Subject: EnerPlus Title V Withdrawal: Belford Pad, Igneous Pad and Spiders Pad
Date: Tuesday, February 7, 2023 8:43:00 AM

Dear Kristin,

The U.S. Environmental Protection Agency Region 8 has reviewed your letters dated December 22, 2022, in which you request the withdrawal of three Part 71 Applications for 1) Belford Pad, 2) Igneous Pad and 3) Spiders Pad, whose initial Part 2's were received on 1) August 12, 2021, 2) June 30, 2021 and 3) November 18, 2021 respectively. Based on the information provided by Enerplus Resources (USA) Corporation (Enerplus) in the updated Part 2 calculations received December 22, 2022, the potential to emit (PTE) of regulated air pollutants from the facility is below all major source thresholds under the Title V Operating Permit Program at 40 CFR part 71 (Part 71).

Given this information, the 1) Belford Pad, 2) Igneous Pad and 3) Spiders Pad are no longer subject to the Part 71 requirements and all associated Part 71 compliance requirements. All previously applicable Part 71 requirements are effective through the receipt date of this email, including but not limited to emissions fees.

Regards,

Lohitaksha (Lo.) Rao M.S.
