Honeywell | THE FUTURE IS WHAT WE MAKE IT

Forward Looking Statements

This presentation contains certain statements that may be deemed “forward-looking statements” within the meaning of Section 21E of the Securities Exchange Act of 1934. All statements, other than statements of historical fact, that address activities, events or developments that we or our management intends, expects, projects, believes or anticipates will or may occur in the future are forward-looking statements. Such statements are based upon certain assumptions and assessments made by our management in light of their experience and their perception of historical trends, current economic and industry conditions, expected future developments and other factors they believe to be appropriate. The forward-looking statements included in this presentation are also subject to a number of material risks and uncertainties, including but not limited to economic, competitive, governmental, technological, and COVID-19 public health factors affecting our operations, markets, products, services and prices. Such forward-looking statements are not guarantees of future performance, and actual results, and other developments, including the potential impact of the COVID-19 pandemic, and business decisions may differ from those envisaged by such forward-looking statements. Any forward-looking plans described herein are not final and may be modified or abandoned at any time. We identify the principal risks and uncertainties that affect our performance in our Form 10-K and other filings with the Securities and Exchange Commission.

OPERATIONAL TECHNOLOGY WAS NEVER DESIGNED TO WORK TOGETHER...

YOU OPERATE IN SILOS

- Lack of real time, holistic visibility and decision making
- Benchmarking is difficult

YOU HAVE MULTIPLE SITES; ALL ARE DIFFERENT

- Inconsistent standards in equipment, data, processes
- Difficult to measure KPIs (operational and financial)
- Difficult to implement change or improvement

YOUR WORK IS MOSTLY MANUAL AND ON-SITE

- Automation and remote work are elusive
- Dependency on 100s of OEMs for maintenance
- Every service case requires an expensive truck roll

YOUR PEOPLE NEED HELP

- To do more with less and do it remotely
- With training and safety
- With tools and work orders

...which hinders digital transformation in advanced industries
