

## Newmont Reports First Quarter 2024 Results

DENVER, April 25, 2024 – Newmont Corporation (NYSE: NEM, TSX: NGT, ASX: NEM, PNGX: NEM) (Newmont or the Company) today announced first quarter 2024 results and declared a first quarter dividend of \$0.25 per share.

*"Newmont delivered a strong first quarter operational performance, producing 2.2 million gold equivalent ounces and generating over \$1.4 billion in cash from operations before working capital changes," said Tom Palmer, Newmont's President and Chief Executive Officer. "Underpinned by the gold industry's leading portfolio of Tier 1 gold and copper operations, we remain well-positioned to achieve our full-year guidance and deliver meaningful synergies and productivity improvements from the combined portfolio. We remain focused on delivering on the commitments we laid out at the beginning of this year, creating an attractive value proposition for new and existing investors during this unique time in the gold industry."*

### Q1 2024 Results<sup>1</sup>

- Delivered \$288 million in dividends to shareholders; declared a dividend of \$0.25 per share of common stock for the first quarter of 2024<sup>2</sup>
- Announced sale of the Lundin Gold stream credit facility and offtake agreement ("Lundin Gold Financing Facilities") for \$330 million, further monetizing Newmont's non-core assets while maintaining its equity interest in Lundin Gold
- Produced 1.7 million attributable gold ounces and 489 thousand gold equivalent ounces (GEOs)<sup>3</sup> from copper, silver, lead and zinc; primarily driven by production of 1.4 million gold ounces from Newmont's Tier 1 Portfolio<sup>4</sup>
- Reported gold Costs Applicable to Sales (CAS) per ounce of \$1,057 and gold All-In Sustaining Costs (AISC) per ounce of \$1,439; Newmont's Tier 1 Portfolio reported CAS of \$1,000 per ounce and AISC of \$1,378 per ounce<sup>5</sup>
- Generated \$776 million of cash from operating activities, net of working capital changes of \$(666) million; reported \$(74) million in Free Cash Flow net of working capital changes and \$850 million of capital reinvestment to sustain current operations and advance high-return projects; excluding the stamp duty payment in connection with the Newcrest transaction, Newmont generated Free Cash Flow of \$217 million<sup>5</sup>
- Reported Net Income of \$179 million, Adjusted Net Income (ANI) of \$0.55 per share and Adjusted EBITDA of \$1.7 billion for the quarter<sup>5</sup>
- Delivered \$105 million in synergies to date from the Newcrest acquisition; on track to realize \$500 million in annual synergies by the end of 2025<sup>6</sup>
- Firmly on track to deliver 2024 guidance for production, costs and capital spend; full-year production expected to be second-half weighted as previously indicated<sup>7</sup>
- Classified six non-core assets and one project as held for sale, resulting in a non-cash impairment of \$485 million
- Refinanced approximately \$2 billion of debt acquired from the Newcrest acquisition; targeting a \$1 billion debt reduction
- Published 20<sup>th</sup> Annual Sustainability Report and 3<sup>rd</sup> Annual Taxes and Royalties Contribution Report, providing a transparent review of Newmont's ESG performance, tax strategy and economic contributions

<sup>1</sup> Newmont's actual condensed consolidated financial results remain subject to completion and final review by management and external auditors for the quarter ended March 31, 2024. Newmont intends to file its Q1 2024 Form 10-Q on or about the close of business on April 29, 2024. See notes at the end of this release.

<sup>2</sup> Newmont's Board of Directors declared a dividend of \$0.25 per share of common stock for the first quarter of 2024, payable on June 27, 2024 to holders of record at the close of business on June 4, 2024.

<sup>3</sup> Gold equivalent ounces (GEOs) calculated using Gold (\$1,400/oz.), Copper (\$3.50/lb.), Silver (\$20.00/oz.), Lead (\$1.00/lb.) and Zinc (\$1.20/lb.) pricing for 2024.

<sup>4</sup> Newmont's go-forward portfolio is focused on Tier 1 assets, consisting of (1) six managed Tier 1 assets (Boddington, Tanami, Cadia, Lihir, Peñasquito and Ahajo), (2) assets owned through two non-managed joint ventures at Nevada Gold Mines and Pueblo Viejo, including four Tier 1 assets (Carlin, Cortez, Turquoise Ridge and Pueblo Viejo), (3) three emerging Tier 1 assets (Merian, Cerro Negro and Yanacocha), which do not currently meet the criteria for Tier 1 Asset, and (4) an emerging Tier 1 district in the Golden Triangle in British Columbia (Red Chris and Brucejack), which does not currently meet the criteria for Tier 1 Asset. Newmont's Tier 1 portfolio also includes attributable production from the Company's equity interest in Lundin Gold (Fruta del Norte). Tier 1 Portfolio cost and capital metrics include the proportional share of the Company's interest in the Nevada Gold Mines joint venture.

<sup>5</sup> Non-GAAP metrics; see reconciliations at the end of this release.

<sup>6</sup> Synergies are a management estimate provided for illustrative purposes and should not be considered a GAAP or non-GAAP financial measure. Synergies represent management's combined estimate of pre-tax synergies, supply chain efficiencies and Full Potential improvements, as a result of the integration of Newmont's and Newcrest's businesses that have been monetized for the purposes of the estimation. Such estimates are necessarily imprecise and are based on numerous judgments and assumptions. See cautionary statement at the end of this release regarding forward-looking statements.

<sup>7</sup> See discussion of outlook and cautionary statement at the end of this release regarding forward-looking statements.

## Advancing Portfolio Optimization with Sale of Lundin Gold Financing Facilities

Newmont announced today that Lundin Gold Inc. (Lundin Gold) has agreed to buy out 100 percent of the balance of the stream credit facility agreement and offtake agreement for the Fruta del Norte gold mine in Ecuador for total consideration of \$330 million, payable in cash in two tranches: \$180 million as of the expected closing date of June 28, 2024, and the remaining \$150 million by September 30, 2024. Newmont has maintained its exposure to the Fruta del Norte operation through its equity interest in Lundin Gold.

In connection with the acquisition of Newcrest and the Company's strategy to create lasting value, Newmont committed to delivering at least \$2 billion in near-term cash improvements through portfolio optimization within the first two years. The early repayment of the facilities is another step in delivering on this commitment as Newmont continues to build a more profitable and resilient future for the business.

### FIRST QUARTER 2024 FINANCIAL AND PRODUCTION SUMMARY

**Attributable gold production<sup>1</sup>** decreased 4 percent to 1,675 thousand ounces from the prior quarter primarily due to lower production at Tanami due to a planned mill shutdown and seasonal rainfall impacts, and the ongoing stripping campaigns at Boddington and Akyem. In addition, lower production was delivered from the non-managed joint venture at Nevada Gold Mines. This unfavorable impact was partially offset by higher production at Peñasquito and Yanacocha, as well as a full quarter of ownership of the sites acquired in the Newcrest transaction. Full year production for 2024 is expected to be second-half weighted as previously indicated.

Looking ahead, operations at Cerro Negro are currently suspended as a full investigation is conducted following the tragic fatalities of two members of the Newmont workforce on April 9, 2024. In addition, operations are temporarily suspended at Telfer, one of Newmont's non-core assets, as further work is completed to remediate the safe operation of the tailings storage facility.

**Average realized gold price** was \$2,090, an increase of \$86 per ounce over the prior quarter. Average realized gold price includes \$2,082 per ounce of gross price received, a favorable impact of \$19 per ounce mark-to-market on provisionally-priced sales and reductions of \$11 per ounce for treatment and refining charges.

**Gold CAS<sup>2</sup>** totaled \$1.7 billion for the quarter. **Gold CAS per ounce<sup>3</sup>** was largely in line with the prior quarter at \$1,057 per ounce.

**Gold AISC per ounce<sup>3</sup>** was largely in line with the prior quarter at \$1,439 per ounce, with a slight improvement from lower sustaining capital spend.

**Attributable gold equivalent ounce (GEO) production from other metals** increased 69 percent to 489 thousand ounces from the prior quarter primarily due to the ramp-up of Peñasquito to full operations after the resolution of the labor strike in the fourth quarter of 2023, combined with higher co-product grades from the Chile Colorado pit. In addition, Cadia delivered higher copper production.

**CAS from other metals**<sup>2</sup> totaled \$416 million for the quarter. **CAS per GEO**<sup>3</sup> decreased 34 percent to \$829 per ounce from the prior quarter primarily due to higher other metal sales as a result of the increased volumes at Peñasquito.

**AISC per GEO**<sup>3</sup> decreased 33 percent to \$1,148 per ounce compared to the prior quarter primarily due to lower CAS per GEO as a result of the increased volumes at Peñasquito, as well as lower sustaining capital spend.

**Net income from continuing operations attributable to Newmont stockholders** was \$166 million or \$0.15 per diluted share, an increase of \$3.3 billion from the prior quarter primarily due to the recognition of impairment charges and higher reclamation and remediation expense during the fourth quarter of 2023, as well as higher average realized gold prices and lower CAS in the first quarter of 2024.

**Adjusted net income**<sup>4</sup> was \$630 million or \$0.55 per diluted share, compared to \$452 million or \$0.46 per diluted share in the prior quarter. Primary adjustments to first quarter net income include a loss on assets held for sale of \$485 million, changes in the fair value of investments of \$31 million, Newcrest transaction and integration costs of \$29 million and settlement costs of \$21 million.

**Adjusted EBITDA**<sup>4</sup> increased 23 percent to \$1,694 million for the quarter, compared to \$1,382 million for the prior quarter.

**Consolidated cash from operations before working capital**<sup>5</sup> increased 86 percent from the prior quarter to \$1.4 billion primarily due to higher realized gold prices, lower CAS and lower Newcrest transaction and integration costs.

**Consolidated net cash from operating activities** increased 26 percent from the prior quarter to \$776 million primarily due to the improvement in cash from operations described above, partially offset by a \$666 million reduction in operating cash flow due to changes in working capital, including a \$291 million stamp duty payment in connection with the Newcrest acquisition, a build in inventories, stockpiles and ore on leach pads of \$193 million, a build in accounts receivable of \$84 million and reclamation spend of \$59 million, primarily related to the construction of the Yanacocha water treatment facilities.

**Free Cash Flow**<sup>7</sup> was \$(74) million compared to \$(304) million in the prior quarter primarily due to lower sustaining and development capital expenditures.

**Capital expenditures**<sup>6</sup> decreased 8 percent from the prior quarter to \$850 million primarily due to lower sustaining and development capital spend. Development capital expenditures in 2024 primarily relate to Ahafo North, Tanami Expansion 2, Cadia Block Caves and Cerro Negro expansion projects.

**Balance sheet and liquidity** remained strong in the first quarter, ending the quarter with \$2.3 billion of consolidated cash, cash of \$342 million included in *Current assets held for sale*, with approximately \$6.7 billion of total liquidity; reported net debt to adjusted EBITDA of 1.2x<sup>8</sup>.

## NON-MANAGED JOINT VENTURE AND EQUITY METHOD INVESTMENTS<sup>9</sup>

**Nevada Gold Mines (NGM)** attributable gold production was 264 thousand ounces, with CAS of \$1,177 per ounce<sup>3</sup> and AISC of \$1,576 per ounce<sup>3</sup> for the first quarter.

**Pueblo Viejo (PV)** attributable gold production was 54 thousand ounces for the quarter. Cash distributions received for the Company's equity method investment in Pueblo Viejo totaled \$45 million in the first quarter. Capital contributions of \$9 million were made during the quarter related to the expansion project at Pueblo Viejo.

**Fruta del Norte** attributable gold production is reported on a quarter lag. Production reported in the first quarter of 2024 was 21 thousand ounces. Cash distributions received from the Company's equity method investment in Fruta del Norte were \$8 million for the first quarter.

<sup>1</sup> Attributable gold production includes ounces from the Company's equity method investment in Pueblo Viejo (40%) and in Lundin Gold (31.9%).

<sup>2</sup> Consolidated Costs applicable to sales (CAS) excludes Depreciation and amortization and Reclamation and remediation.

<sup>3</sup> Non-GAAP measure. See end of this release for reconciliation to Costs applicable to sales.

<sup>4</sup> Non-GAAP measure. See end of this release for reconciliation to Net income (loss) attributable to Newmont stockholders.

<sup>5</sup> Cash from operations before working capital is a non-GAAP metric with the most directly comparable GAAP financial metric being to Net cash provided by (used in) operating activities, as shown reconciled in the Condensed Consolidated Statements of Cash Flows.

<sup>6</sup> Capital expenditures refers to Additions to property plant and mine development from the Consolidated Statements of Cash Flows.

<sup>7</sup> Non-GAAP measure. See end of this release for reconciliation to Net cash provided by operating activities. Excluding the stamp duty payment in connection with the Newcrest transaction, Newmont generated Free Cash Flow of \$217 million.

<sup>8</sup> Non-GAAP measure. See end of this release for reconciliation.

<sup>9</sup> Newmont has a 38.5% interest in Nevada Gold Mines, which is accounted for using the proportionate consolidation method. In addition, Newmont has a 40% interest in Pueblo Viejo, which is accounted for as an equity method investment, as well as a 31.9% interest in Lundin Gold, who wholly owns and operates the Fruta del Norte mine, which is accounted for as an equity method investment on a quarter lag.

## Key Projects in Execution

Newmont's project pipeline supports stable production with improving margins and mine life<sup>1</sup>. Newmont's 2024 outlook includes current development capital costs and production related to the key projects of Tanami Expansion 2, Ahafo North and Cadia Block Caves.

- Tanami Expansion 2 (Australia) secures Tanami's future as a long-life, low-cost producer by extending mine life beyond 2040 through the addition of a 1,460 meter hoisting shaft and supporting infrastructure to process 3.3 million tonnes per year and provide a platform for future growth. The expansion is expected to increase average annual gold production by approximately 150 to 200 thousand ounces per year for the first five years and reduce operating costs by approximately 30 percent, bringing average all-in sustaining costs to \$900 to \$1,000 per ounce for Tanami (2028 - 2032). As a result of the identification of required overbreak and underbreak remediation, commercial production for the project is now expected in the second half of 2027. Total capital costs are now estimated to be between \$1.7 and \$1.8 billion, incorporating the required remediation work. Development costs (excluding capitalized interest) since approval were \$806 million, of which \$54 million related to 2024.
- Ahafo North (Ghana) expands our existing footprint in Ghana with four open pit mines and a stand-alone mill located approximately 30 kilometers from the Company's Ahafo South operations. The project is expected to add between 275 and 325 thousand ounces per year with all-in sustaining costs of \$800 to \$900 per ounce for the first five full years of production (2026 - 2030). Ahafo North is the best unmined gold deposit in West Africa with approximately 4.1 million ounces of Reserves and 1.3 million ounces of Measured, Indicated and Inferred Resources<sup>2</sup> and significant upside potential to extend beyond Ahafo North's current 13-year mine life. Commercial production for the project is expected in the second half of 2025. Total capital costs are estimated to be between \$950 and \$1,050 million. Development costs (excluding capitalized interest) since approval were \$434 million, of which \$59 million related to 2024.
- Cadia Block Caves (Australia) includes two existing panel caves to recover approximately 5.9 million ounces of Gold Reserves as well as 1.3 million tonnes of Copper Reserves. First ore has been delivered from the first panel cave (PC2-3), and development is underway at the second panel cave (PC1-2). The newly-acquired project is currently under review, and a more fulsome update on the anticipated metrics is expected to be provided in the second half of 2024. Development capital costs (excluding capitalized interest) since approval were \$76 million, of which \$40 million related to 2024.

## Committed to Concurrent Reclamation

Since mines operate for a finite period, careful closure planning is crucial to address the diverse social, economic, environmental and regulatory impacts associated with the end of mining operations. Newmont's global Closure Strategy integrates closure planning throughout each operation's lifespan, aiming to create enduring positive and sustainable legacies that last long after mining ceases. Newmont continues to accrue to reclamation and remediation spend through the year. Newmont expects to incur a cash outflow of approximately \$600 million in 2024 and \$700 million in 2025, primarily related to the construction of two new water treatment plants and post-closure management at Yanacocha. The operation's ongoing closure planning study advanced to the feasibility state in December 2023 and continues to address several complex closure issues, including water management, social impacts and tailings. A long-term water management solution will replace five existing water treatment facilities with two, addressing the watersheds along the continental divide. Certain estimated costs remain subject to revision as ongoing study work and assessment of opportunities that incorporates the latest design considerations remain in progress.

<sup>1</sup> Project estimates remain subject to change based upon uncertainties, including future market conditions, macroeconomic and geopolitical conditions, changes in interest rates, inflation, commodities and raw materials prices, supply chain disruptions, labor markets, engineering and mine plan assumptions, future funding decisions, consideration of strategic capital allocation and other factors, which may impact estimated capital expenditures, AISC and timing of projects. See end of this release for cautionary statement regarding forward-looking statements.

<sup>2</sup> Total resources presented for Ahafo North includes Measured and Indicated resources of 1 million gold ounces and Inferred resources of 300 thousand gold ounces. See cautionary statement at the end of this release.

<sup>a</sup> 2024 outlook projections are considered forward-looking statements and represent management's good faith estimates or expectations of future production results as of February 22, 2024. Outlook is based upon certain assumptions, including, but not limited to, metal prices, oil prices, certain exchange rates and other assumptions. For example, 2024 Outlook assumes \$1,900/oz Au, \$8,818/tonne Cu, \$23.00/oz Ag, \$2,976/tonne Zn, \$2,205/tonne Pb, \$0.70 AUD/USD exchange rate, \$0.75 CAD/USD exchange rate and \$90/barrel WTI. Production, CAS, AISC and capital estimates exclude projects that have not yet been approved. The potential impact on inventory valuation as a result of lower prices, input costs, and project decisions are not included as part of this Outlook. Assumptions used for purposes of Outlook may prove to be incorrect and actual results may differ from those anticipated, including variation beyond a +/-5% range. Outlook cannot be guaranteed. As such, investors are cautioned not to place undue reliance upon Outlook and forward-looking statements as there can be no assurance that the plans, assumptions or expectations upon which they are placed will occur. Amounts may not recalculate to totals due to rounding. See cautionary at the end of this release.

<sup>b</sup> All-in sustaining costs (AISC) as used in the Company's Outlook is a non-GAAP metric; see below for further information and reconciliation to consolidated 2024 CAS outlook.

<sup>c</sup> Consolidated production for Merian is presented on a total production basis for the mine site; attributable production represents a 75% interest for Merian.

<sup>d</sup> Represents the ownership interest in the Nevada Gold Mines (NGM) joint venture. NGM is owned 38.5% by Newmont and owned 61.5% and operated by Barrick. The Company accounts for its interest in NGM using the proportionate consolidation method, thereby recognizing its pro-rata share of the assets, liabilities and operations of NGM.

<sup>e</sup> Attributable production includes Newmont's 40% interest in Pueblo Viejo, which is accounted for as an equity method investment.

<sup>f</sup> Attributable production includes Newmont's 31.9% interest in Lundin Gold, who wholly owns and operates the Fruta del Norte mine, which is accounted for as an equity method investment on a quarter lag.

<sup>(1)</sup> Attributable gold ounces sold excludes ounces related to the Pueblo Viejo mine, which is 40% owned by Newmont and accounted for as an equity method investment, and the Fruta del Norte mine, which is wholly owned by Lundin Gold whom the Company holds a 31.9% interest and is accounted for as an equity method investment.

<sup>(2)</sup> For the three months ended June 30, 2023 and September 30, 2023, Peñasquito production was impacted due to the suspension of operations as a result of the Union labor strike. Sales activity recognized in the third quarter of 2023 was related to adjustments on provisionally price concentrate sales subject to final settlement. Consequently, price per ounce/pound metrics are not meaningful ("N.M").

<sup>(3)</sup> Represents attributable gold from Newmont's 40% interest in Pueblo Viejo, which is accounted for as an equity method investment. Attributable gold ounces produced at Pueblo Viejo are not included in attributable gold ounces sold, as noted in footnote (1). Income and expenses of equity method investments are included in *Equity income (loss) of affiliates*.

<sup>(4)</sup> Represents attributable gold from Newmont's 31.9% interest in Lundin Gold, who wholly owns and operates the Fruta del Norte mine, which is accounted for on a quarterly-lag as an equity method investment. Attributable gold ounces produced by Lundin Gold represent prior quarter production and are not included in attributable gold ounces sold, as noted in footnote (1). Income and expenses of equity method investments are included in *Equity income (loss) of affiliates*.

<sup>(5)</sup> Sites are classified as held for sale as of March 31, 2024.

<sup>(6)</sup> Non-GAAP measure. See end of this release for reconciliation.

<sup>(1)</sup> Certain amounts and disclosures in the prior year have been reclassified to conform to the current year presentation.

<sup>(2)</sup> Cash from operations before working capital is a non-GAAP metric with the most directly comparable GAAP financial metric being to *Net cash provided by (used in) operating activities*, as shown reconciled above.

<sup>(3)</sup> During the first quarter of 2024, certain non-core assets were determined to meet the criteria for assets held for sale. As a result, the related assets and liabilities, including \$342 of *Cash and cash equivalents* and \$53 of restricted cash, included in *Other current assets* and *Other non-current assets*, were reclassified to *Current assets held for sale* and *Current liabilities held for sale*, respectively.

## Non-GAAP Financial Measures

Non-GAAP financial measures are intended to provide additional information only and do not have any standard meaning prescribed by GAAP. These measures should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. Refer to Non-GAAP Financial Measures within Part II, Item 7 within our Form 10-K for the year ended December 31, 2023, filed with the SEC on February 29, 2024 for further information on the non-GAAP financial measures presented below, including why management believes that its presentation of non-GAAP financial measures provides useful information to investors.

## Free Cash Flow

The following table sets forth a reconciliation of Free Cash Flow, a non-GAAP financial measure, to *Net cash provided by (used in) operating activities*, which the Company believes to be the GAAP financial measure most directly comparable to Free Cash Flow, as well as information regarding *Net cash provided by (used in) investing activities* and *Net cash provided by (used in) financing activities*.

	Three Months Ended March 31,	
	2024	2023

<sup>(1)</sup> Includes payment of \$291 for stamp duty tax, related to the Newcrest transaction, in the first quarter of 2024.

<sup>(2)</sup> *Net cash provided by (used in) investing activities* includes *Additions to property, plant and mine development*, which is included in the Company's computation of Free Cash Flow.

## Attributable Free Cash Flow

Management uses Attributable Free Cash Flow as a non-GAAP measure to analyze cash flows generated from operations that are attributable to the Company. Attributable Free Cash Flow is *Net cash provided by (used in) operating activities* after deducting net cash flows from operations attributable to noncontrolling interests less *Net cash provided by (used in) operating activities of discontinued operations* after deducting net cash flows from discontinued operations attributable to noncontrolling interests less *Additions to property, plant and mine development* after deducting property, plant and mine development attributable to noncontrolling interests. The Company believes that Attributable Free Cash Flow is useful as one of the bases for comparing the Company's performance with its competitors. Although Attributable Free Cash Flow and similar measures are frequently used as measures of cash flows generated from operations by other companies, the Company's calculation of Attributable Free Cash Flow is not necessarily comparable to such other similarly titled captions of other companies.

The presentation of non-GAAP Attributable Free Cash Flow is not meant to be considered in isolation or as an alternative to Net income attributable to Newmont stockholders as an indicator of the Company's performance, or as an alternative to *Net cash provided by (used in) operating activities* as a measure of liquidity as those terms are defined by GAAP, and does not necessarily indicate whether cash flows will be sufficient to fund cash needs. The Company's definition of Attributable Free Cash Flow is limited in that it does not represent residual cash flows available for discretionary expenditures due to the fact that the measure does not deduct the payments required for debt service and other contractual obligations or payments made for business acquisitions. Therefore, the Company believes it is important to view Attributable Free Cash Flow as a measure that provides supplemental information to the Company's Condensed Consolidated Statements of Cash Flows.

The following tables set forth a reconciliation of Attributable Free Cash Flow, a non-GAAP financial measure, to *Net cash provided by (used in) operating activities*, which the Company believes to be the GAAP financial measure most directly comparable to Attributable Free Cash Flow, as well as information regarding *Net cash provided by (used in) investing activities* and *Net cash provided by (used in) financing activities*.

<sup>(2)</sup> For the three months ended March 31, 2023, Merian had total consolidated *Additions to property, plant and mine development* of \$13 on a cash basis.

<sup>(3)</sup> *Net cash provided by (used in) investing activities* includes *Additions to property, plant and mine development*, which is included in the Company's computation of Free Cash Flow.

### Net Debt

Net Debt is calculated as *Debt* and *Lease and other financing obligations* less *Cash and cash equivalents* and time deposits included in *Time deposits and other investments*, as presented on the Condensed Consolidated Balance Sheets. *Cash and cash equivalents* and time deposits are subtracted from *Debt* and *Lease and other financing obligations* as these are highly liquid, low-risk investments and could be used to reduce the Company's debt obligations.

The following table sets forth a reconciliation of Net Debt, a non-GAAP financial measure, to *Debt* and *Lease and other financing obligations*, which the Company believes to be the GAAP financial measures most directly comparable to Net Debt.

	At March 31, 2024	At December 31, 2023

### ***Costs applicable to sales per ounce/gold equivalent ounce***

*Costs applicable to sales per ounce/gold equivalent ounce* are calculated by dividing the costs applicable to sales of gold and other metals by gold ounces or gold equivalent ounces sold, respectively. These measures are calculated for the periods presented on a consolidated basis.

The following tables reconcile these non-GAAP measures to the most directly comparable GAAP measures.

#### ***Costs applicable to sales per ounce***

	Three Months Ended March 31,

## All-In Sustaining Costs

All-in sustaining costs represent the sum of certain costs, recognized as GAAP financial measures, that management considers to be associated with production. All-in sustaining costs per ounce amounts are calculated by dividing all-in sustaining costs by gold ounces or gold equivalent ounces sold.

## Net debt to Adjusted EBITDA ratio

Management uses net debt to Adjusted EBITDA as non-GAAP measures to evaluate the Company's operating performance, including our ability to generate earnings sufficient to service our debt. Net debt to Adjusted EBITDA represents the ratio of the Company's debt, net of cash and cash equivalents, to Adjusted EBITDA. Net debt to Adjusted EBITDA does not represent, and should not be considered an alternative to, net income (loss), operating income (loss), or cash flow from operations as those terms are defined by GAAP, and does not necessarily indicate whether cash flows will be sufficient to fund cash needs. Although Net Debt to Adjusted EBITDA and similar measures are frequently used as measures of operations and the ability to meet debt service requirements by other companies, our calculation of net debt to Adjusted EBITDA measure is not necessarily comparable to such other similarly titled captions of other companies. The Company believes that net debt to Adjusted EBITDA provides useful information to investors and others in understanding and evaluating our operating results in the same manner as our management and Board of Directors. Management's determination of the components of net debt to Adjusted EBITDA is evaluated periodically and based, in part, on a review of non-GAAP financial measures used by mining industry analysts. Net income (loss) attributable to Newmont stockholders is reconciled to Adjusted EBITDA as follows:

<sup>(1)</sup> Represents Newcrest's pre-acquisition Adjusted EBITDA on a US GAAP basis from January 1, 2023 through to the acquisition date, November 6, 2023. This amount is added to our adjusted EBITDA to include a full twelve months of Newcrest results on a pro forma basis for the rolling twelve months ended March 31, 2024. The pro forma adjusted EBITDA was derived from Newcrest unaudited financial information for the 10 months ended October 31, 2023 and November 1, 2023 through November 6, 2023, the acquisition date. Newcrest's pre-acquisition Adjusted EBITDA has been added to our adjusted EBITDA for the purposes of Net Debt to Pro Forma Adjusted EBITDA ratio only.

<sup>(2)</sup> During the first quarter of 2024, certain non-core assets were determined to meet the criteria for assets held for sale. As a result, \$342 of Cash and cash equivalents were reclassified to Current assets held for sale.

## Net average realized price per ounce/ pound

Average realized price per ounce/ pound are non-GAAP financial measures. The measures are calculated by dividing the net consolidated gold, copper, silver, lead and zinc sales by the consolidated gold ounces, copper pounds, silver ounces, lead pounds and zinc pounds sold, respectively. These measures are calculated on a consistent basis for the periods presented on a consolidated basis. Average realized price per ounce/ pound statistics are intended to provide additional information only, do not have any standardized meaning prescribed by GAAP and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. The measures are not necessarily indicative of operating profit or cash flow from operations as determined under GAAP. Other companies may calculate these measures differently.

The following tables reconcile these non-GAAP measures to the most directly comparable GAAP measure:

## Gold by-product metrics

Copper, silver, lead, zinc and molybdenum are by-products often obtained during the process of extracting and processing the primary ore-body. In our GAAP Consolidated Financial Statements, the value of these by-products is recorded as a credit to our CAS and the value of the primary ore is recorded as Sales. In certain instances, copper, silver, lead and zinc are co-products, or a significant resource in the primary ore-body, and the revenue is recorded as Sales in our GAAP Consolidated Financial Statements.

Gold by-product metrics are non-GAAP financial measures that serve as a basis for comparing the Company's performance with certain competitors. As Newmont's operations are primarily focused on gold production, "Gold by-product metrics" were developed to allow investors to view Sales, CAS per ounce and AISC per ounce calculations that classify all copper, silver, lead, zinc and molybdenum production as a by-product, even when copper, silver, lead or zinc is a significant resource in the primary ore-body. These metrics are calculated by subtracting copper, silver, lead and zinc sales recognized from Sales and including these amounts as offsets to CAS.

Gold by-product metrics are calculated on a consistent basis for the periods presented on a consolidated basis. These metrics are intended to provide supplemental information only, do not have any standardized meaning prescribed by GAAP and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. Other companies may calculate these measures differently as a result of differences in the underlying accounting principles, policies applied and in accounting frameworks, such as in IFRS.

The following tables reconcile these non-GAAP measures to the most directly comparable GAAP measures:

	Three Months Ended March 31,	
	2024	2023
Consolidated gold sales, net	\$ 3,341	\$ 2,303
Consolidated other metal sales, net	682	376
Sales	<u>\$ 4,023</u>	<u>\$ 2,679</u>
Costs applicable to sales	\$ 2,106	\$ 1,482
Less: Consolidated other metal sales, net	(682)	(376)
By-product costs applicable to sales	<u>\$ 1,424</u>	<u>\$ 1,106</u>
Gold sold (thousand ounces)	1,599	1,208
Total Gold CAS per ounce (by-product) <sup>(1)</sup>	<u>\$ 891</u>	<u>\$ 916</u>
Total AISC	\$ 2,878	\$ 2,012
Less: Consolidated other metal sales, net	(682)	(376)
By-product AISC	<u>\$ 2,196</u>	<u>\$ 1,636</u>
Gold sold (thousand ounces)	1,599	1,208
Total Gold AISC per ounce (by-product) <sup>(1)</sup>	<u>\$ 1,373</u>	<u>\$ 1,354</u>

<sup>(1)</sup> Per ounce measures may not recalculate due to rounding.

**Cautionary Statement Regarding Forward Looking Statements, Including Outlook Assumptions:**

This news release contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbor created by such sections and other applicable laws. Where a forward-looking statement expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, such statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by the forward-looking statements. Forward-looking statements often address our expected future business and financial performance and financial condition; and often contain words such as "anticipate," "intend," "plan," "will," "would," "estimate," "expect," "believe," "pending" or "potential." Forward-looking statements in this news release may include, without limitation, (i) estimates of future production and sales, including production outlook, average future production and upside potential, including our Full Potential initiatives and synergies; (ii) estimates of future costs applicable to sales and all-in sustaining costs; (iii) estimates of future capital expenditures, including development and sustaining capital; (iv) expectations regarding the Tanami Expansion 2, Ahafo North and Cadia Block Caves projects, including, without limitation, expectations for production, milling, costs applicable to sales and all-in sustaining costs, capital costs, mine life extension, construction completion commercial production, and other timelines; (v) any share repurchases; (vi) estimates of future cost reductions, synergies, including pre-tax synergies, savings and efficiencies, Full Potential and productivity improvements, and future cash flow enhancements through portfolio optimization, (vii) expectations regarding future exploration and the development, growth and potential of Newmont Corporation's ("Newmont"), project pipeline and investments; (viii) expectations regarding future investments or divestitures, including of non-core assets; (ix) expectations regarding free cash flow and returns to stockholders, including with respect to future dividends and future share repurchases, the dividend framework and expected payout levels; (x) expectations regarding future mineralization, including, without limitation, expectations regarding reserves and recoveries; (xi) expectations regarding organic growth in our operations; and (xii) other outlook. Estimates or expectations of future events or results are based upon certain assumptions, which may prove to be incorrect. Such assumptions, include, but are not limited to: (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of operations and projects being consistent with current expectations and mine plans, including, without limitation, receipt of export approvals; (iii) political developments in any jurisdiction in which the Company operates being consistent with its current expectations; (iv) certain exchange rate assumptions for the Australian dollar to U.S. dollar and Canadian dollar to U.S. dollar, as well as other exchange rates being approximately consistent with current levels; (v) certain price assumptions for gold, copper, silver, zinc, lead and oil; (vi) prices for key supplies; (vii) the accuracy of current mineral reserve, mineral resource and mineralized material estimates; and (viii) other planning assumptions. Uncertainties include those relating to general macroeconomic uncertainty and changing market conditions, changing restrictions on the mining industry in the jurisdictions in which we operate, impacts to supply chain, including price, availability of goods, ability to receive supplies and fuel, and impacts of changes in interest rates. Such uncertainties could result in operating sites being placed into care and maintenance and impact estimates, costs and timing of projects. Uncertainties in geopolitical conditions could impact certain planning assumptions, including, but not limited to commodity and currency prices, costs and supply chain availabilities.

Future dividends beyond the dividend payable on June 27, 2024 to holders of record at the close of business on June 4, 2024 have not yet been approved or declared by the Board of Directors, and an annualized dividend payout or dividend yield has not been declared by the Board. Management's expectations with respect to future dividends are "forward-looking statements" and the Company's dividend policy is non-binding. The declaration and payment of future dividends remain at the discretion of the Board of Directors and will be determined based on Newmont's financial results, balance sheet strength, cash and liquidity requirements, future prospects, gold and commodity prices, and other factors deemed relevant by the Board.

For a more detailed discussion of such risks and other factors that might impact future looking statements, see the Company's Annual Report on Form 10-K for the year ended December 31, 2023 filed with the U.S. Securities and Exchange Commission (the "SEC") on February 29, 2024, under the heading "Risk Factors", and other factors identified in the Company's reports filed with the SEC, available on the SEC website or at [www.newmont.com](http://www.newmont.com). The Company does not undertake any obligation to release publicly revisions to any "forward-looking statement," including, without limitation, outlook, to reflect events or circumstances after the date of this news release, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws. Investors should not assume that any lack of update to a previously issued "forward-looking statement" constitutes a reaffirmation of that statement. Continued reliance on "forward-looking statements" is at investors' own risk. Investors are also encouraged to review our Form 10-Q for the quarter ended March 31, 2024, expected to be filed on, or about April 29, 2024.

**Notice Regarding Reserve and Resource:**

Unless otherwise stated herein, the reserves stated in this release represent estimates at December 31, 2023, which could be economically and legally extracted or produced at the time of the reserve determination. Estimates of proven and probable reserves are subject to considerable uncertainty. Such estimates are, or will be, to a large extent, based on metal prices and interpretations of geologic data obtained from drill holes and other exploration techniques, which data may not necessarily be indicative of future results. Additionally, resource does not indicate proven and probable reserves as defined by the SEC or the Company's standards. Estimates of measured, indicated and inferred resource are subject to further exploration and development, and are, therefore, subject to considerable uncertainty. Inferred resources, in particular, have a great amount of uncertainty as to their existence and their economic and legal feasibility. The Company cannot be certain that any part or parts of the resource will ever be converted into reserves. For additional information on our reserves and resources, please see Item 2 of the Company's Form 10-K, filed on February 29, 2024 with the SEC.
