## CONSOLIDATED FINANCIAL STATEMENTS OF ENLINK MIDSTREAM PARTNERS, LP AND SUBSIDIARIES

## TABLE OF CONTENTS

Item	Description						
	PART I—FINANCIAL INFORMATION						
<u>1.</u>	<u>Financial Statements</u>	4					
2.	Management's Discussion and Analysis of Financial Condition and Results of Operations	27					

## **DEFINITIONS**

The following terms as defined are used in this document:

Defined Term	Definition
/d	Per day.
2014 Plan	ENLC's 2014 Long-Term Incentive Plan.
Adjusted gross margin	Revenue less cost of sales, exclusive of operating expenses and depreciation and amortization related to our operating segments. Adjusted gross margin is a non-GAAP financial measure. See "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations—Non-GAAP Financial Measures" for additional information.
AR Facility	A three-year committed accounts receivable securitization facility of up to \$300 million entered into by EnLink Midstream Funding, LLC, a bankruptcy-remote special purpose entity and our indirect subsidiary, with PNC Bank, National Association, as administrative agent and lender, and PNC Capital Markets, LLC, as structuring agent.
ASC	The FASB Accounting Standards Codification.
Ascension JV	Ascension Pipeline Company, LLC, a joint venture between a subsidiary of ENLK and a subsidiary of Marathon Petroleum Corporation in which ENLK owns a 50% interest and Marathon Petroleum Corporation owns a 50% interest. The Ascension JV, which began operations in April 2017, owns an NGL pipeline that connects ENLK's Riverside fractionator to Marathon Petroleum Corporation's Garyville refinery.
Bbls	Barrels.
Bcf	Billion cubic feet.
Cedar Cove JV	Cedar Cove Midstream LLC, a joint venture between a subsidiary of ENLK and a subsidiary of Kinder Morgan, Inc. in which ENLK owns a 30% interest and Kinder Morgan, Inc. owns a 70% interest. The Cedar Cove JV, which was formed in November 2016, owns gathering and compression assets in Blaine County, Oklahoma, located in the STACK play.
CNOW	Central Northern Oklahoma Woodford Shale.
Commission	U.S. Securities and Exchange Commission.
Consolidated Credit Facility	A \$1.75 billion unsecured revolving credit facility entered into by ENLC that matures on January 25, 2024, which includes a \$500.0 million letter of credit subfacility.
Delaware Basin	A large sedimentary basin in West Texas and New Mexico.
Delaware Basin JV	Delaware G&P LLC, a joint venture between a subsidiary of ENLK and an affiliate of NGP in which ENLK owns a 50.1% interest and NGP owns a 49.9% interest. The Delaware Basin JV, which was formed in August 2016, owns the Lobo processing facilities and the Tiger Plant located in the Delaware Basin in Texas.
Devon	Devon Energy Corporation.
ENLC	EnLink Midstream, LLC.
ENLK	EnLink Midstream Partners, LP or, when applicable, EnLink Midstream Partners, LP together with its consolidated subsidiaries. Also referred to as the "Partnership."
FASB	Financial Accounting Standards Board.
GAAP	Generally accepted accounting principles in the United States of America.
Gal	Gallons.
GCF	Gulf Coast Fractionators, which owns an NGL fractionator in Mont Belvieu, Texas. ENLK owns 38.75% of GCF.
GIP	Global Infrastructure Management, LLC, an independent infrastructure fund manager, itself, its affiliates, or managed fund vehicles, including GIP III Stetson I, L.P., GIP III Stetson II, L.P., and their affiliates.
ISDAs	International Swaps and Derivatives Association Agreements.
Merger	On January 25, 2019, NOLA Merger Sub, LLC (previously a wholly-owned subsidiary of ENLC) merged with and into ENLK with ENLK continuing as the surviving entity and a subsidiary of ENLC.
Midland Basin	A large sedimentary basin in West Texas.
MMbbls	Million barrels.
MMbtu	Million British thermal units.
MVC	Minimum volume commitment.
NGL	Natural gas liquid.
NGP	NGP Natural Resources XI, LP.
OPEC+	Organization of the Petroleum Exporting Countries and its broader partners.
Operating Partnership	EnLink Midstream Operating, LP, a Delaware limited partnership and wholly owned subsidiary of ENLK.
ORV	ENLK's Ohio River Valley crude oil, condensate stabilization, natural gas compression, and brine disposal assets in the Utica and Marcellus shales.

Permian Basin	A large sedimentary basin that includes the Midland and Delaware Basins.
POL contracts	Percentage-of-liquids contracts.
POP contracts	Percentage-of-proceeds contracts.
Series B Preferred Units	ENLK's Series B Cumulative Convertible Preferred Units.
Series C Preferred Units	ENLK's Series C Fixed-to-Floating Rate Cumulative Redeemable Perpetual Preferred Units.
STACK	Sooner Trend Anadarko Basin Canadian and Kingfisher Counties in Oklahoma.
Term Loan	A term loan originally in the amount of \$850.0 million entered into by ENLK on December 11, 2018 with Bank of America, N.A., as Administrative Agent, Bank of Montreal and Royal Bank of Canada, as Co-Syndication Agents, Citibank, N.A. and Wells Fargo Bank, National Association, as Co-Documentation Agents, and the lenders party thereto, which ENLC assumed in connection with the Merger and the obligations of which ENLK guarantees.

Non-cash financing activities:				
Redemption of non-controlling interest	\$	\$	(4.0)	

## ENLINK MIDSTREAM PARTNERS, LP AND SUBSIDIARIES

Notes to Consolidated Financial Statements March 31, 2021 (Unaudited)

#### (1) General

In this report, the term "Partnership," as well as the terms "ENLK," "our," "we," "us," and "its" are sometimes used as abbreviated references to EnLink Midstream Partners, LP itself or EnLink Midstream Partners, LP together with its consolidated subsidiaries, including the Operating Partnership.

Please read the notes to the consolidated financial statements in conjunction with the Definitions page set forth in this report prior to Part I—Financial Information.

#### a. Organization of Business

ENLK is a Delaware limited partnership formed in 2002. Our business activities are conducted through the Operating Partnership and the subsidiaries of the Operating Partnership.

EnLink Midstream GP, LLC, a Delaware limited liability company, is our general partner. Our general partner manages our operations and activities. Our general partner is a direct, wholly-owned subsidiary of ENLC. ENLC's units are traded on the New York Stock Exchange under the symbol "ENLC." ENLC's managing member is a wholly-owned subsidiary of GIP.

#### b. Nature of Business

We primarily focus on providing midstream energy services, including:

- gathering, compressing, treating, processing, transporting, storing, and selling natural gas;
- fractionating, transporting, storing, and selling NGLs; and
- gathering, transporting, stabilizing, storing, trans-loading, and selling crude oil and condensate, in addition to brine disposal services.

Our midstream energy asset network includes approximately 11,900 miles of pipelines, 22 natural gas processing plants with approximately 5.5 Bcf/d of processing capacity, seven fractionators with approximately 290,000 Bbls/d of fractionation capacity, barge and rail terminals, product storage facilities, purchasing and marketing capabilities, brine disposal wells, a crude oil trucking fleet, and equity investments in certain joint ventures. Our operations are based in the United States, and our sales are derived primarily from domestic customers.

Our natural gas business includes connecting the wells of producers in our market areas to our gathering systems. Our gathering systems consist of networks of pipelines that collect natural gas from points at or near producing wells and transport it to our processing plants or to larger pipelines for further transmission. We operate processing plants that remove NGLs from the natural gas stream that is transported to the processing plants by our own gathering systems or by third-party pipelines. In conjunction with our gathering and processing business, we may purchase natural gas and NGLs from producers and other supply sources and sell that natural gas or NGLs to utilities, industrial consumers, marketers, and pipelines. Our transmission pipelines receive natural gas from our gathering systems and from third-party gathering and transmission systems and deliver natural gas to industrial end-users, utilities, and other pipelines.

Our fractionators separate NGLs into separate purity products, including ethane, propane, iso-butane, normal butane, and natural gasoline. Our fractionators receive NGLs primarily through our transmission lines that transport NGLs from East Texas and from our South Louisiana processing plants. Our fractionators also have the capability to receive NGLs by truck or rail terminals. We also have agreements pursuant to which third parties transport NGLs from our West Texas and Central Oklahoma operations to our NGL transmission lines that then transport the NGLs to our fractionators. In addition, we have NGL storage capacity to provide storage for customers.

Our crude oil and condensate business includes the gathering and transmission of crude oil and condensate via pipelines, barges, rail, and trucks, in addition to condensate stabilization and brine disposal. We also purchase crude oil and condensate

from producers and other supply sources and sell that crude oil and condensate through our terminal facilities to various markets.

Across our businesses, we primarily earn our fees through various fee-based contractual arrangements, which include stated fee-only contract arrangements or arrangements with fee-based components where we purchase and resell commodities in connection with providing the related service and earn a net margin as our fee. We earn our net margin under our purchase and resell contract arrangements primarily as a result of stated service-related fees that are deducted from the price of the commodities purchased. While our transactions vary in form, the essential element of most of our transactions is the use of our assets to transport a product or provide a processed product to an end-user or marketer at the tailgate of the plant, pipeline, or barge, truck, or rail terminal.

#### c. COVID-19 Update

On March 11, 2020, the World Health Organization declared the ongoing coronavirus (COVID-19) outbreak a pandemic and recommended containment and mitigation measures worldwide. There is considerable uncertainty regarding how long the COVID-19 pandemic will persist and affect economic conditions and the extent and duration of changes in consumer behavior.

#### (2) Significant Accounting Policies

#### a. Basis of Presentation

The accompanying consolidated financial statements are unaudited and do not include all the information and disclosures required by GAAP for complete financial statements. All adjustments that, in the opinion of management, are necessary for a fair presentation of the results of operations for the interim periods have been made and are of a recurring nature unless otherwise disclosed herein. The results of operations for such interim periods are not necessarily indicative of results of operations for a full year. These consolidated financial statements should be read in conjunction with the consolidated financial statements and accompanying notes included in our Annual Report for the year ended December 31, 2020. Certain reclassifications were made to the financial statements for the prior period to conform to current period presentation. The effect of these reclassifications had no impact on previously reported partners' equity or net income (loss). All significant intercompany balances and transactions have been eliminated in consolidation.

#### b. Revenue Recognition

Certain of our gathering and processing agreements provide for quarterly or annual MVCs. Under these agreements, our customers or suppliers agree to ship and/or process a minimum volume of product on our systems over an agreed time period. If a customer or supplier under such an agreement fails to meet its MVC for a specified period, the customer is obligated to pay a contractually-determined fee based upon the shortfall between actual product volumes and the MVC for that period. Some of these agreements also contain make-up right provisions that allow a customer or supplier to utilize gathering or processing fees in excess of the MVC in subsequent periods to offset shortfall amounts in previous periods. We record revenue under MVC contracts during periods of shortfall when it is known that the customer cannot, or will not, make up the deficiency in subsequent periods. Deficiency fee revenue is included in midstream services revenue.

For our firm transportation contracts, we transport commodities owned by others for a stated monthly fee for a specified monthly quantity with an additional fee based on actual volumes. We include transportation fees from firm transportation contracts in our midstream services revenue.

The following table summarizes the contractually committed fees that we expect to recognize in our consolidated statements of operations, in either revenue or reductions to cost of sales, from MVC and firm transportation contractual provisions. All amounts in the table below are determined using the contractually-stated MVC or firm transportation volumes specified for each period multiplied by the relevant deficiency or reservation fee. Actual amounts could differ due to the timing of revenue recognition or reductions to cost of sales resulting from make-up right provisions included in our agreements, as well as due to nonpayment or nonperformance by our customers. These fees do not represent the shortfall amounts we expect to collect under our MVC contracts, as we generally do not expect volume shortfalls to equal the full amount of the contractual MVCs during these periods. For example, for the three months ended March 31, 2021, we had contractual commitments of \$13.5 million under our MVC contracts and recorded \$0.3 million of revenue due to volume shortfalls.

MVC and Firm Transportation Commitments (in millions) (1)

2021 (remaining)	\$ 106.3
2022	127.5
2023	116.5
2024	104.4
2025	62.0
Thereafter	 342.1
Total	\$ 858.8

<sup>(1)</sup> Amounts do not represent expected shortfall under these commitments.

### (3) Intangible Assets

Intangible assets associated with customer relationships are amortized on a straight-line basis over the expected period of benefits of the customer relationships, which range from 10 to 20 years.

The following table represents our change in carrying value of intangible assets (in millions):

	Gross Carrying Amount		Accumulated Amortization		Net Carrying Amount
Three Months Ended March 31, 2021					
Customer relationships, beginning of period	\$ 1,794.2	\$	(668.8)	\$	1,125.4
Amortization expense			(30.9)		(30.9)
Customer relationships, end of period	\$ 1,794.2	\$	(699.7)	\$	1,094.5

The weighted average amortization period for intangible assets is 15.0 years. Amortization expense was \$30.9 million for each of the three months ended March 31, 2021 and 2020, respectively.

The following table summarizes our estimated aggregate amortization expense for the next five years and thereafter (in millions):

2021 (remaining)	\$ 92.5
2022	123.4
2023	123.4
2024	123.4
2025	106.1
Thereafter	 525.7
Total	\$ 1,094.5

### (4) Related Party Transactions

#### (a) Transactions with ENLC

Related Party Debt. Related party debt includes borrowings under the Consolidated Credit Facility, the Term Loan, \$500.0 million in aggregate principal amount of ENLC's 5.625% senior unsecured notes due January 15, 2028 (the "2028 Notes"), and \$500.0 million in aggregate principal amount of ENLC's 5.375% senior unsecured notes due June 1, 2029 (the "2029 Notes") to fund the operations of ENLK through a related party arrangement with ENLC. See "Note 5—Long-Term Debt" for more information on this arrangement.

We had accounts receivable balances related to transactions with ENLC of \$30.0 million and \$43.2 million as of March 31, 2021 and December 31, 2020, respectively.

Transfer of EORV. In December 2020, we sold our ownership of EORV to ENLC for \$12.0 million. Subsequent to the sale, ENLC converted EORV from a corporation to a limited liability company. EORV originally was a corporation that owned the Ohio River Valley assets associated with the Clearfield acquisition and in 2012 transferred them to the Operating Partnership in exchange for equity interests in the Operating Partnership. EORV had a \$170.0 million note payable to the Operating Partnership due 2027, which was eliminated in consolidation prior to the transfer. We presented a \$170.0 million note receivable from EORV in our consolidated balance sheets as of March 31, 2021 and December 31, 2020. The note eliminates in consolidation at ENLC. In addition, we recorded a \$198.1 million increase in non-controlling interest related to EORV's ownership of the Operating Partnership, which we fully consolidate. For the three months ended March 31, 2021, we distributed \$4.2 million to EORV for its ownership of the Operating Partnership.

#### (b) Transactions with Cedar Cove JV

For the three months ended March 31, 2021 and 2020, we recorded cost of sales of \$3.2 million and \$2.9 million, respectively, related to our purchase of residue gas and NGLs from the Cedar Cove JV subsequent to processing at our Central Oklahoma processing facilities. Additionally, we had accounts payable balances related to transactions with the Cedar Cove JV of \$1.2 million and \$1.0 million at March 31, 2021 and December 31, 2020, respectively.

#### (c) Transactions with GIP

For the three months ended March 31, 2021, we recorded general and administrative expenses of \$0.1 million related to personnel secondment services provided by GIP. We did not record any expenses related to transactions with GIP for the three months ended March 31, 2020.

Management believes the foregoing transactions with related parties were executed on terms that are fair and reasonable to us. The amounts related to related party transactions are specified in the accompanying consolidated financial statements.

#### (5) Long-Term Debt

As of March 31, 2021 and December 31, 2020, long-term debt consisted of the following (in millions):

		March 31, 2	021	December 31, 2020				
	Outstanding Principal	Premiun (Discoun		Long-Term Outstanding Debt Principal		Long-Term Debt		
Related party debt	\$ 1,348.7	\$ -	- \$ 1,348.7	\$ 1,348.7	\$ —	\$ 1,348.7		
AR Facility due 2023 (1)	150.0	_	- 150.0	250.0	_	250.0		
4.40% Senior unsecured notes due 2024	521.8	1	0 522.8	521.8	1.1	522.9		
4.15% Senior unsecured notes due 2025	720.8	(0	5) 720.3	720.8	(0.6)	720.2		
4.85% Senior unsecured notes due 2026	491.0	(0	4) 490.6	491.0	(0.4)	490.6		
5.60% Senior unsecured notes due 2044	350.0	(0	2) 349.8	350.0	(0.2)	349.8		
5.05% Senior unsecured notes due 2045	450.0	(5	6) 444.4	450.0	(5.7)	444.3		
5.45% Senior unsecured notes due 2047	500.0	(0	1) 499.9	500.0	(0.1)	499.9		
Debt, long-term and current maturities	\$ 4,532.3	\$ (5	8) 4,526.5	\$ 4,632.3	\$ (5.9)	4,626.4		
Debt issuance cost (2)			(31.5	)		(32.6)		
Less: Current maturities of long-term debt, from related parties (3)			(349.8	)		(349.8)		
Long-term debt, net of unamortized issuance cost	t		\$ 4,145.2	=		\$ 4,244.0		

<sup>(1)</sup> Bears interest based on LMIR and/or LIBOR plus an applicable margin. The effective interest rate was 1.4% and 2.0% at March 31, 2021 and December 31, 2020, respectively.

#### Related Party Debt

Related party debt includes borrowings under the Term Loan, the Consolidated Credit Facility, the 2028 Notes, and the 2029 Notes. Interest charged to ENLK for borrowings made through the related party arrangement will be the same as interest charged to ENLC on borrowings under the Term Loan, the Consolidated Credit Facility, the 2028 Notes, and the 2029 Notes, respectively. As of March 31, 2021 and December 31, 2020, \$998.9 million and \$349.8 million of related party debt is included in "Long-term debt" and "Current maturities of long-term debt, from related parties," respectively, in the consolidated balance sheet related to these borrowings.

The indebtedness under the Term Loan the Consolidated Credit Facility, the 2028 Notes, and the 2029 Notes was incurred by ENLC but is guaranteed by ENLK. Therefore, the covenants in the agreements governing such indebtedness described below affect balances owed by ENLK on the related party debt.

#### Term Loan

On December 11, 2018, ENLK entered into the Term Loan with Bank of America, N.A., as Administrative Agent, Bank of Montreal and Royal Bank of Canada, as Co-Syndication Agents, Citibank, N.A. and Wells Fargo Bank, National Association, as Co-Documentation Agents, and the lenders party thereto. Upon the closing of the Merger, ENLC assumed ENLK's obligations under the Term Loan, and ENLK became a guarantor of the Term Loan. In the event that ENLC defaults on the Term Loan and the outstanding balance becomes due, ENLK will be liable for any amount owed on the Term Loan not paid by ENLC. The outstanding balance of the Term Loan was \$350.0 million as of March 31, 2021. The obligations under the Term Loan are unsecured.

At March 31, 2021, ENLC was in compliance with and expects to be in compliance with the financial covenants of the Term Loan until the Term Loan matures on December 10, 2021. Accordingly, we do not expect to make payments related to our guarantee of the \$350.0 million outstanding on the Term Loan.

<sup>(2)</sup> Net of amortization of \$15.3 million and \$14.1 million at March 31, 2021 and December 31, 2020, respectively.

<sup>(3)</sup> Bears interest based on Prime and/or LIBOR plus an applicable margin. The effective interest rate was 1.6% and 1.7% at March 31, 2021 and December 31, 2020, respectively. The Term Loan will mature on December 10, 2021. Therefore, the outstanding principal balance, net of discount and debt issuance costs, is classified as "Current maturities of long-term debt" on the consolidated balance sheet as of March 31, 2021.

AR Facility

On October 21, 2020, EnLink Midstream Funding, LLC, a bankruptcy-remote special purpose entity that is an indirect subsidiary of ENLC (the "SPV") entered into the AR Facility to borrow up to \$250.0 million. In connection with the AR Facility, certain subsidiaries of ENLC have sold and contributed, and will continue to sell or contribute, their accounts receivable to the SPV to be held as collateral for borrowings under the AR Facility. The SPV's assets are not available to satisfy the obligations of ENLC or any of its affiliates.

On February 26, 2021, the SPV entered into an amendment to the AR Facility that, among other things: (i) increased the AR Facility limit and lender commitments by \$50.0 million to \$300.0 million, (ii) reduced the Adjusted LIBOR and LMIR (each as defined in the AR Facility) minimum floor to zero, rather than the previous 0.375%, and (iii) reduced the currently effective drawn fee to 1.25% rather than the previous 1.625%.

Since our investment in the SPV is not sufficient to finance its activities without additional support from us, the SPV is a variable interest entity. We are the primary beneficiary of the SPV because we have the power to direct the activities that most significantly affect its economic performance and we are obligated to absorb its losses or receive its benefits from operations. Since we are the primary beneficiary of the SPV, we consolidate its assets and liabilities, which consist primarily of billed and unbilled accounts receivable of \$505.9 million and long-term debt of \$150.0 million as of March 31, 2021.

The amount available for borrowings at any one time under the AR Facility is limited to a borrowing base amount calculated based on the outstanding balance of eligible receivables held as collateral, subject to certain reserves, concentration limits, and other limitations. As of March 31, 2021, the AR Facility had a borrowing base of \$262.1 million. Borrowings under the AR Facility bear interest (based on LIBOR or LMIR (as defined in the AR Facility)) plus a drawn fee in the amount of 1.25% at March 31, 2021. The drawn fee varies based on ENLC's credit rating, and the SPV also pays a fee on the undrawn committed amount of the AR Facility. Interest and fees payable by the SPV under the AR Facility are due monthly.

The AR Facility is scheduled to terminate on October 20, 2023, unless extended in accordance with its terms or earlier terminated, at which time no further advances will be available and the obligations under the AR Facility must be repaid in full by no later than (i) the date that is ninety (90) days following such date or (ii) such earlier date on which the loans under the AR Facility become due and payable.

The AR Facility includes covenants, indemnification provisions, and events of default, including those providing for termination of the AR Facility and the acceleration of amounts owed by the SPV under the AR Facility if, among other things, a borrowing base deficiency exists, there is an event of default under the Consolidated Credit Facility, the Term Loan or certain other indebtedness, certain events negatively affecting the overall credit quality of the receivables held as collateral occur, a change of control occurs, or if the consolidated leverage ratio of ENLC exceeds limits identical to those in the Consolidated Credit Facility and the Term Loan.

At March 31, 2021, we were in compliance with and expect to be in compliance with the financial covenants of the AR Facility for at least the next twelve months.

#### Consolidated Credit Facility

The Consolidated Credit Facility permits ENLC to borrow up to \$1.75 billion on a revolving credit basis and includes a \$500.0 million letter of credit subfacility. The Consolidated Credit Facility became available for borrowings and letters of credit upon closing of the Merger. In addition, ENLK became a guarantor under the Consolidated Credit Facility upon the closing of the Merger. In the event that ENLC's obligations under the Consolidated Credit Facility are accelerated due to a default, ENLK will be liable for the entire outstanding balance and 105% of the outstanding letters of credit under the Consolidated Credit Facility. There were no outstanding borrowings under the Consolidated Credit Facility and \$27.5 million outstanding letters of credit as of March 31, 2021.

At March 31, 2021, ENLC was in compliance with and expects to be in compliance with the financial covenants of the Consolidated Credit Facility for at least the next twelve months. Accordingly, we do not expect to make payments related to our guarantee of the Consolidated Credit Facility.

#### (6) Partners' Capital

### a. Series B Preferred Units

Income is allocated to the Series B Preferred Units in an amount equal to the quarterly distribution with respect to the period earned. A summary of the distribution activity relating to the Series B Preferred Units during the three months ended March 31, 2021 and 2020 is provided below:

Declaration period	Distribution paid as additional Series B Preferred Units	h Distribution in millions)	Date paid/payable
2021			
Fourth Quarter of 2020	150,494	\$ 16.9	February 12, 2021
First Quarter of 2021	150,871	\$ 17.0	May 14, 2021
2020			
Fourth Quarter of 2019	148,999	\$ 16.8	February 13, 2020
First Quarter of 2020	149,371	\$ 16.8	May 13, 2020

#### b. Series C Preferred Units

There was no distribution activity related to the Series C Preferred Units during the three months ended March 31, 2021 and 2020.

#### c. Allocation of ENLK Income

The net income (loss) allocated to our general partner is as follows (in millions):

	 Three Months Ended March 31,					
	2021		2020			
Unit-based compensation attributable to ENLC's restricted and performance units	\$ (6.5)	\$	(12.3)			
General partner share of net income (loss)	<u> </u>		(1.4)			
General partner interest in net income (loss)	\$ (6.5)	\$	(13.7)			

#### (7) Investment in Unconsolidated Affiliates

As of March 31, 2021, our unconsolidated investments consisted of a 38.75% ownership in GCF and a 30% ownership in the Cedar Cove JV. The following table shows the activity related to our investment in unconsolidated affiliates for the periods indicated (in millions):

		Three Months Ended March 31,							
		2021		2020					
GCF									
Distributions	\$	3.5	\$	1.6					
Equity in income (loss)	\$	(5.7)	\$	1.8					
Cedar Cove JV									
Distributions	\$	0.1	\$	0.2					
Equity in loss	\$	(0.6)	\$	(0.1)					
Total									
Distributions	\$	3.6	\$	1.8					
Equity in income (loss)	\$	(6.3)	\$	1.7					

The following table shows the balances related to our investment in unconsolidated affiliates as of March 31, 2021 and December 31, 2020 (in millions):

	March	31, 2021	December 31, 2020		
GCF	\$	31.4	\$	40.6	
Cedar Cove JV		0.3		1.0	
Total investment in unconsolidated affiliates	\$	31.7	\$	41.6	

#### (8) Employee Incentive Plans

### a. Long-Term Incentive Plans

We account for unit-based compensation in accordance with ASC 718, Compensation—Stock Compensation, which requires that compensation related to all unit-based awards be recognized in the consolidated financial statements. Unit-based compensation cost is valued at fair value at the date of grant, and that grant date fair value is recognized as expense over each award's requisite service period with a corresponding increase to equity or liability based on the terms of each award and the appropriate accounting treatment under ASC 718. Unit-based compensation associated with ENLC's unit-based compensation plan awarded to directors, officers, and employees of our general partner is recorded by ENLK since ENLC has no substantial or managed operating activities other than its interests in ENLK.

Amounts recognized on the consolidated financial statements with respect to these plans are as follows (in millions):

	March 31,			
	2021			2020
Cost of unit-based compensation charged to operating expense	\$	1.7	\$	2.2
Cost of unit-based compensation charged to general and administrative expense		4.8		6.6
Total unit-based compensation expense	\$	6.5	\$	8.8

#### b. ENLC Restricted Incentive Units

ENLC restricted incentive units were valued at their fair value at the date of grant, which is equal to the market value of ENLC common units on such date. A summary of the restricted incentive unit activity for the three months ended March 31, 2021 is provided below:

Thusa Months Ended

		March 31, 2021					
ENLC Restricted Incentive Units:	Number of Units	Ave	Weighted erage Grant- e Fair Value				
Non-vested, beginning of period	5,350,086	\$	8.45				
Granted (1)	3,622,698		3.72				
Vested (1)(2)	(813,686)		12.52				
Forfeited	(116,444)		6.62				
Non-vested, end of period	8,042,654	\$	5.93				
Aggregate intrinsic value, end of period (in millions)	\$ 34.5	•					

<sup>(1)</sup> Restricted incentive units typically vest at the end of three years.

A summary of the restricted incentive units' aggregate intrinsic value (market value at vesting date) and fair value of units vested (market value at date of grant) for the three months ended March 31, 2021 and 2020 is provided below (in millions):

		Three Months Ended March 31,					
ENLC Restricted Incentive Units:	2	021		2020			
Aggregate intrinsic value of units vested	\$	3.0	\$	10.1			
Fair value of units vested	\$	10.2	\$	18.9			

As of March 31, 2021, there were \$26.6 million of unrecognized compensation costs that related to non-vested ENLC restricted incentive units. These costs are expected to be recognized over a weighted-average period of 1.9 years.

#### c. ENLC Performance Units

ENLC grants performance awards under the 2014 Plan. The performance award agreements provide that the vesting of performance units (i.e., performance-based restricted incentive units) granted thereunder is dependent on the achievement of certain performance goals over the applicable performance period. At the end of the vesting period, recipients receive distribution equivalents, if any, with respect to the number of performance units vested. The vesting of such units ranges from zero to 200% of the units granted depending on the extent to which the related performance goals are achieved over the relevant performance period.

<sup>(2)</sup> Vested units included 240,085 units withheld for payroll taxes paid on behalf of employees.

The following table presents a summary of the performance units:

		Three Months Ended March 31, 2021				
ENLC Performance Units:	Number of Units	Aver	eighted age Grant- Fair Value			
Non-vested, beginning of period	2,351,241	\$	8.82			
Granted	1,388,139		4.70			
Vested (1)	(164,553)		26.73			
Non-vested, end of period	3,574,827	\$	6.40			
Aggregate intrinsic value, end of period (in millions)	\$ 15.3					

<sup>(1)</sup> Vested units included 63,901 units withheld for payroll taxes paid on behalf of employees.

A summary of the performance units' aggregate intrinsic value (market value at vesting date) and fair value of units vested (market value at date of grant) for the three months ended March 31, 2021 and 2020 is provided below (in millions).

_		Three Months Ended March 31,				
ENLC Performance Units:	2	2021		2020		
Aggregate intrinsic value of units vested	\$	0.6	\$	0.9		
Fair value of units vested	\$	4.4	\$	5.0		

As of March 31, 2021, there were \$14.9 million of unrecognized compensation costs that related to non-vested ENLC performance units. These costs are expected to be recognized over a weighted-average period of 1.8 years.

The following table presents a summary of the grant-date fair value assumptions by performance unit grant date:

ENLC Performance Units:	Janu	ary 2021	 July 2020	N	Iarch 2020	Ja	nuary 2020
Grant-Date Fair Value	\$	4.70	\$ 2.33	\$	1.13	\$	7.69
Beginning TSR price	\$	3.71	\$ 2.52	\$	1.25	\$	6.13
Risk-free interest rate		0.17 %	0.17 %		0.42 %		1.62 %
Volatility factor		71.00 %	67.00 %		51.00 %		37.00 %

#### (9) Derivatives

#### Interest Rate Swaps

In April 2019, we entered into \$850.0 million of interest rate swaps with ENLC, which mirrored the terms of ENLC's interest rate swap with a third party, to manage the interest rate risk associated with our floating-rate, LIBOR-based borrowings. Under this arrangement, we pay a fixed interest rate of 2.28% in exchange for LIBOR-based variable interest through December 2021. There was no ineffectiveness related to this hedge.

In December 2020, in connection with a \$500.0 million repayment of the related party debt, we paid \$10.9 million to terminate \$500.0 million of the \$850.0 million interest rate swaps and settled the outstanding derivative liability of \$10.9 million. The unrealized loss remains in accumulated other comprehensive loss and will amortize into "Interest expense" on the consolidated statements of operations until the original maturity date of the Term Loan. For the three months ended March 31, 2021, we amortized \$2.9 million into interest expense out of accumulated other comprehensive income (loss) related to the termination of the interest rate swaps. The remaining \$350.0 million interest rate swaps were re-designated as a cash flow hedge on LIBOR-based borrowings and continue to be effective.

The gain (loss) on designated cash flow hedge related to changes in the fair value of our interest rate swaps were as follows (in millions):

	Three Months Ended March 31,						
	2021		2020				
Gain (loss) on designated cash flow hedge	\$ 4.7	\$	(17.1)				

The interest expense, recognized from accumulated other comprehensive loss from the monthly settlement of our interest rate swaps and amortization of the termination payment, included in our consolidated statements of operations were as follows (in millions):

	Three Moi Marc	nths Ended ch 31,	
	2021	2020	
\$	4.8	\$	1.3

We expect to recognize an additional \$13.5 million of interest expense out of accumulated other comprehensive loss over the next twelve months.

The fair value of our interest rate swaps included in our consolidated balance sheets were as follows (in millions):

	March 31, 2	2021	December 31,	2020
Fair value of derivative liabilities—current	\$	(5.7)	\$	(7.6)

#### Commodity Swaps

The components of gain (loss) on derivative activity in the consolidated statements of operations related to commodity swaps are (in millions):

		nded 		
		2021		2020
Change in fair value of derivatives	\$	(7.9)	\$	13.0
Realized gain (loss) on derivatives		(75.5)		6.2
Gain (loss) on derivative activity	\$	(83.4)	\$	19.2

The fair value of derivative assets and liabilities related to commodity swaps are as follows (in millions):

	Ma	rch 31, 2021	December 31, 2020		
Fair value of derivative assets—current	\$	40.2	\$	25.0	
Fair value of derivative assets—long-term		3.4		4.9	
Fair value of derivative liabilities—current		(53.6)		(29.5)	
Fair value of derivative liabilities—long-term				(2.5)	
Net fair value of commodity swaps	\$	(10.0)	\$	(2.1)	

Set forth below are the summarized notional volumes and fair values of all instruments related to commodity swaps that we held for price risk management purposes and the related physical offsets at March 31, 2021 (in millions). The remaining term of the contracts extend no later than December 2022.

	_		March 31, 20	21
Commodity	Instruments	Unit	Volume	Net Fair Value
NGL (short contracts)	Swaps	Gallons	(204.2)	\$ (18.1)
NGL (long contracts)	Swaps	Gallons	30.2	(0.1)
Natural gas (short contracts)	Swaps	MMbtu	(10.8)	(0.3)
Natural gas (long contracts)	Swaps	MMbtu	3.9	0.7
Crude and condensate (short contracts)	Swaps	MMbbls	(9.5)	(17.6)
Crude and condensate (long contracts)	Swaps	MMbbls	4.3	25.4
Total fair value of commodity swaps				\$ (10.0)

On all transactions where we are exposed to counterparty risk, we analyze the counterparty's financial condition prior to entering into an agreement, establish limits, and monitor the appropriateness of these limits on an ongoing basis. We primarily deal with financial institutions when entering into financial derivatives on commodities. We have entered into Master ISDAs that allow for netting of swap contract receivables and payables in the event of default by either party. If our counterparties failed to perform under existing commodity swap contracts, the maximum loss on our gross receivable position of \$43.6 million as of March 31, 2021 would be reduced to \$7.5 million due to the offsetting of gross fair value payables against gross fair value receivables as allowed by the ISDAs.

#### (10) Fair Value Measurements

Assets and liabilities measured at fair value on a recurring basis are summarized below (in millions):

_		Lev	ei Z	
	Marc	h 31, 2021	Decei	mber 31, 2020
Interest rate swaps (1)	\$	(5.7)	\$	(7.6)
Commodity swaps (2)	\$	(10.0)	\$	(2.1)

Lovel 2

#### Fair Value of Financial Instruments

The estimated fair value of our financial instruments has been determined using available market information and valuation methodologies. Considerable judgment is required to develop the estimates of fair value; thus, the estimates provided below are not necessarily indicative of the amount we could realize upon the sale or refinancing of such financial instruments (in millions):

March	31, 2021	Decembe	r 31, 2020	
Carrying Value	Fair Value	Carrying Value	Fair Value	
\$ 4,495.0	\$ 4,207.7	\$ 4,593.8	\$ 4,318.2	

<sup>(1)</sup> The carrying value of long-term debt includes current maturities and is reduced by debt issuance costs of \$31.5 million and \$32.6 million as of March 31, 2021 and December 31, 2020, respectively. The respective fair values do not factor in debt issuance costs.

The carrying amounts of our cash and cash equivalents, accounts receivable, and accounts payable approximate fair value due to the short-term maturities of these assets and liabilities.

The fair values of all senior unsecured notes as of March 31, 2021 and December 31, 2020 were based on Level 2 inputs from third-party market quotations.

<sup>(1)</sup> The fair values of the interest rate swaps are estimated based on the difference between expected cash flows calculated at the contracted interest rates and the expected cash flows using observable benchmarks for the variable interest rates.

<sup>(2)</sup> The fair values of commodity swaps represent the amount at which the instruments could be exchanged in a current arms-length transaction adjusted for our credit risk and/or the counterparty credit risk as required under ASC 820, Fair Value Measurement.

#### (11) Segment Information

Starting in the first quarter of 2021, we began evaluating the financial performance of our segments by including realized and unrealized gains and losses resulting from commodity swaps activity in the Permian, Louisiana, Oklahoma, and North Texas segments. Commodity swaps activity was previously reported in the Corporate segment. We have recast segment information for all presented periods prior to the first quarter of 2021 to conform to current period presentation. Identification of the majority of our operating segments is based principally upon geographic regions served:

- *Permian Segment*. The Permian segment includes our natural gas gathering, processing, and transmission activities and our crude oil operations in the Midland and Delaware Basins in West Texas and Eastern New Mexico;
- Louisiana Segment. The Louisiana segment includes our natural gas and NGL pipelines, natural gas processing plants, natural gas and NGL storage facilities, and fractionation facilities located in Louisiana and our crude oil operations in ORV;
- Oklahoma Segment. The Oklahoma segment includes our natural gas gathering, processing, and transmission
  activities, and our crude oil operations in the Cana-Woodford, Arkoma-Woodford, northern Oklahoma Woodford,
  STACK. and CNOW shale areas:
- North Texas Segment. The North Texas segment includes our natural gas gathering, processing, and transmission activities in North Texas; and
- *Corporate Segment*. The Corporate segment includes our unconsolidated affiliate investments in the Cedar Cove JV in Oklahoma, our ownership interest in GCF in South Texas, and our general corporate assets and expenses.

We evaluate the performance of our operating segments based on segment profit and adjusted gross margin. Adjusted gross margin is a non-GAAP financial measure. Summarized financial information for our reportable segments is shown in the following tables (in millions):

	Pe	rmian	Louisi	ana	Oklahoma	Nort	h Texas	Corpor	ate	,	Totals
<b>Three Months Ended March 31, 2021</b>											
Natural gas sales	\$	125.0	\$ 12	21.2	\$ 35.9	\$	51.0	\$	_	\$	333.1

Short-term lease liability		19.2		16.3
Operating expense accruals		17.8		8.4
Other		25.1		28.5
Other current liabilities	\$	148.4	\$	144.9

#### (13) Commitments and Contingencies

In February 2021, the areas in which we operate experienced a severe winter storm, with extreme cold, ice, and snow occurring over an unprecedented period of approximately 10 days ("Winter Storm Uri"). As a result of Winter Storm Uri, we have several pending customer billing disputes, including one that has resulted in litigation, and we could be involved in other disputes and litigation arising out of the storm in the future.

We are involved in various litigation and administrative proceedings arising in the normal course of business. We cannot currently predict the outcome of these contingencies and therefore have not accrued any costs associated with potential claims. In the opinion of management, any liabilities that may result from these claims would not individually or in aggregate have a material adverse effect on our financial position, results of operations, or cash flows.

#### (14) Subsequent Event

Amarillo Rattler Acquisition. On April 30, 2021, we completed the acquisition of Amarillo Rattler, LLC, the owner of a gathering and processing system located in the Midland Basin. In connection with the purchase, we entered into an amended and restated gas gathering and processing agreement with Diamondback Energy, strengthening our dedicated acreage position and deepening our relationship with Diamondback Energy. We acquired the system with an upfront payment of \$50.0 million, which was paid with cash-on-hand, with an additional \$10 million to be paid in 2022, and an earnout capped at \$15 million based on Diamondback Energy's drilling activity above historical levels.

For purposes of issuing these financial statements, management evaluated events and transactions through May 5, 2021, the date the financial statements were available to be issued. Based on these evaluations, there were no additional subsequent events that require recognition or disclosure.

#### Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Please read the following discussion of our financial condition and results of operations in conjunction with the financial statements and notes thereto included elsewhere in this report. In addition, please refer to the Definitions page set forth in this report prior to Part I—Financial Information.

In this report, the term "Partnership," as well as the terms "ENLK," "our," "we," "us," and "its" are sometimes used as abbreviated references to EnLink Midstream Partners, LP itself or EnLink Midstream Partners, LP together with its consolidated subsidiaries, including the Operating Partnership.

#### Overview

We are a Delaware limited partnership formed on July 12, 2002. We primarily focus on providing midstream energy services, including:

- gathering, compressing, treating, processing, transporting, storing, and selling natural gas;
- · fractionating, transporting, storing, and selling NGLs; and
- gathering, transporting, stabilizing, storing, trans-loading, and selling crude oil and condensate, in addition to brine disposal services.

Our midstream energy asset network includes approximately 11,900 miles of pipelines, 22 natural gas processing plants with approximately 5.5 Bcf/d of processing capacity, seven fractionators with approximately 290,000 Bbls/d of fractionation capacity, barge and rail terminals, product storage facilities, purchasing and marketing capabilities, brine disposal wells, a crude oil trucking fleet, and equity investments in certain joint ventures. We manage and report our activities primarily according to the nature of activity and geography.

Starting in the first quarter of 2021, we began evaluating the financial performance of our segments by including realized and unrealized gains and losses resulting from commodity swaps activity in the Permian, Louisiana, Oklahoma, and North Texas segments. Commodity swaps activity was previously reported in the Corporate segment. We have recast segment information for all presented periods prior to the first quarter of 2021 to conform to current period presentation. Identification of the majority of our operating segments is based principally upon geographic regions served:

- *Permian Segment*. The Permian segment includes our natural gas gathering, processing, and transmission activities and our crude oil operations in the Midland and Delaware Basins in West Texas and Eastern New Mexico;
- Louisiana Segment. The Louisiana segment includes our natural gas and NGL pipelines, natural gas processing plants, natural gas and NGL storage facilities, and fractionation facilities located in Louisiana and our crude oil operations in ORV;
- Oklahoma Segment. The Oklahoma segment includes our natural gas gathering, processing, and transmission
  activities, and our crude oil operations in the Cana-Woodford, Arkoma-Woodford, northern Oklahoma Woodford,
  STACK, and CNOW shale areas;
- North Texas Segment. The North Texas segment includes our natural gas gathering, processing, and transmission activities in North Texas; and
- *Corporate Segment.* The Corporate segment includes our unconsolidated affiliate investments in the Cedar Cove JV in Oklahoma, our ownership interest in GCF in South Texas, and our general corporate assets and expenses.

We manage our consolidated operations by focusing on adjusted gross margin because our business is generally to gather, process, transport, or market natural gas, NGLs, crude oil, and condensate using our assets for a fee. We earn our fees through various fee-based contractual arrangements, which include stated fee-only contract arrangements or arrangements with fee-based components where we purchase and resell commodities in connection with providing the related service and earn a net margin as our fee. We earn our net margin under our purchase and resell contract arrangements primarily as a result of stated service-related fees that are deducted from the price of the commodity purchase. While our transactions vary in form, the essential element of most of our transactions is the use of our assets to transport a product or provide a processed product to an end-user or marketer at the tailgate of the plant, pipeline, or barge, truck, or rail terminal. Adjusted gross margin is a non-GAAP financial measure and is explained in greater detail under "Non-GAAP Financial Measures" below. Approximately 82% of our

adjusted gross margin was derived from fee-based contractual arrangements with minimal direct commodity price exposure for the three months ended March 31, 2021.

Our revenues and adjusted gross margins are generated from eight primary sources:

- gathering and transporting natural gas, NGLs, and crude oil on the pipeline systems we own;
- processing natural gas at our processing plants;
- fractionating and marketing recovered NGLs;
- providing compression services;
- providing crude oil and condensate transportation and terminal services;
- providing condensate stabilization services;
- providing brine disposal services; and
- providing natural gas, crude oil, and NGL storage.

The following customers represent a significant percentage of revenues, and the loss of the customer would have a material adverse impact on our results of operations because the revenues and adjusted gross margin received from transactions with these customers is material to us.

	March 31	
	2021	2020
Devon	9.6 %	12.9 %
Dow Hydrocarbons and Resources LLC	14.5 %	11.2 %
Marathon Petroleum Corporation	14.8 %	16.8 %

We gather, transport, or store gas owned by others under fee-only contract arrangements based either on the volume of gas gathered, transported, or stored or, for firm transportation arrangements, a stated monthly fee for a specified monthly quantity with an additional fee based on actual volumes. We also buy natural gas from producers or shippers at a market index less a fee-based deduction subtracted from the purchase price of the natural gas. We then gather or transport the natural gas and sell the natural gas at a market index, thereby earning a margin through the fee-based deduction. We attempt to execute substantially all purchases and sales concurrently, or we enter into a future delivery obligation, thereby establishing the basis for the fee we will receive for each natural gas transaction. We are also party to certain long-term gas sales commitments that we satisfy through supplies purchased under long-term gas purchase agreements. When we enter into those arrangements, our sales obligations generally match our purchase obligations. However, over time, the supplies that we have under contract may decline due to reduced drilling or other causes, and we may be required to satisfy the sales obligations by buying additional gas at prices that may exceed the prices received under the sales commitments. In our purchase/sale transactions, the resale price is generally based on the same index at which the gas was purchased.

We typically buy mixed NGLs from our suppliers to our gas processing plants at a fixed discount to market indices for the component NGLs with a deduction for our fractionation fee. We subsequently sell the fractionated NGL products based on the same index-based prices. To a lesser extent, we transport and fractionate or store NGLs owned by others for a fee based on the volume of NGLs transported and fractionated or stored. The operating results of our NGL fractionation business are largely dependent upon the volume of mixed NGLs fractionated and the level of fractionation fees charged. With our fractionation business, we also have the opportunity for product upgrades for each of the discrete NGL products. We realize higher adjusted gross margins from product upgrades during periods with higher NGL prices.

We gather or transport crude oil and condensate owned by others by rail, truck, pipeline, and barge facilities under fee-only contract arrangements based on volumes gathered or transported. We also buy crude oil and condensate on our own gathering systems, third-party systems, and trucked from producers at a market index less a stated transportation deduction. We then transport and resell the crude oil and condensate through a process of basis and fixed price trades. We execute substantially all purchases and sales concurrently, thereby establishing the net margin we will receive for each crude oil and condensate transaction.

We realize adjusted gross margins from our gathering and processing services primarily through different contractual arrangements: processing margin ("margin") contracts, POL contracts, POP contracts, fixed-fee based contracts, or a combination of these contractual arrangements. See "Item 3. Quantitative and Qualitative Disclosures about Market Risk—Commodity Price Risk" for a detailed description of these contractual arrangements. Under any of these gathering and processing arrangements, we may earn a fee for the services performed, or we may buy and resell the gas and/or NGLs as part

of the processing arrangement and realize a net margin as our fee. Under margin contract arrangements, our adjusted gross margins are higher during periods of high NGL prices relative to natural gas prices. Adjusted gross margin results under POL contracts are impacted only by the value of the liquids produced with margins higher during periods of higher liquids prices. Adjusted gross margin results under POP contracts are impacted only by the value of the natural gas and liquids produced with margins higher during periods of higher natural gas and liquids prices. Under fixed-fee based contracts, our adjusted gross margins are driven by throughput volume.

Operating expenses are costs directly associated with the operations of a particular asset. Among the most significant of these costs are those associated with direct labor and supervision, property insurance, property taxes, repair and maintenance expenses, contract services, and utilities. These costs are normally fairly stable across broad volume ranges and therefore do not normally increase or decrease significantly in the short term with increases or decreases in the volume of gas, liquids, crude oil, and condensate moved through or by our assets.

#### Recent Developments Affecting Industry Conditions and Our Business

#### Current Market Environment

The midstream energy business environment and our business are affected by the level of production of natural gas and oil in the areas in which we operate and the various factors that affect this production, including commodity prices, capital markets trends, competition, and regulatory changes. We believe these factors will continue to affect production and therefore the demand for midstream services and our business in the future. To the extent these factors vary from our underlying assumptions, our business and actual results could vary materially from market expectations and from the assumptions discussed in this section.

Production levels by our exploration and production customers are driven in large part by the level of oil and natural gas prices. New drilling activity is necessary to maintain or increase production levels as oil and natural gas wells experience production declines over time. New drilling activity generally moves in the same direction as crude oil and natural gas prices as those prices drive investment returns and cash flow available for reinvestment by exploration and production companies. Accordingly, our operations are affected by the level of crude, natural gas, and NGL prices, the relationship among these prices, and related activity levels from our customers.

There has been, and we believe there will continue to be, volatility in commodity prices and in the relationships among NGL, crude oil, and natural gas prices. During 2020, the COVID-19 pandemic and related travel and operational restrictions, as well as business closures and curtailed consumer activity, led to a reduction in global demand for energy, volatility in the market prices for crude oil, condensate, natural gas, and NGLs, and a significant reduction in the market price of crude oil during the first half of 2020. Although commodity markets have recovered nearly to pre-pandemic levels, oil and natural gas commodity prices remain somewhat weak relative to historical levels and continue to remain volatile.

Capital markets and the demands of public investors also affect producer behavior, production levels, and our business. Over the last several years, public investors have exerted pressure on oil and natural gas producers to increase capital discipline and focus on higher investment returns even if it means lower growth. In addition, the ability of companies in the oil and gas industry to access the capital markets on favorable terms has been negatively impacted. This demand by investors for increased capital discipline from energy companies, as well as the difficulties in accessing capital markets, has led to more modest capital investment by producers, curtailed drilling and production activity, and, accordingly, slower growth for us and other midstream companies during the past few years. This trend was amplified in 2020 as a result of the COVID-19 pandemic demand destruction. Although volumes recovered nearly to pre-pandemic levels in the second half of 2020, global capital investments by oil and natural gas producers remain at low levels.

Producers generally focus their drilling activity on certain producing basins depending on commodity price fundamentals and favorable drilling economics. In the last few years, many producers have increasingly focused their activities in the Permian Basin, because of the availability of higher investment returns. Currently, a large percentage of all drilling rigs operating in the United States are operating in the Permian Basin. As a result of this concentration of drilling activity in the Permian, other basins, including those in which we operate in Oklahoma and North Texas, have experienced reduced incremental new investment and declines in volumes produced. In contrast, we continue to experience an increase in volumes in our Permian segment as our operations in that basin are in a favorable position relative to producer activity.

Our Louisiana segment, while subject to commodity prices and capital markets developments, is less dependent on gathering and processing activities and more affected by industrial demand for the natural gas and NGLs that we supply. Industrial demand along the Gulf Coast region has remained strong in the second half of 2020 and through the first quarter of

2021, supported by regional industrial activity and export markets. Our activities and, in turn, our financial performance in the Louisiana segment are highly dependent on the availability of natural gas and NGLs produced by our upstream gathering and processing business and by other market participants. To date, the supply of natural gas and NGLs has remained at levels sufficient for us to supply our customers, and maintaining such supply is a key business focus.

#### Winter Storm Uri

In February 2021, the areas in which we operate experienced a severe winter storm, with extreme cold, ice, and snow occurring over an unprecedented period of approximately 10 days ("Winter Storm Uri"). Winter Storm Uri adversely affected our facilities and activities across our footprint, as it did for producers and other midstream companies located in these areas. The severe cold temperatures caused production freeze-offs and also led some producers to proactively shut-in their wells to preserve well integrity. As a result, ENLK's gathering and processing volumes were significantly reduced during this period, with peak volume declines ranging between 44% and 92%, depending on the region. ENLK responded to the challenges presented by the storm by taking active steps to ensure the resiliency of our assets and the protection of the health and well-being of its employees. Our operations have now returned to normal, and volumes have recovered to pre-storm levels.

The lack of gathered and processed volumes during the storm presented a number of commercial challenges, including the management of losses on derivative contracts and firm commodity sales contracts and making outlays to meet one-time operating expenses for storm recovery. To balance these challenges, ENLK was able to use its integrated asset base to make limited incremental gas available to support local markets and to use its storage volumes in Louisiana to help offset lower natural gas and NGL supplies. Additionally, because of idled operations and elevated power prices, ENLK was able to earn approximately \$40 million in credits for unused electricity which had been purchased on a firm basis. These credits can be used to offset future power payments. However, because of the magnitude and unprecedented nature of the storm, we cannot at this time predict the full impact that Winter Storm Uri may have on our future results of operations. The ultimate impacts will depend on future developments, including, among other factors, the outcome of pending billing disputes with customers and regulatory actions by state legislatures and other entities responsible for the regulation and pricing of electricity and the electrical grid.

#### COVID-19 Update

On March 11, 2020, the World Health Organization declared the ongoing coronavirus (COVID-19) outbreak a pandemic and recommended containment and mitigation measures worldwide. Since the outbreak began, our first priority has been the health and safety of our employees and those of our customers and other business counterparties. Beginning in March 2020, we implemented preventative measures and developed a response plan to minimize unnecessary risk of exposure and prevent infection, while supporting our customers' operations, and we continue to follow these plans. We also continue to promote heightened awareness and vigilance, hygiene, and implementation of more stringent cleaning protocols across our facilities and operations and we continue to evaluate and adjust our preventative measures, response plans, and business practices with the evolving impacts of COVID-19. We have continued to maintain these COVID protocols since the inception of the pandemic and to date we have not experienced any COVID-19 related operational disruptions.

There is considerable uncertainty regarding how long the COVID-19 pandemic will persist and affect economic conditions and the extent and duration of changes in consumer behavior.

We cannot predict the full impact that the COVID-19 pandemic or the volatility in oil and natural gas markets related to COVID-19 will have on our business, liquidity, financial condition, results of operations, and cash flows (including our ability to make distributions to unitholders) at this time due to numerous uncertainties. The ultimate impacts will depend on future developments, including, among others, the ultimate duration and persistence of the pandemic, the speed at which the population is vaccinated against the virus and the efficacy of the vaccines, the effect of the pandemic on economic, social, and other aspects of everyday life, the consequences of governmental and other measures designed to prevent the spread of the virus, actions taken by members of OPEC+ and other foreign, oil-exporting countries, actions taken by governmental authorities, customers, suppliers, and other third parties, and the timing and extent to which normal economic, social, and operating conditions resume. A sustained significant decline in oil and natural gas exploration and production activities and related reduced demand for our services by our customers, whether due to decreases in consumer demand or reduction in the prices for crude oil, condensate, natural gas, and NGLs or otherwise, would have a material adverse effect on our business, liquidity, financial condition, results of operations, and cash flows (including our ability to make distributions to our unitholders).

### Regulatory Developments

On January 20, 2021, the Biden Administration came into office and immediately issued a number of executive orders related to climate change and the production of oil and gas that could affect our operations and those of our customers. On his first day in office, President Biden signed an instrument reentering the United States into the Paris Agreement, effective February 19, 2021, and issued an executive order on "Protecting Public Health and the Environment and Restoring Science to Tackle the Climate Crisis" seeking to adopt new regulations and policies to address climate change and suspend, revise, or rescind prior agency actions that are identified as conflicting with the Biden Administration's climate policies. In addition, on January 27, 2021, President Biden issued an executive order indefinitely suspending new oil and natural gas leases on public lands or in offshore waters pending completion of a comprehensive review and reconsideration of federal oil and gas permitting and leasing practices, and on April 22, 2021, at a global summit on climate change, President Biden committed the United States to target emissions reductions of 50-52% of 2005 levels by 2030. Among the areas that could be affected by these initiatives are regulations addressing methane emissions and the part of the extraction process known as hydraulic fracturing. The Biden Administration could also seek, in the future, to put into place additional executive orders, policy and regulatory reviews, or seek to have Congress pass legislation that could adversely affect the production of oil and gas assets and our operations and those of our customers.

Only a small percentage of our operations are derived from customers operating on public land, mainly in the Delaware Basin, and these activities are expected to represent only approximately 4% of our total segment profit, net to EnLink, during 2021. In addition, we have a robust program to monitor and prevent methane emissions in our operations and we maintain a comprehensive environmental program that is embedded in our operations. However, our activities that take place on public lands require that we and our producer customers obtain leases, permits, and other approvals from the federal government. While the status of recent and future rules and rulemaking initiatives under the Biden Administration remain uncertain, these actions, and the regulations and the policies that could result from them, could lead to increased costs for us or our customers, difficulties in obtaining leases, permits, and other approvals for us and our customers, reduced utilization of our gathering, processing and pipeline systems or reduced rates under renegotiated transportation or storage agreements in affected regions. These impacts could, in turn, adversely affect our business, financial condition, results of operations or cash flows, including our ability to make cash distributions to our unitholders.

#### **Non-GAAP Financial Measures**

To assist management in assessing our business, we use the following non-GAAP financial measure: adjusted gross margin.

#### Adjusted Gross Margin

We define adjusted gross margin as revenues less cost of sales, exclusive of operating expenses and depreciation and amortization related to our operating segments. We present adjusted gross margin by segment in "Results of Operations." We disclose adjusted gross margin in addition to gross margin as defined by GAAP because it is the primary performance measure used by our management to evaluate consolidated operations. We believe adjusted gross margin is an important measure because, in general, our business is to gather, process, transport, or market natural gas, NGLs, condensate, and crude oil for a fee or to purchase and resell natural gas, NGLs, condensate, and crude oil for a margin. Operating expense is a separate measure used by our management to evaluate the operating performance of field operations. Direct labor and supervision, property insurance, property taxes, repair and maintenance, utilities, and contract services comprise the most significant portion of our operating expenses. We exclude all operating expenses and depreciation and amortization related to our operating segments from adjusted gross margin because these expenses are largely independent of the volumes we transport or process and fluctuate depending on the activities performed during a specific period. The GAAP measure most directly comparable to adjusted gross margin is gross margin. Adjusted gross margin should not be considered an alternative to, or more meaningful than, gross margin as determined in accordance with GAAP. Adjusted gross margin has important limitations because it excludes all operating expenses and depreciation and amortization related to our operating segments that affect gross margin. Our adjusted gross margin may not be comparable to similarly titled measures of other companies because other entities may not calculate these amounts in the same manner.

The following table reconciles total revenues and gross margin to adjusted gross margin (in millions):

	Three Months March 3				
		2021		2020	
Total revenues	\$	1,248.4	\$	1,156.1	
Cost of sales, exclusive of operating expenses and depreciation and amortization (1)		(934.7)		(755.3)	
Operating expenses		(56.3)		(100.7)	
Depreciation and amortization		(151.0)		(162.8)	
Gross margin		106.4		137.3	
Operating expenses		56.3		100.7	
Depreciation and amortization		151.0		162.8	
Adjusted gross margin	\$	313.7	\$	400.8	

<sup>(1)</sup> Excludes all operating expenses as well as depreciation and amortization related to our operating segments of \$149.0 million and \$160.8 million for the three months ended March 31, 2021 and 2020, respectively.

## **Results of Operations**

The tables below set forth certain financial and operating data for the periods indicated. We evaluate the performance of our consolidated operations by focusing on adjusted gross margin, while we evaluate the performance of our operating segments based on segment profit and adjusted gross margin, as reflected in the table below (in millions, except volumes):

	Pe	ermian	L	ouisiana	Ok	dahoma	Nor	th Texas	Co	rporate	Totals
Three Months Ended March 31, 2021											
Gross margin	\$	9.3	\$	46.1	\$	4.8	\$	48.2	\$	(2.0)	\$ 106.4

#### Three Months Ended March 31, 2021 Compared to Three Months Ended March 31, 2020

*Gross Margin.* Gross margin was \$106.4 million for the three months ended March 31, 2021 compared to \$137.3 million for the three months ended March 31, 2020, a decrease of \$30.9 million. The primary contributors to the decrease were as follows (in millions):

- *Permian Segment.* Gross margin was \$9.3 million for the three months ended March 31, 2021 compared to \$13.4 million for the three months ended March 31, 2020, a decrease of \$4.1 million primarily due to the following:
  - Adjusted gross margin in the Permian segment decreased \$37.1 million, which was primarily driven by:
    - An increase in realized and unrealized derivative losses of \$57.8 million and \$14.7 million, respectively, due to significant commodity price impacts resulting from Winter Storm Uri.
    - A \$3.0 million decrease to adjusted gross margin associated with our Midland Basin crude assets primarily due to volume declines related to weather disruptions from Winter Storm Uri.
    - A \$0.8 million decrease in adjusted gross margin associated with our Delaware Basin gas assets primarily due to volume declines related to weather disruptions from Winter Storm Uri.
    - These decreases were partially offset by a \$38.1 million increase in adjusted gross margin due to significant favorable physical commodity price sales on our Midland Basin gas assets resulting from Winter Storm Uri, which were more than offset by the derivative impact noted above, and a \$1.1 million increase in adjusted gross margin due to volume growth in our Delaware Basin crude assets from system expansion.
  - Operating expenses in the Permian segment decreased \$37.3 million primarily due to lower utility costs as a result of approximately \$40.0 million of utility credits that we received because our electricity usage was below our contractual base load amounts during Winter Storm Uri, which entitled us to credits based on market rates for our unused electricity. These credits can be used to offset future utility payments. Operating expenses also decreased due to lower labor and benefits expense as a result of reductions in workforce in April 2020. These decreases were partially offset by increases in construction fees and services and materials and supplies expense.
  - Depreciation and amortization in the Permian segment increased \$4.3 million primarily due to new assets placed into service, including the expansion to our Riptide processing plant in March 2020 and the completion of our Tiger processing plant in August 2020.
- Louisiana Segment. Gross margin was \$46.1 million for the three months ended March 31, 2021 compared to \$37.5 million for the three months ended March 31, 2020, an increase of \$8.6 million primarily due to the following:
  - Adjusted gross margin in the Louisiana segment increased \$4.3 million, resulting from:
    - A \$21.7 million increase in adjusted gross margin associated with our Louisiana NGL transmission and fractionation assets, which was primarily due to favorable market prices on NGL sales.
    - A \$1.4 million increase in adjusted gross margin associated with our Louisiana gas assets, which was
      primarily due to increased gathering and transportation fees as a result of higher volumes transported in
      addition to increased storage and hub fees following our acquisition of the Jefferson Island storage
      facility in December 2020.
    - A \$0.6 million decrease in unrealized derivative losses due to significant commodity price impacts resulting from Winter Storm Uri.

These increases were partially offset by a \$15.0 million increase in realized derivative losses due to significant commodity price impacts resulting from Winter Storm Uri, and a \$4.4 million decrease in adjusted gross margin associated with our ORV crude assets, which was primarily due to lower volumes.

Operating expenses in the Louisiana segment decreased \$2.6 million primarily due to lower utility costs as a
result of Winter Storm Uri and lower labor and benefits expense as a result of reductions in workforce in
April 2020. These decreases were partially offset by higher engineering fees and services associated with the
operation of these assets.

- Depreciation and amortization in the Louisiana segment decreased \$1.7 million primarily due to the impairment of assets in the first quarter of 2020.
- Oklahoma Segment. Gross margin was \$4.8 million for the three months ended March 31, 2021 compared to \$51.4 million for the three months ended March 31, 2020, a decrease of \$46.6 million primarily due to the following:
  - Adjusted gross margin in the Oklahoma segment decreased \$55.7 million, resulting from:
    - A \$32.2 million decrease in adjusted gross margin associated with our Oklahoma gas assets primarily due to lower volumes from our existing customers, including weather disruptions from Winter Storm Uri.
    - A \$9.5 million decrease in adjusted gross margin due to the expiration of the MVC provision of a gathering and processing contract at the end of 2020.
    - An increase in realized and unrealized derivative losses of \$6.8 million and \$5.6 million, respectively, due to significant commodity price impacts resulting from Winter Storm Uri.
    - A \$1.6 million decrease in adjusted gross margin associated with our Oklahoma crude assets primarily
      due to lower volumes from our existing customers and partially as a result of weather disruptions from
      Winter Storm Uri.
  - Operating expenses in the Oklahoma segment decreased \$3.2 million primarily due to reductions in compressor rentals related to the assets in this segment and labor and benefits expense as a result of reductions in workforce in April 2020. These decreases were partially offset by higher construction fees and services associated with work performed related to the assets in this segment.
  - Depreciation and amortization in the Oklahoma segment decreased \$5.9 million primarily due to a change in the estimated useful lives of certain non-core assets in 2020.
- *North Texas Segment.* Gross margin was \$48.2 million for the three months ended March 31, 2021 compared to \$37.0 million for the three months ended March 31, 2020, an increase of \$11.2 million primarily due to the following:
  - Adjusted gross margin in the North Texas segment increased \$1.4 million, which was primarily due to favorable market pricing resulting from Winter Storm Uri. The increase was partially offset by decreased revenues from volume declines and increased realized and unrealized derivative losses.
  - Operating expenses in the North Texas segment decreased \$1.3 million primarily due to reductions in compressor rentals, reductions to labor and benefits expense as a result of reductions in workforce in April 2020, and reductions to utility costs. These decreases were partially offset by higher materials and supplies expense related to the assets in this segment.
  - Depreciation and amortization in the North Texas segment decreased \$8.5 million primarily due to a change in the estimated useful lives of certain non-core assets in 2020.
- *Corporate Segment*. Gross margin was negative \$2.0 million for each of the three months ended March 31, 2021 and 2020, respectively. Corporate gross margin consists of depreciation and amortization of corporate assets.

*Impairments*. We recognized no impairment expense for the three months ended March 31, 2021. For the three months ended March 31, 2020, we recognized impairment expense related to property and equipment, including cancelled projects. Impairment expense is composed of the following amounts (in millions):

	e Months Ended March 31,
	 2020
Property and equipment impairment	\$ 168.0
Cancelled projects	 0.4
Total impairments	\$ 168.4

General and Administrative Expenses. General and administrative expenses were \$25.9 million for the three months ended March 31, 2021 compared to \$30.9 million for the three months ended March 31, 2020, a decrease of \$5.0 million. The decrease in general and administrative expenses was primarily due to reduced labor costs and unit-based compensation costs, which decreased \$5.0 million as a result of reductions in workforce in April 2020.

*Interest Expense*. Interest expense was \$56.7 million for the three months ended March 31, 2021 compared to \$55.6 million for the three months ended March 31, 2020, an increase of \$1.1 million. Interest expense consisted of the following (in millions):

	Three Months Ended March 31,		
		2021	2020
Senior Notes	\$	43.6 \$	37.4
Related party debt		9.4	17.1
AR Facility		1.2	_
Capitalized interest		(0.2)	(1.2)
Amortization of debt issue costs and net discounts (premiums)		1.2	1.0
Interest rate swap - realized		4.8	1.3
Interest income from note receivable from related party		(3.3)	
Total	\$	56.7 \$	55.6

Gain on Extinguishment of Debt. We recognized a gain on extinguishment of debt of \$5.3 million for the three months ended March 31, 2020 due to repurchases of the 2024, 2025, and 2026 Notes in open market transactions.

*Income (Loss) from Unconsolidated Affiliate Investments.* Loss from unconsolidated affiliate investments was \$6.3 million for the three months ended March 31, 2021 compared to income of \$1.7 million for the three months ended March 31, 2020, a decrease of \$8.0 million. The decrease was primarily attributable to a reduction of income of \$7.5 million from our GCF investment, as a result of the GCF assets being temporarily idled beginning in January 2021, and a reduction of income of \$0.5 million from our Cedar Cove JV.

#### **Critical Accounting Policies**

Information regarding our critical accounting policies is included in "Item 1. Management's Discussion and Analysis of Financial Conditions and Results of Operations" of our Annual Report for the year ended December 31, 2020.

#### **Liquidity and Capital Resources**

Cash Flows from Operating Activities. Net cash provided by operating activities was \$228.8 million for the three months ended March 31, 2021 compared to \$178.0 million for the three months ended March 31, 2020. Operating cash flows and changes in working capital for comparative periods were as follows (in millions):

	 Three Months Ended March 31,			
	 2021		2020	
Operating cash flows before working capital	\$ 151.0	\$	206.1	
Changes in working capital	77.8		(28.1)	

Operating cash flows before changes in working capital decreased \$55.1 million for the three months ended March 31, 2021 compared to the three months ended March 31, 2020. The primary contributors to the decrease in operating cash flows were as follows:

- Gross margin, excluding depreciation and amortization, non-cash commodity swap activity, utility credits, and unit-based compensation, decreased \$57.8 million. For more information regarding the changes in gross margin for the three months ended March 31, 2021 compared to the three months ended March 31, 2020, see "Results of Operations."
- Distribution of earnings from unconsolidated affiliates decreased \$1.6 million.
- Interest expense, net of interest income and excluding amortization of debt issue costs and net discounts (premium) of notes, increased \$4.2 million.

These changes to operating cash flows were offset by the following:

 General and administrative expenses excluding unit-based compensation decreased \$3.2 million primarily due to reductions in workforce in April 2020.

The changes in working capital for the three months ended March 31, 2021 compared to the three months ended March 31, 2020 were primarily due to fluctuations in trade receivable and payable balances due to timing of collection and payments, changes in inventory balances attributable to normal operating fluctuations, and fluctuations in accrued revenue and accrued cost of sales.

Cash Flows from Investing Activities. Net cash used in investing activities was \$19.2 million for the three months ended March 31, 2021 compared to \$115.5 million for the three months ended March 31, 2020. Investing cash flows are primarily related to capital expenditures. Capital expenditures decreased from \$112.0 million for the three months ended March 31, 2020 to \$23.5 million for the three months ended March 31, 2021. The decrease was primarily due to the completion of major projects in 2020 and the timing of 2021 projects, which is more heavily weighted in the subsequent quarters of 2021.

Cash Flows from Financing Activities. Net cash used in financing activities was \$176.4 million for the three months ended March 31, 2021 and net cash provided by financing activities was \$118.2 million for the three months ended March 31, 2020. Our primary financing activities consisted of the following (in millions):

	 Three Months Ended March 31,		
	 2021	2020	0
Net repayments on the AR Facility (1)	\$ (100.0)	\$	_
Net borrowings on related party debt (1)	_		200.0
Net repurchases on senior unsecured notes (1)	_		(1.0)
Contributions by non-controlling interests (2)	0.9		37.1
Distributions to non-controlling interests (3)	(13.3)		(7.9)
Distributions to common units (4)	(47.1)		(93.3)
Distributions to Series B Preferred Unitholders (5)	(16.9)		(16.8)

<sup>(1)</sup> See "Item 1. Financial Statements—Note 5" for more information regarding the AR Facility, related party debt, and the senior unsecured notes.

Capital Requirements. We expect our remaining 2021 capital expenditures, including capital contributions to our unconsolidated affiliate investments, to be approximately \$92 million to \$132 million, which is net of approximately \$3 million to \$5 million from our joint venture partners. Our primary capital projects for the remainder of 2021 include continued development of our existing systems through well connects and other low-cost development projects. Additionally, we expect our remaining 2021 operating expenses related to the relocation of equipment and facilities previously associated with the Battle Ridge processing plant in Central Oklahoma to the Permian Basin to be approximately \$17 million. These expenses are treated as an operating expense under GAAP and, therefore, are not included in our expected remaining 2021 capital expenditures.

We expect to fund capital expenditures from operating cash flows and capital contributions by joint venture partners that relate to the non-controlling interest share of our consolidated entities. In 2021, it is possible that not all of our planned projects will be commenced or completed. Our ability to pay distributions to our unitholders, to fund planned capital expenditures, and to make acquisitions will depend upon our future operating performance, which will be affected by prevailing economic conditions in the industry, financial, business, and other factors, some of which are beyond our control.

Off-Balance Sheet Arrangements. We had no off-balance sheet arrangements as of March 31, 2021.

<sup>(2)</sup> Represents contributions from NGP to the Delaware Basin JV.

<sup>(3)</sup> Represents distributions to NGP for its ownership in the Delaware Basin JV, distributions to Marathon Petroleum Corporation for its ownership in the Ascension JV, and distributions to other non-controlling interests. Subsequent to the transfer of EORV in December 2020, distributions to non-controlling interests also represents distributions to EORV for its ownership of the Operating Partnership.

<sup>(4)</sup> ENLC owns all of our outstanding common units and we make quarterly distributions to ENLC related to its ownership of our common units.

<sup>(5)</sup> See "Item 1. Financial Statements—Note 6" for information on distributions to holders of the Series B Preferred Units.

*Total Contractual Cash Obligations*. A summary of our total contractual cash obligations as of March 31, 2021 is as follows (in millions):

	Payments Due by Period						
	Total	Remainder 2021	2022	2023	2024	2025	Thereafter
ENLK's senior unsecured notes	\$ 3,033.6	\$ —	\$ —	\$ —	\$ 521.8	\$ 720.8	\$ 1,791.0
Related party debt (1)	1,348.7	350.0					998.7
AR Facility (2)	150.0	_	_	150.0	_	_	_
Interest payable on fixed long-term debt obligations	2,511.3	176.3	201.2	201.2	189.7	163.3	1,579.6
Operating lease obligations	124.6	17.2	17.0	11.6	10.1	9.8	58.9
Purchase obligations	5.3	5.3	_	_	_	_	_
Pipeline and trucking capacity and deficiency agreements (3)	187.1	40.8	44.5	33.5	24.4	21.3	22.6
Inactive easement commitment (4)	10.0		10.0				
Total contractual obligations	\$ 7,370.6	\$ 589.6	\$ 272.7	\$ 396.3	\$ 746.0	\$ 915.2	\$ 4,450.8

<sup>(1)</sup> Related party debt includes borrowings under the Term Loan, the Consolidated Credit Facility, the 2028 Notes, and the 2029 Notes. The Term Loan matures on December 10, 2021. The Consolidated Credit Facility will mature on January 25, 2024. As of March 31, 2021, there were no amounts outstanding under the Consolidated Credit Facility.

The above table does not include any physical or financial contract purchase commitments for natural gas and NGLs due to the nature of both the price and volume components of such purchases, which vary on a daily or monthly basis. Additionally, we do not have contractual commitments for fixed price and/or fixed quantities of any material amount that is not already disclosed in the table above.

The interest payable under the AR Facility and the related party debt associated with the Term Loan and the Consolidated Credit Facility are not reflected in the above table because such amounts depend on the outstanding balances and interest rates of the AR Facility, the Term Loan, and the Consolidated Credit Facility, which vary from time to time.

Our contractual cash obligations for the remainder of 2021 are expected to be funded from cash flows generated from our operations and the available capacity under the AR Facility, the Consolidated Credit Facility, or other debt sources.

#### Indebtedness

In October 2020, we entered into the AR Facility, which is a three-year committed accounts receivable securitization facility originally in the amount of up to \$250.0 million. On February 26, 2021, the SPV entered into the First Amendment to the Receivables Financing Agreement, which amended the AR Facility to, among other things, increase the facility limit and lender commitments by \$50.0 million to \$300.0 million. As of March 31, 2021, the AR Facility had a borrowing base of \$262.1 million and there was \$150.0 million in outstanding borrowings under the AR Facility.

We have a related party debt arrangement with ENLC to fund the operations and growth capital expenditures of ENLK. Interest charged to ENLK for borrowings made through the related party arrangement is substantially the same as interest charged to ENLC on borrowings from third party lenders. The indebtedness under the Consolidated Credit Facility, the Term Loan, the 2028 Notes, and the 2029 Notes was incurred by ENLC but is guaranteed by us. Therefore, the covenants in the agreements governing such indebtedness described in "Item 1. Financial Statements—Note 5" affect balances owed by us on the related party debt. As of March 31, 2021, we had \$1.3 billion in outstanding borrowings under the related party debt arrangement, of which \$350.00 million was related to the Term Loan and \$998.7 million was related to the 2028 Notes and 2029 Notes. ENLC had no outstanding borrowings under the Consolidated Credit Facility as of March 31, 2021.

In addition, as of March 31, 2021, we have \$3.0 billion in aggregate principal amount of outstanding unsecured senior notes maturing from 2024 to 2047.

See "Item 1. Financial Statements—Note 5" for more information on our outstanding debt instruments.

<sup>(2)</sup> The AR Facility is scheduled to terminate on October 20, 2023.

<sup>(3)</sup> Consists of pipeline capacity payments for firm transportation and deficiency agreements.

<sup>(4)</sup> Amounts related to inactive easements paid as utilized by us with balance due in 2022 if not utilized.

#### **Recent Accounting Pronouncements**

See "Item 1. Financial Statements—Note 2" for more information on recently issued and adopted accounting pronouncements.

#### **Disclosure Regarding Forward-Looking Statements**

This Quarterly Report contains forward-looking statements within the meaning of the federal securities laws. Although these statements reflect the current views, assumptions and expectations of our management, the matters addressed herein involve certain assumptions, risks and uncertainties that could cause actual activities, performance, outcomes and results to differ materially from those indicated herein. Therefore, you should not rely on any of these forward-looking statements. All statements, other than statements of historical fact, included in this Quarterly Report constitute forward-looking statements, including, but not limited to, statements identified by the words "forecast," "may," "believe," "will," "should," "plan," "predict," "anticipate," "intend," "estimate," "expect," "continue," and similar expressions. Such forward-looking statements include, but are not limited to, statements about when additional capacity will be operational, timing for completion of construction or expansion projects, results in certain basins, profitability, financial or leverage metrics, future cost savings or operational initiatives, our future capital structure and credit ratings, objectives, strategies, expectations, and intentions, the impact of the COVID-19 pandemic and Winter Storm Uri on us and our financial results and operations, and other statements that are not historical facts. Factors that could result in such differences or otherwise materially affect our financial condition, results of operation, or cash flows, include, without limitation, (a) the impact of the ongoing coronavirus (COVID-19) outbreak on our business, financial condition, and results of operation, (b) potential conflicts of interest of GIP with us and the potential for GIP to favor GIP's own interests to the detriment of our unitholders, (c) GIP's ability to compete with us and the fact that it is not required to offer us the opportunity to acquire additional assets or businesses, (d) a default under GIP's credit facility could result in a change in control of us and a default under ENLC's Consolidated Credit Facility and Term Loan, (e) the dependence on Devon for a substantial portion of the natural gas and crude that we gather, process, and transport, (f) developments that materially and adversely affect Devon or other customers, (g) adverse developments in the midstream business that may reduce our ability to make distributions, (h) competition for crude oil, condensate, natural gas, and NGL supplies and any decrease in the availability of such commodities, (i) decreases in the volumes that we gather, process, fractionate, or transport, (j) increasing scrutiny and changing expectations from stakeholders with respect to our environment, social, and governance practices, (k) our ability to receive or renew required permits and other approvals, (l) increased federal, state, and local legislation, and regulatory initiatives, as well as government reviews relating to hydraulic fracturing resulting in increased costs and reductions or delays in natural gas production by our customers, (m) climate change legislation and regulatory initiatives resulting in increased operating costs and reduced demand for the natural gas and NGL services we provide, (n) changes in the availability and cost of capital, including as a result of a change in our credit rating, (o) volatile prices and market demand for crude oil, condensate, natural gas, and NGLs that are beyond our control, (p) our debt levels could limit our flexibility and adversely affect our financial health or limit our flexibility to obtain financing and to pursue other business opportunities, (q) operating hazards, natural disasters, weather-related issues or delays, casualty losses, and other matters beyond our control, (r) reductions in demand for NGL products by the petrochemical, refining, or other industries or by the fuel markets, (s) impairments to goodwill, long-lived assets and equity method investments, and (t) the effects of existing and future laws and governmental regulations, including environmental and climate change requirements and other uncertainties. In addition to the specific uncertainties, factors, and risks discussed above and elsewhere in this Quarterly Report, and in "Item 1A. Risk Factors" in ENLC's Annual Report on Form 10-K for the year ended December 31, 2020, filed with the Commission on February 17, 2021, may affect our performance and results of operations. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may differ materially from those in the forward-looking statements. We disclaim any intention or obligation to update or review any forward-looking statements or information, whether as a result of new information, future events, or otherwise.
