

Triton Knoll Offshore Wind Farm successfully completes turbine commissioning

As announced on Aug. 13th 2018, The Kansai Electric Power Co., Inc. (Kansai) had signed a share purchase agreement through its subsidiary, KPIC Netherlands B.V., to acquire a 16% stake of Triton Knoll Holdco Limited aiming to construct and operate offshore wind power plant in the UK.

The Project has been developed with 90 wind turbines installed in the North Sea which have a total power output of 857,000kW. This is the first case of Japanese electric power utilities entering into overseas offshore wind power projects.

Kansai hereby announce that turbine commissioning at Triton Knoll Offshore Wind Farm(hereafter referred to as "Triton Knoll") has been successfully completed. Once fully operational, Triton Knoll will be one of the world's largest offshore wind farms, full operations are expected in Q1 2022 as planned.

As stated in the Kansai Electric Power Group "Zero Carbon Vision 2050" and Medium-term Management Plan, Kansai is firmly committed to promoting energy businesses that contribute to achieving a zero-carbon society across the world by making active use of technological strength and expertise cultivated throughout our company's history.
