2. Summary of Significant Accounting Principles

a) Basis of Presentation and Fiscal Year

These are the Annual financial statements prepared for Year-End 2023 that closed on December 31, 2023. prepared in accordance with GAAP.

b) Use of Estimates

The Company regularly evaluates estimates and assumptions related to useful life and recoverability of long-lived assets, allowances for doubtful accounts, sales returns and allowances, inventory reserves, stock-based compensation expense, warranty liabilities and deferred income tax asset valuations. The Company bases its estimates and assumptions on current facts, historical experience and various other factors that it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the accrual of costs and expenses that are not readily apparent from other sources

c) Cash and Cash Equivalents The Company considers all highly liquid instruments with a maturity of three months or less at the time of issuance to be cash equivalents.

3. Summary of Significant Accounting Policies (continued)

a) Allowance for Doubtful Accounts

The Company evaluates the collectability of accounts receivable based on a combination of factors. In cases where the Company is aware of circumstances that may impair a specific customer's ability to meet its financial obligations subsequent to the original sale, the Company will record an allowance against amounts due, and thereby reduce the net recognized receivable to the amount the Company reasonably believes will be collected. The allowance for doubtful accounts as of December 31, 2023 was negligible.

b) Property and Equipment- fixed assets

Property and equipment is stated at cost, less accumulated amortization, and consists of office furniture and equipment, leasehold improvements and assets under capital lease. Circumstances which could trigger a review include, but are not limited to: significant decreases in the market price of the asset; significant adverse changes in the business climate or legal factors; accumulation of costs significantly in excess of the amount originally expected for the acquisition or construction of the asset; current period cash flow or operating losses combined with a history of losses or a forecast

of continuing losses associated with the use of the asset; and current expectation that the asset will more likely than not be sold or disposed significantly before the end of its estimated useful life.
