			Form Ap	proved. O.M.B. No. 207	70-0012. Approval Expires 12/31/2022				
U.S. ENVI	ONMENTAL PROTECTION	AGENCY		AGE	NCY USE ONLY				
Content of Allen	PREM	IANUFACTU	RE	Date of receipt:	11/06/2020				
PROTEIN	FOR NEW C	NOTICE HEMICAL SUBS	TANCES						
		Office of Pollution I	If sending by US Mail: Office of Pollution Prevention and Toxics Document Control Office (7407M)		Submission Report Number				
send this form to:	US EPA, 1201 Constitution Ave NW WASHINGTON, D.C. 20460 Contact Numbers: 202-564-8930/8940	US EPA, 1200 Penn WASHINGTON, D.C							
Total Numbe	r of Pages		TS Number						
21			TA2005						
		GENERA	AL INSTRUCTIONS						
Before you co (TSCA) Inform	vide all information requested in this form to the ex mplete this form, you should read the "Instructions nation Service by calling 202-554-1404, or faxing 2	Manual for Premanufa 202-554-5603).	acture Notification" (the Instr	ructions Manual is available	from the Toxic Substances Control Act				

If a fee has been remitted for this notice (40 CFR 700.45), indicate in the boxes above the TS fee identification number you have generated. Remember, your fee ID number must also
appear on your corresponding fee remittance. For mailing address information see the Help instructions in the e-PMN tool.

Part I – GENERAL INFORMATION

You must provide the currently correct Chemical Abstracts (CA) Name of the new chemical substance, even if you claim the identity as confidential. You may authorize another person to submit chemical identity information for you, but your submission will not be complete and the review will not begin until EPA receives this information. A letter in support of your submission should reference your TS fee identification number. For all Section 5 Notice submissions (paper or electronic) you must submit an original notice including all test data; if you claimed any information as confidential, an original sanitized copy must also be submitted.

Part II – HUMAN EXPOSURE AND ENVIRONMENTAL RELEASE

If there are several manufacture, processing, or use operations to be described in Part II, sections A and B of this notice, reproduce the sections as needed.

Part III - LIST OF ATTACHMENTS

For paper submissions, attach additional sheets if there is not enough space to answer a question fully. Label each continuation sheet with the corresponding section heading. In Part III, list these attachments, any test data or other data and any optional information included in the notice.

OPTIONAL INFORMATION

You may include any information that you want EPA to consider in evaluating the new substance. On page 11 of this form, space has been provided for you to describe pollution prevention and recycling information you may have regarding the new substance. "Binding" boxes are included throughout this form for you to indicate your willingness to be bound to certain statements you make in this section, such as use, production volume, protective equipment . . . The intention is to reduce delays that routinely accompany the development of consent orders or Significant New Use Rules. Checking a "binding" box in a PMN does not by itself prohibit the submitter from later deviating from the information (except chemical identity) reported in the form; however, in the case of exemption applications (such as TMEA, LVE, LOREX) certain information provided in such notifications is binding on the submitter when the Agency approves the exemption application, especially if the production volume "binding" box is chosen in a LVE.

CONFIDENTIALITY CLAIMS

You may claim any information in this notice as confidential. To assert a claim on the form, mark (X) the confidential box next to the information that you claim as confidential. To assert a claim in an attachment, circle or bracket the information you claim as confidential. If you claim information in the notices as confidential, you must also provide a sanitized version of the notice. (including attachments). For additional instructions on claiming information as confidential, read the Instructions Manual.

TEST DATA AND OTHER DATA

You are required to submit all test data in your possession or control and to provide a description of all other data known to or reasonably ascertainable by you, if these data are related to the health and environmental effects on the manufacture, processing, distribution in commerce, use, or disposal of the new chemical substance. Standard literature citations may be submitted for data in the open scientific literature. <u>Complete test data (written in English)</u>, not summaries of data, must be submitted if they do not appear in the open literature. You should clearly identify whether test data is on the substance or on an analog. Also, the chemical composition of the tested material should be characterized. Following are examples of test data and other data. Data should be submitted according to the requirements of §720.50 of the Premanufacture Notification Rule (40 CFR Part 720).

	Test Data (Check Below any included in this notice)

The public reporting and recordkeeping burden for this collection of information is estimated to average 93 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for ninimizing respondent burden, including through the use of automated collection techniques to the Director, Collection Strategies Division, U.S. Environmental Protection Agency (2822T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed EPA Form 7710-25 to this address.									
CERTIFICATION A printed copy of this signature page, with orig with CD or paper submission.	inal signa	ture, must be submitted							
I hereby certify to the best of my knowledge and belief that all information enter I further certify that, pursuant to 15 U.S.C. § 2613(c), for all claims for protection submission, all information submitted to substantiate such claims is true and comperson submitting the claim has: (i) taken reasonable measures to protect the confidentiality of the information (ii) determined that the information is not required to be disclosed or otherwised Federal law (iii) a reasonable basis to conclude that disclosure of the information is likely to position of the person; and (iv) a reasonable basis to believe that the information is not readily discoverable	n for any c prrect, and made ava cause sul	confidential information mac that it is true and correct th ailable to the public under a ostantial harm to the compe	e with this at the ny other						
Any knowing and willful misrepresentation is subject to criminal penalty pursu	ant to 18 l	J.S.C. § 1001.							
Additional Certification Statements:									
If you are submitting a PMN, SNUN, LoREX, LVE, or TMEA, check the statement that applies:	following	Fees Certification							
The Company named in Part I, Section A is a "small business concern" a fee as specified in 40 CFR 700.45(c).	s defined u	nder 40 CFR 700.43 and will r	emit the						
X The Company named in Part I, Section A will remit the fee as specified in 4) CFR 700.4	45(c).							
This joint submission includes at least one Company which is a "small busin not a "small business concern," as defined under 40 CFR 700.43. The fee w remaining balance due for this joint submission is to be paid by the second	/ill be remit	ted with the joint submission. A							
The company named in Part I, Section A is submitting a sustainable futures Sustainable Futures program and is therefore exempt from fees for this sustainable Futures program and is therefore exempt from fees for this sustainable futures.			PA's						
If you are submitting a Low Volume Exemption (LVE) application in a Low Release and Low Exposure Exemption (LoRex) application in a the following certification statements:									
The manufacturer submitting this notice intends to manufacture or import t other than in small quantities solely for research and development, under t			al purposes,						
The manufacturer is familiar with the terms of this section and will comply	with those t	erms; and							
The new chemical substance for which the notice is submitted meets all a	oplicable ex	emption conditions.							
If this application is for an LVE in accordance with 40 CFR 723.50(c)(1), the exempted substance for commercial purposes within 1 year of the date

3. Environmental Release and Disposal -- You must make separate confidentiality claims for the release number and the amount of the new chemical substance released and other release and disposal information. Mark (X) the "Confidential" box next to each item you claim as confidential.

- (1) -- Enter the number of each release point identified in the process description, part II, section A, subsection 1d(3).
- (2) -- Estimate the amount of the new substance released (a) directly to the environment or (b) into control technology (in kg/day or kg/batch).
- (3) -- Mark (X) this column if entries in columns (1) and (2) are confidential business information (CBI).

(4) -- Identify the media (stack air, fugitive air (optional-see Instruction Manual), surface water, on-site or off-site land or incineration, POTW, or other (specify)) to which the new substance will be released from that release point.

(5) -- a. Describe control technology, if any, and control efficiency that will be used to limit the release of the new substance to the environment. For releases disposed of on land, characterize the disposal method and state whether it is approved for disposal of RCRA hazardous waste. On a continuation sheet, for each site describe any additional disposal methods that will be used and whether the waste is subject to secondary or tertiary on-site treatment. b. Estimate the amount released to the environment after control technology (in kg/day).

(6) -- Mark (X) this column if entries in columns (4) and (5) are confidential business information (CBI).

(7) -- Identify the destination(s) of releases to water. Please supply NPDES (National Pollutant Discharge Elimination System) numbers for direct discharges or NPDES numbers of the POTW (Publicly Owned Treatment Works). Mark (X) if the POTW name or NPDES # is confidential business information (CBI).

OPTIONAL POLLUTION PREVENTION INFORMATION

To claim information in the following section as confidential, bracket (e.g. {}) the specific information that you claim as confidential.

In this section you may provide information not reported elsewhere in this form regarding your efforts to reduce or minimize potential risks associated with activities surrounding manufacturing, processing, use and disposal of the PMN substance. Please include new information pertinent to pollution prevention, including source reduction, recycling activities and safer processes or products available due to the new chemical substance. Source reduction includes the reduction in the amount or toxicity of chemical wastes by technological modification, process and procedure modification, product reformulation, and/or raw materials substitution. Recycling refers to the reclamation of useful chemical components from wastes that would otherwise be treated or released as air emissions or water discharges, or land disposal. Quantitative or qualitative descriptions of pollution prevention, source reduction and recycling should emphasize potential risk reduction in addition to compliance with existing regulatory requirements. The EPA is interested in the information to assess <u>overall net</u> reductions in toxicity or environmental releases and exposures, not the shifting of risks to other media (e.g., air to water) or nonenvironmental areas (e.g., occupational or consumer exposure). To the extent known, information about the technology being replaced will assist EPA in its relative risk determination. In addition, information on the relative cost or performance characteristics of the PMN substance to potential alternatives may be provided.

Describe the expected net benefits, such as

- (1) an overall reduction in risk to human health or the environment;
- (2) a reduction in the generation of waste materials through recycling, source reduction or other means;
- (3) a reduction in the use of hazardous starting materials, reagents, or feedstocks;
- (4) a reduction in potential toxicity, human exposure and/or environmental release; or
- (5) the extent to which the new chemical substance may be a substitute for an existing substance that poses a greater overall risk to human health or the environment.

Information provided in this section will be taken into consideration during the review of this substance. See PMN Instructions Manual and Pollution Prevention Guidance manual for guidance and examples.

PMN Page 12

Part III -- LIST OF ATTACHMENTS

Attach continuation sheets for sections of the form, test data and other data (including physical/chemical properties and structure/activity information), and optional information after this page. Clearly identify the attachment and the section of the form to which it relates, if appropriate. Number consecutively the pages of any paper attachments. In the Number of Pages column below, enter the inclusive page numbers of each attachment for paper submissions or enter the total number of pages for each attachment for electronic submissions. Electronic attachments can be identified by filename.

Mark (X) the "Confidential" box next to any attachment name or filename you claim as confidential. Read the Instructions Manual for guidance on how to claim any information in an attachment as confidential. You must include with the sanitized copy of the notice form a sanitized version of any attachment in which you claim information as confidential.
