

Power Integrations, Inc.
Nasdaq: POWI

December 2021

Forward-Looking Statements/Non-GAAP Metrics

These slides accompany an oral presentation by Power Integrations, Inc., which contains forward-looking statements. Each statement relating to events that will or may occur in the future is a forward-looking statement. The Company's actual results may differ materially from those suggested in the presentation.

Information concerning factors that could cause such a difference is contained in the Company's most recent report on Form 10-K.

This presentation may also contain certain non-GAAP financial information. Reconciliations of non-GAAP financial metrics to GAAP results are available on the investor page of the Power Integrations website, <http://investors.power.com>.

ICs for Energy Production, Transmission & Consumption

POWER
MANAGEMENT

Technology leader in ICs for energy-efficient AC-DC power supplies

LED
DRIVERS

High-efficiency driver ICs energizing the LED lighting revolution

GATE
DRIVERS

Gate drivers for renewable energy, DC transmission, electric locomotives and more

MOTOR
DRIVERS

Highly-efficient, reliable and integrated motor drivers

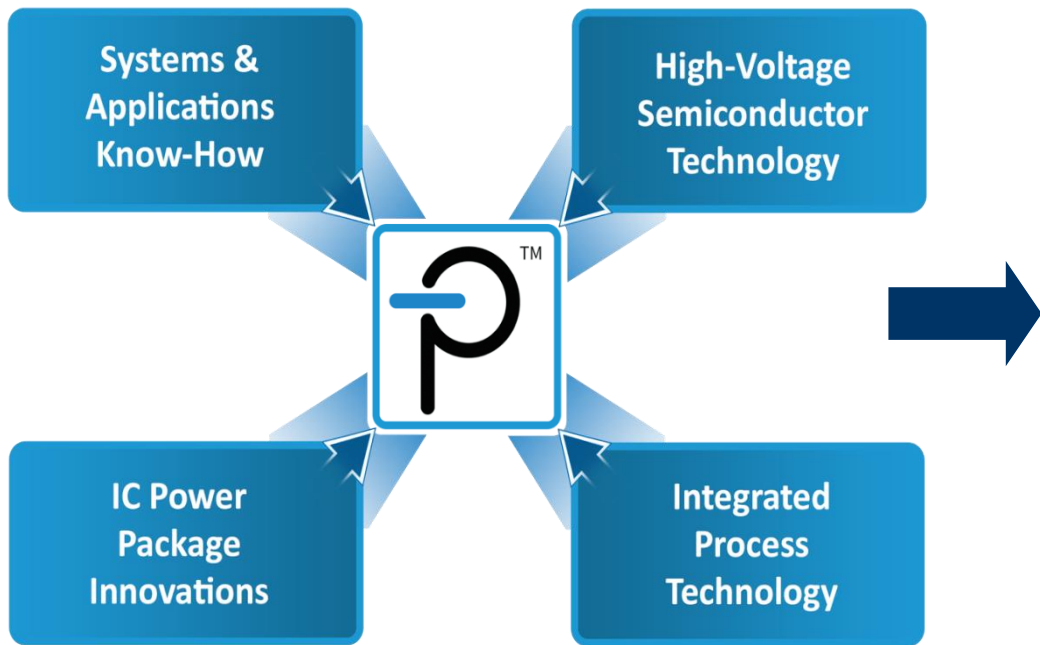

AUTOMOTIVE
SOLUTIONS

Automotive solutions for efficient, compact high-voltage power conversion and control

Comprehensive Expertise in High Voltage

- **Ultra-simple power converters**
 - ▶ Fewer components
 - ▶ Shorter design cycles
 - ▶ Easier to manufacture
 - ▶ Higher reliability
- **BOM cost similar to discrete designs**
- **Highly energy-efficient**

Long-Term Secular Growth Drivers

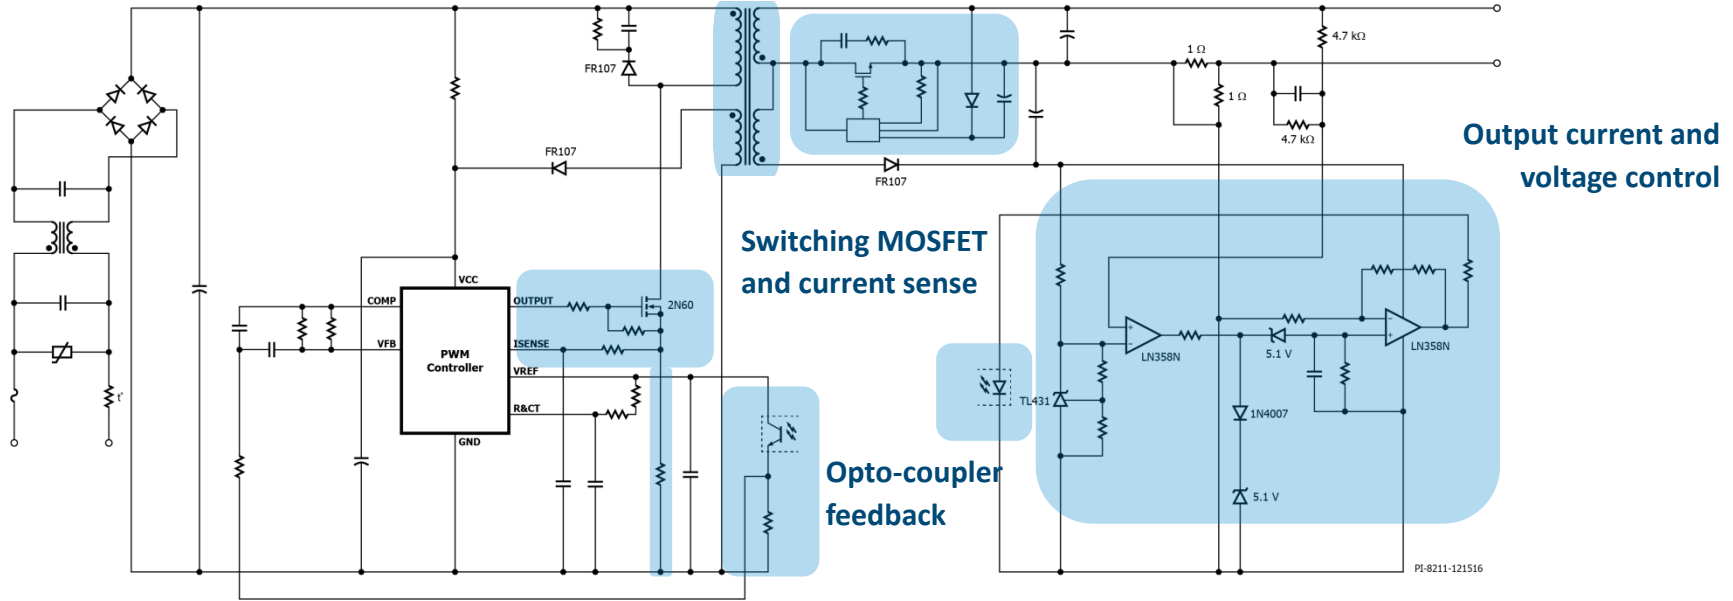

- **Ongoing transition to highly integrated power supplies**
 - ▶ Integration saves labor and materials, improves reliability
- **Enabler of reduced carbon emissions**
 - ▶ EcoSmart™ technology saves equivalent of 1.6M homes' electricity usage each year by reducing standby consumption in electronics and appliances
 - ▶ Strong presence in renewable energy, electric transportation, efficient high-voltage DC transmission
- **Gallium-nitride (GaN) technology expands dollar content, increases efficiency**
- **Expanding high-voltage market opportunity – SAM up ~3x since 2010**
 - ▶ Advanced chargers for smartphones, tablets, notebooks
 - ▶ Home & building automation / smart lighting and appliances / IoT / smart utility meters
 - ▶ Electrification of tools and transportation
 - ▶ BridgeSwitch™ motor-drive ICs expand appliance SAM
 - ▶ LED lighting
 - ▶ Sizeable opportunity in electric vehicles

The Power Integrations Advantage

EMI filter and bridge rectifier

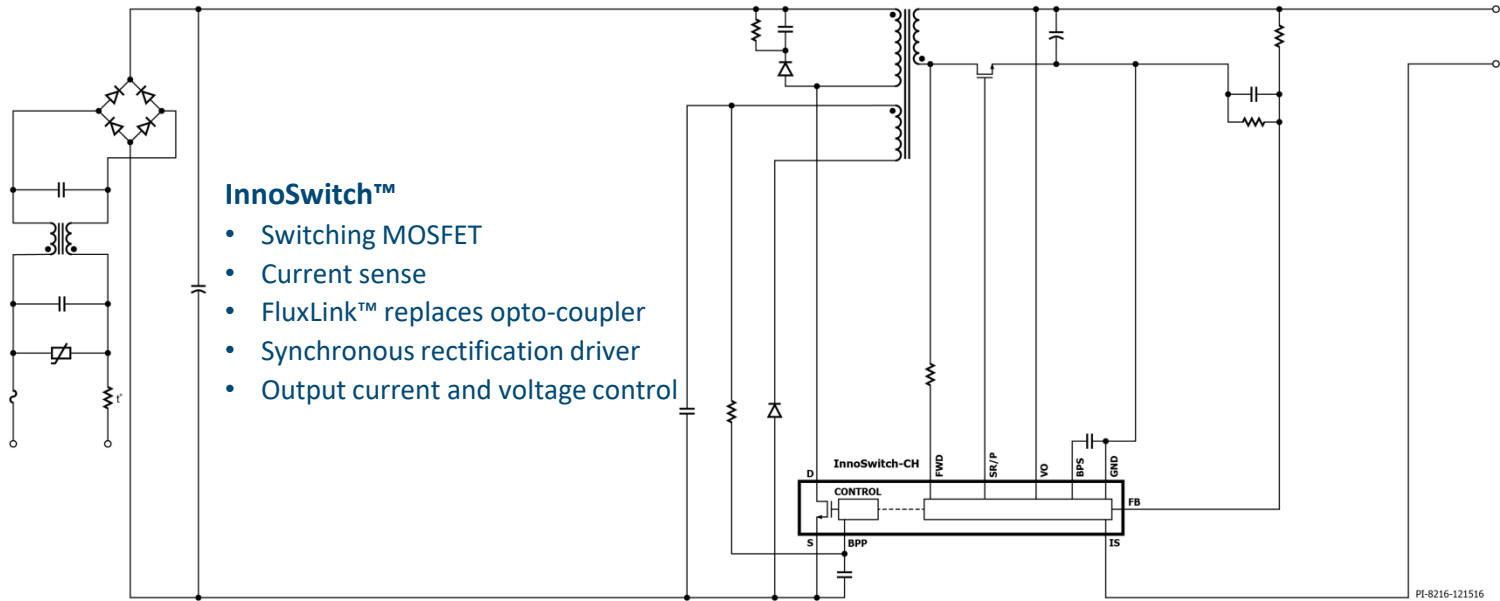

Isolation transformer

Synchronous rectification

Conventional Phone Charger - More than 60 Components

The Power Integrations Advantage

Phone-charger using InnoSwitch-CH – only 24 components

InnoSwitch™: A Higher Level of Integration

- **First IC to integrate primary and secondary sides of power supply across safety barrier**
 - ▶ Enabled by FluxLink™ technology
- **Drastic reduction in component count, complexity**
- **Highly energy-efficient**
 - ▶ Very high efficiency
 - ▶ Very low standby consumption

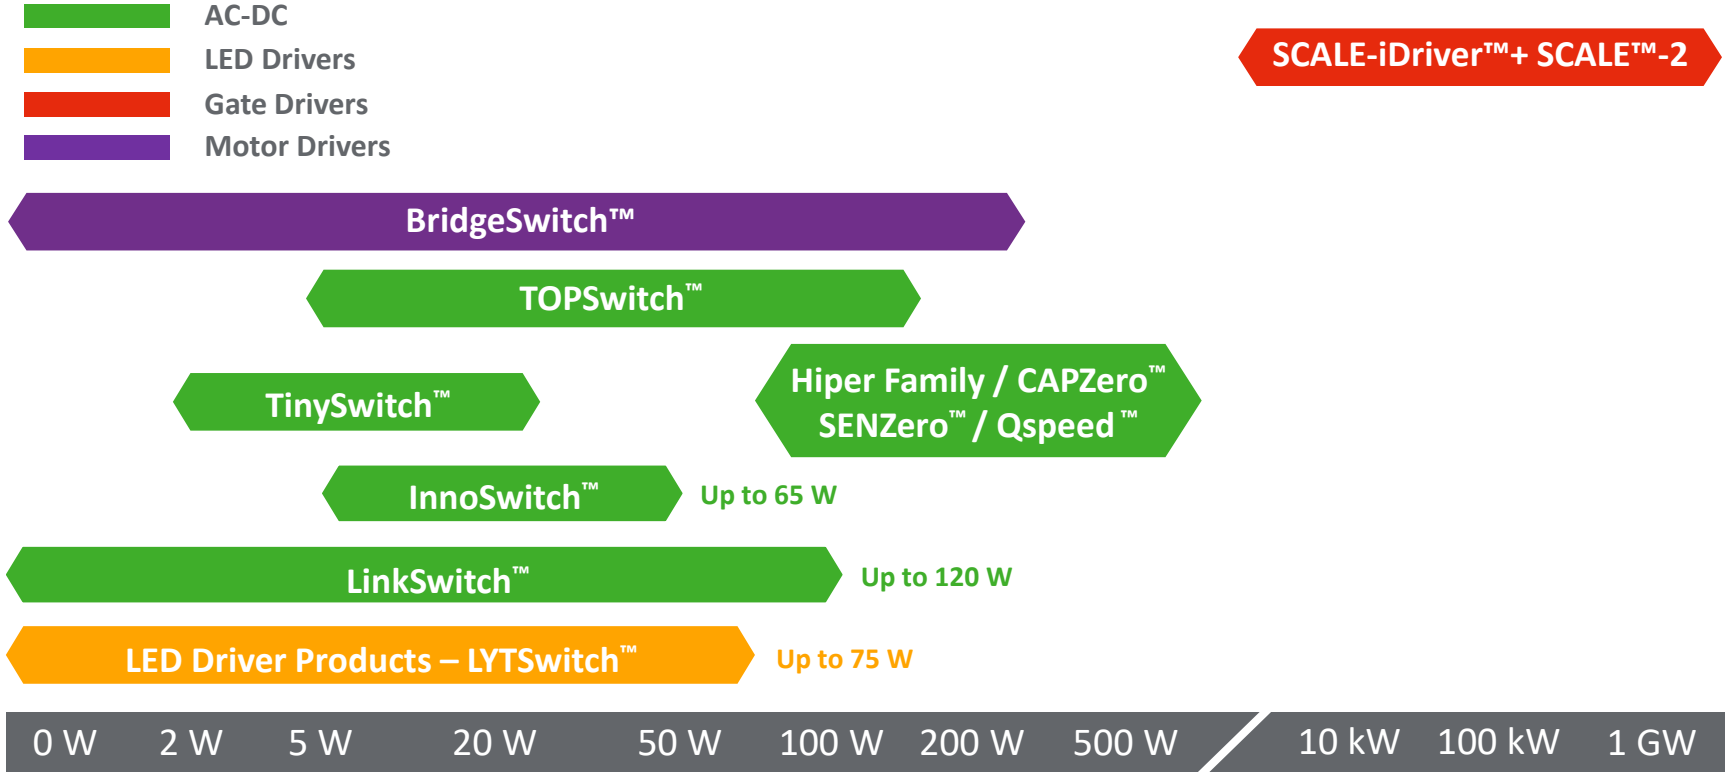

GaN Is the Future of Power Conversion

- **GaN transistors are better than silicon**
 - ▶ More efficient, cooler, smaller power supplies
 - ▶ Eliminates heatsinks even at high power levels
- **Proprietary GaN switches integrated into our ICs**
 - ▶ Far easier to use than discrete GaN transistors
- **GaN now utilized in a broad range of POWI products and applications**
 - ▶ Advanced chargers (smartphone, tablet, notebook, multi-port)
 - ▶ TVs, appliances, USB wall outlets, more

Spanning a Wide Power Range

Power Everywhere

Addressable Market Now \$4+ Billion

- LED lighting
- Home/building automation
- Smart meters
- Industrial controls
- Battery-powered tools
- EV auxiliary power supplies
- **Industrial motor drives**
- **Wind/solar inverters**
- **Electric trains/buses**
- **DC transmission**
- **Medical**

- Desktop/server standby
- Desktop main
- Notebook/tablet adapters
- LCD monitors
- Printers

- White goods
- Air conditioners
- TV standby / TV main
- Small appliances
- Set-top boxes
- DVD players
- Game consoles
- Mobile phone chargers
- Cordless phone adapters
- Broadband modems
- VoIP phones
- Wireless routers

High-power applications in red

Technology Trends Bring SAM Expansion

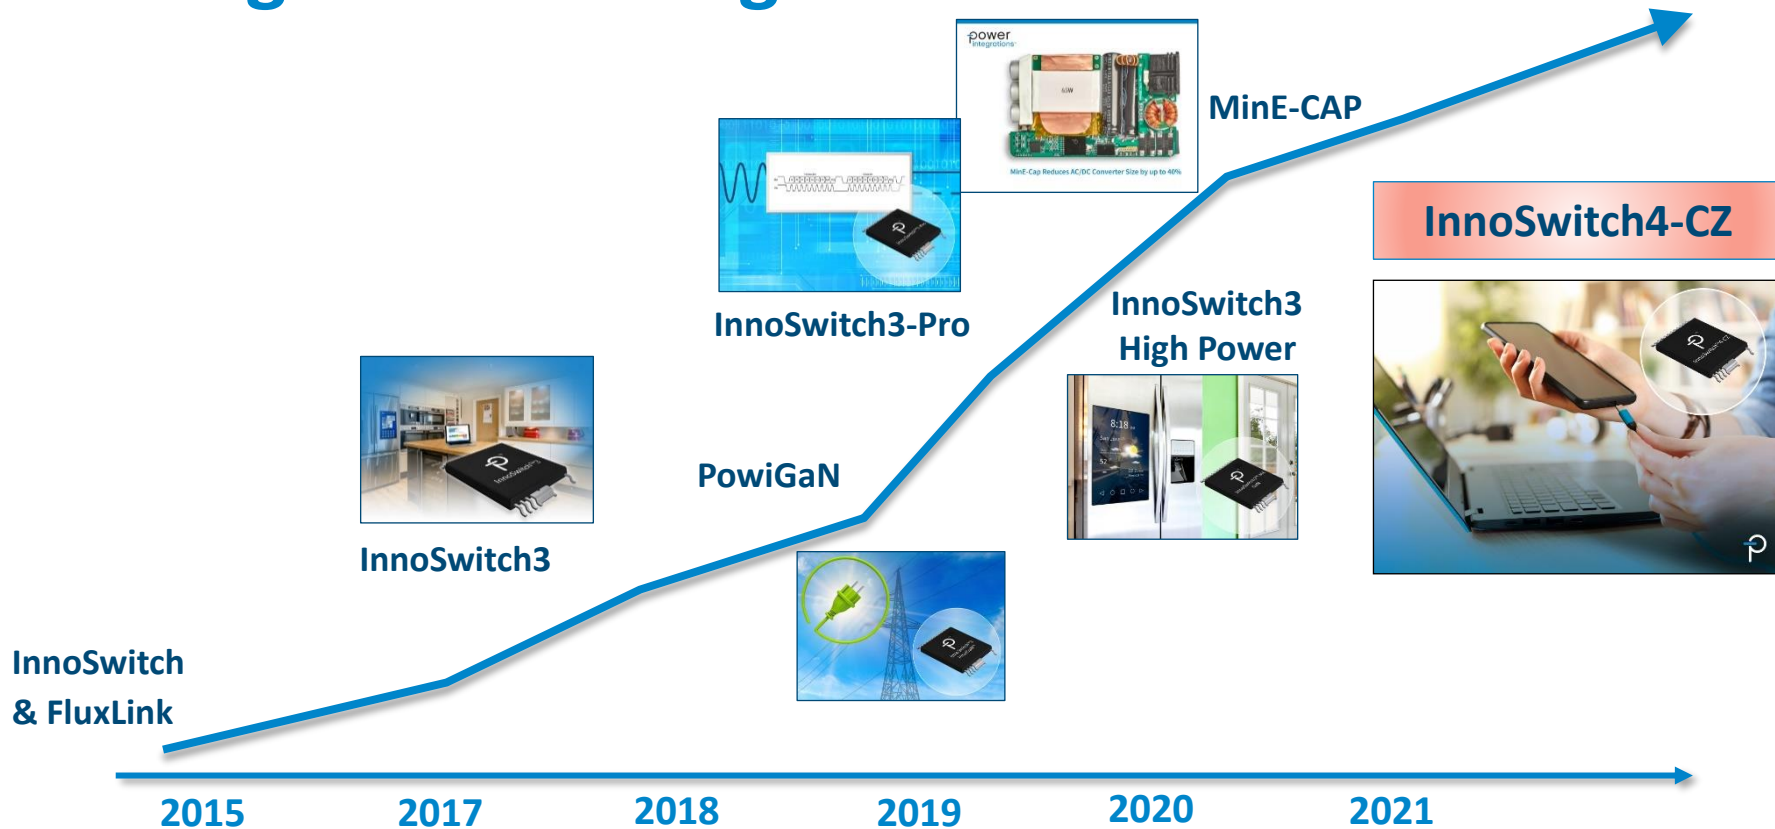

- **Rapid charging for mobile-device market**
 - ▶ Faster chargers = greater dollar content, higher efficiency
- **Home & building automation / smart lighting and appliances / IoT**
 - ▶ Smarter homes and appliances = more power needed = greater POWI dollar content
- **Electrification creating new opportunities in tools, transportation**
 - ▶ Lithium-ion batteries replacing gas and plug-in electric for lawn equipment, vacuums
 - ▶ Electric cars, locomotives, buses, delivery vehicles, etc.
- **Conversion to brushless DC motors in appliances**
 - ▶ BridgeSwitch™ ICs target BLDC motors up to 400W
- **LED lighting – requires efficient, reliable AC-DC drivers**
- **GaN-based ICs increase dollar content and performance**

Advanced Chargers for Mobile Devices

- **Single, high-power adapter for travel is becoming common**
 - ▶ Standardization around rapid-charge protocols and connectors
 - ▶ High power needed to charge larger batteries and multiple devices
- **Rapid growth in aftermarket brands**
 - ▶ Smaller is better
 - ▶ Consumers engaged
- **Expanding USB charging ecosystem**
 - ▶ Wall outlets, appliances, tool chargers adding USB ports
 - ▶ Small space requires compact design, no heatsinks

Leading USB PD Design & Innovation

Compact 60W Charger with InnoSwitch4-CZ & ClampZero

Uses GaN-based MinE-CAP IC to reduce size of bulk capacitors

MinE-CAP

InnoSwitch4-CZ

ClampZero

To Scale

Volume = 24.4 cm^3
Power Density = 2.5 W/cm^3
No heatsinks

PowiGaN Winning Big in Advanced Chargers

65W USB PD

100W Multi-Port

33W USB PD

33 W USB PD

47W Dual Port

45W USB PD

65 W USB PD

20W Slim Charger

IoT / Home Automation / Fixed Charging

USB-C power receptacle with InnoSwitch3

Reliability, low standby power critical for IoT devices and USB receptacles

BridgeSwitch™ Motor-Driver ICs for BLDC Motors

- **98.5% efficiency**
- **Integrated half-bridge architecture eliminates heatsinks**
- **Built-in protection**
 - ▶ Simplifies and shortens regulatory approval
 - ▶ Hardware fault management simplifies software
- **Ideal for appliances – white goods and industrial**
 - ▶ Ceiling fans, water pumps, air-conditioning, motors

LYTSwitch™ Drivers for LED Lighting

- Traditional light sources phasing out
- LEDs need efficient, reliable AC-DC drivers
- Integration brings reliability, efficiency, size advantage

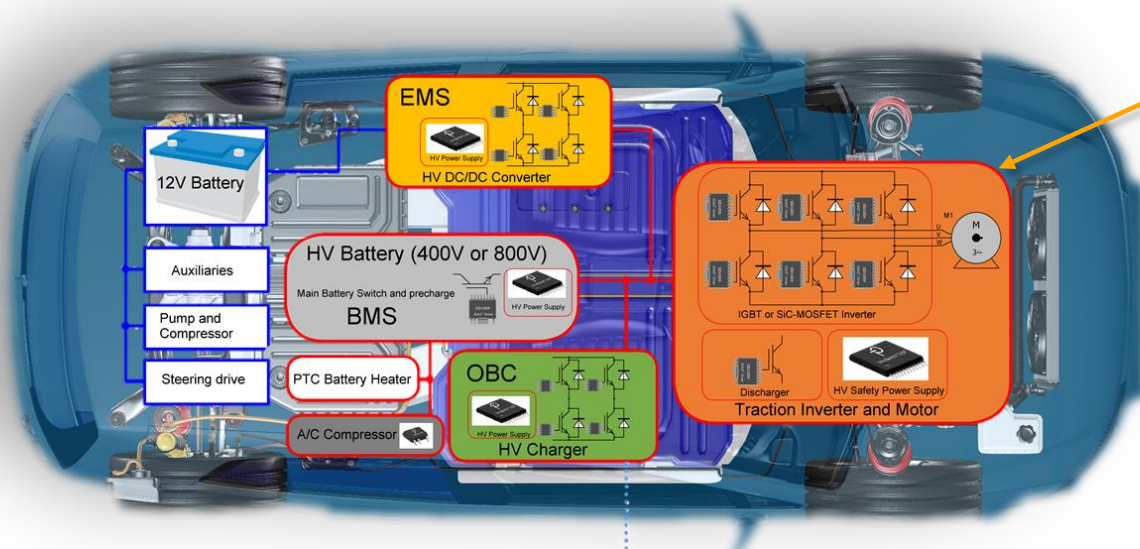

Gate Drivers for High-Power Market

- Acquired CT-Concept in 2012
- Addressing applications 10 kW to 1 GW
 - ▶ DC industrial motors, renewable energy, electric transportation, DC transmission
- Drivers for IGBTs and SiC switches

SCALE™ drivers reduce component count, enhance efficiency, reliability

EVs Bring High Voltage to the Auto Industry

- **Tens of dollars of potential content per car**
 - Drive train, charging, DC-DC conversion
- **Several POWI products now auto-qualified**

Traction Inverter

- ▶ SiC MOSFET or IGBT gate drivers

- ▶ Emergency power supply
 - ▶ InnoSwitch3-AQ

Global Presence

- Headquarters in San José, California
- Design centers: U.S., Canada, Switzerland, UK, Germany, Malaysia, Philippines
- 19 field labs worldwide

Financials

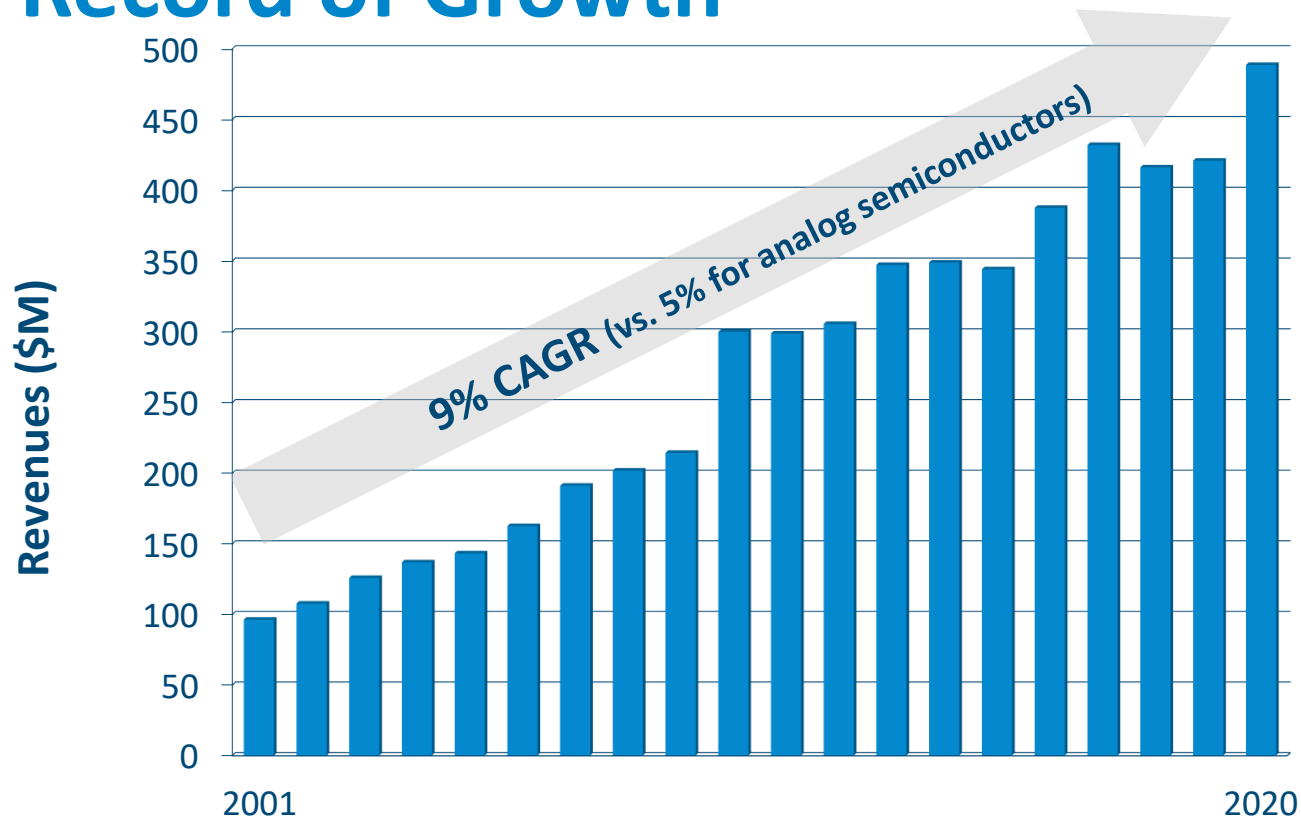

**Best Financially Managed Semiconductor Company Achieving up
to \$1 Billion in Annual Sales**

Target Financial Model

- **Low-double-digit revenue growth**
 - ▶ Up 57% for first nine months of 2021
 - ▶ 9% CAGR since 2001
- **Non-GAAP gross margin 50-55%**
 - ▶ 51.1% for first nine months of 2021
- **Non-GAAP operating margin 25%+**
 - ▶ 30.3% for first nine months of 2021

Track Record of Growth

Note: Revenues prior to 2017 do not reflect ASC 606 recast; see company website for recast financial data for 2015-2016

Well-Diversified Revenue Mix

2002

2020

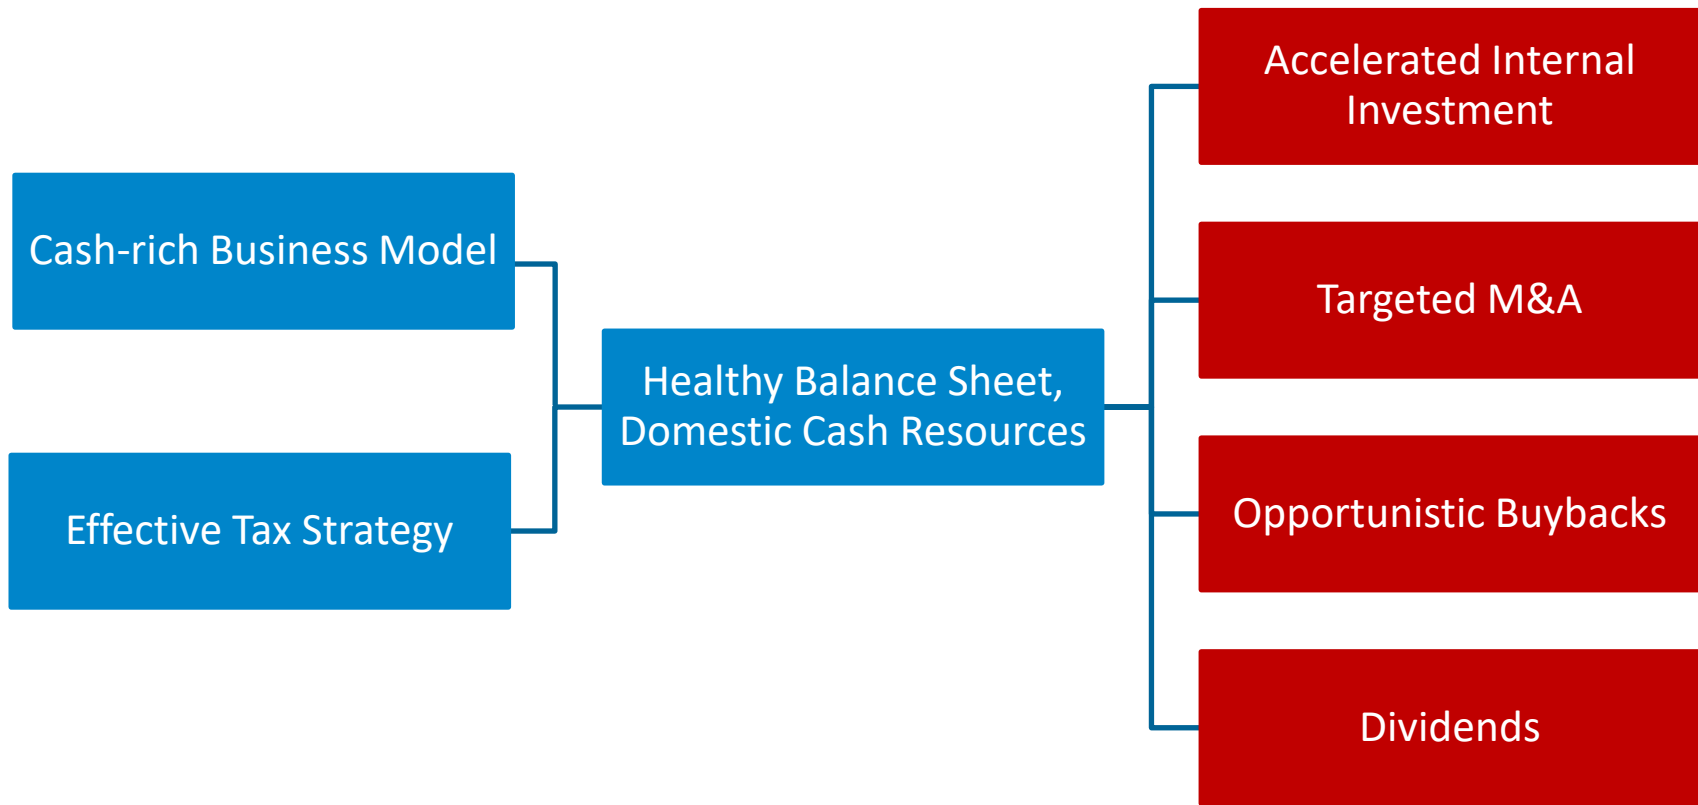

Strong Cash Flow

FCF = Cash flow from operations less capital expenditures

2019 GAAP Cash from Operations = \$224.5M; above excludes impact of litigation settlement

Four-Prong Approach to Capital Management

Strong Balance Sheet

At September 30, 2021

- **\$549M cash and investments**
 - ▶ \$175M litigation settlement received in Oct. 2019
- **No debt**
- **Quarterly dividend of \$0.15/share**
 - ▶ Raised dividend by \$0.02 in Q4 2021
- **Share count down 6% since 2008**
 - ▶ 120K shares repurchased in Q3 2021 for \$9.8M

Sustainability:

Saving energy and reducing e-waste

Visit our sustainability site for additional ESG-related information:
<https://www.power.com/company/sustainability-and-citizenship>

Recognized Leader in Energy Efficiency

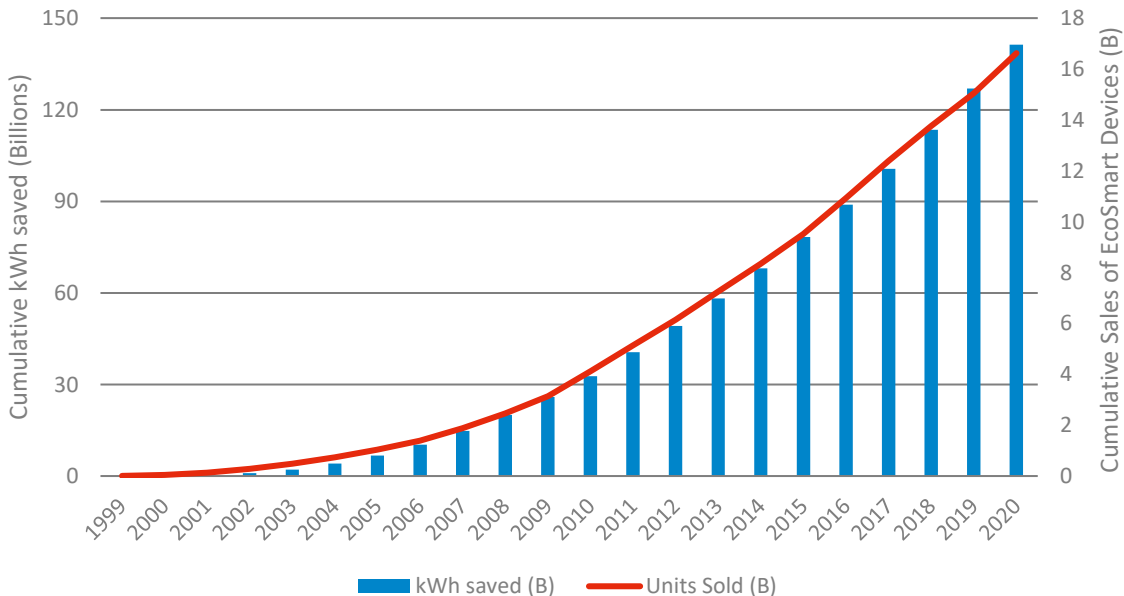

- **Member of clean-tech stock indices**
 - ▶ The Cleantech Index (CTIUS)
 - ▶ Nasdaq Clean Edge Green Energy (CELS)
 - ▶ Ardour Global Index (AGIGL)
 - ▶ ECPI Global Clean Energy Index (GALPHCLN)
- **Twice named a top 20 sustainable stock by SustainableBusiness.com**
- **ENERGY STAR® award recipient**
- **Star of Energy Efficiency award recipient**

EcoSmart™ Technology Saves Energy

- **>16 billion EcoSmart chips sold since 1998**
- **>140B kWh of standby energy saved since 1999**
 - ▶ >\$14B saved by end users
- **Saving equivalent of 1.6M homes' entire electricity usage each year***
 - ▶ Saving >6M tons of CO₂ emissions annually**

Estimated Energy Savings from EcoSmart Devices

* Source: U.S. EPA Greenhouse Gas Equivalencies Calculator

**Based on 2019 U.S. average of 0.92 lbs./kWh, per U.S. Energy Information Administration

Energy Vampire vs. LinkZero™

Energy-Efficiency Specs Drive Innovation

- External power supply requirements in Europe tightened in 2020
- ENERGY STAR® “Most Efficient” label rewards top performers
- SEAD awards for connected efficiency
- Light bulbs in U.S. now required to be 60-70% more efficient than standard incandescent bulbs

POWI Products Reduce E-waste

Two Hiper™ ICs replace up to 100 components

HiperPFS, HiperLCS / HiperTFS
