

Concert Pharmaceuticals Completes Enrollment in THRIVE-AA1 Phase 3 Clinical Trial Evaluating CTP-543 for Alopecia Areata

October 25, 2021

LEXINGTON, Mass.--(BUSINESS WIRE)--Oct. 25, 2021-- [Concert Pharmaceuticals, Inc.](#) (NASDAQ: CNCE) today announced that it has completed patient enrollment in THRIVE-AA1, the first Phase 3 clinical trial to evaluate the efficacy and safety of CTP-543, an oral Janus kinase (JAK) inhibitor, in adult patients with moderate to severe alopecia areata. Topline data from THRIVE-AA1 is expected in the second quarter of 2022.

"We are very pleased to have completed enrollment in the first of our two planned pivotal registration trials. With our CTP-543 Phase 3 THRIVE-AA program advancing under Breakthrough Therapy designation, we believe that positive results from our Phase 3 trials will support submission of a New Drug Application in early 2023," said James V. Cassella, Ph.D., Chief Development Officer of Concert Pharmaceuticals. "As always, we are extremely grateful to the individuals with alopecia areata volunteering to participate in this and other clinical trials, as they are essential in the development of new treatment options for this serious medical condition."

The THRIVE-AA clinical program includes two Phase 3 studies, THRIVE-AA1 and THRIVE-AA2.

About the THRIVE-AA1 Study

THRIVE-AA1 (NCT04518995) is a randomized, double-blind, placebo-controlled clinical trial in adult patients with moderate to severe alopecia areata at sites in the U.S., Canada and Europe evaluating the regrowth of scalp hair after 24 weeks of dosing using the Severity of Alopecia Tool (SALT). Key aspects of THRIVE-AA1 include:

- Patient characteristics: adults age 18-65 years with $\geq 50\%$ hair loss are eligible for the study;
- Enrollment size: 708 patients;
- Dosing: 8 mg twice-daily or 12 mg twice-daily of CTP-543 or placebo for 24 weeks; and
- Primary endpoint: Percent of patients achieving a SALT score ≤ 20 at Week 24.

Further information about the THRIVE-AA clinical trials is available on www.clinicaltrials.gov:

- THRIVE-AA1: <https://clinicaltrials.gov/ct2/show/NCT04518995>.
- THRIVE-AA2: <https://clinicaltrials.gov/ct2/show/NCT04797650>.

About CTP-543 and Alopecia Areata

CTP-543 is an investigational oral selective inhibitor of Janus kinases JAK1 and JAK2. The U.S. Food and Drug Administration (FDA) has granted CTP-543 Breakthrough Therapy designation for the treatment of adult patients with moderate to severe alopecia areata and Fast Track designation for the treatment of alopecia areata.

Alopecia areata is an autoimmune disease in which the immune system attacks hair follicles, resulting in partial or complete loss of hair on the scalp and body. Alopecia areata may affect up to 1 million Americans at any given time¹. The scalp is the most commonly affected area, but any hair-bearing site can be affected alone or together with the scalp. Onset of the disease can occur throughout life and affects both women and men. Alopecia areata can be associated with serious psychological consequences, including anxiety and depression. There are currently no drugs approved by the FDA for the treatment of alopecia areata.

The FDA selected alopecia areata as one of eight new disease areas that it focused on under its Patient-Focused Drug Development Initiative (PFDDI) in 2016-2017. The goal of the PFDDI is to bring patient perspectives into an earlier stage of product development. Following the FDA's Patient-Focused Drug Development meeting held in September 2017 on alopecia areata, the FDA summarized the input shared by patients and patient representatives in a [Voice of the Patient](#) report. Additional information on the PFDDI is available [online](#).

About Concert

[Concert Pharmaceuticals](#) is a clinical stage biopharmaceutical company that is developing small molecule drugs that it discovered through the application of its [DCF Platform](#)[®] (deuterated chemical entity platform). Selective incorporation of deuterium into known molecules has the potential, on a case-by-case basis, to provide better pharmacokinetic or metabolic properties, thereby enhancing their clinical safety, tolerability or efficacy. Concert's lead [product candidate](#) is in late-stage development for the treatment of alopecia areata, a serious autoimmune dermatological condition. Concert is also assessing a number of earlier-stage pipeline candidates. For more information please visit www.concertpharma.com or follow us on Twitter at [@ConcertPharma](#) or on [LinkedIn](#).

Cautionary Note on Forward Looking Statements

Any statements in this press release about our future expectations, plans and prospects, including, among others, statements about our expectations regarding the development of CTP-543, the timing of availability of clinical trial data and the timing of regulatory filings, and any other statements containing the words "anticipate," "believe," "continue," "could," "estimate," "expect," "intend," "may," "plan," "potential," "predict," "project," "should," "target," "will," "would" and similar expressions, constitute forward-looking statements within the meaning of The Private Securities Litigation Reform Act of 1995. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: the uncertainties inherent in the initiation, timing and design of future clinical trials, the availability and timing of data from ongoing and future clinical trials and the results of such trials, whether preliminary results from a clinical trial will be predictive of the final results of that trial or whether

results of early clinical trials will be indicative of the results of later clinical trials, expectations for regulatory approvals and other factors discussed in the "Risk Factors" section of our most recent Quarterly Report on Form 10-Q filed with the Securities and Exchange Commission and in other filings that we make with the Securities and Exchange Commission. In addition, any forward-looking statements included in this press release represent our views only as of the date of this release and should not be relied upon as representing our views as of any subsequent date. We specifically disclaim any obligation to update any forward-looking statements included in this press release.
