- Jean Holmes
- Tom Steeger
- Christina Wendel
- Cheryl Sutton
- Kris Garber

HED:

- Laura Bacon
- Briana Lee
- Rosanna Louie-Juzwiak
- Tom Moriarty
- Cassi Walls

General Notes:

On February 2, 2023, members of the rodenticide team from PRD, HED, and EFED met with representatives from BASF to discuss cholecalciferol and the mitigation measures proposed in the PID. Cholecalciferol is a non-anticoagulant rodenticide. EPA encouraged BASF to include their comments and any voluntary submissions of data during the public comment period on the PID. The cholecalciferol docket (EPA-HQ-OPP-2016-0139) was open for public comment until February 13, 2023.
