<b>TELEPHONE CALL RECORD</b>		CALL OUTGOING <u>  X  </u>
		CALL INCOMING <u>      </u>
PROJECT:	Baker's Yeast Manufacturing NESHP (STD-132)	
EC/R STAFF:	Lisa Sutton	
DATE:	July 8, 1998	
CONVERSATION WITH:	Mr. Mark Henson	
AFFILIATION:	Fleischmann's Yeast, Inc. Fenton, Missouri	
TELEPHONE NO.:	(314) 349-8839	
SUBJECT:	Integrated Ingredients yeast producer in Hutchinson, Missouri.	
<p><b>SUMMARY:</b></p> <p>Today I spoke with Mr. Mark Henson, environmental manager for Fleischmann's Yeast, Inc., regarding Integrated Ingredients, a yeast-producing facility for which he had earlier provided contact information. Mr. Henson explained that Fleischmann's Yeast is a division of Burns Philp Food, which is the North American subsidiary of Burns Philp Ltd. in Australia. Integrated Ingredients, in Hutchinson, Minnesota, is a separate division of Burns Philp Food.</p> <p>Mr. Henson believes Integrated Ingredients does produce baker's yeast, among other things. Its market is distinct from that of Fleischmann's in that it does not produce yeast for industrial bakers or the commercial yeast found in grocery stores; instead, it produces baker's yeast used in tortillas, corn chips, etc.</p> <p>Mr. Henson suggested that I call the Integrated Ingredients plant manager directly for more information. Mr. Henson will also speak with the plant manager, with the intent to visit the facility in the "not too distant" future, and he will offer to represent Integrated Ingredients in the MACT standards development process. Mr. Henson does not know anything about facility emissions from or permits issued to Integrated Ingredients.</p> <p>--Lisa S.</p> <p>cc: Beth Friedman</p>
