

Material Adverse Event

Global Profit Technologies, Inc. is no longer generating any revenue from their licensing agreement entered into on November 1, 2015 with AutomataFX.

AutomataFX is a foreign-owned business entity operating out of St. Vincent and the Grenadines. Global Profit Technologies, Inc. expressly does not market nor generate any revenue from USA citizens or businesses, and lacks the resources to market its software on an international scale.

As AutomataFX is the sole licensee of 4X-DAT software, this is a material adverse event as this licensing agreement has been the sole source of revenue to Global Profit Technologies, Inc. since that licensing agreement was entered into.
