innovative market strategies undertaken over the past three years. NEL's non-energy sector portfolio continues to display resilience with steady performance and consistent valuations under uncertain economic conditions and challenges. The demonstration of value increases across NEL's portfolio is the foundation for the anticipated realization of increased dividend income in the short and mid-term.

Shareholders are reminded that the company's fiscal year-end was changed from March 31 to September 30 on July 13, 2021. The Audited Financial Statements will therefore be presented for the eighteen-month period ended September 30, 2022 with appropriate comparatives. NEL's focus remains building the platform for improved forecasting and risk management, while ensuring balance and increasing the value of our shareholders' valuable investments through diversification and transformation.
