## APPENDIX

Reconciliation of GAAP and non-GAAP Financial Measures

The Company has used the non-GAAP financial measures of adjusted net income and adjusted EPS in this earnings release, and the non-GAAP financial measures of organic revenues, organic revenues by type, organic revenues in constant dollars, adjusted EBITDA, and free cash flow in today's conference call. Organic revenue is calculated as revenue less acquisition revenue. Acquisition revenue is based on the trailing 12-month revenue of our acquired entities. These measures should not be considered in isolation or as a substitute for revenues, net income, earnings per share or other performance measures prepared in accordance with GAAP.

Management uses adjusted net income, adjusted EPS and adjusted EBITDA as measures of operating performance because these measures allow the Company to compare performance consistently over various periods without regard to the impact of the property disposition gains, the accelerated stock vesting expense or the SEC matter. Management also uses organic revenues, organic revenues by type and organic revenues in constant dollars to compare revenues over various periods excluding the impact of acquisitions and the change in foreign currency rates. Management uses free cash flow, which is calculated as net cash provided by operating activities less capital expenditures, to demonstrate the Company's ability to maintain its asset base and generate future cash flows from operations. Management believes all of these non-GAAP financial measures are useful to provide investors with information about current trends in, and period-over-period comparisons of, the Company's results of operations.

A non-GAAP financial measure is a numerical measure of financial performance, financial position, or cash flows that either 1) excludes amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the most directly comparable measure calculated and presented in accordance with GAAP in the statement of operations, balance sheet or statement of cash flows, or 2) includes amounts, or is subject to adjustments that have the effect of including amounts, that are excluded from the most directly comparable measure so calculated and presented.

Set forth below is a reconciliation of non-GAAP financial measures used in today's earnings release and conference call with their most comparable GAAP measures.
