BMO Global Metals, Mining & Critical Minerals Conference February 27, 2024

We are a leading large-scale, low-cost integrated zinc producer with over **60 years of experience developing** and operating mining and smelting assets in Latin America

Nexa | Overview

	Our Flagship Mining Operations Nexa Polymetallic Mines			nexa

- Cerro Lindo: 1st. quartile AISC. Largest UG polymetallic mine in Peru
- Cerro Pasco: well-known and high attractive mineral province. Nexa operates in the area for +50yrs
- Vazante: Large zinc silicate deposit. High Zn grade

1 - 1 1 - 1 1 - 1 4 1 - 1 4 1 - 1 4 1 - 1 1 - 1 1 - 1 4 1 - 1 4 1 - 1 4 1 - 1 4 1 - 1 1 - 1 4 1

• Aripuanã: long-life mining asset. Our 3rd flagship mine

1. Ex-Aripuanã (due to it is still ramping-up). Based on FY23 mining all-in sustaining cash cost. Wood Mackenzie 4Q23 AISC curve. * FY 2023 production. 3. Not considering Morro Agudo

4

Aripuanã

World-class, long-life underground polymetallic mine – our 3rd flagship mine

- Total capex of ~US\$ 632 mm
- Total all-in¹ investment: ~US\$ 1.0 bn (including capex + working capital + pre-operating expenses)
- Ramp-up delay in 2023 (due to bottlenecks in pumping system): nameplate capacity by mid-2024
- End of investment cycle in 2023
- Exploration campaign continues showing **potential relevant LoM addition**

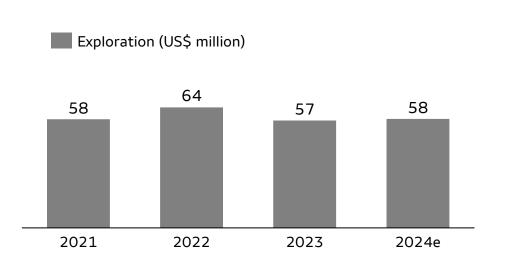

1. Including pre-operating expenses during ramp-up phase and working capital. Non-audited estimated figures (management view) from project approval up to Dec/23. 2. Based on current Reserves + Resources inventory

Mineral Exploration

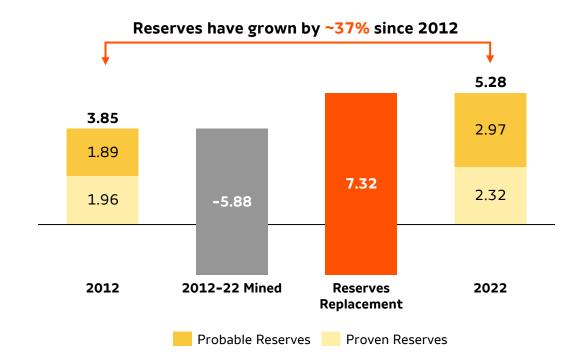

Supporting Nexa growth platform: current operations and projects

 Robust pipeline and consistent investments: Mineral Exploration contributing to replenish and increase the reserves and resources base in current operations and provide strategic growth opportunities

- Exploration as part of Nexa's growth strategy: current operations + projects
- In 2023, we expect and additional increase in Nexa's overall reserves base

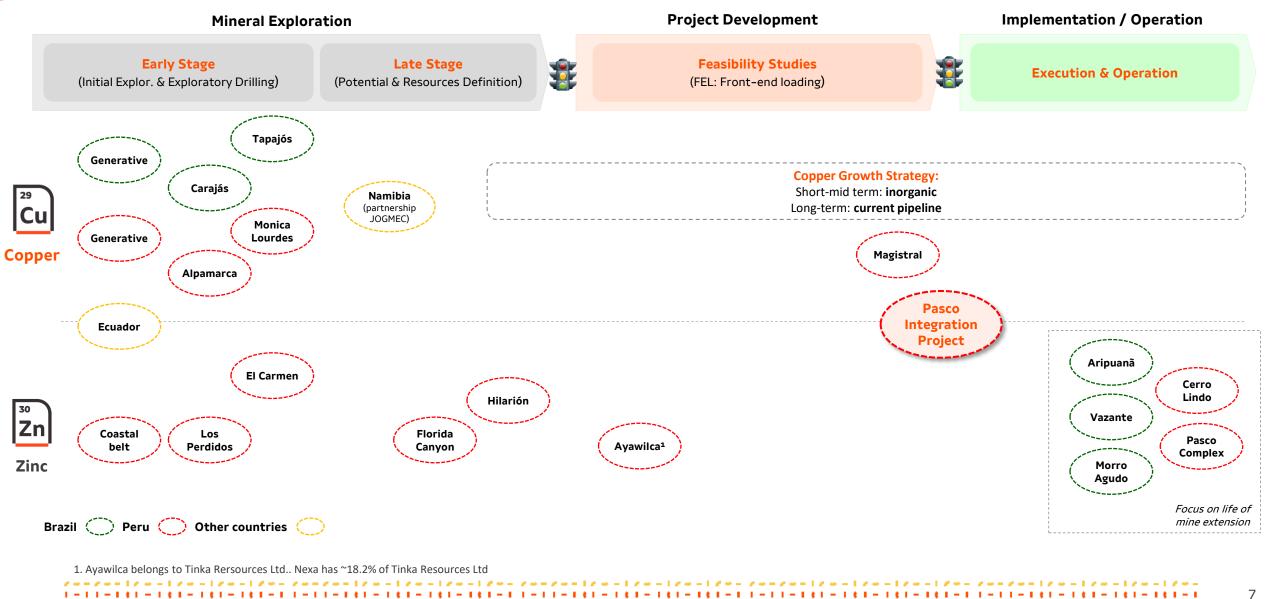

- Mineral Reserves: outstanding replacement track record at current operations (Mt Zn Eq)
- 1. Assuming 100% ownership of Nexa Peru (formerly Milpo) and Atacocha; reserves replacement calculated by subtracting 2012 Zn Eq. reserves from 2022 Zn Eq. reserves, plus Zn Eq. Ore Mined; Zn Eq. is calculated based on respective metal content in ore mined and metal prices of Zn: US\$2,826.35/t, Pb: US\$2,043.95/t; Cu: US\$7,398.47/t; Au: US\$1,474.88/oz; and Ag: US\$19.93/oz, with all costs in US dollars.

Portfolio of options in Zn and Cu

From early-stage exploration to life of mine extension: extensive knowledge in exploration

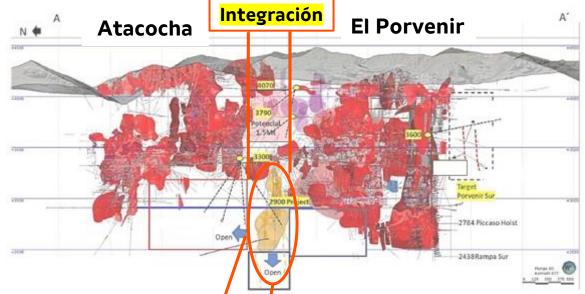

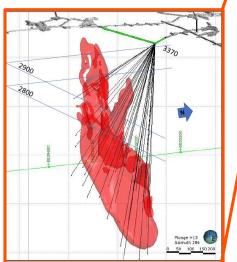

Pasco Complex Integration Project

A robust organic growth option

- Repositioning the asset's competitiveness by building a robust organic growth option
- Integration of Atacocha and El Porvenir underground mines: unlocking site's full potential
- El Porvenir (LoM)¹: 6 years
- Atacocha (LoM)²: **<5 years**
- El Porvenir + Atacocha integrated (LoM): > 10 years³

Project's Highlights:

- Integration of the 2 UG mines: underground infrastructure (shared infrastructure >> higher profitability)
- El Porvenir shaft upgrade: improve capacity
- Tailings Storage Facility: Increased storage capacity + pumping system
- **Support studies:** environmental studies & permits, corporate structure

1. Note: Mine Life based on Mining Report 2022; mine life calculated by dividing reserves by ore mined capacity; 2. Open pit mine (Tajo San Gerardo) estimated LoM. 3. Including potential endowment and Integración target

Our Flagship Smelting Operations

Regional leadership (high premium markets). High production scale operations. Close to raw material sources

1. Based on 4Q23 smelting cash cost. Wood Mackenzie 4Q23 AISC curve. * FY 2023 production

Operational and Financial Highlights

Current results impacted by lower Zn prices. End of Aripuanã investment cycle

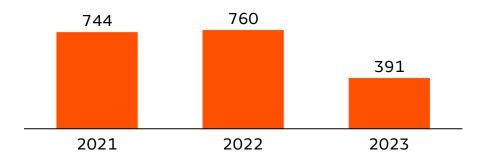

Capex (US\$ million)

Adjusted EBITDA (US\$ million)

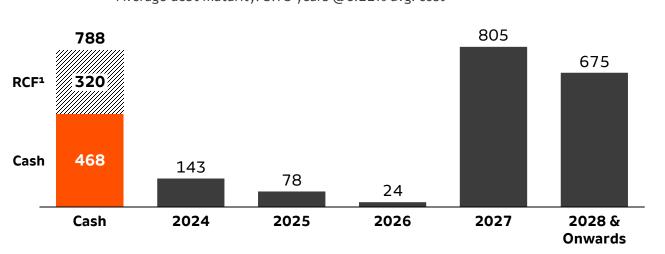

• Record-high Adjusted EBITDA of US\$760 million in 2022

- Adj. EBITDA in 2023 following lower LME prices and impact of Aripuanã ramp-up
- Aripuanã investment cycle ended

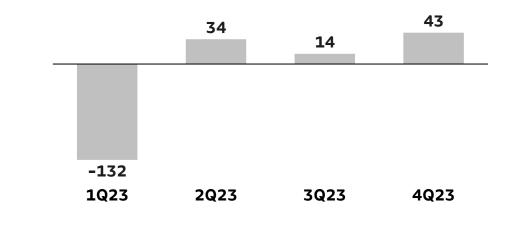

Cash Flow and Debt Profile

Debt profile (as of December 31st, 2023) Average debt maturity: 3.75 years @6.11% avg. cost

2023 FCF quarterly evolution (US\$ million)

- Sound balance sheet with a long-term debt profile
- Positive free cash flow in 2Q3, 3Q23 and 4Q23, despite challenging price scenario and Aripuanã ramp-up: ~(190 million) in cash flow impact from Aripuanã³ in 2023
- End of Aripuanã investment cycle: improving cash generation
- Leverage at 3.2x due to lower LTM Adj. EBITDA

Rating agencies	Rating	<u>Outlook</u>
Fitch	BBB-	Stable
S&P	BBB-	Stable

Why Nexa

1. Solid long-term market
fundamentals: Copper and
Zinc connected to green
economy

4. Active exploration strategy: robust portfolio of potential projects in different stages and in friendly jurisdictions

2. Mines with high potential of life of mine extension (attractive capital allocation) 5. Effective ESG approach: recognized disclosing practices (low carbon footprint – leading position in Zn industry)

3. Smelters well positioned: raw material supply and leading sales position in high-premium markets

6. Sound balance sheet: to be **further strengthened** after the investment cycle in Aripuanã

7. Commitment to capital allocation discipline and cash flow generation
