

ASX Announcement

September 23, 2021

## **EUROPEAN PATENT OFFICE GRANTS PATENT COVERING CLTX CAR TECHNOLOGY USED IN CHM 1101**

Chimeric Therapeutics (ASX:CHM, “Chimeric” or the “Company”), a clinical-stage cell therapy company, is pleased to announce the European Patent Office’s decision to grant patent EP 3,362,470 B1, which was published in the European Patent Bulletin dated September 22, 2021.

The granted patent covers certain applications of chimeric antigen receptor (CAR) technology using chlorotoxin (CLTX), including Chimeric’s clinical-stage CAR T asset, CHM 1101, with patent protection expected until 2036.

Chimeric holds the exclusive worldwide license to develop and commercialize EP 3,362,470 B1 and related patent applications filed in other global territories.

### **Commenting on Chimeric’s intellectual property position, CEO and Managing Director Jennifer Chow said:**

“We are pleased to see the continued advancement of the strong intellectual property portfolio underpinning Chimeric’s CLTX CAR T program, on this occasion in a geography that holds significant market potential.”

**Authorised on behalf of the Chimeric Therapeutics board of directors by Chairman Paul Hopper.**

### **ABOUT CHIMERIC THERAPEUTICS**

Chimeric Therapeutics is a clinical stage cell therapy company focused on bringing the promise of cell therapy to life for more patients with cancer. We believe that cellular therapies have the promise to cure cancer not just delay disease progression.

To bring that promise to life for more patients, Chimeric’s world class team of cell therapy pioneers and experts is focused on the discovery, development, and commercialization of the most innovative and promising cell therapies.

CHM 1101 (CLTX CAR T) is a novel and promising CAR T therapy for the treatment of patients with Glioblastoma (GBM). CHM 1101 was developed by scientists at the City of Hope Medical Centre in California where it is currently being studied in a phase 1 clinical trial.

Chimeric also recently announced the expansion of their pipeline with the exclusive licensing of CHM 2101, a novel, 3rd generation CDH17 CAR T invented at the University of Pennsylvania. CHM 2101 (CDH17 CAR T) is currently in preclinical development with a planned phase 1 clinical trial in 2022 in Neuroendocrine Tumours, Colorectal, Pancreatic and Gastric Cancer.

Chimeric Therapeutics continues to be actively engaged in further developing its oncology pipeline with new and novel cell therapy assets that will bring the promise of cell therapy to life for more patients with cancer.
