**Notes**

- 1) Data from pre-works BERs are used to identify solid fuel homes where available, alternatively post works BER data is used.
- 2) Data to end Feb 2024
- 3) SEAI do not support solid fuel boilers on domestic retrofit programmes. The only solid fuel boilers supported in the timeframe above were 3 stoves supported under the Community Energy Grant programme in 2020.
- 4) SEAI continuously reviews and refines the reporting methodology and definition of key metrics to improve the accuracy and quality of insights. In some instances, this may result in minor adjustments to previously reported figures
