risk related to currency conversions is minimal and therefore does not hedge its foreign exchange risk. At December 31, 2023 1 Canadian Dollar was equal to 0.68 Euro and 0.76 US Dollar.

	Euros	United States Dollars	CDN \$ Equivalent
Cash	-	466	613
Investments	<u>3,290,850</u>	<u>-</u>	<u>4,834,509</u>
	<u>3,290,850</u>	<u>466</u>	<u>4,835,122</u>

Based on the net exposures as of December 31, 2023 and assuming that all other variables remain constant, a 10% fluctuation on the Canadian Dollar against the Euro and US Dollar would result in the Company's comprehensive income or loss being approximately \$483,500 higher (or lower).

(c) Equity Price Risk

The Company is exposed to equity risk due to the significance of its holdings in two investments. On December 31, 2023 these investments were valued at \$10,743,909.

A 10% fluctuation in the value of its investments from the value at December 31, 2023 would result in the Company recording a gain or loss through unrealized loss or gain in fair value of its investments of \$1,074,000.

### ***Capital Management***

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern such that it can provide returns for shareholders and benefits for other stakeholders. The Company considers the items included in shareholders' equity as capital. The management of the capital structure is based on the funds available to the Company in order to maintain the Company in good standing with the various regulatory authorities. In order to maintain or adjust its capital structure, the Company may issue new shares, sell assets to settle liabilities or return capital to its shareholders. There has been no change to the Company's capital management strategy during fiscal 2023 and the Company is not subject to any externally imposed capital requirements.

### **Changes in Accounting Policies**

There are no changes in accounting policies. A detailed summary of the Company's material accounting policies is included in Note 3 to the December 31, 2023 audited annual financial statements.
