Smartsheet Inc.

(Exact name of Registrant as specified in its charter)

Washington

(State or other jurisdiction of incorporation or organization)

20-2954357

(I.R.S. Employer Identification No.)

10500 NE 8th Street, Suite 1300

Bellevue, WA

(Address of principal executive offices)

98004

(Zip Code)

(844) 324-2360

Registrant's telephone number, including area code

(Former name, former address and former fiscal year, if changed since last report)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Class A common stock, no par value per share	SMAR	The New York Stock Exchange

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer", "accelerated filer", "smaller reporting company", and "emerging growth company" in Rule 12b-2 of the Exchange Act:

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

As of November 30, 2021, there were 126,752,271 shares of the registrant's Class A common stock outstanding.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements. All statements contained in this Quarterly Report on Form 10-Q other than statements of historical fact, including statements regarding our future operating results and financial position, our business strategy and plans, market growth and trends, and our objectives for future operations, are forward-looking statements. The words “believe,” “may,” “will,” “estimate,” “continue,” “anticipate,” “intend,” “expect,” “could,” “would,” “project,” “plan,” “potentially,” “likely,” and similar expressions are intended to identify forward-looking statements. We have based these forward-looking statements largely on our current expectations and projections about future events and trends, including, but not limited to, the macroeconomic impact of COVID-19, that we believe may affect our financial condition, operating results, business strategy, short-term and long-term business operations and objectives, and financial needs. These forward-looking statements are subject to a number of risks, uncertainties, and assumptions, including those described under Part II, Item 1A, “Risk Factors.” Moreover, we operate in a very competitive and rapidly changing environment. New risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the effect of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. In light of these risks, uncertainties, and assumptions, the future events and trends discussed in this Quarterly Report on Form 10-Q may not occur, and actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements.

You should not rely on forward-looking statements as predictions of future events. The events and circumstances reflected in the forward-looking statements may not be achieved or may not occur. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee that the future results, performance, or events and circumstances reflected in the forward-looking statements will be achieved or will occur. We undertake no obligation to update any of these forward-looking statements for any reason after the date of this Quarterly Report on Form 10-Q or to conform these statements to actual results or revised expectations.

SMARTSHEET INC.**Notes to Condensed Consolidated Financial Statements
(unaudited)****1. Overview and Basis of Presentation*****Description of business***

Smartsheet Inc. (the “Company,” “we,” “our”) was incorporated in the State of Washington in 2005, and is headquartered in Bellevue, Washington. The Company is the enterprise platform for dynamic work, enabling teams and organizations of all sizes to plan, capture, manage, automate, and report on work at scale. Customers access their accounts online via a web-based interface or a mobile application. Some customers also purchase the Company’s professional services, which primarily consist of consulting and training services.

Basis of presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (“GAAP”), and applicable rules and regulations of the Securities and Exchange Commission (“SEC”) regarding interim financial reporting. The condensed consolidated balance sheet as of January 31, 2021 was derived from the audited consolidated financial statements as of that date but does not include all of the information and notes required by GAAP for complete financial statements. Certain information and note disclosures normally included in the financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations. Therefore, these condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements in our Annual Report on Form 10-K for the year ended January 31, 2021, filed with the SEC on March 25, 2021.

The condensed consolidated financial statements include the results of Smartsheet Inc. and its wholly owned subsidiaries, which are located in the United States, the United Kingdom, Australia, and Germany. All intercompany balances and transactions have been eliminated upon consolidation.

In the opinion of management, the information contained herein reflects all adjustments necessary for a fair presentation of our condensed consolidated financial statements. All such adjustments are of a normal, recurring nature. The results of operations for the three and nine months ended October 31, 2021 are not necessarily indicative of results to be expected for the full year ending January 31, 2022, or for any other interim period, or for any future year.

Use of estimates

The preparation of the condensed consolidated financial statements in conformity with GAAP requires management to make estimates, judgments, and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements, and the reported amounts of revenue and expenses during the reporting periods. The Company bases its estimates on historical experience and on other assumptions that its management believes are reasonable under the circumstances. Actual results could differ from those estimates. The Company’s most significant estimates and judgments involve revenue recognition with respect to the allocation of transaction consideration for the Company’s offerings; determination of the amortization period for capitalized sales commission costs; capitalization of internal-use software development costs; valuation of assets and liabilities acquired as part of business combinations; and incremental borrowing rate estimates for operating leases, among others.

2. Summary of Significant Accounting Policies***Segment information***

The Company operates as one operating segment. The Company’s chief operating decision maker is its Chief Executive Officer, who reviews financial information for purposes of making operating decisions, assessing financial performance, and allocating resources.

SMARTSHEET INC.

Notes to Condensed Consolidated Financial Statements
(unaudited)**Restricted cash**

Restricted cash was \$0.5 million and \$0.1 million as of October 31, 2021 and January 31, 2021, respectively, primarily related to Australian employee contributions to our 2018 Employee Stock Purchase Plan.

Cash as reported on the condensed consolidated statements of cash flows includes the aggregate amounts of cash and cash equivalents and restricted cash as shown on the condensed consolidated balance sheets. Cash as reported on the condensed consolidated statements of cash flows consisted of the following (in thousands):

	October 31,	
	2021	2020
Cash and cash equivalents	\$ 439,950	\$ 420,417
Restricted cash included in prepaid expenses and other current assets	437	26
Restricted cash	17	359
Total cash, cash equivalents, and restricted cash shown in the condensed consolidated statements of cash flows	\$ 440,404	\$ 420,802

Internal-use software development costs

The Company capitalizes certain qualifying costs incurred during the application development stage in connection with the development of internal-use software. Costs related to preliminary project activities and post-implementation activities are expensed in research and development (“R&D”) as incurred. R&D expenses consist primarily of employee-related costs, hardware- and software-related costs, costs of outside services used to supplement our internal staff, and overhead allocations.

Internal-use software costs of \$2.5 million and \$3.1 million were capitalized in the three months ended October 31, 2021 and 2020, respectively, and \$6.7 million and \$7.0 million were capitalized in the nine months ended October 31, 2021 and 2020, respectively. All capitalized costs related to costs incurred during the application development stage of software development for the Company’s platform to which subscriptions are sold.

Capitalized internal-use software costs are included within property and equipment, net on the condensed consolidated balance sheets, and are amortized over the estimated useful life of the software, which is typically three years. The related amortization expense is recognized in the condensed consolidated statements of operations and comprehensive loss within the function that receives the benefit of the developed software. Amortization expense of capitalized internal-use software costs totaled \$1.4 million and \$1.0 million for the three months ended October 31, 2021 and 2020, respectively, and \$3.8 million and \$2.7 million for the nine months ended October 31, 2021 and 2020, respectively. The Company evaluates the useful lives of these assets and tests for impairment whenever events or changes in circumstances occur that could impact the recoverability of these assets.

Concentrations of risk and significant customers

Financial instruments that potentially subject the Company to concentrations of credit risk are primarily cash, cash equivalents, and accounts receivable. The Company maintains its cash accounts with financial institutions where deposits, at times, exceed the Federal Deposit Insurance Corporation limits.

No individual customer represented more than 10% of accounts receivable as of October 31, 2021 or January 31, 2021. No individual customer represented more than 10% of revenue for the three and nine months ended October 31, 2021 or 2020.

SMARTSHEET INC.

**Notes to Condensed Consolidated Financial Statements
(unaudited)*****Recent accounting pronouncements not yet adopted***

In October 2021, the Financial Accounting Standards Board issued Accounting Standards Update 2021-08, *Business Combinations-Accounting for Contract Assets and Contract Liabilities from Contracts with Customers (Topic 805)*. The new guidance requires contract assets and contract liabilities acquired in a business combination to be recognized in accordance with Accounting Standards Codification (“ASC”) Topic 606 as if the acquirer had originated the contracts. The standard is effective for fiscal years beginning after December 15, 2022, including interim periods within those fiscal years. Early adoption is permitted. The Company does not expect adoption of this standard to have a material effect on the Company’s condensed consolidated financial statements.

3. Revenue from Contracts with Customers

During the three months ended October 31, 2021 and 2020, the Company recognized \$109.0 million and \$73.5 million of subscription revenue, respectively, and \$4.3 million and \$2.4 million of professional services revenue, respectively, which were included in the deferred revenue balance as of July 31, 2021 and 2020, respectively.

During the nine months ended October 31, 2021 and 2020, the Company recognized \$196.6 million and \$141.3 million of subscription revenue, respectively, and \$4.7 million and \$3.3 million of professional services revenue, respectively, which were included in the deferred revenue balance as of January 31, 2021 and 2020, respectively.

As of October 31, 2021, approximately \$316.7 million of revenue, including amounts already invoiced and amounts contracted but not yet invoiced, was expected to be recognized from remaining performance obligations, of which \$312.3 million related to subscription services and \$4.4 million related to professional services. Approximately 90% of revenue related to total remaining performance obligations is expected to be recognized in the next 12 months.

4. Deferred Commissions

Deferred commissions were \$79.5 million as of October 31, 2021 and \$60.5 million as of January 31, 2021.

Amortization expense for deferred commissions was \$11.4 million and \$7.9 million for the three months ended October 31, 2021 and 2020, respectively, and \$31.2 million and \$22.0 million for the nine months ended October 31, 2021 and 2020, respectively. Deferred commissions are amortized over a period of three years and the amortization expense is recorded in sales and marketing on the Company’s condensed consolidated statements of operations and comprehensive loss.

SMARTSHEET INC.
**Notes to Condensed Consolidated Financial Statements

5. Net Loss Per Share

The following table presents calculations for basic and diluted net loss per share (in thousands, except per share data):

	Three Months Ended October 31,		Nine Months Ended October 31,	
	2021	2020	2021	2020
Numerator:				
Net loss	\$ (36,718)	\$ (31,971)	\$ (117,958)	\$ (86,314)
Denominator:				
Weighted-average common shares outstanding	126,118	121,203	125,157	120,006
Net loss per share, basic and diluted	\$ (0.29)	\$ (0.26)	\$ (0.94)	\$ (0.72)

The following outstanding shares of common stock equivalents (in thousands) as of the periods presented were excluded from the computation of diluted net loss per share attributable to common shareholders for the periods presented because the impact of including them would have been anti-dilutive:

	October 31,	
	2021	2020
Shares subject to outstanding common stock awards	10,926	12,422
Shares issuable pursuant to the 2018 Employee Stock Purchase Plan	43	52
Total potentially dilutive shares	10,969	12,474

6. Fair Value Measurements

Assets and liabilities recorded at fair value in the condensed consolidated financial statements are categorized based upon the level of judgment associated with the inputs used to measure their fair value. The lowest level of significant input determines the placement of the fair value measurement within the following hierarchical levels:

- *Level 1:* Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets.
- *Level 2:* Observable inputs, other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.
- *Level 3:* Unobservable inputs that are supported by little or no market activity.

Assets and liabilities measured at fair value on a recurring basis

The following tables present information about the Company's financial assets and liabilities that are measured at fair value and indicate the fair value hierarchy of the valuation inputs used (in thousands):

	October 31, 2021			
	Level 1	Level 2	Level 3	Total
Assets				
Cash equivalents:				
Money market funds	\$ 378,290	\$ —	\$ —	\$ 378,290
Total assets	\$ 378,290	\$ —	\$ —	\$ 378,290

SMARTSHEET INC.
**Notes to Condensed Consolidated Financial Statements
(unaudited)**

	January 31, 2021			
	Level 1	Level 2	Level 3	Total
Assets				
Cash equivalents:				
Money market funds	\$ 378,281	\$ —	\$ —	\$ 378,281
Total assets	\$ 378,281	\$ —	\$ —	\$ 378,281

The carrying amounts of certain financial instruments, including cash held in banks, accounts receivable, and accounts payable, approximate fair value due to their short-term maturities and are excluded from the fair value tables above.

It is the Company's policy to recognize transfers of assets and liabilities between levels of the fair value hierarchy at the end of a reporting period. The Company does not transfer out of Level 3 and into Level 2 until observable inputs become available and reliable. There were no transfers between fair value measurement levels during the three and nine months ended October 31, 2021 and 2020.

Assets and liabilities measured at fair value on a non-recurring basis

See Note 7, *Business Combinations*, and Note 8, *Goodwill and Net Intangible Assets*, of these notes to our condensed consolidated financial statements for fair value measurements of certain assets and liabilities recorded at fair value on a non-recurring basis.

7. Business Combinations
Brandfolder

On September 14, 2020, we acquired 100% of the outstanding equity of Brandfolder, Inc. ("Brandfolder"), a Delaware corporation, pursuant to an Agreement and Plan of Merger (the "Brandfolder Merger Agreement"). Combining Brandfolder capabilities with Smartsheet creates dynamic solutions that manage workflows around content and collaboration. The Company has included the financial results of Brandfolder in our condensed consolidated financial statements from the acquisition date. We incurred acquisition costs of \$1.0 million during the year ended January 31, 2021 and less than \$0.1 million during the three and nine months ended October 31, 2021. These costs included legal and accounting fees and other costs directly related to the acquisition of Brandfolder and are recognized within general and administrative expenses in the condensed consolidated statements of operations and comprehensive loss. The acquisition date fair value of the consideration transferred for Brandfolder was approximately \$152.5 million, which consisted of the following (in thousands):

	Fair Value
Cash	\$ 126,589
Class A Common Stock	25,872
Total	\$ 152,461

The fair value of the Class A Common Stock issued as part of the consideration paid for Brandfolder was determined on the basis of the closing market price of Smartsheet's common shares on the acquisition date.

Of the cash paid at closing, \$0.7 million was held in a third-party escrow account after closing to secure our indemnification rights under the Brandfolder Merger Agreement. The amount was released on December 7, 2021.

Additionally, we granted certain continuing employees of Brandfolder restricted stock awards with service conditions, which total 96,620 shares of our Class A common stock with an aggregate grant date fair value of \$4.5 million that will be accounted for as post-acquisition share-based compensation expense over the vesting period. In the three and nine months ended October 31, 2021, we incurred share-based compensation expense related to these awards of \$0.3 million and \$1.2 million, respectively.

SMARTSHEET INC.

Notes to Condensed Consolidated Financial Statements
(unaudited)

We accounted for the transaction as a business combination using the acquisition method of accounting. We allocated the purchase price to the tangible and identifiable intangible assets acquired and liabilities assumed based on their respective estimated fair values on the acquisition date. The excess purchase price consideration was recorded as goodwill, and is primarily attributable to the acquired assembled workforce and expanded market opportunities. The goodwill recognized upon acquisition is not expected to be deductible for U.S. federal income tax purposes. Fair values were determined using income and cost approaches. The fair value measurements of the intangible assets were based primarily on significant unobservable inputs and thus represent a Level 3 measurement as defined in ASC 820.

We engaged a third-party valuation specialist to aid our analysis of the fair value of the acquired intangibles. All estimates, key assumptions, and forecasts were either provided by or reviewed by us. While we chose to utilize a third-party valuation specialist for assistance, the fair value analysis and related valuations reflect the conclusions of management and not those of any third party.

The fair values assigned to assets acquired and liabilities assumed are based on management's best estimates and assumptions as of the reporting date and are considered final. The following table presents the final allocation of the purchase price at the acquisition date (in thousands):

	September 14, 2020
Cash	\$ 2,530
Accounts receivable	2,649
Contract assets	1,620
Right-of-use assets	895
Other assets	991
Intangible assets	45,270
Goodwill	109,108
Accounts payable, accrued expenses and other current liabilities	(1,411)
Deferred revenue	(4,655)
Lease liabilities, non-current	(522)
Net deferred tax liability	(4,014)
Total	<u>\$ 152,461</u>

The estimated useful lives and fair values of the identifiable intangible assets at acquisition date were as follows (dollars in thousands):

	Fair Value	Expected Useful Life	Discount Rate
Software technology	\$ 17,400	5 years	10.0 %
Customer relationships	16,590	7 years	11.0 %
Customer relationships - reseller	7,280	7 years	13.0 %
Trade name	4,000	9 years	13.8 %
Total intangible assets	<u>\$ 45,270</u>		

The related software technology amortization expense is recognized over its useful life within cost of revenues in the condensed consolidated statements of operations and comprehensive loss. The amortization expense related to customer relationships and trade name intangible assets are recognized over their useful lives within sales and marketing in our condensed consolidated statements of operations and comprehensive loss. The weighted-average amortization period of the acquired intangible assets is 6.4 years.

SMARTSHEET INC.

8. Goodwill and Net Intangible Assets

There were no changes in the carrying amount of goodwill or measurement period adjustments during the nine months ended October 31, 2021.

The following table presents the components of net intangible assets (in thousands):

	As of October 31, 2021			As of January 31, 2021		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Acquired software technology	\$ 25,400	\$ (7,925)	\$ 17,475	\$ 25,400	\$ (4,115)	\$ 21,285
Acquired customer relationships	32,150	(6,614)	25,536	32,150	(3,235)	28,915
Trade names	4,100	(595)	3,505	4,100	(233)	3,867
Patents	170	(122)	48	170	(111)	59
Domain name	13	—	13	13	—	13
Total	\$ 61,833	\$ (15,256)	\$ 46,577	\$ 61,833	\$ (7,694)	\$ 54,139

The components of acquired intangible assets as of the periods presented were as follows (dollars in thousands):

	As of October 31, 2021		As of January 31, 2021	
	Net Carrying Amount	Weighted Average Life (Years)	Net Carrying Amount	Weighted Average Life (Years)
Acquired software technology	\$ 17,475	3.6	\$ 21,285	4.3
Acquired customer relationships	25,536	5.8	28,915	6.5
Trade names	3,505	7.9	3,867	8.6
Total	\$ 46,516	5.1	\$ 54,067	5.8

Amortization expense related to intangible assets was \$2.5 million and \$1.8 million for the three months ended October 31, 2021 and 2020, respectively, and \$7.6 million and \$3.5 million for the nine months ended October 31, 2021 and 2020, respectively. As of October 31, 2021, estimated remaining amortization expense for the finite-lived intangible assets by fiscal year is as follows (in thousands):

Remainder of Fiscal 2022	\$ 2,513
Fiscal 2023	9,942
Fiscal 2024	9,942
Fiscal 2025	8,740
Fiscal 2026	7,023
Thereafter	8,404
Total	\$ 46,564

9. Share-Based Compensation

The Company has issued incentive and non-qualifying stock options to employees and non-employee directors under the 2005 Stock Option/Restricted Stock Plan, the 2015 Equity Incentive Plan (the “2015 Plan”), and the 2018 Equity Incentive Plan (the “2018 Plan”).

The Company has also issued restricted stock units (“RSUs”) to employees and non-employee directors pursuant to the 2015 Plan and the 2018 Plan.

SMARTSHEET INC.
**Notes to Condensed Consolidated Financial Statements
(unaudited)**

The Company has issued restricted stock awards (“RSAs”) to certain Brandfolder employees subject to vesting conditions. These shares were issued in a private placement transaction. As vesting of these RSAs is dependent on continuous employment, these were not considered part of the purchase price in accounting for the acquisition.

Employee stock options are granted with exercise prices at the fair value of the underlying common stock on the grant date, in general vest based on continuous employment over four years, and expire 10 years from the date of grant. Employee RSUs are measured based on the grant date fair value of the awards and in general vest based on continuous employment over four years. The RSAs are measured based on the grant date fair value of the awards and vest over a three-year period.

Stock options

The following table includes a summary of the option activity during the nine months ended October 31, 2021:

	Options Outstanding	Weighted-Average Exercise Price
Outstanding at January 31, 2021	6,533,474	\$ 12.07
Granted	325,358	63.97
Exercised	(1,413,559)	6.61
Forfeited or canceled	(207,794)	32.42
Outstanding at October 31, 2021	5,237,479	15.96
Exercisable at October 31, 2021	4,170,428	9.52

Restricted stock units

The following table includes a summary of the RSU activity during the nine months ended October 31, 2021:

	Number of Shares Underlying Outstanding RSUs	Weighted-Average Grant-Date Fair Value per RSU
Outstanding at January 31, 2021	4,765,240	\$ 42.15
Granted	3,245,060	65.94
Vested	(1,489,648)	40.98
Forfeited or canceled	(831,811)	48.19
Outstanding at October 31, 2021	5,688,841	55.15

Restricted stock awards

The following table includes a summary of the RSA activity during the nine months ended October 31, 2021:

	Number of Shares	Weighted-Average Grant-Date Fair Value per Share
Outstanding at January 31, 2021	92,318	\$ 46.93
Granted	—	—
Vested	(33,640)	46.93
Forfeited or canceled	—	—
Outstanding at October 31, 2021	58,678	46.93

2018 Employee Stock Purchase Plan

In April 2018, we adopted our 2018 Employee Stock Purchase Plan (“ESPP”). The ESPP became effective on April 26, 2018, with the effective date of our initial public offering.

SMARTSHEET INC.
**Notes to Condensed Consolidated Financial Statements
(unaudited)**

Under our ESPP, eligible employees are able to acquire shares of our Class A common stock by accumulating funds through payroll deductions of up to 15% of their compensation, subject to plan limitations. Purchases are accomplished through participation in discrete offering periods. Each offering period is six months (commencing each March 25 and September 25) and consists of one six-month purchase period, unless otherwise determined by our board of directors or our compensation committee. Beginning January 1, 2022, each offering period will commence on January 1 and July 1. This change requires an abbreviated, one-time purchase period from September 25, 2021 through December 31, 2021 to align to the new offering periods. The purchase price for shares of our common stock purchased under our ESPP is 85% of the lesser of the fair market value of our common stock on (i) the first trading day of the applicable offering period or (ii) the last trading day of the purchase period in the applicable offering period.

Shares available for issuance

The following table includes a summary of the activity during the nine months ended October 31, 2021 of our shares available for issuance under our 2018 Plan and our ESPP:

	2018 Plan	2018 ESPP
Balance at January 31, 2021	13,654,077	3,234,516
Authorized	6,163,646	1,232,730
Granted	(3,570,418)	(355,578)
Forfeited	1,039,605	—
Balance at October 31, 2021	17,286,910	4,111,668

The aggregate number of shares reserved for issuance under our ESPP will increase automatically on February 1 of each of the first 10 calendar years after the first offering date under the ESPP by the number of shares equal to 1% of the total outstanding shares of our Class A common stock and Class B common stock as of the immediately preceding January 31 (rounded to the nearest whole share) or such lesser number of shares as may be determined by our board of directors in any particular year. The aggregate number of shares issued over the term of our ESPP, subject to stock-splits, recapitalizations or similar events, may not exceed 20,400,000 shares of our Class A common stock.

As of October 31, 2021, \$2.3 million has been withheld on behalf of our employees for a future purchase under the ESPP and is recorded in accrued compensation and related benefits in the condensed consolidated balance sheet.

Share-based compensation expense

Share-based compensation expense included in the condensed consolidated statements of operations and comprehensive loss was as follows (in thousands):

	Three Months Ended October 31,		Nine Months Ended October 31,	
	2021	2020	2021	2020
Cost of subscription revenue	\$ 1,629	\$ 1,123	\$ 4,726	\$ 3,131
Cost of professional services revenue	1,034	576	2,648	1,575
Research and development	10,095	6,509	28,426	17,836
Sales and marketing	9,595	6,512	28,566	18,356
General and administrative	5,707	3,833	16,186	10,233
Total share-based compensation expense*	\$ 28,060	\$ 18,553	\$ 80,552	\$ 51,131

*Includes amortization related to share-based compensation that was capitalized in internal-use software and other assets in previous periods.

SMARTSHEET INC.
**Notes to Condensed Consolidated Financial Statements
(unaudited)**
10. Income Taxes

The provision for income taxes for interim tax periods is generally determined using an estimate of the Company's annual effective tax rate, excluding jurisdictions for which no tax benefit can be recognized due to valuation allowances, and adjusted for discrete tax items in the period. Each quarter the Company updates its estimate of the annual effective tax rate and makes a cumulative adjustment if the estimated annual tax rate has changed.

The Company's effective tax rate generally differs from the U.S. federal statutory tax rate primarily due to a valuation allowance related to the Company's U.S. federal, state, and certain foreign deferred tax assets partially offset by the windfall from share-based compensation tax deductions.

The Company recorded a provision for income taxes of \$0.1 million and \$0.2 million for the three and nine months ended October 31, 2021, respectively, primarily attributable to income taxes in foreign jurisdictions and state income taxes. We recorded a benefit for income taxes of \$3.9 million and \$3.8 million for the three and nine months ended October 31, 2020, respectively, primarily attributable to a \$4.0 million release of the Company's federal and state valuation allowance on deferred tax assets as a result of the deferred tax liabilities established for definite lived intangible assets from the acquisition of Brandfolder, partially offset by income taxes in foreign jurisdictions and state income taxes.

On March 27, 2020, the Coronavirus Aid, Relief and Economic Security Act (the "CARES Act") was signed into law. The CARES Act provides numerous tax provisions and other stimulus measures including temporary changes regarding the prior and future utilization of net operating losses, temporary changes to the prior and future limitations on interest deductions, temporary suspension of certain payment requirements for the employer portion of Social Security taxes, technical corrections from prior tax legislation for tax depreciation of certain qualified improvement property, and the creation of certain refundable employee retention credits. The Company elected to defer the employer portion of Social Security taxes and recorded the expense as incurred. As of October 31, 2021, these taxes totaled \$7.8 million, of which \$3.9 million was recorded in accrued compensation and related benefits and \$3.9 million was recorded in other long-term liabilities on our condensed consolidated balance sheet. The deferral of these taxes does not impact the Company's condensed consolidated statements of operations and comprehensive loss.

11. Leases

The Company has operating leases primarily related to corporate offices and certain equipment. Our leases have remaining lease terms of less than 1 year to 8 years, some of which include options to extend the leases for up to 5 years.

The components of lease expense recorded in the condensed consolidated statements of operations and comprehensive loss were as follows (in thousands):

	Three Months Ended October 31,		Nine Months Ended October 31,	
	2021	2020	2021	2020
Operating lease cost	\$ 4,768	\$ 3,732	\$ 13,966	\$ 11,134
Finance lease cost:				
Amortization of assets	—	976	—	3,093
Interest on lease liabilities	—	30	—	114
Short-term lease cost	7	343	357	1,070
Variable lease cost	745	629	2,089	1,879
Total lease costs	\$ 5,520	\$ 5,710	\$ 16,412	\$ 17,290

SMARTSHEET INC.
**Notes to Condensed Consolidated Financial Statements
(unaudited)**

Other information related to leases was as follows (dollars in thousands):

	Nine Months Ended October 31,	
	2021	2020
Supplemental cash flow information:		
Cash paid for amounts included in the measurement of lease liabilities:		
Operating cash flows from operating leases*	\$ 4,634	\$ 10,386
Operating cash flows from finance leases	\$ —	\$ 114
Financing cash flows from finance leases	\$ —	\$ 1,973
Right-of-use assets obtained in exchange for lease obligations:		
Operating leases	\$ 742	\$ 13,965
Finance leases	\$ —	\$ —
Weighted-average remaining lease term (in years):		
Operating leases	5.5	5.7
Finance leases	—	—
Weighted-average discount rate:		
Operating leases	5.0 %	5.5 %
Finance leases	— %	4.5 %

*Includes cash paid for lease liability accretion of \$3.2 million and \$2.8 million for the nine months ended October 31, 2021 and 2020, respectively.

As of October 31, 2021, remaining maturities of lease liabilities were as follows (in thousands):

	Operating Leases
Remainder of Fiscal 2022	\$ 4,550
Fiscal 2023	18,288
Fiscal 2024	17,716
Fiscal 2025	15,392
Fiscal 2026	13,348
Thereafter	21,547
Total lease payments	90,841
Less: imputed interest	(11,058)
Total	\$ 79,783

12. Commitments and Contingencies
Purchase Commitments

In September 2021, the Company entered into a four-year commitment with a cloud-based hosting service provider for \$190.0 million. This commitment replaced our four-year commitment for \$75.0 million disclosed in our audited consolidated financial statements as of and for the year ended January 31, 2021. As of October 31, 2021, \$186.3 million remained unpaid, \$35.0 million of upfront payments are to be paid in fiscal year 2023, \$44.3 million of upfront payments are to be paid in fiscal year 2024, \$57.8 million of upfront payments are to be paid in fiscal year 2025, and \$40.5 million of upfront payments are to be paid in fiscal year 2026. Total remaining payments will exceed upfront payments based on on-demand usage.

SMARTSHEET INC.
**Notes to Condensed Consolidated Financial Statements
(unaudited)**

In December 2020, the Company entered into a three-year commitment with a separate cloud-based hosting service provider for \$3.2 million. As of October 31, 2021, \$2.1 million remained unpaid. Payments are to be made monthly based on usage through fiscal year 2024.

Legal matters

An indemnification claim has been made against the Company by a former director, Ryan Hinkle, and Insight Venture Partners VII, L.P. and certain affiliated entities that are former shareholders of the Company (together with Hinkle, the “IVP Parties”), relating to a purported class action litigation in which the IVP Parties are defendants. On January 29, 2021, the IVP Parties filed a complaint against the Company in the Superior Court of Washington, King County, for the advancement of legal fees, costs, and expenses incurred in defending the purported class action claim. We have recorded a liability of \$10.0 million as of October 31, 2021 in connection with these lawsuits, which is classified in general and administrative expenses in our condensed consolidated statements of operations and comprehensive loss. On November 18, 2021, the Company agreed to pay \$10.0 million as part of an overall settlement of these matters.

From time-to-time, in the normal course of business, the Company may be subject to various other legal matters such as threatened or pending claims or proceedings. Although management currently believes that resolution of such matters, individually and in the aggregate, will not have a material impact on our financial position, results of operations, or cash flows, these matters are subject to inherent uncertainties, and management’s view of these matters may change in the future.

13. Geographic Information
Revenue

Revenue by geographic location is determined by the location of the Company’s customers. The following table sets forth revenue (in thousands) by geographic area:

	Three Months Ended October 31,		Nine Months Ended October 31,	
	2021	2020	2021	2020
United States	\$ 119,369	\$ 80,826	\$ 323,921	\$ 224,050
EMEA	13,438	9,379	37,062	26,903
Asia Pacific	5,553	4,025	15,195	11,068
Americas other than the United States	6,268	4,703	17,268	13,621
Total	<u>\$ 144,628</u>	<u>\$ 98,933</u>	<u>\$ 393,446</u>	<u>\$ 275,642</u>

No individual country other than the United States contributed more than 10% of total revenue during any of the periods presented.

Long-lived assets

Long-lived assets by geographic location is based on the location of the legal entity that owns the asset. The following table sets forth long-lived assets by geographic area (in thousands):

	October 31, 2021	January 31, 2021
United States	\$ 81,998	\$ 85,740
EMEA	4,262	5,007
Asia Pacific	1,476	2,020
Total	<u>\$ 87,736</u>	<u>\$ 92,767</u>

The table above includes property and equipment and operating lease right-of-use assets and excludes capitalized internal-use software costs and intangible assets.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read together with our unaudited condensed consolidated financial statements and related notes included elsewhere in this Quarterly Report on Form 10-Q and our Annual Report on Form 10-K for the year ended January 31, 2021. This discussion contains forward-looking statements based upon current expectations that involve risks and uncertainties. These statements are often identified by the use of words such as “may,” “will,” “expect,” “believe,” “anticipate,” “intend,” “could,” “estimate,” or “continue,” and similar expressions or variations. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of various factors, including but not limited to those discussed in the section titled “Risk Factors” and in other parts of this Quarterly Report on Form 10-Q. Our fiscal year ends January 31.

Overview

Smartsheet is the enterprise platform for dynamic work. We empower anyone to drive meaningful change. Our leading cloud-based platform enables teams and organizations to plan, capture, manage, automate, and report on work at scale, resulting in more efficient processes and better business outcomes. We were founded in 2005 with a vision to build a universal application for work management that does not require coding capabilities.

Unstructured or dynamic work is work that has historically been managed using a combination of email, spreadsheets, whiteboards, phone calls, and in-person meetings to communicate with team members and complete projects and processes. It is frequently changing, often ad-hoc, and highly reactive to new information. Our platform helps manage this kind of unstructured work and serves as a single source of truth across work processes, fostering accountability and engagement within teams, leading to more efficient decision-making and better business outcomes.

We generate revenue primarily from the sale of subscriptions to our cloud-based platform. For subscriptions, customers select the plan that meets their needs and can begin using Smartsheet within minutes. We offer three Smartsheet subscription levels to new customers: Pro, Business, and Enterprise, the pricing for which varies by the capabilities provided. Customers can also purchase Smartsheet Advance, which provides components that, in combination, enable customers to implement solutions for a specific use case or for large scale projects, initiatives, or processes. Some components are available for standalone purchase, including Connectors, which provide data integration and automation to third-party applications, and premium applications such as Dynamic View, Data Shuttle, Control Center, and Bridge. Additional subscriptions that can be integrated with our cloud-based platform include Resource Management by Smartsheet, a resource planning solution that helps businesses find and schedule appropriate project teams, track and manage time, and forecast hiring needs; and Brandfolder, a digital asset management platform that enables workers to intuitively store, customize, and share creative assets. Professional services are offered to help customers create and administer solutions for specific use cases and for training purposes.

Customers can begin using our platform by purchasing a subscription directly from our website or through our sales force, starting a free trial, or working as a collaborator on a project.

Impact of COVID-19

In December 2019, a novel coronavirus (“COVID-19”) was first reported. In January 2020, the World Health Organization (“WHO”) declared COVID-19 a Public Health Emergency of International Concern, and in March 2020, the WHO characterized it as a pandemic.

In response to reports of COVID-19, our executive leadership team and human resources leadership team began an ongoing monitoring of the COVID-19 situation. Beginning in early February 2020, and aligning with guidance provided by government agencies and international organizations, we took measures to restrict travel, institute a broad work-from-home policy, and limit visitors and office services. By mid-March 2020, and again aligning with guidance provided by government agencies and international organizations, we restricted all travel, mandated a work-from-home policy across our global workforce, fully closed our offices to all visitors and services, and migrated all customer-facing activities to virtual formats. As of October 31, 2021, our offices have reopened at limited capacity and in accordance with applicable regional guidance. We continue to prioritize employee and community health and safety.

During the nine months ended October 31, 2021, purchasing decisions of certain customers continued to be impacted and sometimes deferred due to uncertainties around COVID-19. As long as the global economic environment is influenced by the COVID-19 pandemic, our existing customers may be hesitant to expand their use of Smartsheet and in certain industries may be more likely to churn.

The broader implications of the COVID-19 pandemic on our business, operating results, and overall financial performance remain uncertain and depend on various indicators, including vaccine availability and distribution, emergence and prevalence of variants, duration and severity of spread in global communities, impact on our customers and our sales cycles, impact on our partners and employees, and impact on the economic environment and financial markets, all of which are uncertain and cannot be predicted. We expect that our customers and potential customers in some verticals may take actions to reduce operating expenses and moderate cash flows, including by delaying some purchase decisions and requesting extended billing and payment terms.

We will continue to actively monitor the COVID-19 situation and may take further actions that alter our business operations, as may be required by federal, state, or local authorities, or that we determine are in the best interests of our employees, customers, partners, suppliers, and shareholders.

Key Business Metrics

We review the following key business metrics to evaluate our business, measure our performance, identify trends affecting our business, formulate business plans, and make strategic decisions.

	As of October 31,	
	2021	2020
Average annualized contract value per domain-based customer	\$ 6,368	\$ 4,665
Dollar-based net retention rate for all customers (trailing 12 months)	131 %	125 %
Customers with annualized contract values (“ACV”) of \$5 thousand or more	14,228	11,172
Customers with ACV of \$50 thousand or more	2,078	1,331
Customers with ACV of \$100 thousand or more	868	504

Average ACV per domain-based customer

We use ACV per domain-based customer to measure customer commitment to our platform and sales force productivity. We define average ACV per domain-based customer as total outstanding ACV for domain-based subscriptions as of the end of the reporting period divided by the number of domain-based customers as of the same date. We define domain-based customers as organizations with a unique email domain name.

Dollar-based net retention rate

We calculate dollar-based net retention rate as of a period end by starting with the ACV from the cohort of all customers as of the 12 months prior to such period end (“Prior Period ACV”). We then calculate the ACV from these same customers as of the current period end (“Current Period ACV”). Current Period ACV includes any upsells and is net of contraction or attrition over the trailing 12 months, but excludes subscription revenue from new customers in the current period. We then divide the total Current Period ACV by the total Prior Period ACV to arrive at the dollar-based net retention rate. Any ACV obtained through merger and acquisition transactions does not affect the dollar-based net retention rate until one year from the date on which the transaction closed.

The dollar-based net retention rate is used by us to evaluate the long-term value of our customer relationships and is driven by our ability to retain and expand the subscription revenue generated from our existing customers.

Components of Results of Operations

Revenue

Subscription revenue

Subscription revenue primarily consists of fees from customers for access to our cloud-based platform. We recognize subscription revenue ratably over the term of the subscription period beginning on the date access to our platform is provided, as no implementation work is required, assuming all other revenue recognition criteria have been met.

Professional services revenue

Professional services revenue primarily includes fees for consulting and training services. Our consulting services consist of platform configuration and use case optimization, and are primarily invoiced on a time and materials basis, with some smaller engagements being provided for a fixed fee. We recognize revenue for our consulting services as those services are delivered. Our training services are delivered either remotely or at the customer site. Training services are charged for on a fixed-fee basis and we recognize revenue as the training program is delivered. Our consulting and training services are generally considered to be distinct, for accounting purposes, and we recognize revenue as services are performed or upon completion of work.

Cost of revenue and gross margin

Cost of subscription revenue

Cost of subscription revenue primarily consists of expenses related to hosting our services and providing support, including employee-related costs such as salaries, wages, and related benefits, third-party hosting fees, amortization of acquisition-related intangibles, allocated overhead, software-related costs, payment processing fees, costs of outside services to supplement our internal teams, costs of Connectors between Smartsheet and third-party applications, and costs related to technical support services.

Cost of professional services revenue

Cost of professional services revenue consists primarily of employee-related costs for our consulting and training teams, costs of outside services to supplement our internal teams, allocated overhead, software-related costs, and billable expenses.

Gross margin

Gross margin is calculated as gross profit expressed as a percentage of total revenue. Our gross margin may fluctuate from period to period as our revenue mix fluctuates, and as a result of the timing and amount of investments to expand our hosting capacity, our continued building of application support and professional services teams, and increased share-based compensation expense. As we continue to build our technology to extend to newer markets and geographies, we expect our gross margin to decline moderately.

Operating expenses

Research and development

Research and development expenses consist primarily of employee-related costs, software-related costs, allocated overhead, and costs of outside services used to supplement our internal staff. We consider continued investment in our development talent and our platform to be important for our growth. We expect our research and development expenses to increase in absolute dollars as our business grows and to gradually decrease over the long-term as a percentage of total revenue due to economies of scale.

Sales and marketing

Sales and marketing expenses consist primarily of employee-related costs, costs of general marketing and promotional activities, allocated overhead, software-related costs, travel-related expenses, amortization of acquisition-related intangibles, and costs of outside services used to supplement our internal staff. Commissions earned by our sales force that are incremental to each customer contract, along with related fringe benefits and taxes, are capitalized and amortized over an estimated useful life of three years. We expect that sales and marketing expenses will increase in absolute dollars as we continue to invest in advertising and marketing initiatives and expect more of our future revenue to come from our inside and direct sales models, rather than through digital self-service sales. We expect sales and marketing costs to gradually decrease over the long-term as a percentage of total revenue due to economies of scale.

General and administrative

General and administrative expenses consist primarily of employee-related costs for accounting, finance, legal, IT, and human resources personnel. In addition, general and administrative expenses include non-personnel costs, such as allocated overhead, software-related costs, costs of outside services to supplement our internal staff, certain tax, license and insurance-related expenses, accounting and legal costs, bad debt expense, bank charges, and travel-related expenses. We expect our general and administrative expenses to increase in absolute dollars as our business grows, and to gradually decrease over the long term as a percentage of total revenue due to economies of scale.

Interest income

Interest income consists of interest income from our investment holdings. Due to the current near-zero interest rate environment, consistent with the three and nine months ended October 31, 2021, we expect our interest income in the near term to remain insignificant.

Other income (expense), net

Other income (expense), net primarily consists of foreign exchange gains and losses, interest expense, and other non-operating income and expenses.

Income tax provision (benefit)

The income tax provision consists primarily of income taxes in foreign jurisdictions and state income taxes. We maintain a valuation allowance on our U.S. federal, state and certain foreign deferred tax assets as we have concluded that it is not more likely than not that the deferred assets will be realized.

Results of Operations

The following tables set forth our results of operations for the periods presented and as a percentage of our total revenue for those periods:

	Three Months Ended October 31,		Nine Months Ended October 31,	
	2021	2020	2021	2020
(in thousands)				
Revenue				
Subscription	\$ 132,597	\$ 90,890	\$ 361,720	\$ 251,675

Comparison of the three months ended October 31, 2021 and 2020

Revenue

	Three Months Ended October 31,		Change	
	2021	2020	Amount	%
(dollars in thousands)				
Revenue				
Subscription	\$ 132,597	\$ 90,890	\$ 41,707	46 %
Professional services	12,031	8,043	3,988	50 %
Total revenue	\$ 144,628	\$ 98,933	\$ 45,695	46 %
Percentage of total revenue				
Subscription revenue	92 %	92 %		
Professional services revenue	8 %	8 %		

During the three months ended October 31, 2021, as compared to the three months ended October 31, 2020, total subscription revenue increased by \$41.7 million, or 46%. The increase in revenue between periods was driven by an increase in sales of user-based subscription plans, which contributed \$25.4 million of the increase, followed by an increase in sales of pre-configured capabilities, which contributed \$16.3 million of the increase.

The increase in professional services revenue was primarily driven by an increase in demand for our consulting and training services.

Cost of revenue, gross profit, and gross margin

	Three Months Ended October 31,		Change	
	2021	2020	Amount	%
(dollars in thousands)				
Cost of revenue				
Subscription	\$ 18,253	\$ 17,417	\$ 836	5 %
Professional services	11,162	6,313	4,849	77 %
Total cost of revenue	\$ 29,415	\$ 23,730	\$ 5,685	24 %
Gross profit	\$ 115,213	\$ 75,203	\$ 40,010	53 %
Gross margin				
Subscription	86 %	81 %		
Professional services	7 %	22 %		
Total gross margin	80 %	76 %		

Cost of subscription revenue increased \$0.8 million, or 5%, for the three months ended October 31, 2021 compared to the three months ended October 31, 2020. The increase was primarily due to an increase of \$0.6 million in allocated overhead, an increase of \$0.4 million in costs of outside services to supplement our internal staff, an increase of \$0.3 million in employee-related expenses due to increased headcount, of which \$0.3 million was related to share-based compensation expense, an increase of \$0.3 million in amortization of acquisition-related intangibles, an increase of \$0.2 million each in software-related costs and credit card processing fees, and an increase of \$0.1 million in costs of Connectors with third-party applications. This was partially offset by a decrease of \$1.3 million in hosting fees, which included the depreciation of data center equipment in the prior period.

Our gross margin for subscription revenue was 86% and 81% for the three months ended October 31, 2021 and 2020, respectively. The increase in gross margin during the three months ended October 31, 2021 was driven primarily by an increase in subscription revenue that outpaced the related increase in personnel expenses and a decrease in costs related to hosting our platform, which included the depreciation of data center equipment in the prior period.

Cost of professional services increased \$4.8 million, or 77%, for the three months ended October 31, 2021 compared to the three months ended October 31, 2020. The increase was primarily due to an increase of \$2.7 million in employee-related expenses, of which \$0.5 million was related to share-based compensation expense, an increase of \$1.8 million in costs of outside services to supplement our internal staff, an increase of \$0.2 million in allocated overhead, and an increase of \$0.1 million in software-related costs.

Our gross margin for professional services was 7% and 22% for the three months ended October 31, 2021 and 2020, respectively. The decrease in gross margin during the three months ended October 31, 2021 was driven primarily by an increase in personnel expenses that outpaced the related increase in professional services revenue and increased utilization of third-party service providers to supplement our internal staff in delivering revenue-generating consulting arrangements.

Research and development expenses

	Three Months Ended October 31,		Change	
	2021	2020	Amount	%
(dollars in thousands)				
Research and development	\$ 41,151	\$ 32,369	\$ 8,782	27 %
Percentage of total revenue	28 %	33 %		

Research and development expenses increased \$8.8 million, or 27%, for the three months ended October 31, 2021 compared to the three months ended October 31, 2020. The increase was primarily due to an increase of \$6.6 million in employee-related expenses due to increased headcount, of which \$3.6 million was related to share-based compensation expense, an increase of \$1.7 million in software-related costs, and an increase of \$0.4 million in costs of outside services to supplement our internal staff.

Sales and marketing expenses

	Three Months Ended October 31,		Change	
	2021	2020	Amount	%
	(dollars in thousands)			
Sales and marketing	\$ 83,114	\$ 59,197	\$ 23,917	40 %
Percentage of total revenue	57 %	60 %		

Sales and marketing expenses increased \$23.9 million, or 40%, for the three months ended October 31, 2021 compared to the three months ended October 31, 2020. The increase was primarily due to an increase of \$14.0 million in employee-related expenses due to increased headcount, of which \$3.1 million related to share-based compensation expense, an increase of \$7.1 million in costs related to general marketing and advertising efforts, an increase of \$1.0 million in software-related costs, an increase of \$0.5 million each in costs of outside services used to supplement our internal staff, amortization of acquisition-related intangibles, and allocated overhead costs, and a \$0.3 million increase in travel-related costs.

General and administrative expenses

	Three Months Ended October 31,		Change	
	2021	2020	Amount	%
	(dollars in thousands)			
General and administrative	\$ 26,928	\$ 19,530	\$ 7,398	38 %
Percentage of total revenue	19 %	20 %		

General and administrative expenses increased \$7.4 million, or 38%, for the three months ended October 31, 2021 compared to the three months ended October 31, 2020. This was driven by an increase of \$4.1 million in employee-related expenses due to increased headcount, of which \$1.9 million related to share-based compensation expense, an increase of \$2.3 million in legal costs, which primarily related to an accrual for an indemnification claim, an increase of \$0.7 million in costs of outside services to supplement our internal staff, an increase of \$0.4 million in software-related costs, an increase of \$0.3 million in allocated overhead costs, and an increase of \$0.3 million in taxes, licenses and insurance. This was partially offset by a decrease of \$0.5 million in accounting, internal control, and tax-related costs, and a decrease of \$0.2 million in bad debt expense.

Other income (expense), net

	Three Months Ended October 31,		Change	
	2021	2020	Amount	%
	(dollars in thousands)			
Other income (expense), net	\$ (651)	\$ (25)	\$ (626)	*N/M
Percentage of total revenue	— %	— %		
*N/M = Not meaningful				

For the three months ended October 31, 2021 compared to the three months ended October 31, 2020, the change in other income (expense), net was driven by an increase of \$0.6 million in other expense, which primarily related to a \$0.5 million impairment of an investment, and an increase of \$0.1 million in realized foreign currency loss. This was partially offset by an increase of \$0.2 million in unrealized foreign currency gain.

Income tax provision (benefit)

	Three Months Ended October 31,		Change	
	2021	2020	Amount	%
	(dollars in thousands)			
Income tax provision (benefit)	\$ 99	\$ (3,933)	\$ 4,032	*N/M
Percentage of total revenue	— %	(4)%		
<i>*N/M = Not meaningful</i>				

For the three months ended October 31, 2021 compared to the three months ended October 31, 2020, the change in income tax provision (benefit) was primarily driven by a \$4.0 million partial release of our valuation allowance in the prior period related to the purchase accounting for the acquisition of Brandfolder.

Comparison of the nine months ended October 31, 2021 and 2020

Revenue

	Nine Months Ended October 31,		Change	
	2021	2020	Amount	%
	(dollars in thousands)			
Revenue				
Subscription	\$ 361,720	\$ 251,675	\$ 110,045	44 %
Professional services	31,726	23,967	7,759	32 %
Total revenue	\$ 393,446	\$ 275,642	\$ 117,804	43 %
Percentage of total revenue				
Subscription revenue	92 %	91 %		
Professional services revenue	8 %	9 %		

During the nine months ended October 31, 2021, as compared to the nine months ended October 31, 2020, total subscription revenue increased by \$110.0 million, or 44%. The increase in revenue between periods was driven by an increase in sales of user-based subscription plans, which contributed \$66.2 million of the increase, followed by an increase in sales of pre-configured capabilities, which contributed \$43.8 million of the increase.

The increase in professional services revenue was primarily driven by an increase in demand for our consulting and training services.

Cost of revenue, gross profit, and gross margin

	Nine Months Ended October 31,		Change	
	2021	2020	Amount	%
(dollars in thousands)				
Cost of revenue				
Subscription	\$ 55,155	\$ 41,894	\$ 13,261	32 %
Professional services	28,298	19,295	9,003	47 %
Total cost of revenue	\$ 83,453	\$ 61,189	\$ 22,264	36 %
Gross profit	\$ 309,993	\$ 214,453	\$ 95,540	45 %
Gross margin				
Subscription	85 %	83 %		
Professional services	11 %	19 %		
Total gross margin	79 %	78 %		

Cost of subscription revenue increased \$13.3 million, or 32%, for the nine months ended October 31, 2021 compared to the nine months ended October 31, 2020. The increase was primarily due to an increase of \$3.9 million in employee-related expenses due to increased headcount, of which \$1.3 million was related to share-based compensation expense, an increase of \$2.2 million in hosting fees, an increase of \$1.7 million each in costs of outside services to supplement our internal staff and amortization of acquisition-related intangibles, an increase of \$1.4 million in allocated overhead costs, an increase of \$1.0 million in software-related costs, an increase of \$0.7 million in costs of Connectors with third-party applications, an increase of \$0.6 million in credit card processing fees, and an increase of \$0.1 million in costs related to technical support services.

Our gross margin for subscription revenue was 85% and 83% for the nine months ended October 31, 2021 and 2020, respectively. The increase in gross margin during the nine months ended October 31, 2021 was driven primarily by an increase in subscription revenue that outpaced the related increase in personnel expenses. This was partially offset an increase in costs related to hosting our platform and technical support services.

Cost of professional services increased \$9.0 million, or 47%, for the nine months ended October 31, 2021 compared to the nine months ended October 31, 2020. The increase was primarily due to an increase of \$5.9 million in employee-related expenses, of which \$1.1 million was related to share-based compensation expense, an increase of \$2.7 million in costs of outside services to supplement our internal staff, an increase of \$0.3 million in allocated overhead costs, and an increase of \$0.2 million in software-related costs. This was partially offset by a decrease of \$0.1 million in billable expenses.

Our gross margin for professional services revenue was 11% and 19% for the nine months ended October 31, 2021 and 2020, respectively. The decrease in gross margin during the nine months ended October 31, 2021 was driven primarily by an increase in personnel expenses that outpaced the related increase in professional services revenue and increased utilization of third-party service providers to supplement our internal staff in delivering revenue-generating consulting arrangements.

Research and development expenses

	Nine Months Ended October 31,		Change	
	2021	2020	Amount	%
	(dollars in thousands)			
Research and development	\$ 116,704	\$ 86,449	\$ 30,255	35 %
Percentage of total revenue	30 %	31 %		

Research and development expenses increased \$30.3 million, or 35%, for the nine months ended October 31, 2021 compared to the nine months ended October 31, 2020. The increase was primarily due to an increase of \$26.7 million in employee-related expenses due to increased headcount, of which \$10.6 million was related to share-based compensation expense, and an increase of \$4.2 million in software-related costs. This was partially offset by a decrease of \$0.5 million in costs of outside services to supplement our internal staff and a decrease of \$0.1 million in allocated overhead costs.

Sales and marketing expenses

	Nine Months Ended October 31,		Change	
	2021	2020	Amount	%
	(dollars in thousands)			
Sales and marketing	\$ 231,613	\$ 167,759	\$ 63,854	38 %
Percentage of total revenue	59 %	61 %		

Sales and marketing expenses increased \$63.9 million, or 38%, for the nine months ended October 31, 2021 compared to the nine months ended October 31, 2020. The increase was primarily due to an increase of \$44.1 million in employee-related expenses due to increased headcount, of which \$10.0 million related to share-based compensation expense, an increase of \$13.5 million in marketing costs related to our brand advertising campaign and other marketing initiatives, an increase of \$2.4 million in amortization of acquisition-related intangibles, an increase of \$2.0 million in software-related costs, an increase of \$1.3 million in allocated overhead costs, and an increase of \$1.0 million in costs of outside services used to supplement our internal staff. This was partially offset by a decrease of \$0.5 million in travel-related costs.

General and administrative expenses

	Nine Months Ended October 31,		Change	
	2021	2020	Amount	%
	(dollars in thousands)			
General and administrative	\$ 79,567	\$ 51,672	\$ 27,895	54 %
Percentage of total revenue	20 %	19 %		

General and administrative expenses increased \$27.9 million, or 54%, for the nine months ended October 31, 2021 compared to the nine months ended October 31, 2020. The increase was primarily due to an increase of \$15.2 million in employee-related expenses due to increased headcount, of which \$5.9 million related to share-based compensation expense, an increase of \$9.9 million in legal costs, which primarily related to a \$10.0 million accrual for an indemnification claim, an increase of \$1.4 million in costs of outside services used to supplement our internal staff, an increase of \$1.2 million in taxes, licenses, and insurance, an increase of \$1.0 million in software-related costs, an increase of \$0.9 million in allocated overhead costs, and an increase of \$0.5 million in bad debt expense. This was partially offset by a decrease of \$2.1 million in accounting, internal control, and tax-related costs and a decrease of \$0.1 million in bank charges.

Interest income

	Nine Months Ended October 31,		Change	
	2021	2020	Amount	%
	(dollars in thousands)			
Interest income	\$ 35	\$ 1,433	\$ (1,398)	(98)%
Percentage of total revenue	— %	1 %		

For the nine months ended October 31, 2021 compared to the nine months ended October 31, 2020, the decrease in interest income of \$1.4 million was driven by a lower monetary value of cash and cash equivalents held in interest-bearing accounts and instruments and the decline in interest rates year over year.

Other income (expense), net

Percentage of total revenue	— %	— %		

*N/M = Not meaningful

For the nine months ended October 31, 2021 compared to the nine months ended October 31, 2020, the change in other income (expense), net was driven by an increase in other income of \$1.0 million due to an acquisition-related gain contingency that was resolved during the nine months ended October 31, 2021. This was partially offset by an increase of \$0.6 million in other expense, which primarily related to a \$0.5 million impairment of an investment, and an increase of \$0.2 million in realized foreign currency loss.

Income tax provision (benefit)

	Nine Months Ended October 31,		Change	
	2021	2020	Amount	%
	(dollars in thousands)			
Income tax provision (benefit)	\$ 214	\$ (3,785)	\$ 3,999	*N/M
Percentage of total revenue	— %	(1)%		

*N/M = Not meaningful

For the nine months ended October 31, 2021 compared to the nine months ended October 31, 2020, the change in income tax provision (benefit) was primarily driven by a \$4.0 million partial release of our valuation allowance in the prior period related to the purchase accounting for the acquisition of Brandfolder.

Non-GAAP Financial Measures

In addition to our results determined in accordance with generally accepted accounting principles in the United States (“GAAP”), we believe the following non-GAAP financial measures are useful in evaluating our operating performance. We use the below referenced non-GAAP financial measures, collectively, to evaluate our ongoing operations and for internal planning and forecasting purposes. We believe that non-GAAP financial measures, when taken collectively, may be helpful to investors because they provide consistency and comparability with past financial performance, and assist in comparisons with other companies, some of which use similar non-GAAP financial measures to supplement their GAAP results. The non-GAAP financial measures are presented for supplemental informational purposes only, should not be considered a substitute for financial measures presented in accordance with GAAP, and may be different from similarly-titled non-GAAP measures used by other companies. A reconciliation is provided below for each non-GAAP financial measure to the most directly comparable financial measure stated in accordance with GAAP. Investors are encouraged to review the related GAAP financial measures and the reconciliation of these non-GAAP financial measures to their most directly comparable GAAP financial measures.

Limitations of non-GAAP financial measures

Our non-GAAP financial measures have limitations as analytical tools and you should not consider them in isolation or as a substitute for an analysis of our results under GAAP. There are a number of limitations related to the use of these non-GAAP financial measures versus their nearest GAAP equivalents. First, free cash flow and calculated billings are not substitutes for net cash used in operating activities and total revenue, respectively. Similarly, non-GAAP gross profit and non-GAAP operating loss are not substitutes for gross profit and operating loss, respectively. Second, other companies may calculate similar non-GAAP financial measures differently or may use other measures as tools for comparison. Additionally, the utility of free cash flow as a measure of our financial performance and liquidity is further limited as it does not represent the total increase or decrease in our cash balance for a given period. Furthermore, as calculated billings are affected by a combination of factors, including the timing of sales, the mix of monthly and annual subscriptions sold, and the relative duration of subscriptions sold, and each of these elements has unique characteristics in the relationship between calculated billings and total revenue, our calculated billings activity is not closely correlated to revenue except over longer periods of time.

Non-GAAP gross profit and non-GAAP gross margin

We define non-GAAP gross profit as gross profit adjusted for share-based compensation expense, amortization of acquisition-related intangible assets, and one-time acquisition costs. Non-GAAP gross margin represents non-GAAP gross profit as a percentage of total revenue.

	Three Months Ended October 31,		Nine Months Ended October 31,	
	2021	2020	2021	2020
	(dollars in thousands)			
Gross profit	\$ 115,213	\$ 75,203	\$ 309,993	\$ 214,453
Add:				
Share-based compensation expense*	2,663	1,699	7,374	4,706
Amortization of acquisition-related intangible assets	1,270	1,000	3,810	2,111
Non-GAAP gross profit	\$ 119,146	\$ 77,902	\$ 321,177	\$ 221,270
Gross margin	80 %	76 %	79 %	78 %
Non-GAAP gross margin	82 %	79 %	82 %	80 %

*Includes amortization related to share-based compensation that was capitalized in internal-use software and other assets in previous periods.

Non-GAAP operating loss and non-GAAP operating margin

We define non-GAAP operating loss as loss from operations adjusted for share-based compensation expense, amortization of acquisition-related intangible assets, one-time acquisition costs, and litigation expenses and settlements related to matters that are outside the ordinary course of our business. Non-GAAP operating margin represents non-GAAP operating loss as a percentage of total revenue.

	Three Months Ended October 31,		Nine Months Ended October 31,	
	2021	2020	2021	2020
	(dollars in thousands)			
Loss from operations	\$ (35,980)	\$ (35,893)	\$ (117,891)	\$ (91,427)
Add:

Amortization of acquisition-related intangible assets	2,517	1,786	7,551	3,475
One-time acquisition costs	—	558	17	900
Litigation expenses and settlements**	2,750	—	10,000	—
Non-GAAP operating loss	\$ (2,653)	\$ (14,996)	\$ (19,771)	\$ (35,921)
Operating margin	(25)%	(36)%	(30)%	(33)%
Non-GAAP operating margin	(2)%	(15)%	(5)%	(13)%

*Includes amortization related to share-based compensation that was capitalized in internal-use software and other assets in previous periods.

**Relates to matters that are outside the ordinary course of our business.

Non-GAAP net loss

We define non-GAAP net loss as net loss adjusted for share-based compensation expense, amortization of acquisition-related intangible assets, one-time acquisition costs, litigation expenses and settlements related to matters that are outside the ordinary course of our business, and non-recurring income tax adjustments associated with mergers and acquisitions.

	Three Months Ended October 31,		Nine Months Ended October 31,	
	2021	2020	2021	2020
	(in thousands)			
Net loss	\$ (36,718)	\$ (31,971)	\$ (117,958)	\$ (86,314)
Add:				
Share-based compensation expense*	28,060	18,553	80,552	51,131
Amortization of acquisition-related intangible assets	2,517	1,786	7,551	3,475

Release of valuation allowance	—	(4,014)	—	(4,014)
Non-GAAP net loss	\$ (3,391)	\$ (15,088)	\$ (19,838)	\$ (34,822)

*Includes amortization related to share-based compensation that was capitalized in internal-use software and other assets in previous periods.

**Relates to matters that are outside the ordinary course of our business.

Free cash flow

We define free cash flow as net cash provided by (used in) operating activities less cash used for purchases of property and equipment, capitalized internal-use software, and payments on finance lease obligations. We believe free cash flow facilitates period-to-period comparisons of liquidity. We consider free cash flow to be a key performance metric because it measures the amount of cash we generate from our operations after our capital expenditures and payments on finance lease obligations. We use free cash flow in conjunction with traditional GAAP measures as part of the overall assessment of our liquidity, including the preparation of our annual operating budget and quarterly forecasts, to evaluate the effectiveness of the Company's business strategies, and to communicate with our board of directors concerning our liquidity.

	Three Months Ended October 31,		Nine Months Ended October 31,	
	2021	2020	2021	2020
	(in thousands)			
Net cash used in operating activities	\$ (2,161)	\$ (5,249)	\$ (3,360)	\$ (30,852)
Less:				
Purchases of property and equipment	(2,194)	(674)	(9,169)	(2,663)
Capitalized internal-use software development costs	(1,953)	(2,262)	(5,509)	(5,973)
Payments on principal of finance leases	—	(626)	—	(1,973)
Free cash flow	<u>\$ (6,308)</u>	<u>\$ (8,811)</u>	<u>\$ (18,038)</u>	<u>\$ (41,461)</u>

Calculated billings

We define calculated billings as total revenue plus the change in deferred revenue in the period. Because we recognize subscription revenue ratably over the subscription term, calculated billings can be used to measure our subscription sales activity for a particular period, to compare subscription sales activity across particular periods, and as an indicator of future subscription revenue.

Because we generate most of our revenue from customers who are invoiced on an annual basis, and because we have a wide range of customers, from those who pay us less than \$200 per year to those who pay us more than \$3.0 million per year, we experience seasonality and variability that is tied to typical enterprise buying patterns and contract renewal dates of our largest customers. We expect that our billings trends will continue to vary in future periods based on the timing and size of new and renewal bookings, changes to the economic environment inclusive of those related to COVID-19, and other factors.

	Three Months Ended October 31,		Nine Months Ended October 31,	
	2021	2020	2021	2020
	(in thousands)			
Total revenue	\$ 144,628	\$ 98,933	\$ 393,446	\$ 275,642
Add:				
Deferred revenue (end of period)	267,748	182,683	267,748	182,683
Less:				
Deferred revenue (beginning of period)	250,826	169,258	223,997	158,809
Calculated billings	<u>\$ 161,550</u>	<u>\$ 112,358</u>	<u>\$ 437,197</u>	<u>\$ 299,516</u>

Liquidity and Capital Resources

As of October 31, 2021, our principal sources of liquidity were cash and cash equivalents totaling \$440.0 million, which were held for working capital purposes. Our cash equivalents were comprised primarily of money market funds. We have historically generated significant operating losses and negative cash flows from operations as reflected in our accumulated deficit and condensed consolidated statements of cash flows. We expect to continue to incur operating losses and may incur negative cash flows from operations for the foreseeable future.

We have financed our operations primarily through payments received from customers for subscriptions and professional services, net proceeds received through sales of equity securities, option exercises, contributions from our 2018 Employee Stock Purchase Plan ("ESPP"), finance leases, and interest income.

We believe our existing cash and cash equivalents, and cash provided by sales of our products and services will be sufficient to meet our working capital and capital expenditure needs for at least the next 12 months. Our future capital requirements will depend on many factors, including our subscription growth rate, subscription renewal activity, billing frequency, the timing and extent of spending to support development efforts, the expansion of sales and marketing activities, the introduction of new and enhanced product offerings, and the continuing market adoption of our product. We may, in the future, enter into arrangements to acquire or invest in complementary businesses, services, and technologies, including intellectual property rights. We may be required to seek additional equity or debt financing. In the event that additional financing is required from outside sources, we may not be able to raise it on terms acceptable to us, or at all. If we are unable to raise additional capital or generate cash flows necessary to expand our operations and invest in new technologies, our ability to compete successfully could be reduced, and this could harm our results of operations.

A significant majority of our customers pay in advance for annual subscriptions. Therefore, a substantial source of our cash is from our deferred revenue, which is included on our condensed consolidated balance sheet as a liability. Deferred revenue consists primarily of the unearned portion of billed fees for our subscriptions, which is recognized as revenue in accordance with our revenue recognition policy. As of October 31, 2021, we had deferred revenue of \$267.7 million, of which \$266.5 million was recorded as a current liability and was expected to be recognized as revenue in the subsequent 12 months, provided all recognition criteria are met.

Cash flows

The following table summarizes our cash flows for the periods indicated (in thousands):

	Nine Months Ended October 31,	
	2021	2020
Net cash used in operating activities	\$ (3,360)	\$ (30,852)
Net cash used in investing activities	(15,678)	(83,159)
Net cash provided by financing activities	17,228	18,076
Effects of changes in foreign currency exchange rates on cash, cash equivalents, and restricted cash	(134)	(52)
Net decrease in cash, cash equivalents, and restricted cash	<u>\$ (1,944)</u>	<u>\$ (95,987)</u>

Operating activities

Our largest sources of operating cash are cash collections from our customers for sales of subscriptions and professional services. Our primary uses of cash from operating activities are for employee-related expenditures and sales and marketing expenses. Historically, we have generated negative cash flows from operating activities during most fiscal years, and have supplemented working capital requirements through net proceeds from the sale of equity securities.

During the nine months ended October 31, 2021, net cash used in operating activities was \$3.4 million, driven by our net loss of \$118.0 million, adjusted for non-cash charges of \$137.7 million, and net cash outflows of \$23.1 million due to changes in our operating assets and liabilities. Non-cash charges primarily consisted of share-based compensation, amortization of deferred commission costs, non-cash operating lease costs, depreciation of property and equipment, and amortization of intangible assets. Fluctuations in operating assets and liabilities included an increase in deferred commissions of \$50.2 million, an increase in deferred revenue of \$43.8 million, an increase in prepaid expenses and other current assets of \$13.1 million, a decrease in operating lease liabilities of \$9.9 million, an increase in accounts payable and accrued expenses of \$9.4 million, an increase in accounts receivable of \$3.7 million, and a decrease in other long-term assets of \$0.7 million.

During the nine months ended October 31, 2020, net cash used in operating activities was \$30.9 million, driven by our net loss of \$86.3 million, adjusted for non-cash charges of \$94.3 million, and net cash outflows of \$38.9 million due to changes in our operating assets and liabilities. Non-cash charges primarily consisted of share-based compensation, amortization of deferred commission costs, depreciation of property and equipment, non-cash operating lease costs, and amortization of intangible assets. Fluctuations in operating assets and liabilities included an increase in deferred commissions of \$28.5 million, an increase in deferred revenue of \$19.2 million, a decrease in accounts payable and accrued expenses of \$13.5 million, a decrease in operating lease liabilities of \$7.7 million, an increase of \$6.8 million in long-term liabilities, an increase in accounts receivable of \$6.3 million, an increase in other long-term assets of \$6.0 million, and an increase in prepaid expenses and other current assets of \$2.9 million.

Investing activities

Net cash used in investing activities during the nine months ended October 31, 2021 of \$15.7 million consisted of purchases of property and equipment of \$9.2 million, spend on capitalized internal-use software development of \$5.5 million, and purchases of long-term investments of \$1.0 million.

Net cash used in investing activities during the nine months ended October 31, 2020 of \$83.2 million consisted of \$125.1 million in payments for business acquisitions net of cash acquired for the purchase of Brandfolder and the release of the \$1.0 million holdback related to the January 2019 acquisition of TernPro, Inc., spend on capitalized internal-use software development of \$6.0 million, and purchases of property and equipment of \$2.7 million. This was partially offset by \$50.5 million in proceeds from the early termination of short-term investments.

Financing activities

Net cash provided by financing activities during the nine months ended October 31, 2021 of \$17.2 million was primarily due to \$13.0 million in proceeds from our ESPP and \$9.2 million in proceeds from the exercise of stock options. These proceeds were partially offset by taxes paid related to net share settlement of restricted stock units of \$4.9 million.

Net cash provided by financing activities during the nine months ended October 31, 2020 of \$18.1 million was primarily due to \$11.1 million in proceeds from the exercise of stock options and \$10.7 million in proceeds from our ESPP. These proceeds were partially offset by payments of principal on finance leases of \$2.0 million, taxes paid related to net share settlement of restricted stock units of \$1.8 million, and payments of deferred follow-on offering costs of \$0.1 million.

Obligations and Other Commitments

As of October 31, 2021, our principal obligations consisted of obligations outstanding under non-cancelable operating leases that expire at various dates through fiscal year 2030. See Note 11, *Leases*, to the condensed consolidated financial statements contained within this Quarterly Report on Form 10-Q for additional information on our operating leases, including changes to our principal lease commitments compared to those discussed in Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for the fiscal year ended January 31, 2021.

Our non-lease contractual commitments consist of obligations under our commitment with a cloud-based hosting service provider and non-cancelable purchase commitments. See Note 12, *Commitments and Contingencies*, to the condensed consolidated financial statements contained within this Quarterly Report on Form 10-Q for additional information on our non-lease contractual commitments, including changes to those discussed in Note 13 *Commitments and Contingencies*, of our Annual Report on Form 10-K for the fiscal year ended January 31, 2021.

Indemnification Agreements

In the ordinary course of business, we enter into agreements of varying scope and terms pursuant to which we agree to indemnify customers, vendors, lessors, business partners, and other parties with respect to certain matters, including, but not limited to, losses arising out of the breach of such agreements, services to be provided by us, or from intellectual property infringement claims made by third parties. In addition, we have entered into indemnification agreements with our directors and certain officers and employees that will require us, among other things, to indemnify them against certain liabilities that may arise by reason of their status or service as directors, officers, or employees. An indemnification claim has been made to the Company related to litigation in which a former director and shareholder are parties. On January 29, 2021, Ryan Hinkle and Insight Venture Partners VII, L.P. and certain affiliates filed a complaint against Smartsheet Inc. in the Superior Court of Washington, King County, for the advancement of legal fees, costs, and expenses incurred related to this indemnification claim. As of October 31, 2021, we recorded a liability of \$10.0 million related to these lawsuits. On November 18, 2021, the Company agreed to pay \$10.0 million as part of an overall settlement of these matters, as described in Note 12, *Commitments and Contingencies*, in this Quarterly Report on Form 10-Q.

Off-Balance Sheet Arrangements

As of October 31, 2021, we did not have any relationships with organizations or financial partnerships, such as structured finance or special purpose entities that would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

Critical Accounting Policies and Estimates

We prepare our condensed consolidated financial statements in accordance with GAAP. In the preparation of these condensed consolidated financial statements, we are required to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, expenses, and related disclosures. To the extent that there are material differences between these estimates and actual results, our financial condition or results of operations would be affected. We base our estimates on past experience and other assumptions that we believe are reasonable under the circumstances, and we evaluate these estimates on an ongoing basis. We refer to accounting estimates of this type as critical accounting policies and estimates.

The Company's significant accounting policies are discussed in Note 2, *Summary of Significant Accounting Policies*, in our Annual Report on Form 10-K for the year ended January 31, 2021. There have been no significant changes to these policies during the nine months ended October 31, 2021 except as described in Note 2, *Summary of Significant Accounting Policies*, in this Quarterly Report on Form 10-Q.

Recent Accounting Pronouncements

For further information on recent accounting pronouncements, refer to Note 2, *Summary of Significant Accounting Policies*, in the condensed consolidated financial statements contained within this Quarterly Report on Form 10-Q.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Interest rate risk

We had cash and cash equivalents totaling \$440.0 million as of October 31, 2021, of which \$410.8 million was invested in money market funds. We had cash and cash equivalents totaling \$442.2 million as of January 31, 2021, of which \$420.6 million was invested in money market funds. Our cash and cash equivalents are held for working capital purposes. We do not enter into investments for trading or speculative purposes.

Our cash equivalents and our investment portfolio are subject to market risk due to changes in interest rates. Fixed rate securities may have their market value adversely affected due to a rise in interest rates. Due in part to these factors, our future investment income may fall short of our expectations due to changes in interest rates or we may suffer losses in principal if we are forced to sell securities that decline in market value due to changes in interest rates.

A hypothetical 10% relative change in interest rates during the periods presented would not have a material impact on the value of our cash equivalents in our condensed consolidated financial statements.

Foreign currency exchange risk

Due to our international operations, although our sales contracts are primarily denominated in U.S. dollars, we have foreign currency risks related to revenue denominated in other currencies, such as the British Pound Sterling, Euro, Australian dollar, and Canadian dollar, as well as expenses denominated in the British Pound Sterling and Australian dollar. Changes in the relative value of the U.S. dollar to other currencies may negatively affect revenue and other operating results as expressed in U.S. dollars. We have not engaged in the hedging of foreign currency transactions to date. We do not believe that an immediate 10% increase or decrease in the relative value of the U.S. dollar to other currencies would have a material effect on our operating results.

Item 4. Controls and Procedures

Evaluation of disclosure controls and procedures

Our management, with the participation and supervision of our Chief Executive Officer and our Chief Financial Officer, have evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) as of the end of the period covered by this Quarterly Report on Form 10-Q. Our disclosure controls and procedures are designed to ensure that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Based on such evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures, in design and operation, were effective as of October 31, 2021.

Changes in internal control over financial reporting

There were no changes in our internal control over financial reporting identified in connection with the evaluation required by Rules 13a-15(d) and 15d-15(d) of the Exchange Act that occurred during the period covered by this Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Inherent limitation on the effectiveness of internal control

The effectiveness of any system of internal control over financial reporting, including ours, is subject to inherent limitations, including the exercise of judgment in designing, implementing, operating, and evaluating the controls and procedures, and the inability to eliminate misconduct completely. Accordingly, in designing and evaluating the disclosure controls and procedures, management recognizes that any system of internal control over financial reporting, including ours, no matter how well designed and operated, can only provide reasonable, not absolute assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs. Moreover, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Part II. Other Information

Item 1. Legal Proceedings

From time to time in the normal course of business, we may be subject to various legal matters such as threatened or pending claims or proceedings. For further information on our legal proceedings, see Note 12, *Commitments and Contingencies*, in the notes to our condensed consolidated financial statements included in this Quarterly Report on Form 10-Q.

Item 1A. Risk Factors

Investing in our Class A common stock involves a high degree of risk. You should carefully consider the risks described below, as well as the other information in this Quarterly Report on Form 10-Q, including our condensed consolidated financial statements and the related notes and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” before deciding whether to invest in our Class A common stock. The occurrence of any of the events or developments described below could materially and adversely affect our business, financial condition, results of operations, and growth prospects. These factors could also cause our actual business and financial results to differ materially from those contained in forward-looking statements made by management from time-to-time. In such an event, the market price of our Class A common stock could decline, and you may lose all or part of your investment. Additional risks and uncertainties not presently known to us or that we currently believe are not material may also impair our business, financial condition, results of operations, and growth prospects. In addition to the effects discussed in the “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and in the risk factors below, additional or unforeseen effects from COVID-19 and the resulting global economic impacts may give rise to additional risks or amplify the risks discussed in this Item 1A.

Risk Factor Summary

The following summarizes certain of the most material risks that make an investment in our Class A common stock uncertain, risk laden, or speculative. If any of the following risks occur, our business, financial condition, results of operations, and growth prospects may be impaired, the market price of our Class A common stock could decline, and you may lose all or part of your investment.

Industry, Product, and Infrastructure Risks

- The market in which we participate is highly competitive, and if we do not compete effectively, our operating results could be harmed.
- Our business depends on a strong brand, and if we are unable to develop, maintain, and enhance our brand, our business and results may be harmed.
- Our forecasts of market growth may prove to be inaccurate, and our business may not grow at a pace similar to market growth.
- Security threats and attacks are common, increasing globally, and may result in significant liabilities.

- Our failure to sufficiently secure our platform and services may result in unauthorized access to customer data, negatively impact our customer attraction and retention, and result in significant liabilities.
- We depend on public cloud service providers and computing infrastructure operated by third parties, and any disruptions in these operations could harm our business and results.
- If our platform fails to perform or if we fail to scale our platform to meet the needs of customers, our market share could decline and we could be subject to liability.
- If we fail to manage our services infrastructure, or our platform experiences outages, interruptions, or delays in updates to meet customers' needs, we may be subject to liabilities and our operating results may be harmed.
- Failure to establish and maintain partnerships with complementary technology offerings and integrations could limit our ability to grow our business.
- Our platform and internal business operations use third-party software and services that may be difficult to replace or may cause errors or failures that could lead to a loss of customers or harm our operating results.

Commercial and Financial Risks

- It is difficult to predict future operating results, particularly as we monitor the effects of the COVID-19 pandemic.
- We have a history of cumulative losses and cannot assure profitability in the future.
- We derive substantially all of our revenue from a single offering.
- We recognize revenue over the term of the relevant service period, and downgrades, new sales, or renewals may not be immediately reflected in our results.

Operational and Other Risks

- We have recently experienced rapid growth and expect our growth to continue; failure to manage our growth effectively may harm our business.
- Our sales cycle may become longer, more complex, and more expensive as we continue to target enterprise and government customers, all of which could harm our business or results.
- Our growth depends on our ability to expand our sales force domestically and internationally, and the failure to do so may harm our business and results.
- We may not receive significant revenue from our current development efforts for several years, if at all.
- Contractual disputes or commitments, including indemnity obligations, may be costly, time consuming, and could harm our reputation.
- Catastrophic events, including global pandemics, may disrupt our business.

Risks Related to Our Industry, Platform, and Infrastructure

The market in which we participate is highly competitive, and if we do not compete effectively, our operating results could be harmed.

The market for collaborative work management platforms is fragmented, increasingly competitive, and subject to rapidly changing technology and evolving standards. Our competitors range in size, from diversified global companies with significant research and development and marketing resources, to smaller startups building on new technology platforms whose narrower offerings may allow them to be more efficient in deploying technical, marketing, and financial resources.

Certain of our features compete with current or potential products and services offered by Airtable, Asana, Atlassian, Monday.com, Planview, Wrike, and others. We also face competition from Google and Microsoft, who offer a range of productivity solutions including spreadsheets and email that have traditionally been used for work management. While we currently collaborate with Adobe, Google, and Microsoft, they may develop and introduce, or acquire, products that directly or indirectly compete with our platform. For example, Adobe recently acquired Workfront, a company whose product and service offerings compete with ours. As we continue to sell products and services to potential customers with existing internal solutions, we must convince their stakeholders that our platform is superior to the solutions that their organization has previously adopted and deployed. With the introduction of new technologies and market entrants, and the growth of existing market participants, we expect competition to continue to intensify in the future.

Many of our current and potential competitors, particularly large software companies, have longer operating histories, greater name recognition, more established customer bases, and significantly greater financial, operating, technical, marketing, and other resources than we do. As a result, our competitors may be able to leverage their relationships with distribution partners and customers based on other products or incorporate functionality into existing products to gain business in a manner that discourages users from purchasing our platform, including by selling at zero or negative margins or by using product bundling. Further, our competitors may respond more quickly and effectively than we can to new or changing opportunities, technologies, standards, or customer requirements. We could lose customers if our competitors consolidate, introduce new collaborative work management products, add new features to their current product offerings, acquire competitive products, reduce prices, form strategic alliances with other companies, or are acquired by third parties with greater available resources. We may also face increasing competition if our competitors provide products and services for free. If our competitors' products or services are more widely adopted than ours, if they are successful in bringing their products or services to market sooner than ours, if their pricing is more competitive, or if their products or services are more technologically capable than ours, then our business, results of operations, and financial condition may be harmed.

If we do not keep pace with technological changes, our platform may become less competitive and our business may suffer.

Our industry is marked by rapid technological developments and innovations, and evolving industry standards. If we are unable to provide enhancements and new features and integrations for our existing platform, develop new products that achieve market acceptance, or innovate quickly enough to keep pace with rapid technological developments, our business could be harmed.

In addition, because our platform is designed to operate on a variety of systems, we will need to continuously modify, enhance, and improve our platform to keep pace with changes in the following: Internet-related hardware; mobile operating systems such as iOS and Android; and other software, communication, browser, and database technologies. We may not be successful in either developing these modifications, enhancements, and improvements, or in bringing them to market quickly or cost-effectively in response to market demands. Furthermore, uncertainties about the timing and nature of new network platforms or technologies, or modifications to existing platforms or technologies, could increase our research and development expenses. Any failure of our products or services to keep pace with technological changes or operate effectively with future network platforms and technologies, or to do so in a timely and cost-effective manner, could reduce the demand for our platform, result in customer dissatisfaction, reduce our competitive advantage, and harm our business.

Our business depends on a strong brand, and if we are not able to develop, maintain, and enhance our brand, our business and operating results may be harmed.

We believe that developing, maintaining, and enhancing our brand is critical to achieving widespread acceptance of our platform, attracting new customers, retaining existing customers, persuading existing customers to expand their relationships with us, and hiring and retaining employees. We believe that the importance of our brand will increase as competition in our market further intensifies. Successful promotion of our brand will depend on a number of factors, including the effectiveness of our marketing efforts; our ability to provide a high-quality, reliable, and cost-effective platform; the perceived value of our platform; our ability to provide a quality customer success experience; and our ability to control or influence perception of our brand regardless of customer use cases.

Brand promotion activities require us to make substantial expenditures. We have made and continue to make significant investments in the promotion of our brand, however, our ability to successfully promote our brand is uncertain. The promotion of our brand may not generate customer awareness or increase revenue, and any increase in revenue may not offset the expenses we incur in building and maintaining our brand. If we fail to successfully promote and maintain our brand, or if we incur substantial expenses in an unsuccessful attempt to promote and maintain our brand, we may fail to realize a sufficient return on our brand-building efforts, or fail to achieve the widespread brand awareness that is critical for broad customer adoption of our platform, which could harm our business and operating results.

Our forecasts of market growth may prove to be inaccurate, and even if the markets in which we compete achieve the forecasted growth, we cannot assure you that our business will grow at similar rates, if at all.

Growth forecasts are subject to significant uncertainty and are based on assumptions and estimates that may not prove to be accurate. Our forecasts, including the size and expected growth in the addressable market for collaborative work management platforms, may prove to be inaccurate, or may decline rapidly as a result of unforeseen events and the ongoing effects, including the continuing and uncertain impact, of the COVID-19 pandemic. Even if these markets experience the forecasted growth, we may not grow our business at similar rates, or at all. Our growth is subject to many factors, including our success in implementing our business strategy, which is subject to many risks and uncertainties.

Security threats and attacks are common, increasing globally, and may result in significant liabilities.

Our platform and our internal corporate information technology systems have in the past been, and will in the future be, subject to cyber-attacks, phishing attacks, ransomware attacks, malicious software programs, supply chain attacks, and other cyber security threats (“Cyber Threats”). Further, we engage service providers to store and otherwise process some of our and our customers’ data, including sensitive and personal information, and these service providers are also targets of Cyber Threats.

Cyber Threats have been increasing in frequency globally, and may be accompanied by demands for payment in exchange for resolution, restoration of functionality, or return of data. Sources of Cyber Threats range from individuals to sophisticated organizations, including state-sponsored organizations. These attackers use a wide variety of methods to exploit vulnerabilities and gain access to corporate assets, including networks, information, individuals, or credentials. The types and methods of Cyber Threats are constantly evolving and becoming more complex, and we may not be able to detect, combat, or successfully defend against Cyber Threats. Attackers initiating Cyber Threats may be more sophisticated than we are and may gain access to our corporate assets. Any vulnerabilities in our infrastructure or the success of any Cyber Threats against us may not be discovered in a timely fashion or at all, and the impact of vulnerabilities may be exacerbated the longer such vulnerabilities persist or remain undetected. While we utilize security measures and architecture designed to protect the integrity of our platform and corporate information technology environment, we remain subject to ongoing and evolving Cyber Threats, and we anticipate that we will need to expend significant resources in an effort to protect against Cyber Threats. We may not be able to deploy, allocate, or retain sufficient resources to keep pace with the persistent and evolving Cyber Threat landscape.

Further, our ability to monitor the data security of our service providers and vendors is limited, and Cyber Threats initiated by third parties may successfully circumvent our service providers' security measures, resulting in the unauthorized access to, or misuse, disclosure, loss, or destruction of our and our customers' data. Any actual or perceived failure by us or our service providers to prevent or defend against Cyber Threats, actual or perceived vulnerabilities in our products or services, or unauthorized access to corporate assets may lead to claims against us and may result in significant data loss, significant costs and liabilities, and could reduce our revenue, harm our reputation, and compromise our competitive position.

Our failure to sufficiently secure our platform and services may result in unauthorized access to customer data, negatively impact our customer attraction and retention, and result in significant liabilities.

Our products and services involve the storage, transmission, and processing of our customers' sensitive and proprietary information, including business strategies, financial and operational data, personal or identifying information, and other data. As a result, unauthorized use of or access to this data could result in the loss, compromise, corruption, or destruction of our or our customers' sensitive and proprietary information and could lead to litigation, regulatory investigations and claims, indemnity obligations, loss of authorization under the Federal Risk and Authorization Management Program ("FedRAMP") or other authorizations, and other liabilities.

Our customers, especially our larger enterprise customers, increasingly prioritize security of their digital assets and information when making decisions regarding purchasing Internet-based products and services. Additionally, we serve government customers; customers in regulated industries such as financial services, health care, and education; and other customers that process large quantities of sensitive information or personal data. These customers often seek platforms that offer enhanced or specialized security measures. Any success in attracting new customers in these industries, and retaining and growing such existing customers, may require enhancements to or additional engineering of our platform to meet these requirements. Committing to such changes could be costly and time consuming, and could divert the attention of our management and key personnel from other business operations; such investments and efforts may not take place in a timely manner, or at all.

Even the perception of inadequate security may damage our reputation and negatively impact our ability to win new customers and retain existing customers. Further, due to the current COVID-19 pandemic and the growing trend of remote work, there is an increased risk that we may be more susceptible to, or more likely to experience, cybersecurity-related incidents as a result of our employees, and the employees of our service providers and other third parties, working remotely.

Additionally, we could be required to expend significant capital and other resources to investigate and address any actual or suspected data security incident or breach, or to prevent further or additional security incidents or breaches. We may find it necessary or desirable to incur costs to provide remediation and incentives to customers or other business partners following a security breach, or other actual or suspected security incident, in an effort to maintain business relationships.

We depend on public cloud service providers and computing infrastructure operated by third parties, and any service outages, delays, or disruptions in these operations could harm our business and operating results.

We host our platform and serve our customers through public cloud service providers. Public cloud service providers run their own platforms that we access, and we are, therefore, vulnerable to service interruptions, delays, and outages. Our public cloud service providers ("Cloud Providers") may experience events such as natural disasters, fires, power loss, telecommunications failures, or similar events. The systems, infrastructure, and services of our Cloud Providers may also be subject to human or software errors, viruses, security attacks (internal and external), Cyber Threats, fraud, spikes in customer usage, denial of service issues, break-ins, sabotage, intentional acts of vandalism, malware, phishing attacks, acts of terrorism, and other misconduct. Further, we have experienced in the past, and expect that in the future we may experience, periodic interruptions, delays, and outages in service and availability with our Cloud Providers due to a variety of factors, including Internet connectivity failures, infrastructure changes, human or software errors, website hosting disruptions, and capacity constraints. In some instances, we may not be able to identify the cause or causes of these performance problems within an acceptable period of time.

We may also be affected by other unanticipated problems experienced by our Cloud Providers, including but not limited to financial difficulties and bankruptcy, the occurrence of which could result in lengthy interruptions, delays, and outages in our service and noncompliance with our contractual obligations or business requirements.

Further, our Cloud Providers have no obligation to renew their agreements with us on commercially reasonable terms, or at all. If we are unable to renew agreements with our Cloud Providers on commercially reasonable terms, if our agreements with our Cloud Providers are prematurely terminated for any reason, or if our Cloud Providers are acquired or cease business, we may be required to transfer our infrastructure to new public cloud facilities, and we may incur significant costs and possible service interruptions in connection with doing so.

Additionally, there are limited options for public cloud service providers capable of effectively supporting our infrastructure. Consolidation through a single, or select few, service provider(s) may result in a dependency on the selected provider(s). Consolidation may also negatively impact customer acquisition or expansion as customers or potential customers may object to certain providers for a variety of reasons, including that such providers do not meet their hosting requirements or that the providers operate in a competitive space. The foregoing objections could harm our business and operating results.

Any issues with our Cloud Providers may result in errors, defects, disruptions, or other performance problems with our platform, which could harm our reputation and may damage our and our customers' businesses. Interruptions in our platform's operation might reduce our revenue, cause us to issue credits or refunds to customers, subject us to potential liability, cause customers to terminate their subscriptions, harm our renewal rates, and affect our reputation. Any of these events could harm our business and operating results.

If our platform fails to perform properly, or if we are unable to scale our platform to meet the needs of our customers, our reputation could be harmed, our market share could decline, and we could be subject to liability claims.

Our platform is inherently complex and may contain material defects or errors. Additionally, we provide regular updates to our platform, which may contain undetected defects when first introduced or released. Any defects in functionality or interruptions in the availability of our platform could result in:

- loss of, or delayed, market acceptance and sales;
- breach of contract or warranty claims;
- issuance of credits or other compensation for downtime;
- termination of subscription agreements, loss of customers, and issuance of refunds;
- diversion of development, customer service, and other company resources; and
- harm to our reputation.

The costs incurred in correcting any material defects or errors might be substantial and could harm our operating results.

Because of the large amount of data that we handle, hardware failures, errors in our systems, user errors, or Internet outages could result in data loss or corruption that our customers may regard as significant. Furthermore, the availability and performance of our platform could be diminished or otherwise impacted by a number of factors, which may damage the perception of its reliability and reduce our revenue. These factors include but are not limited to customers' inability to access the Internet; the failure of our network or software systems, including backup systems; simultaneous development efforts causing reallocation of resources; computing vulnerabilities; security breaches; capacity issues or service failures experienced by our service providers; or variability in user traffic for our platform. We monitor vulnerabilities that may impact our business and the availability of our platform. Any such impact, and the costs incurred in addressing or correcting these vulnerabilities, may harm our operating results, may harm our reputation, and may cause us to lose customers.

We may be required to issue credits or refunds, or otherwise be liable to our customers for damages they may incur resulting from certain of these events. Our insurance coverage may be inadequate to sufficiently cover such potential liabilities, and may not be available in the future on acceptable terms, or at all. In addition, our policy may not cover all claims made against us and defending a lawsuit, regardless of its merit, could be costly and divert management's attention.

Furthermore, we will need to ensure that our platform can scale to meet the evolving needs of our customers, particularly as we continue to focus on larger enterprise customers. We regularly monitor and update our platform to fix errors, add functionality, and improve scaling; however, our customers have occasionally experienced outages and latency issues, sometimes during peak usage periods. If we are not able to provide our platform at the scale required by our customers or to correct any platform functionality defects and capacity limitations, potential customers may not adopt our platform and existing customers may not renew their agreements with us.

If we fail to manage our services infrastructure at the levels expected by our customers, including due to factors such as service outages, interruptions, or delays in updates to our platform to meet customers' needs, then we may be subject to liabilities and our operating results may be harmed.

We have experienced significant growth in the number of users and data that our platform supports, and it is critical that we maintain sufficient excess service capacity to ensure our platform is accessible and functioning with an acceptable latency; and to ensure we meet the needs of existing and new customers and users, the needs required to support customer and user expansion, and our own internal needs. To do this, we must manage our services infrastructure to support software updates and the evolution of our platform capabilities. The provision of any new service infrastructure requires significant cost and management. If we do not accurately predict or manage our service infrastructure requirements, if our existing providers are unable to keep up with our needs for capacity, if they are unwilling or unable to allocate sufficient capacity to us, or if we are unable to contract with additional providers on commercially reasonable terms, our customers may experience service interruptions, delays, or outages that may subject us to financial penalties, cause us to issue credits or other compensation to customers, or result in other liabilities and customer losses. If our services and infrastructure fail to scale, customers may experience delays as we seek to obtain additional capacity or make architectural changes to address newly discovered scalability and performance issues, which could damage our reputation and our business. We may also be required to move or transfer our and our customers' data. Despite precautions taken during this process, any unsuccessful data transfers may impair the delivery and performance of our platform, and may harm our operating results.

Failure to establish and maintain relationships with partners that can provide complementary technology offerings and software integrations could limit our ability to grow our business.

Our growth strategy includes expanding the use of our platform through complementary technology offerings and software integrations, such as third-party application programming interfaces ("APIs"). While we have established relationships with providers of complementary technology offerings and software integrations, we cannot assure you that we will be successful in maintaining relationships with these providers or establishing relationships with new providers. Third-party providers of complementary technology offerings and software integrations may take any of the following actions: decline to enter into, or later terminate, relationships with us; change their features or platforms; restrict our access to their applications and platforms; or alter the terms governing use of and access to their applications and APIs in an adverse manner. Such actions could functionally limit or terminate our ability to use these third-party technology offerings and software integrations with our platform, which could negatively impact our offerings and harm our business.

Further, if we fail to integrate our platform with new third-party applications and platforms that our customers use, or to adapt to the data transfer requirements of such third-party applications and platforms, we may not be able to offer the functionality that our customers need, which would negatively impact our offerings and, as a result, could negatively affect our business, results of operations, and financial condition. In addition, we may benefit from these partners' brand recognition, reputations, referrals, and customer bases. Any losses or shifts in the referrals from, or the market positions of, these partners generally, in relation to one another or to new competitors or technologies, could lead to losses in our relationships or customers, or a need to identify or transition to alternative channels for marketing our platform.

Our platform and internal business operations use third-party software and services that may be difficult to replace or may cause errors or failures that could lead to a loss of customers or harm to our reputation and our operating results.

We license third-party software and depend on services from various third parties to operate our platform. In the future, this software or these services may not be available to us on commercially reasonable terms, or at all. Any loss of the right to use any of such software or services could harm our business, and it could result in decreased functionality of our platform until equivalent technology is either developed by us or, if available from another provider, is identified, obtained, and integrated. In addition, any errors or defects in or failures of the third-party software or services could result in errors or defects in, or failure of, our platform, which could harm our business and be costly to correct. Such errors, defects, or failures could also harm our reputation and result in liability to third parties, including customers. Many of these providers attempt to limit their liability for errors, defects, and failures, which could limit our ability to recover from them and increase our potential liabilities and operating costs.

We will need to maintain our relationships with third-party software and service providers and obtain software and services from such providers that do not contain errors or defects. Any failure to do so could adversely impact our ability to deliver our platform to our customers and could harm our operating results.

Further, we use technologies and services from third parties to operate critical internal functions of our business, including cloud infrastructure services, customer relationship management services, business management services, and customer support and consulting staffing services. Our business would be disrupted if any of the third-party software or services we utilize for internal functions were unavailable due to extended outages or interruptions, or if they are no longer available on commercially reasonable terms or at all. Such disruptions may adversely affect our ability to operate websites, process and fulfill transactions, respond to customer inquiries, and generally maintain cost-efficient operations. In the event of disruption, we may be required to seek replacement technologies or services from other parties, or to develop these components ourselves, which could result in increased costs, delays in the release of new product offerings, and reduced efficiencies in the operations of our impacted departments, until such time as suitable technology can be identified and integrated. These disruptions, if they occur, could result in customer dissatisfaction, and harm our results of operations and financial condition. Any issues with the quality of technologies and services provided by third parties could cause harm to our reputation and increased operational costs to rectify those issues.

Our use of open source software could negatively affect our ability to offer and sell our products and subject us to possible litigation.

We use open source software in our platform and expect to continue to use open source software in the future. There are uncertainties regarding the proper interpretation of and compliance with open source licenses, and there is a risk that such licenses could be construed in a manner that imposes unanticipated conditions or restrictions on our ability to use such open source software, and consequently to provide or distribute our platform. Additionally, we may from time to time face claims from third parties alleging ownership of, or seeking to enforce the terms of, an open source license, including by demanding release of the open source software, derivative works, or our proprietary source code that was developed using such software. These claims could also result in litigation and could require us to make our software source code freely available, devote additional research and development resources to change our platform, or incur additional costs and expenses, any of which could result in reputational harm and would have a negative effect on our business and operating results. In addition, if the license terms change for the open source software we utilize, then we may be forced to re-engineer our platform or incur additional costs to comply with the changed license terms or to replace the affected open source software. Further, use of certain open source software can lead to greater risks than use of third-party commercial software, as open source licensors generally do not provide warranties, assurance of performance or title, or controls on the origin of, or updates to, such software. Certain versions and libraries of open source software allow for any individuals to make general contributions and updates, and the use of such open source software may introduce or amplify certain security vulnerabilities, depending on how, and with which systems, it is implemented. Although we have established policies to regulate the use and incorporation of open source software into our platform, we cannot be certain that we have not incorporated open source software in our platform in a manner that is inconsistent with such policies.

Risks Related to Our Commercial and Financial Operations

It is difficult to predict our future operating results.

Our ability to accurately forecast our future operating results is limited and subject to a number of uncertainties, including planning for and modeling future growth. We have encountered, and will continue to encounter, risks and uncertainties frequently experienced by growing companies in rapidly changing industries. If our assumptions regarding these risks and uncertainties, which we use to plan our business, are incorrect or change due to industry or market developments, or if we do not address these risks successfully, our operating results could differ materially from our expectations and our business could suffer.

The current COVID-19 pandemic has continued to significantly impact worldwide economic activity. The COVID-19 pandemic and related restrictions imposed by the government and businesses could continue to result in one or more of the following conditions that may affect us and our customers: increased risk in collectability of accounts receivable; reduced staff productivity due to working remotely for extended periods; increased costs and challenges related to retrofitting facilities and changing operating procedures for a return to the workplace; reduced staff productivity due to illness, illness in the family, or lack of dependent care; increased customer losses or churn; lengthened customer payment terms; increased challenges in acquiring new customers; extreme currency exchange-rate fluctuations; and challenges with Internet infrastructure due to high loads. There is still uncertainty regarding the duration and scope of the pandemic, and we continue to monitor its effects. While it is not possible at this time to estimate the overall impact that the COVID-19 pandemic could have on our business, the ongoing spread of COVID-19, and the measures taken by the governments of countries affected, will continue to have an impact on global economic conditions, which could have an adverse effect on our business and financial condition.

We have a history of cumulative losses and we cannot assure you that we will achieve profitability in the foreseeable future.

We have incurred losses in each period since we incorporated in 2005. We incurred net losses of \$36.7 million and \$32.0 million during the three months ended October 31, 2021 and 2020, respectively, and \$118.0 million and \$86.3 million during the nine months ended October 31, 2021 and 2020, respectively. As of October 31, 2021, we had an accumulated deficit of \$489.4 million. These losses and accumulated deficit reflect the substantial investments we made to develop our products and services, acquire new customers, and maintain and expand existing customers. We expect our operating expenses to increase in the future due to anticipated increases in sales and marketing expenses, research and development expenses, operations costs, and general and administrative costs, and we expect our losses to continue for the foreseeable future. Furthermore, to the extent we are successful in increasing and expanding our customer base, we may also incur increased losses due to associated upfront costs, particularly as a result of the nature of subscription revenue, which is generally recognized ratably over the term of the subscription period. You should not consider our recent revenue growth as indicative of our future performance. Our revenue growth could slow or our revenue could decline for a number of reasons, including slowing demand for our subscription solutions or professional services, reduced conversion from our free trial users or collaborators to paid users, increasing competition, or our failure to capitalize on growth opportunities. Accordingly, we cannot assure you that we will achieve profitability in the foreseeable future, nor that, if we do become profitable, we will sustain profitability.

If we are unable to attract new customers and maintain and expand sales to existing customers, our growth could be slower than we expect and our business may be harmed.

Our future growth depends in part upon increasing our customer base and expanding sales to, and renewing subscriptions with, our existing customers. Our ability to achieve significant growth in revenue in the future will depend, in large part, upon the effectiveness of our sales and marketing efforts, both domestically and internationally; our ability to predict customer demands; our ability to continue to attract new customers; and our ability to expand our relationship with existing customers by addressing new use cases, increasing their number of users, or selling additional products and services. These endeavors may be particularly challenging where an organization is reluctant to try, or invest further in, a cloud-based collaborative work management platform, or where an organization has already invested significantly in an existing solution. Additionally, we continue to monitor how the COVID-19 pandemic may impact the adoption or expansion of cloud-based solutions generally, and our success in engaging with new customers and expanding relationships with existing customers. If we fail to predict customer demand, fail to sufficiently account for the impact of the COVID-19 pandemic on our sales projections, or fail to attract new customers and maintain and expand those and existing customer relationships, our revenue may grow more slowly than expected, may not grow at all, or may decline, and our business may be harmed.

Moreover, many of our subscriptions are sold for a one-year term. While many of our subscriptions provide for automatic renewal, our customers have no obligation to renew their subscription after the expiration of the term and we cannot assure you that our customers will renew subscriptions with a similar contract period or the same or greater number of users or premium solutions, or renew at all. Our customers' renewal rates may decline or fluctuate as a result of a number of factors, including their satisfaction with our platform or services, our pricing or pricing structure, the pricing or capabilities of the products and services offered by our competitors, the effects of economic conditions, or reductions in our customers' spending levels. If our customers do not renew their agreements with us, or renew on terms less favorable to us, our revenue may decline.

Our quarterly operating results may fluctuate significantly and may not fully reflect the underlying performance of our business.

Our quarterly operating results, including the levels of our revenue, calculated billings, gross margin, profitability, cash flow, and deferred revenue may vary significantly in the future, and period-to-period comparisons of our operating results may not be meaningful. Accordingly, the results of any one quarter should not be relied upon as an indication of future performance. Our quarterly operating results may fluctuate as a result of a variety of factors, many of which are outside of our control, and as a result, may not fully reflect the underlying performance of our business. Fluctuations in quarterly operating results may reduce the value of our Class A common stock. Factors that may cause fluctuations in our quarterly results include, but are not limited to:

- the ongoing impact of, including the market volatility and economic disruption caused by, the COVID-19 pandemic or any other worldwide pandemic;
- the negative impact of the COVID-19 pandemic on certain customer segments, including small and midsize businesses and industries such as travel and hospitality;
- customers impacted by macroeconomic downturns and seeking bankruptcy protection or other similar relief;
- customers' failure to pay amounts due to us, customers' extending the time to pay amounts owed to us, our inability to collect amounts due, and the cost of enforcing the terms of our contracts, including litigation costs;
- our ability to attract new customers and expand existing customers, domestically and internationally;
- interest rate fluctuations which will cause our interest income to decrease during low interest rate environments and may negatively impact our customers' income or access to capital;
- the addition or loss of large customers, including through acquisitions or consolidations;
- the mix of customers obtained through self-service on our website and sales-assisted channels;

- customer renewal rates and the extent to which customers purchase services and subscribe for additional users and products;
- the timing and growth of our business, in particular through our hiring of new employees and international expansion;
- our ability to hire, train, and maintain our sales force and other employees in customer-facing roles;
- the length and timing of sales cycles, with a significant portion of our larger transactions occurring in the last few days and weeks of each quarter;
- the timing of recognition of revenue;
- the amount and timing of operating expenses;
- changes in our pricing policies or offerings, or those of our competitors;
- the timing and success of new product and service introductions by us or our competitors, or any other change in the competitive dynamics of our industry, including consolidation or new entrants among competitors, customers, or strategic partners;
- customers delaying purchasing decisions in anticipation of new products or product enhancements by us or our competitors or otherwise;
- the timing and effectiveness of new and existing sales and marketing initiatives;
- the timing of expenses related to the development or acquisition of technologies or businesses and potential future charges for impairment of goodwill from acquired companies;
- network or service outages, Internet disruptions, security breaches or perceived security breaches impacting us directly or indirectly via our third-party service providers, and the costs associated with responding to and addressing such outages or breaches;
- changes in laws and regulations that affect our business, the costs to maintain or achieve compliance with changes in laws and regulations, and any lawsuits or other proceedings involving us or our competitors;
- changes in foreign currency exchange rates or addition of currencies in which our sales are denominated; and
- general economic, industry, and market conditions.

We derive substantially all of our revenue from a single offering.

Although we offer additional solutions, we currently derive, and expect to continue to derive, substantially all of our revenue from the sale of subscriptions to our cloud-based collaborative work management platform. As such, the continued growth in market demand for our platform is critical to our continued success. Demand for our platform is affected by a number of factors, including continued market acceptance, the timing of development and release of competing products and services, price or product changes by us or by our competitors, technological changes, growth or contraction in the markets we serve, and general economic conditions and trends. In addition, some current and potential customers, particularly large organizations, may develop or acquire their own internal collaborative work management tools or continue to rely on traditional tools that would reduce or eliminate the demand for our platform. If demand for our platform declines for any of these or other reasons, our business could be adversely affected.

Because we recognize revenue from subscriptions and support services over the term of the relevant service period, downturns or upturns in new sales or renewals may not be immediately reflected in our results of operations and may be difficult to discern.

We recognize subscription revenue from customers ratably over the terms of their subscription agreements, which are typically one year. As a result, most of the subscription revenue we report in each quarter is derived from the recognition of deferred revenue relating to subscriptions entered into during previous quarters. A decline in new or renewed subscriptions in any single quarter will likely only have a minor effect on our revenue for that quarter, and such a decline will reduce our revenue in future quarters. Accordingly, the effect of significant downturns in sales and market acceptance of our platform, and potential changes in our pricing policies or customer retention rates, may not be fully reflected in our operating results until future periods. We may be unable to adjust our cost structure to reflect the changes in revenue. Our subscription model also makes it difficult for us to rapidly increase our revenue through additional sales in any period, as subscription revenue from new customers is recognized over the applicable subscription term.

We may need additional capital, and we cannot be certain that additional financing will be available on favorable terms, or at all.

We have funded our operations since inception primarily through equity financings, including our initial public offering (“IPO”) and subsequent registered offering, finance lease arrangements, subscription and services fees from our customers, interest income, and through proceeds from option exercises and the sale of our capital stock pursuant to our 2018 Employee Stock Purchase Plan. We do not know when or if our operations will generate sufficient cash to fund our ongoing operations. In the future, we may require additional capital to respond to business opportunities, challenges, acquisitions, declines in subscriptions for our platform, or unforeseen circumstances. A deterioration of current conditions in worldwide credit markets could limit our ability to obtain external financing to fund our operations and capital expenditures. We may not be able to timely secure debt or equity financing on favorable terms, or at all. Any debt financing obtained by us could involve restrictive covenants relating to our capital raising activities and other financial and operational matters, which may make it more difficult for us to obtain additional capital and to pursue business opportunities, including potential acquisitions. Additionally, we may not be able to generate sufficient cash to service any debt financing obtained by us, which may force us to reduce or delay capital expenditures or sell assets or operations. If we raise additional funds through further issuances of equity, convertible debt securities, or other securities convertible into equity, our existing shareholders could suffer significant dilution in their percentage ownership of our company, and any new equity securities we issue could have rights, preferences, and privileges senior to those of holders of our common stock. If we are unable to obtain adequate financing or financing on terms satisfactory to us when we require it, our ability to continue to grow or support our business and to respond to business challenges could be significantly limited.

We may face exposure to foreign currency exchange rate fluctuations.

While we have historically transacted in U.S. dollars with the majority of our customers and vendors, we have transacted in some foreign currencies and may transact in more foreign currencies in the future. Accordingly, changes in the value of foreign currencies relative to the U.S. dollar can affect our revenue and operating results due to transactional and translational re-measurement that is reflected in our earnings. Such foreign currency exchange rate fluctuations may be materially impacted by the ongoing COVID-19 pandemic.

As a result of foreign currency exchange rate fluctuations, it could be more difficult to detect underlying trends in our business and operating results. In addition, to the extent that fluctuations in currency exchange rates cause our operating results to differ from our expectations or the expectations of our investors, the trading price of our Class A common stock could be lowered. Our foreign currency exchange policy approves use of certain hedging instruments, including spot transactions, forward contracts, and purchased options with maturity of up to one year. The use, if any, of such hedging instruments may not offset any or more than a portion of the adverse financial effects of unfavorable movements in foreign exchange rates over the limited time the hedges are in place. Moreover, the use of hedging instruments may introduce additional risks if we are unable to structure effective hedges with such instruments.

Our sales are generally more heavily weighted toward the end of each fiscal quarter, which could have an impact on the timing of our billings, revenue, and collections, and on the reporting of such metrics for any given quarter and subsequent quarters.

Our sales cycles are generally more heavily weighted toward the end of each fiscal quarter, with a high volume of sales in the last few weeks and days of the quarter, and can otherwise be dependent on customer purchasing patterns and the timing of particularly large transactions. Any of the foregoing may have an impact on the timing of revenue recognition, calculated billings, and cash collections; may cause significant fluctuations in our operating results and cash flows; may make it challenging for an investor to predict our performance on a quarterly or annual basis; and may prevent us from achieving our quarterly or annual forecasts.

Further, the concentration of contract negotiations in the last few weeks and days of the quarter may require us to expend more in the form of compensation for additional sales operations, legal, and finance employees and contractors. Compression of sales activity to the end of the quarter also greatly increases the likelihood that sales cycles will extend beyond the quarter in which they are forecasted to close for some sizable transactions, which may harm forecasting accuracy and adversely impact new customer acquisition metrics for the quarter in which they are forecasted to close.

Risks Related to Our General Operations

We have recently experienced rapid growth and expect our growth to continue. If we fail to manage our growth effectively, we may be unable to execute our business plan, maintain high levels of service and operational controls, or adequately address competitive challenges.

We have recently experienced a period of rapid growth in our personnel headcount and operations. During the period from January 31, 2016 to October 31, 2021 we grew from 274 employees to 2,332 employees. In addition, we have engaged temporary workers and contractors to supplement our employee base. This growth has made our operations more complex and has placed, and future growth will place, a significant strain on our management, administrative, operational, and financial infrastructure. Our success will depend in part on our ability to manage this growth and complexity effectively.

We anticipate that we will continue to expand our operations and personnel headcount in the near term. To manage the expected growth of our operations and personnel, we will need to continue to improve our operational, financial, and management controls, processes, and documentation, and our reporting systems and procedures. Failure to effectively manage growth or complexity could result in difficulties growing and maintaining our customer base; cost increases; inefficient and ineffective responses to customer needs; delays in developing and deploying new features, integrations, or services; violations of law; breaches of contract; or other operational difficulties. Any of these difficulties could harm our business and operating results.

As a substantial portion of our sales efforts are targeted at enterprise and government customers, our sales cycles may become longer and more expensive, we may encounter implementation and configuration challenges, and we may have to delay revenue recognition for more complicated transactions, all of which could harm our business and operating results.

Our ability to increase revenue and achieve and maintain profitability depends, in large part, on widespread acceptance of our platform by large businesses, government agencies, and other organizations. Sales efforts targeted at enterprise and government customers require acceptance by and support of the customers' knowledge workers and senior management and involve greater costs, longer sales cycles, including complex customer procurement and budgeting considerations, greater competition, increased operational burden, potential reseller or other third-party involvement, and less predictability. In the large enterprise and government agency markets, the customer's decision to use our platform and services can sometimes be an organization-wide decision, in which case, we will likely be required to provide greater levels of customer education to familiarize potential customers with the use and benefits of our platform and services, as well as increased training and support. In addition, larger enterprises and government agencies may demand more features, configuration options, and integration and support services. They may also expect operational changes to satisfy their supplier requirements. As a result of the foregoing factors, these sales opportunities may require us to devote greater sales support, research and development, engineering, customer support, professional services resources, and other internal resources and processes to these customers, resulting in increased costs, lengthened sales cycles, and diversion of sales and professional services resources to a smaller number of customers. Moreover, these larger transactions may require us to delay revenue recognition on some of these transactions until the technical or implementation requirements have been met.

Our growth depends on our ability to expand our sales force domestically and internationally.

In order to increase our revenue and achieve profitability, we must increase the size of our sales force, both in the United States and internationally, to generate additional revenue from new and existing customers. We intend to further increase our number of sales personnel, but we may not be successful in doing so and any such increase may occur at a slower pace than intended.

We believe that there is significant competition for sales personnel with the skills and technical knowledge that we require. Our ability to achieve revenue growth will depend, in large part, on our success in recruiting, training, and retaining sufficient numbers of sales personnel to support our growth. New hires require significant training and may take considerable time before they achieve full productivity, particularly in new sales territories. Our recent hires and planned hires may not become productive as quickly as we expect, and we may be unable to hire or retain sufficient numbers of qualified individuals in the markets where we do business or plan to do business, which may necessitate that we explore new markets to find talent or increase sales targets for existing sales personnel. In addition, as we continue to grow, a large percentage of our sales personnel may be new to our company, our platform, or the collaborative work management industry, which may adversely affect our sales if we cannot train such personnel quickly or effectively. Attrition rates may increase and we may face integration challenges as we continue to seek to expand our sales force. If we are unable to hire and train sufficient numbers of effective sales personnel, or the sales personnel are not successful in obtaining new customers or increasing sales to our existing customer base, our business could be adversely affected.

Our failure to attract, integrate, and retain highly qualified personnel could harm our business.

Our growth strategy depends on our ability to expand our organization with highly skilled personnel. Identifying, recruiting, training, and integrating qualified individuals will require significant time, expense, and attention. In addition to hiring new employees, we must continue to focus on retaining our best employees. Competition for highly skilled personnel is intense. We compete with many other companies for software developers with high levels of experience in designing, developing, and managing cloud-based software, as well as for skilled product development, marketing, sales, and operations professionals. We may not be successful in attracting and retaining the professionals we need, particularly in the greater Seattle area where our headquarters are located. We have from time to time experienced, and we expect to continue to experience, difficulty in hiring and retaining employees with appropriate qualifications. In addition, immigration laws and travel bans may restrict or limit our ability to recruit individuals outside of their countries of citizenship. Any changes to immigration or travel policies that restrain the flow of technical and professional talent may inhibit our ability to recruit and retain highly qualified employees.

Further, many of the companies with which we compete for experienced personnel have greater resources than we have. If we hire employees from competitors or other companies, their former employers may attempt to assert that these employees, alone or with our inducement, have breached their legal obligations, resulting in a diversion of our time and resources. In addition, job candidates and existing employees often consider the value of the equity awards they receive in connection with their employment. If the perceived or actual value of our equity awards declines, it may reduce our ability to recruit and retain highly skilled employees. If we fail to attract new personnel or fail to retain and motivate our current personnel, our business and future growth prospects could be harmed.

If we cannot maintain our corporate culture as we grow, we could lose the innovation, teamwork, and passion that we believe contribute to our success, and our business may be harmed.

We believe that a critical component of our success has been our corporate culture. We have invested substantial time and resources in building our team. As we continue to expand our presence domestically and internationally, we will need to preserve and maintain our corporate culture among a larger number of employees who are dispersed in various geographic regions and the majority of whom are currently, and may for an extended period of time be, working remotely. Any failure to preserve our culture could negatively affect our future success, including our ability to retain and recruit personnel and to effectively focus on and pursue our corporate objectives.

We may not receive significant revenue from our current development efforts for several years, if at all.

Developing our platform is expensive and the investment in such technological development often involves a long return on investment cycle. We incurred research and development expenses of \$41.2 million and \$32.4 million during the three months ended October 31, 2021 and 2020, respectively, and \$116.7 million and \$86.4 million during the nine months ended October 31, 2021 and 2020, respectively. We have made and expect to continue to make significant investments in development, infrastructure, and related opportunities, such as maintaining authorization under FedRAMP. Accelerated product introductions and short product life cycles require high levels of expenditures that could adversely affect our operating results if they are not offset by revenue increases. We believe that we must continue to dedicate significant resources to our development efforts to maintain and improve our customer engagement and competitive position. However, we may not receive significant revenue from these investments for several years, if at all.

We may experience difficulties in accurately predicting optimal pricing necessary to attract new customers and retain existing customers.

We have in the past, changed, and expect in the future that we will from time to time need to change, our published and unpublished pricing and packaging models. We have previously deployed, and may continue to deploy, multiple structures and models of pricing and packaging to serve our wide variety of customers. As the market for our platform and services matures, as competitors introduce new products or platforms that compete with ours, and as we expand into international markets, we may be unable to attract and retain customers at the same price or based on the same pricing and packaging models as we have historically, if at all, and some of our competitors may offer their products at a lower price. Further, we may have difficulty attracting and retaining customers based on new pricing and packaging models, and any new models may inhibit the organic growth that we value from individuals who have traditionally used our products and services as free collaborators. Pricing and packaging decisions may also affect the mix of adoption among our subscription plans and reduce our overall revenue. Moreover, larger enterprises may demand substantial price concessions. As a result, in the future we may be required to reduce our prices, which could harm our operating results.

The loss of one or more of our key customers, or a failure to renew our subscription agreements with one or more of our key customers, could negatively affect our ability to market our platform.

We rely on our reputation and recommendations from key customers in order to promote subscriptions to our platform. The loss of, or failure to renew by, any of our key customers could have a significant effect on our revenue, reputation, and our ability to obtain new customers. In addition, if our customers are acquired by other companies, it could lead to cancellation of such customers' contracts, thereby reducing the number of our existing and potential customers.

If we fail to offer high-quality customer support, our business and reputation may be harmed.

Our customers rely on our customer support organization to respond to inquiries about, and resolve issues with, their use of our platform. We may be unable to respond quickly enough to accommodate short-term increases in customer demand for support services. Increased customer demand for these services could increase costs and harm our operating results. Customers who elect not to purchase enhanced support may be unable to sufficiently address their support issues through self-service, and their support requests may not be prioritized once received by us; this may result in a poor customer experience. In addition, our sales process is highly dependent on the ease of use of our platform, our business reputation, and positive recommendations from our existing customers. Any failure to maintain a high-quality customer support organization, or a market perception that we do not maintain high-quality customer support, could harm our reputation, our ability to sell to existing and prospective customers, and our business.

Our long-term growth depends in part on being able to expand internationally on a profitable basis.

Historically, we have generated a majority of our revenue from customers in the United States. We are expanding internationally and plan to continue to expand our international operations as part of our growth strategy. There are certain risks inherent in conducting international business, including:

- fluctuations in foreign currency exchange rates or adding additional currencies in which our sales are denominated;
- new, or changes in existing, regulatory requirements;
- health or similar issues, including epidemics or pandemics such as the current outbreak of COVID-19;
- tariffs, export and import restrictions, restrictions on foreign investments, sanctions, and other trade barriers or protection measures;
- costs of localizing our platform and services;
- lack of or delayed acceptance of localized versions of our platform and services;
- difficulties in and costs of staffing, managing, and operating our international operations;
- tax issues, including restrictions on repatriating earnings, and with respect to our corporate operating structure and intercompany arrangements;
- weaker intellectual property protection;
- the difficulty of, and burden and expense involved with, compliance with privacy, data protection, data storage and processing, and information security laws and regulations, such as the General Data Protection Regulation 2016/679 (“GDPR”);
- economic weakness or currency-related crises;
- the burden of complying with a wide variety of laws and regulations for foreign operations, including the U.S. Foreign Corrupt Practices Act (“FCPA”) of 1977, as amended, the U.K. Bribery Act 2010, import and export control laws, tariffs, trade barriers, economic sanctions and other regulatory or contractual limitations on our ability to sell products and services in certain foreign markets, and the risks and costs of non-compliance;
- generally longer payment cycles and greater difficulty in collecting accounts receivable;
- our ability to adapt to sales practices and customer requirements in different cultures;
- lack of brand recognition;

- political instability, uncertainty, or change, such as that caused by and occurring with the United Kingdom's departure from the European Union ("Brexit");
- security risks in the countries where we are doing business; and
- our ability to maintain our relationship with resellers to distribute our platform internationally.

Any of these risks could adversely affect our business. For example, compliance with laws and regulations applicable to our international operations increases our cost of doing business in foreign jurisdictions. We may be unable to keep current with government requirements as they change from time to time. Failure to comply with these laws or regulations could have adverse effects on our business. In addition, in many foreign countries it is common for others to engage in business practices that are prohibited by our internal policies and procedures or applicable U.S. laws and regulations. As we grow, we continue to implement compliance procedures designed to prevent violations of these laws and regulations. There can be no assurance that all of our employees, contractors, resellers, and agents will comply with our compliance policies, or applicable laws and regulations. Violations of laws or compliance policies by our employees, contractors, resellers, or agents could result in delays in revenue recognition, financial reporting misstatements, fines, penalties, or the prohibition of the import or export of our products and services, and could have a material adverse effect on our business and results of operations.

Further, our limited experience in operating our business internationally increases the risk that any potential future expansion efforts that we may undertake will not be successful. If we invest substantial time and resources to expand our international operations and are unable to do so successfully, or in a timely manner, our business and results of operations will suffer.

Any failure to protect our intellectual property rights could impair our ability to protect our proprietary technology and our brand.

Our success and ability to compete depend in part upon our intellectual property. Unauthorized use of our intellectual property or a violation of our intellectual property rights by third parties may damage our brand and our reputation. In addition to certain patents and patent applications, we primarily rely on a combination of copyright, trademark, and trade secret protections, and confidentiality and license agreements with our employees, customers, partners, and others to protect our intellectual property rights. However, the steps we take to protect our intellectual property rights may be inadequate. We make business decisions about when to seek patent protection for a particular technology and when to rely upon trade secret protection, and the approach we select may ultimately prove to be inadequate. Even in cases where we seek patent protection, there is no assurance that patents may be granted or that awarded patents will effectively protect every significant feature of our products and services. We also believe that the protection of our trademark rights is an important factor in product recognition, protecting our brand, and maintaining goodwill. If we do not adequately protect our rights in our trademarks from infringement and unauthorized use, any goodwill that we have developed in those trademarks could be lost or impaired, which could harm our brand and our business.

In order to protect our intellectual property rights, we may be required to spend significant resources to monitor and protect these rights. Litigation brought to protect and enforce our intellectual property rights could be costly, time-consuming, and distracting to management, and could result in the impairment or loss of portions of our intellectual property. Any efforts to enforce our intellectual property rights may be met with defenses, counterclaims, and countersuits attacking the validity and enforceability of our intellectual property rights. Accordingly, we may not be able to prevent third parties from infringing upon or misappropriating our intellectual property. Remedies following any such infringement or misappropriation, including injunctive relief, may be insufficient to enjoin the infringement or misappropriation or otherwise address the damages sustained. Our failure to secure, protect, and enforce our intellectual property rights could seriously damage our brand and our business.

We may be sued by third parties for alleged infringement of their proprietary rights.

There is considerable patent and other intellectual property development activity in our industry. Our future success depends on our technology, platform, and services not infringing upon the intellectual property rights of others. Our competitors, as well as a number of other entities, including non-practicing entities and individuals, may own or claim to own intellectual property relating to our industry. From time to time, our competitors or other third parties may claim that we are infringing upon or misappropriating their intellectual property rights, and we may be found to be infringing upon such rights. Additionally, we rely on the feedback provided by our customers and users to inform decisions on potential changes to our products and services, and we negotiate agreements with our customers that may include license rights to intellectual property developed while performing professional services. Such feedback and license rights may provide a customer or user a basis for competing against us or contesting ownership of current or future intellectual property.

Third parties have occasionally alleged that our technology infringes upon their intellectual property rights. In the future others may raise the same or similar claims and may assert claims against us, even if we are unaware of their intellectual property rights. Any claims or litigation could cause us to incur significant expenses and, if successfully asserted against us, could require that we pay substantial damages or ongoing royalty payments, prevent us from offering our platform or services or from using certain technologies, require that we implement expensive workarounds, or require that we comply with other unfavorable conditions.

We may incur substantial costs or take material action to resolve claims or litigation, whether or not successfully asserted against us, which could include payment of significant settlement, royalty, or license fees; modification of our products and services; or issuance of refunds to customers. We may also be obligated, without contractual limitation of liability provisions to limit our exposure, to indemnify our customers or business partners for such claims or litigation. Even if we were to prevail in such a dispute, any litigation regarding our intellectual property could be costly and time consuming and divert the attention of our management and key personnel from our business operations. During the course of any litigation, we may make announcements regarding the results of hearings and motions and other interim developments, which could cause the market price of our Class A common stock to decline if securities analysts and investors view those announcements negatively.

The requirements of being a public company, including maintaining adequate internal control over our financial and management systems, may strain our resources, divert management's attention, and affect our ability to attract and retain executive management and qualified board members.

As a public company we incur significant legal, accounting, and other expenses. We are subject to reporting requirements of the Securities Exchange Act of 1934, as amended, ("Exchange Act"), the Sarbanes-Oxley Act of 2002 ("Sarbanes-Oxley Act"), the rules subsequently implemented by the U.S. Securities and Exchange Commission ("SEC"), the rules and regulations of the listing standards of the New York Stock Exchange ("NYSE"), and other applicable securities rules and regulations. Compliance with these rules and regulations will likely strain our financial and management systems, internal controls, and employees.

The Exchange Act requires, among other things, that we file annual, quarterly, and current reports with respect to our business and operating results. Moreover, the Sarbanes-Oxley Act requires, among other things, that we maintain effective disclosure controls and procedures, and internal control, over financial reporting. In order to maintain and, if required, improve our disclosure controls and procedures, and internal control, over financial reporting to meet this standard, significant resources and management oversight may be required.

In addition, we are required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act. We have incurred and expect to continue to incur significant expenses and devote substantial management effort toward ensuring compliance with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act. As a result of the complexity involved in complying with the rules and regulations applicable to public companies, our management's attention may be diverted from other business concerns, which could harm our business, results of operations, and financial condition. To assist us in complying with these requirements we may need to hire more employees in the future, or engage outside consultants, which will increase our operating expenses.

Public company director and officer liability insurance is expensive, and we have recently been, and likely will continue to be, required to incur higher costs to obtain and maintain the same or similar coverage. These factors could also make it more difficult for us to attract and retain qualified members of our board of directors and qualified executive officers.

As reported in our Annual Report on Form 10-K for the fiscal year ended January 31, 2020, we had material weaknesses in our internal control over financial reporting. While we remediated these material weaknesses during the fiscal year ended January 31, 2021 and concluded that our internal control over financial reporting was effective as of January 31, 2021, such remediation does not guarantee that our remediated controls will continue to operate properly, or that we will not experience another material weakness in the future.

Internal controls related to the operation of technology systems are critical to maintaining adequate internal control over financial reporting. As disclosed in Part II, Item 9A of our Annual Report on Form 10-K for the fiscal year ended January 31, 2020, filed with the SEC on March 31, 2020, management had identified material weaknesses evidencing an ineffective control environment relating to: (i) certain revenue and billing processes; (ii) ineffective information technology general controls in the areas of user access, program change-management, and computer operations controls over certain information technology systems that support our financial reporting processes; and (iii) insufficient resources with an appropriate level of controls knowledge and expertise commensurate with our financial reporting requirements. As a result, management concluded that our internal control over financial reporting was not effective as of January 31, 2020. As of January 31, 2021, these material weaknesses had been remediated and we concluded that our internal control over financial reporting was effective. However, we recognize that maintaining adequate internal control over financial reporting will continue to require significant management attention and expense, and we cannot assure you that we will not identify similar material weaknesses in the future. If new material weaknesses are identified in our internal controls then the accuracy and timing of our financial reporting may be adversely affected, we may be unable to maintain compliance with securities law requirements regarding the timely filing of periodic reports or the NYSE listing requirements, investors may lose confidence in our financial reporting, and our share price could decline.

We intend to evaluate acquisitions or investments in third-party technologies and businesses, but we may not realize the anticipated benefits from, and may have to pay substantial costs related to, any acquisitions, mergers, joint ventures, or investments that we undertake.

As part of our business strategy, we continually evaluate acquisitions of, or investments in, a wide array of potential strategic opportunities, including third-party technologies and businesses. We may be unable to identify suitable transaction candidates in the future or to make these transactions on a commercially reasonable basis, or at all. The evaluation of potential acquisitions and investments requires diversion of time and resources from normal business operations and may cause us to incur fees owed to outside advisors. Any transactions that we enter into could be material to our financial condition and results of operations. Such transactions may not result in the intended benefits to our business, and we may not successfully evaluate or utilize any acquired technology, offerings, or personnel, or accurately forecast the financial effect of a transaction. Although we conduct reasonably extensive due diligence of any transaction target entity, such due diligence may not reveal every concern that may exist with the target entity, the proposed transaction, and any subsequent integration. The process of acquiring a company or integrating an acquired company, business, technology, or personnel into our own company is subject to various risks and challenges, including:

- diverting management time and focus from operating our business to acquisition integration;
- disrupting our respective ongoing business operations;
- customer and industry acceptance of the acquired company's offerings;
- implementing or remediating the controls, procedures, and policies of the acquired company;
- integrating acquired technologies into our own platform and technologies;

- our ability to ensure that we maintain quality and security standards for the acquired technology consistent with our brand;
- retaining and integrating acquired employees;
- failing to maintain important business relationships and contracts;
- failing to realize any anticipated synergies;
- using cash or equity that we may need in the future to operate our business or incurring debt on terms unfavorable to us or that we are unable to pay;
- liability for activities of the acquired company before the acquisition;
- liability arising from contracts entered into by the acquired company before the acquisition, which may include contracts that are in active breach by the company or another party thereto, or contracts which may not align with our acceptable contracting principles or liability limitations;
- litigation or other claims arising in connection with the acquired company;
- impairment charges associated with goodwill and other acquired intangible assets; and
- other unforeseen operating difficulties and expenditures.

Our limited experience acquiring companies may increase these risks. Our failure to address these risks or other problems we encounter with our acquisitions and investments could result in a failure to realize the anticipated benefits of such acquisitions or investments, unanticipated liabilities, and harm to our business.

Risks Related to Ownership of Our Common Stock

The market price of our Class A common stock has been and will likely continue to be volatile, and you could lose all or part of your investment.

The market price of our Class A common stock has been, and will likely continue to be, volatile. Since shares of our Class A common stock were sold in our IPO at a price of \$15.00 per share, our stock price has ranged from \$18.06 to \$85.65 through November 30, 2021. In addition to the factors discussed in this Quarterly Report on Form 10-Q, the trading prices of the securities of technology companies in general have been highly volatile.

The market price of our Class A common stock may continue to fluctuate significantly in response to numerous factors, many of which are beyond our control, including:

- price and volume fluctuations in the overall stock market or in the trading volume of our shares or the size of our public float;
- negative publicity related to the real or perceived quality of our platform, as well as the failure to timely launch new features, integrations, or services that gain market acceptance;
- actual or anticipated fluctuations in our revenue or other operating metrics;
- changes in the financial projections we provide to the public or our failure to meet financial projections;
- failure of securities analysts to initiate or maintain coverage of our company, changes in financial estimates by any securities analysts who follow our company, or our failure to meet the estimates or the expectations of investors;
- recruitment or departure of key personnel;
- changes in accounting standards, policies, guidelines, interpretations, or principles;

- the economy as a whole and market conditions in our industry;
- rumors and market speculation involving our company or other companies in our industry;
- actual or perceived failures or breaches of security or privacy, and the costs associated with responding to and addressing any such actual or perceived failures or breaches;
- announcements by us or our competitors of significant innovations, acquisitions, strategic partnerships, joint ventures, or capital commitments;
- new laws or regulations or new interpretations of existing laws or regulations applicable to our business;
- indemnity demands or lawsuits threatened or filed against us;
- other events or factors, including those resulting from war, incidents of terrorism, public health concerns or epidemics (such as the COVID-19 pandemic), or responses to these events;
- sales or distributions of our Class A common stock held by our large institutional shareholders; and
- sales of additional shares of our Class A common stock by us or our shareholders.

In addition, the stock markets have experienced extreme price and volume fluctuations that have affected and continue to affect the market prices of equity securities of many companies. In particular, the stock markets have been volatile in response to the COVID-19 pandemic, and extreme volatility has also resulted for companies that have been targeted for “short squeeze” opportunities. Stock prices of many companies have fluctuated in a manner unrelated or disproportionate to the operating performance of those companies. In the past, shareholders have instituted securities class action litigation following periods of market volatility. If we were to become involved in securities litigation, it could subject us to substantial costs, divert resources and the attention of management from our business, and harm our business.

Sales of a substantial amount of our Class A common stock in the public markets, particularly sales by our directors, executive officers, and significant shareholders, or the perception that these sales may occur, may cause the market price of our Class A common stock to decline.

Shares held by our employees, executive officers, directors, and the majority of our security holders are currently tradeable in the public market, subject in certain cases to volume limitations under Rule 144 of the Securities Act of 1933, as amended (the “Securities Act”), various vesting agreements, as well as our insider trading policy. Sales of a substantial number of such shares, or the perception that such sales may occur, could cause our market price to fall or make it more difficult for you to sell your Class A common stock at a time and price that you deem appropriate.

In addition, as of October 31, 2021, we had options outstanding that, if fully exercised or settled, would result in the issuance of 5,237,479 shares of Class A common stock, and restricted stock units (“RSUs”) outstanding that, if fully settled, would result in the issuance of 5,688,841 shares of Class A common stock. We expect that all of the shares of Class A common stock issuable upon the exercise of stock options or settlement of RSUs, and the shares reserved for future issuance under our equity incentive plans, will be registered for public resale under the Securities Act. Accordingly, these shares will be freely tradable in the public market upon issuance subject to applicable vesting requirements.

In addition, certain holders of our Class A common stock are, subject to certain conditions, entitled under contracts providing for registration rights, to require us to register shares owned by them for public sale in the United States.

We may also issue our shares of common stock or securities convertible into shares of our common stock from time to time in connection with a financing, acquisition, investment, or otherwise. Any further issuance could result in substantial dilution to our existing shareholders and cause the market price of our Class A common stock to decline.

If securities or industry analysts do not publish research, or publish inaccurate or unfavorable research, about our company, the price and trading volume of our Class A common stock could decline.

The trading market for our Class A common stock will depend in part on the research and reports that securities or industry analysts publish about our company, our market, and our competitors. We do not have any control over these analysts. If one or more of the analysts who cover us downgrade our shares or publish inaccurate or unfavorable research about our business, our share price would likely decline. If one or more of these analysts cease coverage of our company or fail to publish reports on our company on a regular basis, demand for our Class A common stock could decrease, which might cause our market price or trading volume to decline.

Provisions in our corporate charter documents and under Washington law could make an acquisition of our company, which may be beneficial to our shareholders, more difficult and may prevent attempts by our shareholders to replace or remove our current management.

Provisions in our amended and restated articles of incorporation and bylaws may discourage, delay, or prevent a merger, acquisition, or other change in control of our company that shareholders may consider favorable, including transactions in which you might otherwise receive a premium for your shares. These provisions could also limit the price that investors might be willing to pay in the future for shares of our common stock, thereby depressing the market price of our common stock. In addition, because our board of directors is responsible for appointing the members of our management team, these provisions may frustrate or prevent any attempts by our shareholders to replace or remove our current management by making it more difficult for shareholders to replace members of our board of directors. Among other things, these provisions:

- established a classified board of directors so that not all members of our board are elected at one time;
- permit only the board of directors to establish the number of directors and fill vacancies on the board;
- eliminated the ability of our shareholders to call special meetings of shareholders;
- prohibit shareholder action by written consent unless the consent is unanimous, which requires all shareholder actions to be taken at a meeting of our shareholders;
- established advance notice requirements for nominations for election to our board or for proposing matters that can be acted upon by shareholders at annual shareholder meetings;
- prohibit cumulative voting;
- provide that directors may only be removed “for cause” and only with the approval of two-thirds of the voting power of our outstanding shares;
- require supermajority voting to amend some provisions in our amended and restated articles of incorporation and amended and restated bylaws; and
- authorized the issuance of “blank check” preferred stock that our board could use to implement a shareholder rights plan, also known as a “poison pill.”

In addition, under Washington law, shareholders of public companies can act by written consent only by obtaining unanimous written consent. This limit on the ability of our shareholders to act by less than unanimous consent may lengthen the amount of time required to take shareholder action.

Moreover, because we are incorporated in the State of Washington, we are governed by the provisions of Chapter 23B.19 of the Washington Business Corporation Act (“WBCA”), which prohibits a “target corporation” from engaging in any of a broad range of business combinations with any “acquiring person,” which is defined as a person or group of persons who beneficially owns 10% or more of the voting securities of the “target corporation,” for a period of five years following the date on which the shareholder became an “acquiring person.”

Any of these provisions of our charter documents or Washington law could, under certain circumstances, depress the market price of our Class A common stock. See Exhibit 4.3 to our Annual Report on Form 10-K for the fiscal year ended January 31, 2021 titled “Description of Securities Under Section 12 of the Securities Exchange Act of 1934, as amended.”

Our amended and restated articles of incorporation designate the federal and state courts located within the State of Washington as the sole and exclusive forum for certain types of actions and proceedings that may be initiated by our shareholders, which could limit our shareholders’ ability to obtain a favorable judicial forum for disputes with us or our directors, officers, employees, or agents.

Our amended and restated articles of incorporation provide that, unless we consent in writing to an alternative forum, the federal courts located in the State of Washington are the sole and exclusive forum for claims under the Securities Act, and the federal and state courts located within the State of Washington (“Washington Courts”), are the sole and exclusive forum for any internal corporate proceedings (as defined in the WBCA), subject to such courts having personal jurisdiction over the indispensable parties named as defendants therein and the claim not being one that is vested in the exclusive jurisdiction of a court or forum other than in Washington Courts, or for which the Washington Courts do not have subject matter jurisdiction. Any person purchasing or otherwise acquiring any interest in any shares of our capital stock shall be deemed to have notice of and to have consented to this provision of our amended and restated articles of incorporation.

This choice of forum provision may limit our shareholders’ ability to bring a claim in a judicial forum that it finds favorable for internal corporate proceedings, which may discourage such lawsuits even though an action, if successful, might benefit our shareholders. Shareholders who do bring a claim in Washington Courts could face additional litigation costs in pursuing any such claim, particularly if they do not reside in or near the State of Washington. Washington Courts may also reach different judgments or results than would other courts, including courts where a shareholder considering an action may be located or would otherwise choose to bring the action, and such judgments or results may be more favorable to us than to our shareholders. Alternatively, if a court were to find this provision of our amended and restated articles of incorporation inapplicable to, or unenforceable in respect of, one or more of the specified types of actions or proceedings, we may incur additional costs associated with resolving such matters in other jurisdictions, which could have an adverse effect on our business, financial condition or results of operations.

Risks Related to Governmental Regulation including Taxation

Changes in privacy laws and standards may reduce the effectiveness of our platform and harm our business.

Our customers are able to use our products and services to collect, use, and otherwise process personal information for their own purposes and we may collect, use, and otherwise process personal information for our own purposes. Privacy laws regulating personal information vary significantly by jurisdiction, including in individual U.S. states, and are particularly stringent in Europe and certain other foreign jurisdictions such as Brazil, Canada, and Japan. Further, new laws are being introduced and interpretations of existing laws are changing. For example, obligations required to utilize certain valid transfer mechanisms under the GDPR have been updated, and these updates may impact the ways in which we are permitted to process and transfer personal information from the European Economic Area. Reactions to these developments by data protection authorities and customers have varied and have included introducing new standards and requirements for service providers like us. For example, some customers may now request or require regional data hosting and local data processing, or the availability of certain security features to accompany their purchase or use of our products and services. Further, privacy advocates and industry groups may establish or propose new or different self-regulatory standards that could place additional burdens on service providers like us. The costs of compliance with, and other burdens imposed by laws and standards may limit or slow the use and adoption of our products and services, restrict our ability to make product or operational improvements, limit our ability to process certain data, restrict our ability to offer our products and services in certain jurisdictions, and create operational burden, any of which could harm our business. Moreover, if we or our service providers fail to comply with relevant laws and standards, our reputation may be harmed and we may be subject to regulatory investigations, litigation, and significant fines, penalties, or liabilities.

Changes in laws and regulations related to the Internet or changes in the Internet infrastructure itself may diminish the demand for our platform and services and could harm our business.

U.S. federal, state, or foreign government bodies or agencies have in the past adopted, and may in the future adopt, laws or regulations relating to Internet usage. The adoption of any laws or regulations that could reduce the growth, popularity, or use of the Internet, including laws or practices regarding Internet neutrality, could decrease the demand for, or the usage of, our platform and services, increase our cost of doing business, and harm our operating results. Changes in these laws or regulations could also require us to modify our platform in order to comply. In addition, government agencies or private organizations may begin to impose taxes, fees, or other charges for accessing the Internet or for commerce conducted via the Internet. These laws or charges could limit the growth of Internet-related commerce or communications, or reduce demand for Internet-based services and platforms such as ours.

Further, we use email as part of our platform for communication and workflow management. Internet service providers continually develop new technologies to filter messages deemed to be unwanted before they reach users' inboxes, which may interfere with the deliverability of email messages from our platform. Government regulations and laws regarding electronic communications, evolving practices regarding the use of email, or misuse of our email features by customers, could restrict our use of email. Any deliverability issues or restrictions on our use of email would reduce functionality of our platform, impact user adoption, and harm our business.

In addition, the use of the Internet and, in particular, cloud-based solutions, could be adversely affected by delays in the development or adoption of new standards and protocols to handle increased demands of Internet activity, security, reliability, cost, ease of use, accessibility, and quality of service. The performance of the Internet has been adversely affected by "viruses," "worms," and similar malicious programs; businesses have experienced a variety of outages and other delays as a result of damage to Internet infrastructure. These issues could diminish the overall attractiveness of, and demand for, our platform.

We could be subject to additional sales tax or other tax liabilities.

State, local, and foreign taxing jurisdictions have differing rules and regulations governing sales, use, value added, and other taxes, and these rules and regulations are subject to varying interpretations that may change over time. In particular, the applicability of sales taxes to our platform in various jurisdictions is unclear. It is possible that we could face tax audits and that our liability for these taxes could exceed our estimates as taxing authorities could still assert that we are obligated to collect additional amounts as taxes from our customers and remit those taxes to those authorities. Additionally, we do not collect such transaction taxes in all jurisdictions in which we have sales, based on our understanding that such taxes are not applicable or an exemption from such taxes applies. If we become subject to tax audits in these jurisdictions and a successful assertion is made that we should be collecting sales, use, value added, or other taxes where we have not historically done so, it could result in substantial tax liabilities for past sales; discourage customers from purchasing our products; or otherwise harm our business, results of operations, and financial condition.

Further, an increasing number of states and foreign jurisdictions have considered or adopted laws or administrative practices, with or without notice, that impose new taxes on all or a portion of gross revenue or other similar amounts or impose additional obligations on remote sellers to collect transaction taxes such as sales, consumption, value added, or similar taxes. If new laws are adopted in a jurisdiction where we do not collect such taxes, we may not have sufficient lead time to implement systems and processes to collect these taxes. Failure to comply with such laws or administrative practices, or a successful assertion by such states or foreign jurisdictions requiring us to collect taxes where we do not, could result in substantial tax liabilities, including for past sales, as well as penalties and interest. In addition, if the tax authorities in jurisdictions where we are already subject to sales tax or other indirect tax obligations were to successfully challenge our positions, our tax liability could increase substantially.

Our ability to use our net operating loss to offset future taxable income may be subject to certain limitations.

As of January 31, 2021, we had U.S. federal net operating loss carryforwards (“NOLs”), of approximately \$390.6 million. In general, under Section 382 of the Internal Revenue Code of 1986, as amended (“Code”), a corporation that undergoes an “ownership change” is subject to limitations on its ability to utilize its NOLs to offset future taxable income. As a result, our existing NOLs may be subject to limitations arising from previous ownership changes.

Future changes in our stock ownership, the causes of which may be outside of our control, could result in an ownership change under Section 382 of the Code. Our NOLs may also be impaired under state laws. Furthermore, our ability to utilize NOLs of companies that we may acquire in the future may be subject to limitations. There is also a risk that due to regulatory changes, such as suspensions on the use of NOLs, or other unforeseen reasons, our existing NOLs could expire or otherwise be unavailable to offset future income tax liabilities. For these reasons, we may not be able to realize a tax benefit from the use of our NOLs, whether or not we attain profitability.

Changes in tax laws or regulations could be enacted or existing tax laws or regulations could be applied to us or our customers in a manner that could increase the costs of our platform and services and harm our business.

Income, sales, use, value added, or other tax laws, statutes, rules, regulations, or ordinances could be enacted or amended at any time, possibly with retroactive effect, and could be applied solely or disproportionately to products and services provided over the Internet. These enactments or amendments could reduce our sales activity by increasing gross sales prices, inclusive of tax, and ultimately harm our operating results and cash flows.

Additionally, any changes to, or the reform of, current U.S. tax laws that may be enacted in the future could impact the tax treatment of our foreign earnings. Currently, we have not accumulated significant foreign earnings; however, this could change on a go-forward basis as our international operations continue to develop. In addition, due to the expansion of our international business activities, any changes in the U.S. taxation of such activities may increase our worldwide effective tax rate and adversely affect our financial position and results of operations.

The application of U.S. federal, state, local, and international tax laws to services provided electronically is unclear and continuously evolving. Existing tax laws, statutes, rules, regulations, or ordinances could be interpreted or applied adversely to us, possibly with retroactive effect, which could require us or our customers to pay additional tax amounts, as well as require us or our customers to pay fines or penalties, as well as interest for past amounts. If we are unsuccessful in collecting such taxes due from our customers, we could be held liable for such costs, thereby adversely affecting our operating results and harming our business.

Failure to comply with Federal Acquisition Regulation clauses or anti-corruption and anti-money laundering laws, including the FCPA and similar laws associated with our activities outside of the United States, could subject us to penalties and other adverse consequences.

We are subject to contractual clauses promulgated under the Federal Acquisition Regulations (“FAR”), the FCPA, the U.S. domestic bribery statute contained in 18 U.S.C. § 201, the U.S. Travel Act, the USA PATRIOT Act, the U.K. Bribery Act 2010, and possibly other anti-bribery and anti-money laundering laws in countries in which we conduct activities. We face significant risks if we fail to comply with the FCPA and other anti-corruption laws that prohibit companies and their employees and third-party intermediaries from promising, authorizing, offering, or providing, directly or indirectly, improper payments or anything of value to foreign government officials, political parties, and private-sector recipients for the purpose of obtaining or retaining business, directing business to any person, or securing any advantage. In many foreign countries, particularly in countries with developing economies, it may be a local custom that businesses engage in practices that are prohibited by the FCPA or other applicable laws and regulations.

In addition, we use various third parties to sell our products and services and conduct our business abroad and with the federal government. We or our third-party intermediaries may have direct or indirect interactions with officials and employees of government agencies or state-owned or affiliated entities and we can be held liable for the corrupt or other illegal activities of these third-party intermediaries, and our employees, representatives, contractors, partners, and agents, even if we do not explicitly authorize such activities. We have implemented an anti-corruption compliance program and adopted an anti-corruption policy, but we cannot assure you that all our employees and agents, as well as those companies to which we outsource certain of our business operations, will comply with our policies and applicable law, and we may be ultimately held responsible for any such non-compliance.

Any breach of applicable FAR clauses or violation of the FCPA or the laws underlying the applicable FAR clauses, other applicable anti-corruption laws, or anti-money laundering laws could result in whistleblower complaints, adverse media coverage, investigations, loss of export privileges, severe criminal or civil sanctions and, in the case of the FCPA, suspension or debarment from U.S. government contracts, any of which could have a materially adverse effect on our reputation, business, operating results, and prospects. In addition, responding to any enforcement action may result in a significant diversion of management's attention and resources and significant defense costs and other professional fees.

Governmental export or import controls could limit our ability to compete in foreign markets and subject us to liability if we violate them.

Our products and services may be subject to U.S. export controls, and we incorporate encryption technology into certain features. U.S. export controls may require submission of a product classification and annual or semi-annual reports. Governmental regulation of encryption technology and regulation of imports or exports of encryption products, or our failure to obtain required import or export authorization for our products and services, when applicable, could harm our international sales and adversely affect our revenue. Compliance with applicable regulatory requirements regarding the export of our products and services may create delays in the introduction of our feature releases in international markets, prevent our customers with international operations from using our platform and services or, in some cases, prevent the export of our products and services to some countries or regions altogether. If we fail to comply with such regulations we may be subject to criminal and civil penalties.

Furthermore, export control laws and economic sanctions prohibit the shipment of certain products and services to countries, governments, and persons identified by government sanction programs. If we fail to comply with export control regulations and such economic sanctions or fail to maintain controls sufficient to monitor our compliance on an ongoing basis, we may be fined or other penalties could be imposed, including a denial of certain export privileges. While our controls and policies are designed to prevent the shipment of certain products and services to countries, governments, and persons identified by government sanction programs, we may not be able to prevent such shipment from occurring, and these controls may not be fully effective.

Moreover, any new export or import restrictions, new legislation, or shifting approaches in the enforcement or scope of existing regulations could result in decreased use of our products or services by, or in our decreased ability to export or sell our services or access to our platform to, existing or potential customers with international operations. Any decreased use of our products or services, or limitation on our ability to export or sell our services or access to our platform, would likely adversely affect our business.

General Risk Factors

The loss of one or more of our key personnel could harm our business.

Our success depends largely upon the continued service of our senior management team, which provides leadership and contributions in the areas of product development, operations, security, marketing, sales, customer support, finance and accounting, legal, and compliance. From time to time, there may be changes in our senior management team resulting from the hiring or departure of executives, which could disrupt our business. Further, if any of our senior management team becomes subject to significant illness, including related to COVID-19, they may be unable to provide leadership and contributions at pre-existing levels until fully recovered.

We do not have employment agreements with any member of our senior management team, and we do not maintain key person life insurance for any employee. The loss of one or more of our key employees or members of our senior management team, especially our President and Chief Executive Officer, Mark P. Mader, may be disruptive to our business.

Contractual disputes or commitments, including indemnity obligations, may be costly, time-consuming, may result in contract or relationship terminations, and could harm our reputation.

The sale of our products and services to customers, and our engagements with other vendors and partners, are contract intensive and we are a party to contracts globally. Contract terms with such parties are not always standardized and may be subject to differing interpretations, which could result in contractual disputes. Our contracts with customers contain a wide variety of operational commitments, including security and privacy obligations and regulatory compliance requirements. If we fail to meet such commitments; if our customers notify us of an alleged contract breach, make claims for damages arising from their use of our platform, or otherwise dispute any provision under our contracts, the resolution of any such failure, disputes, or claims in a manner adverse to us could negatively affect our operating results. Even resolution of such issues in a manner favorable to us could negatively affect our operating results due the costs associated with defending or enforcing our contractual rights.

Further, certain of our customer agreements contain service level commitments. If we are unable to meet the stated service level commitments, including uptime requirements, we may be contractually obligated to provide these affected customers with service credits or refunds which could significantly affect our revenue in the period in which the uptime failure occurs or the period in which the credits are due. We could also face subscription terminations, which may significantly affect both our current and future revenue. We have issued credits and other recompense to customers in the past based on outages experienced by our platform. Additional service level failures could damage our reputation, which would also affect our future revenue and operating results.

Our agreements with customers, vendors, and partners may also include provisions under which we agree to provide certain defense and indemnity obligations for losses suffered or incurred as a result of third-party claims of intellectual property infringement or other liabilities relating to or arising from our contractual obligations. Indemnity payments and defense costs may be substantial and could harm our business, operating results, and financial condition. Any dispute involving a customer and relating to such indemnity obligations could have adverse effects on our relationship with that customer and other existing or potential customers, and may harm our business and operating results. There can be no assurance that contractual provisions will protect us from liability for damages in the event we are sued by parties with which we contract, or if we are called upon to fulfill indemnification obligations.

We may be subject to litigation or regulatory proceedings for a variety of claims, which could adversely affect our results of operations, harm our reputation, or otherwise negatively impact our business.

From time to time, we may be involved as a party to, or an indemnitor in, disputes or regulatory inquiries that arise in the ordinary course of business. These may include alleged claims, lawsuits, and proceedings regarding labor and employment issues, commercial disagreements, securities law violations, merger and acquisition activity, and other matters. For example, we recently settled a lawsuit seeking indemnification from the Company in connection with a lawsuit against a former director and shareholder to which we are not a party. We expect that the number and significance of these potential disputes may increase as our business expands and our company grows larger.

Although we carry general liability, employment practices, and director and officer liability insurance coverage, our insurance may not cover all potential claims to which we are exposed or may not be adequate to indemnify us for all liability that may be imposed. Any claims made against us, whether meritorious or not, could be time consuming, result in costly litigation, require significant amounts of management time, and result in the diversion of significant operational resources. Because litigation is inherently unpredictable, we cannot assure you that the results of any of these actions will not have a material adverse effect on our business, financial condition, results of operations, and prospects.

Our reported financial results may be harmed by changes in the accounting principles generally accepted in the United States.

Generally accepted accounting principles in the United States are subject to interpretation by the Financial Accounting Standards Board, the SEC, and various bodies formed to promulgate and interpret appropriate accounting principles. A change in these principles or interpretations could have a significant effect on our reported financial results, and may even affect the reporting of transactions completed before the announcement or effectiveness of a change. Other companies in our industry may apply these accounting principles differently than we do, adversely affecting the comparability of our consolidated financial statements.

Adverse societal, economic, and market conditions, political developments, and reductions in productivity spending may harm our business.

Our business depends on the overall demand for cloud-based collaborative work management platforms and on the economic health of our current and prospective customers. The United States has experienced cyclical downturns from time to time that have resulted in a significant weakening of the economy, more limited availability of credit, a reduction in business confidence and activity, and other difficulties that may affect one or more of the industries to which we sell subscriptions and services.

Further, political developments impacting government spending and international trade, including government shutdowns in the United States, Brexit and other governmental changes, and trade disputes and tariffs, in particular with China, may negatively impact markets and cause weaker macroeconomic conditions. Such conditions have created economic, operational, and political uncertainty, including volatility in global financial markets and the value of foreign currencies. The impact of Brexit and other governmental changes may not be fully realized for several years or more, and uncertainty in their effects may cause some of our customers or potential customers to curtail spending and may ultimately result in new regulatory, operational, and cost challenges to our global operations. These adverse conditions could result in reductions in sales of our platform, longer sales cycles, reductions in subscription duration and value, slower adoption of new technologies, and increased price competition. Any of these events would likely have an adverse effect on our business, operating results, and financial position.

Our operations expose us to risks associated with public health crises, such as the COVID-19 pandemic, which could harm our business and cause our operating results to suffer. COVID-19 has created significant worldwide operational and economic volatility, uncertainty, and disruption, and the extent to which the COVID-19 pandemic will adversely impact our business is highly uncertain, rapidly changing, and cannot be accurately predicted.

In addition, the COVID-19 pandemic has significantly impacted areas where we operate and areas of customer and user concentration. The impact of the COVID-19 pandemic has limited, for an indefinite period of time, the business activities of our employees, partners, and customers, including due to shutdowns that have been and may continue to be requested or mandated by government authorities, or due to safety measures implemented by businesses themselves. Our response in taking precautions against COVID-19 has required our employees to utilize alternative working arrangements and has restricted our employees' ability to travel. The ongoing effects of these indefinite travel restrictions and alternative working arrangements are unknown, may negatively impact the productivity of our employee base, may have a disproportionately negative impact on our sales and operations functions, and may result in adverse tax consequences, all of which could have an adverse effect on our business, operating results, and financial condition. The COVID-19 pandemic has also resulted in certain government closures and supply chain disruptions, which has impacted specific areas of our business.

Continued uncertainty due to the COVID-19 pandemic, as well as general economic uncertainty, associated macroeconomic conditions, and social unrest make it extremely difficult for us and our customers to accurately forecast and plan future business activities which could cause customers to delay or reduce their information technology spending. This could result in reductions in sales of our platform and services, longer sales cycles, reductions in subscription duration and value, slower adoption of new technologies, and increased price competition. Any of these events could harm our business and operating results. In addition, there can be no assurance that cloud-based collaborative work management and productivity spending levels will increase following any recovery.

Catastrophic events may disrupt our business.

Natural disasters or other catastrophic events may cause damage or disruptions to our operations. Our corporate headquarters are located in the greater Seattle area, an earthquake-prone region and an area that has been significantly affected by the COVID-19 pandemic. Additionally, we rely on our network and third-party infrastructure and enterprise applications, internal technology systems, and our website for our development, marketing, operational support, and sales activities. In the event of a major earthquake, hurricane, or catastrophic event such as fire, power loss, telecommunications failure, social unrest, cyber-attack, war, or terrorist attack, our disaster recovery and business continuity plans may be inadequate and we may endure system interruptions, reputational harm, delays in our product development, lengthy interruptions in our platform and services, breaches of data security, loss of critical data, and inability to continue our operations, all of which could harm our operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Unregistered Sales of Equity Securities

None.

Item 6. Exhibits

Exhibit Number	Exhibit Title	Incorporated by Reference

**CERTIFICATION PURSUANT TO
RULE 13A-14(A) OR 15D-14(A) UNDER THE SECURITIES EXCHANGE ACT OF 1934,
AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Mark P. Mader, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Smartsheet Inc.;
 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

AS ADOPTED PURSUANT TO SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Quarterly Report of Smartsheet Inc. (the “Company”) on Form 10-Q for the fiscal quarter ended October 31, 2021 as filed with the Securities and Exchange Commission on the date hereof (the “Report”), I, Mark P. Mader, Chief Executive Officer of the Company, certify pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that, to the best of my knowledge, the Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, and the information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

AS ADOPTED PURSUANT TO SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Quarterly Report of Smartsheet Inc. (the “Company”) on Form 10-Q for the fiscal quarter ended October 31, 2021 as filed with the Securities and Exchange Commission on the date hereof (the “Report”), I, Pete Godbole, Chief Financial Officer of the Company, certify pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that, to the best of my knowledge, the Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, and the information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
