Cautionary Statement Regarding Forward-Looking Information

Much of the information contained in this presentation is forward-looking information based upon management's current expectations and projections that involve risks and uncertainties. Forward-looking information includes, among other things, information concerning earnings per share, rate case activity, earnings per share growth, cash flow, sources of revenue, dividend growth and dividend payout ratios, sales volumes, capital plans, credit ratings, credit metrics, debt-financings, construction costs, investment opportunities, corporate initiatives (including the ESG Progress Plan), rate base, and environmental matters (including emission reductions). Readers are cautioned not to place undue reliance on this forward-looking information. Forward-looking information is not a guarantee of future performance and actual results may differ materially from those set forth in the forward-looking information.

Factors that could cause actual results to differ materially from those contemplated in any forward-looking statements include, but are not limited to: general economic conditions, including business and competitive conditions in the company's service territories; timing, resolution and impact of rate cases and other regulatory decisions, including rider reconciliations; the company's ability to continue to successfully integrate the operations of its subsidiaries; availability of the company's generating facilities and/or distribution systems; unanticipated changes in fuel and purchased power costs; key personnel changes; unusual, varying or severe weather conditions; continued industry restructuring and consolidation; continued advances in, and adoption of, new technologies that produce power or reduce power consumption; energy and environmental conservation efforts; electrification initiatives, mandates and other efforts to reduce the use of natural gas; the company's ability to successfully acquire and/or dispose of assets and projects and to execute on its capital plan; terrorist, physical or cyber-security threats or attacks and data security breaches; construction risks; labor disruptions; equity and bond market fluctuations; changes in the company's and its subsidiaries' ability to access the capital markets and shareholder approval of related proposals; changes in tax legislation or our ability to use certain tax benefits and carryforwards; federal, state, and local legislative and regulatory changes, including changes in rate-setting policies or procedures and environmental standards, the enforcement of these laws and regulations or permit conditions and changes in the interpretation of regulations by regulatory agencies; supply chain disruptions; inflation; political or geopolitical developments, including impacts on the global economy, supply chain and fuel prices, generally, from ongoing, escalating, or expanding regional conflicts; the impact from any health crises, including epidemics and pandemics; current and future litigation and regulatory investigations, proceedings or inquiries; changes in accounting standards; the financial performance of the American Transmission Company as well as projects in which the company's energy infrastructure business invests; the ability of the company to obtain additional generating capacity at competitive prices; goodwill and its possible impairment; and other factors described under the heading "Factors Affecting Results, Liquidity and Capital Resources" in Management's Discussion and Analysis of Financial Condition and Results of Operations and under the headings "Cautionary Statement Regarding Forward-Looking Information" and "Risk Factors" contained in WEC Energy Group's Form 10-K for the year ended December 31, 2023, and in subsequent reports filed with the Securities and Exchange Commission. Except as may be required by law, WEC Energy Group expressly disclaims any obligation to publicly update or revise any forward-looking information.

In April, Wisconsin Electric, Wisconsin Gas and Wisconsin Public Service filed applications with the state Public Service Commission

In 2025, we'll focus our spending and investment on 3 key priorities:

- Reducing customer outages
- Building infrastructure needed to support jobs and economic growth in Wisconsin
- Meeting new expected EPA environmental rules

Customer bills

Wisconsin Electric and Wisconsin Public Service

Typical residential customer bills are, and will continue to be, significantly below the national average and in line with utilities in Wisconsin and across the Midwest.

2024-2028 Capital Plan

Increased Five-Year Capital Plan by \$300 Million

*ATC is accounted for using the equity method; this represents WEC Energy Group's portion of the investment.

** Includes all gas utilities and Bluewater.

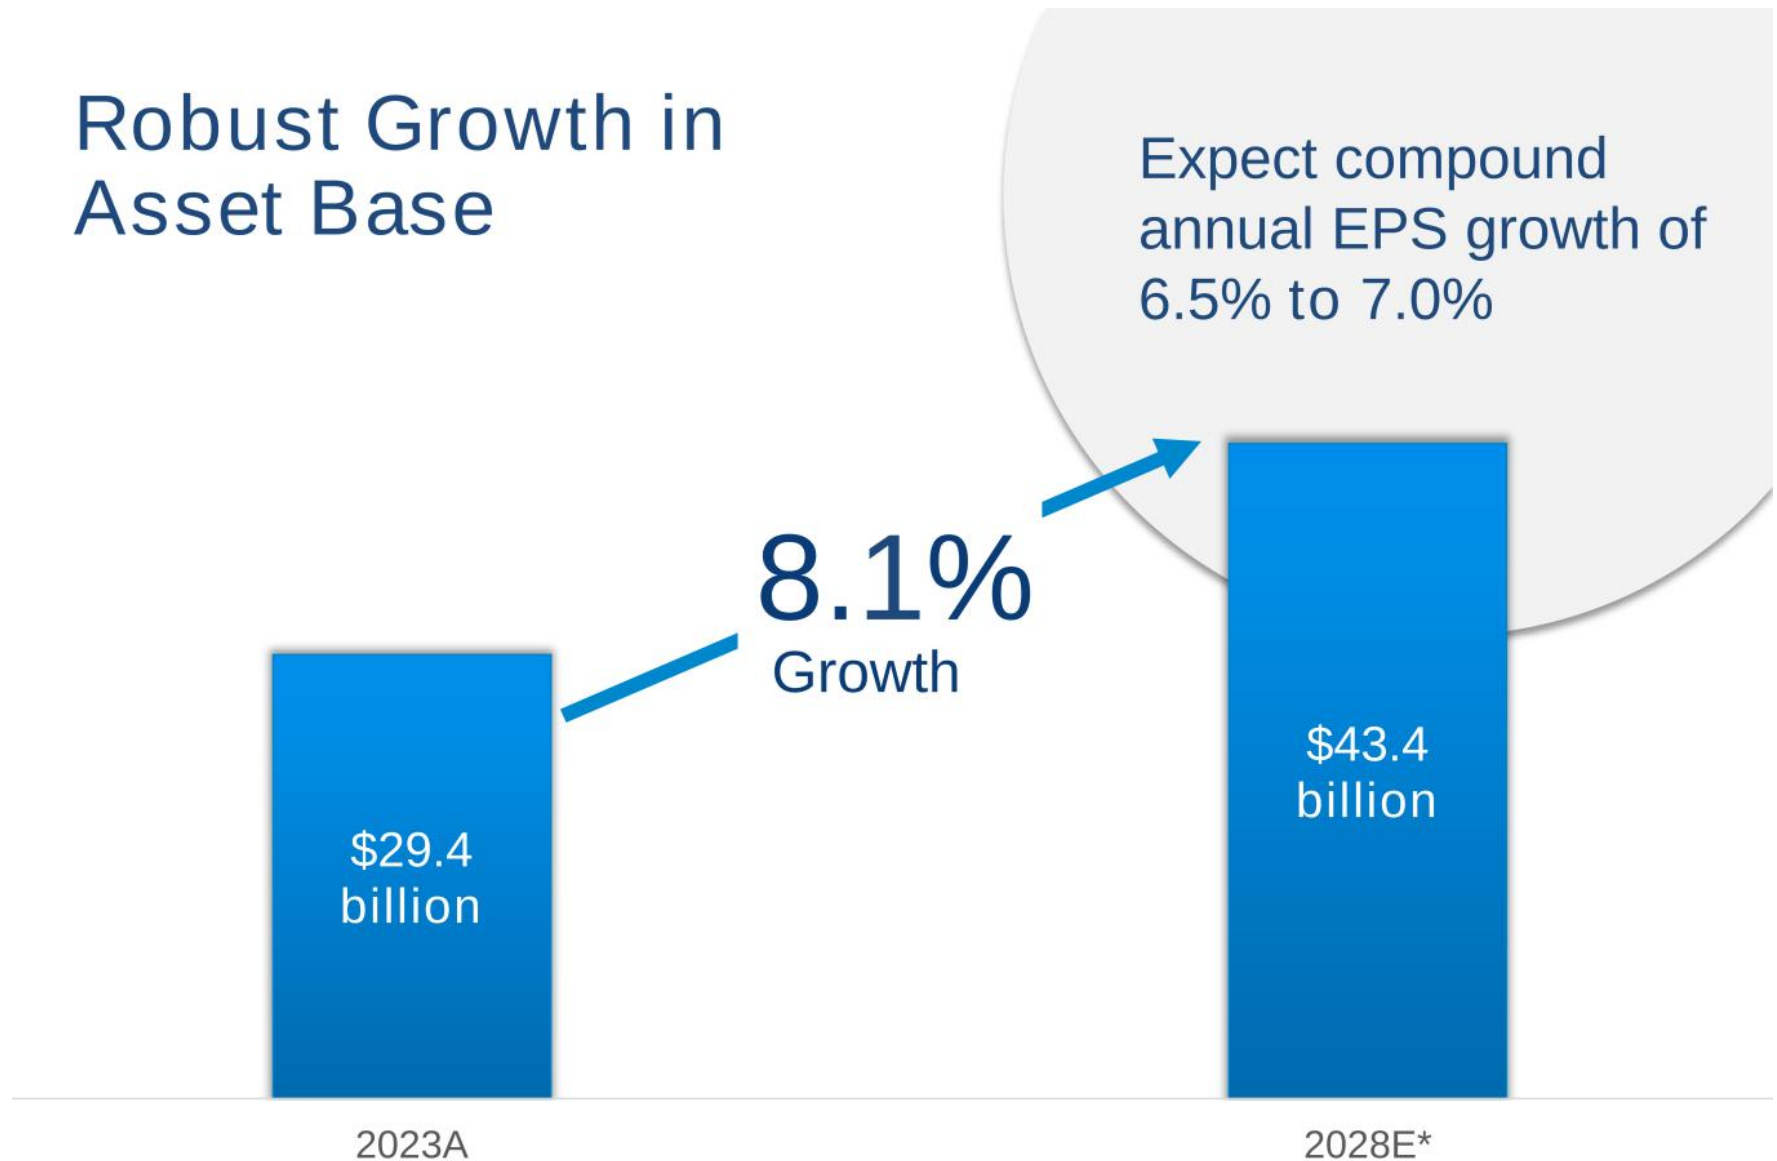

Capital Plan – Key Drivers

- Illinois gas delivery: - \$800 million
- Energy infrastructure: + \$800 million
- Regulated renewables: + \$200 million
- Electric delivery: + \$100 million

Illinois Proceedings

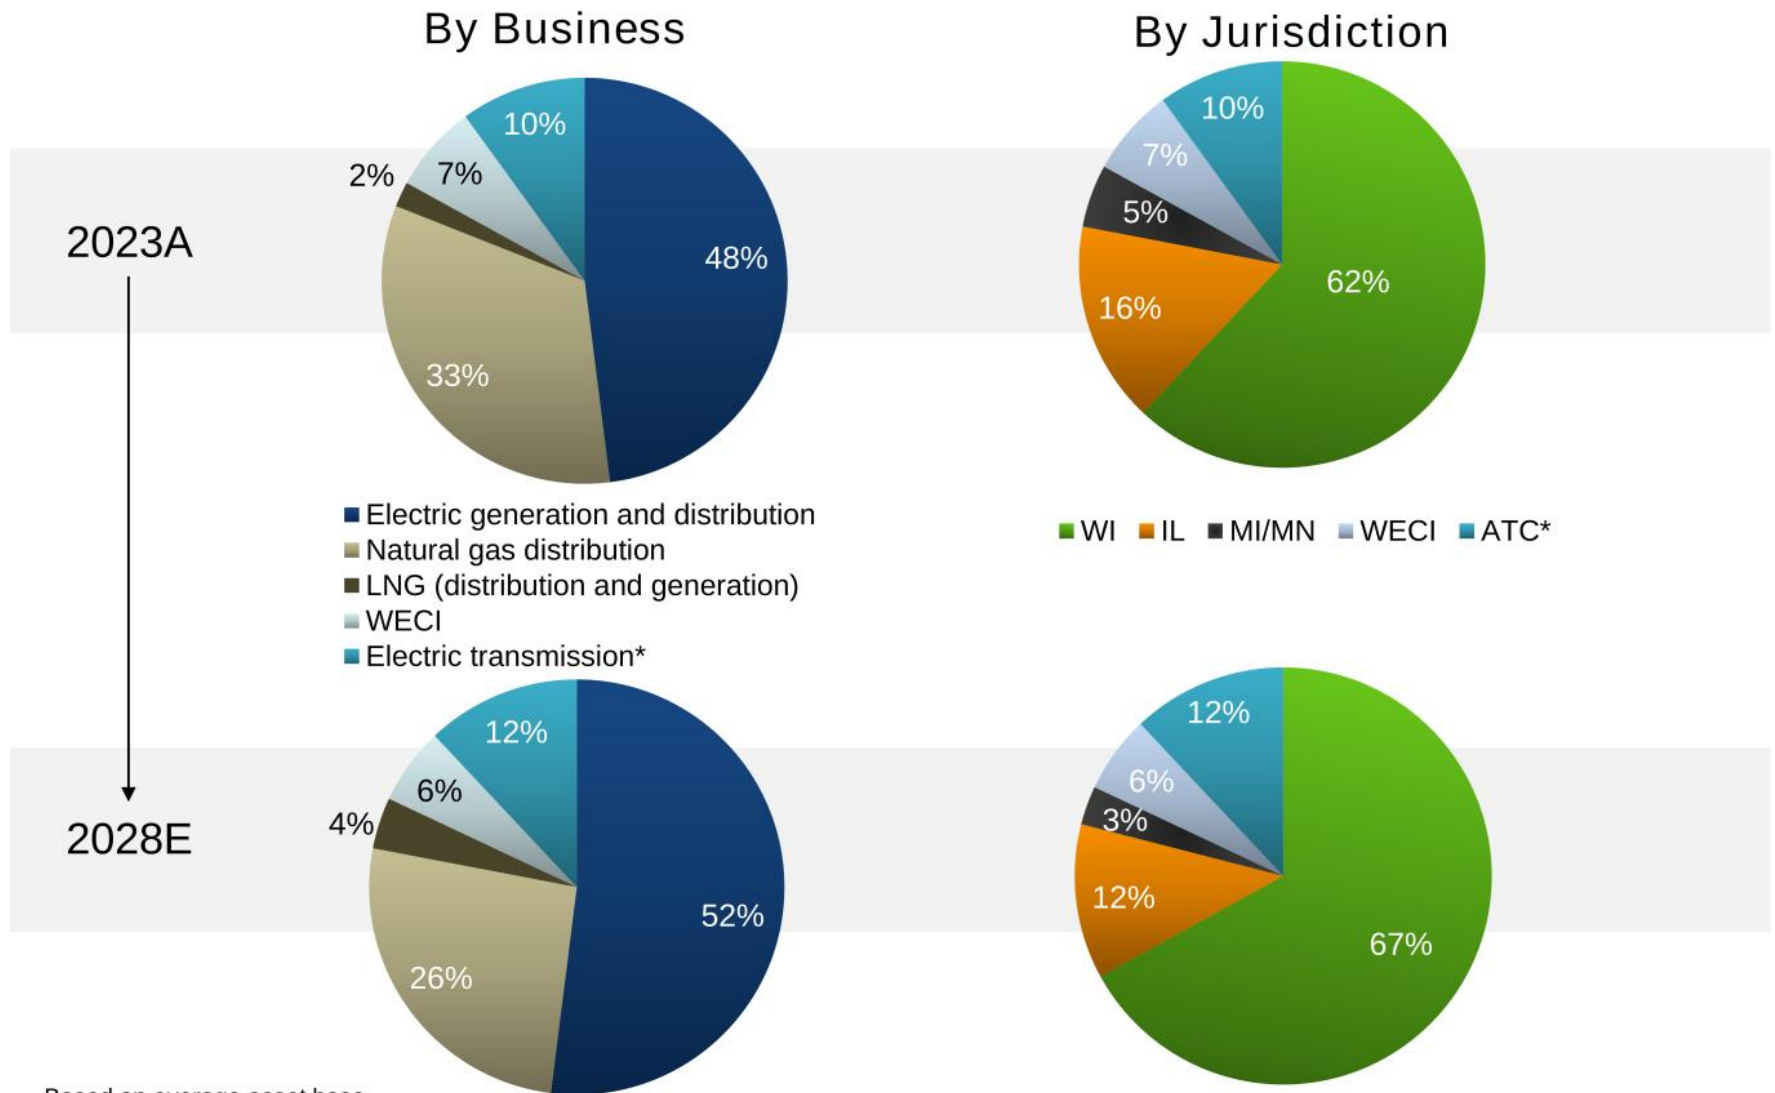

- The Illinois Commerce Commission (ICC) ordered Peoples Gas to pause all spending on the Safety Modernization Program until it determines ‘the optimal method’ of pipe replacement and investment level.
- ICC granted the company’s request for a limited rehearing seeking to restore \$145 million of costs largely related to unfinished and emergency work under the Safety Modernization Program.
 - We expect the commission to issue an order by June 1, 2024.
- ICC also opened a new docket to examine the Future of Gas across the state of Illinois.
 - This review is expected to take at least one year to complete.
- In 2023, the company booked a non-cash charge of 41 cents per share related to the disallowance of construction costs for modern service centers and facilities. At the appropriate time, we will appeal the decision in court.

Exiting Coal

We now plan to eliminate coal as an energy source three years earlier - by end of 2032.

- Retirements planned:
 - Oak Creek Units 5-6: 528 MW (May 2024)
 - Oak Creek Units 7-8: 611 MW (late in 2025)
 - Columbia Units 1-2: 300 MW (by June 1, 2026)
 - Weston Unit 3: 328 MW (end of 2031)
- Enhancing fuel flexibility (gas blending) at Oak Creek Power the Future units and Weston Unit 4.
- By end of 2030, we expect to use coal only as a backup fuel.

Investing \$7.0 Billion in Regulated Renewables

Plan to build and own 3,800 MW – more than **quadrupling** our carbon-free generation.

2024-2028 Plan includes:

Solar Total
2,700 MW
\$4.7 billion

Battery Storage Total
250 MW
\$0.4 billion

Wind Total
880 MW
\$1.9 billion

Grand Total

1. Madison Gas & Electric will own a minority interest at each site.
2. Parks have or are seeking approval for a total of 365 MWs of battery capacity that is not included in the 2024-2028 plan. Evaluating timing and final implementation of batteries.
3. Project seeking regulatory approval.

Modernizing Our Gas-Fueled Generation Fleet

Modern, efficient natural gas generation will serve as a critical resource in our energy transformation.

Oak Creek Combustion Turbines*

- 1,100 MW planned
- Expected investment: \$1.2 billion

New gas lateral*

- To support generation at the Oak Creek campus
- Expected investment: \$180 million

Paris RICE generation*

- 128 MW planned
- Expected investment: \$280 million

West Riverside Energy Center Combined-Cycle

- Additional 100 MW option
- Expected investment: \$100 million
- Received approval from the Wisconsin Commission on February 22, 2024
- Target: Q2 2024

* Filed and pending regulatory approval.

Investing in Reliability for Our Natural Gas Network

LNG provides a solution to meet peak customer demand for heating and ensures gas supply for power generation.

- New proposed LNG storage facilities are needed to ensure gas supply for winter reliability.
 - Expected investment: \$860 million
 - 4 Bcf planned
- Bluff Creek and Ixonia LNG facilities completed
 - Investment: ~\$410 million
 - 2 Bcf
 - In-service dates:
 - Bluff Creek LNG Facility: November 30, 2023
 - Ixonia LNG Facility: February 23, 2024

Carbon Reduction Goals – Electric Generation

We have established aggressive carbon reduction goals for our electric generating fleet, aligned with or surpassing global emissions pathways aimed at limiting warming to 1.5°C.

*Includes projection of potential carbon offsets by 2050.

Methane Reduction

Achieved¹ and anticipated methane emission reduction from natural gas distribution. Aligns with effort to limit warming to 1.5°C.

Goal:

Net zero

by end of 2030²

Use of renewable natural gas (RNG) is expected to contribute significantly to our goal.

1. Represents a decrease in the rate of methane emissions across our system from a 2011 baseline.
2. This goal applies to emissions from WEC Energy Group natural gas distribution companies calculated in accordance with EPA's 40 Code of Federal Regulations Part 98, Subpart W reporting rule.

Organic Flow Battery Storage

- Leading a pilot project to test a new form of long-duration energy storage.
 - Partnering with EPRI and CMBlu Energy
- This system uses a proprietary technology that incorporates environmentally friendly materials - 'a green battery.'
- The project will test battery system performance, including the ability to store and discharge energy for up to twice as long as the typical lithium-ion batteries in use today.
- Results will be shared across the industry

* WEC Energy Group has provided adjusted earnings per share (non-GAAP earnings per share) as a complement to, and not as an alternative to, earnings per share presented in accordance with GAAP. Adjusted earnings per share exclude, as applicable, (1) a one-time reduction in income tax expense related to a revaluation of our deferred taxes as a result of the Tax Cuts and Jobs Act of 2017; (2) costs related to the acquisition of Integrys Energy Group; (3) the results of operations of Integrys and its subsidiaries; (4) the additional shares of WEC Energy Group common stock that were issued as part of the acquisition; and (5) a non-cash charge related to the ICC's disallowance of certain capital costs. None of these items are indicative of WEC Energy Group's operating performance. Therefore, WEC Energy Group believes that the presentation of adjusted earnings per share is relevant and useful to investors to understand the company's operating performance. Management uses such measures internally to evaluate the company's performance and manage its operations.
