

Methode Electronics, Inc.
Investor Relations Presentation
August 2021

Forward-Looking Statements

This presentation contains certain forward-looking statements, which reflect management's expectations regarding future events and operating performance and speak only as of the date hereof. These forward-looking statements are subject to the safe harbor protection provided under the securities laws.

Methode undertakes no duty to update any forward-looking statement to conform the statement to actual results or changes in Methode's expectations on a quarterly basis or otherwise. The forward-looking statements in this presentation involve a number of risks and uncertainties. The factors that could cause actual results to differ materially from our expectations are detailed in Methode's filings with the Securities and Exchange Commission, such as our annual and quarterly reports. Such factors may include, without limitation, the following: 1) Impact from pandemics, such as the COVID-19 pandemic; 2) Dependence on the automotive and commercial vehicle industries; 3) Dependence on our supply chain, including semiconductor suppliers; 4) Dependence on a small number of large customers, including two large automotive customers; 5) Dependence on the availability and price of materials; 6) Failure to attract and retain qualified personnel; 7) Timing, quality and cost of new program launches; 8) Risks related to conducting global operations; 9) Ability to compete effectively; 10) Investment in programs prior to the recognition of revenue; 11) Ability to withstand pricing pressures, including price reductions; 12) Impact from production delays or cancelled orders; 13) Ability to successfully benefit from acquisitions and divestitures; 14) Ability to withstand business interruptions; 15) Breaches to our information technology systems; 16) Ability to keep pace with rapid technological changes; 17) Ability to protect our intellectual property; 18) Costs associated with environmental, health and safety regulations; 19) International trade disputes resulting in tariffs and our ability to mitigate tariffs; 20) Impact from climate change and related regulations; 21) Ability to avoid design or manufacturing defects; 22) Recognition of goodwill and long-lived asset impairment charges; 23) Ability to manage our debt levels and any restrictions thereunder; 24) Currency fluctuations; 25) Income tax rate fluctuations; 26) Judgments related to accounting for tax positions; 27) Adjustments to compensation expense for performance-based awards; 28) Timing and magnitude of costs associated with restructuring activities; and 29) Impact to interest expense from the replacement or modification of LIBOR.

Non-GAAP Financial Measures

To supplement the company's financial statements presented in accordance with generally accepted accounting principles in the United States ("GAAP"), Methode uses certain non-GAAP financial measures, such as EBITDA, Free Cash Flow, Return on Invested Capital, and Net Debt. Reconciliation to the nearest GAAP measures of all non-GAAP measures included in this presentation can be found in the appendix. Management believes EBITDA is useful to investors as it is a measure that is commonly used by other companies in our industry and provides a comparison for investors to the company's performance versus its competitors. Management believes Free Cash Flow is a meaningful measure to investors because management reviews cash flows generated from operations after taking into consideration capital expenditures, which are both necessary to maintain the company's asset base and which are expected to generate future cash flows from operations. Prior to Fiscal 2021 the definition of Free Cash Flow was net income plus depreciation and amortization less capital expenditures. Management believes Return on Invested Capital is useful to investors as a measure of operating performance and of the effectiveness of the use of capital in our operations. Management believes Net Debt is a meaningful measure to investors because management assesses the company's leverage position after considering available cash that could be used to repay outstanding debt. Methode's definitions of these non-GAAP measures may differ from similarly titled measures used by others. These non-GAAP measures should be considered supplemental to, and not a substitute for, financial information prepared in accordance with GAAP.

Methode at a Glance

A leading global supplier of custom-engineered solutions for user interface, LED lighting system, power distribution and sensor applications in the transportation, industrial equipment, cloud computing and medical device end markets.

Established 1946

Headquartered in Chicago, IL

NYSE: MEI

\$1.1 Billion Fiscal 2021 Sales

7,200 Employees
600+ Engineers

Investment Thesis

Exposure to Key Market Trends

- Electrification & Sustainability
 - EV, Commercial Vehicles
- Automation & Safety
 - Sensors, Remote Controls
- Information Technology
 - Cloud Computing

Product Portfolio Management

- Focused on Systems Integration vs. Components
- Auto Volume Provides Scalability for Adjacent Markets
- Technology Solutions Leveraged across Verticals

Operational & Quality Excellence

- Lean & Vertical Integration Drive Competitive Cost Position
- World Class Quality (Single-Digit PPM)
- Global Footprint in Proximity to Key End Markets

Strong Balance Sheet Focus

- Balanced Capital Allocation (63% Growth Oriented)
- Strong Free Cash Flow (127% of FY21 Net Income)
- Low Leverage (Net Debt/EBITDA ~ 0)

Methode's strategy is to design and engineer solutions that incorporate our broad range of field-proven innovative technologies and then utilize our global manufacturing capabilities to provide differentiated value for our customers in our key markets.

Strategic Priorities

Customer & Program Diversification

- Capitalize on Exposure to EV, Commercial Vehicle, and Cloud Computing
- Leverage Power, LED Lighting, and Sensor Technologies across Customer Base

Organic & Inorganic Growth

- Leverage Technology to Increase Content per Vehicle and Penetrate Non-Auto Markets
- Pursue Dynamic Acquisitions that Build on Business Model and Skill Set

Financial Improvement

- Expand Margin via Improved Product Mix and Operational Efficiencies
- Reduce Working Capital % of Sales through Lean Manufacturing

EV Driving Increased Content Per Vehicle

Methode's Internal Combustion Engine (ICE) Vehicle Content

- User Interface
- Lighting
- Sensors

ICE \$1.0x

Methode's Hybrid and Battery Electric Vehicle Content

- User Interface
- Lighting
- Sensors
- **Power Distribution**

HEV \$1.2-1.7x
BEV \$2.0-2.5x

EV Solutions for the “Top Hat”

EV Solutions for the “Skateboard”

Inverter & Charger

Molded Busbar Sub-Assemblies

Battery Monitoring

Current Sensors

Sensors

Position & Torque Sensors

Electric Motors

Busbars & Power Connectors

Battery Module Connections

Busbars & Connectors

Battery Disconnect & Power Distribution

BDU

PDU

EV, Commercial Vehicle, and Cloud Computing Driving Customer Diversification

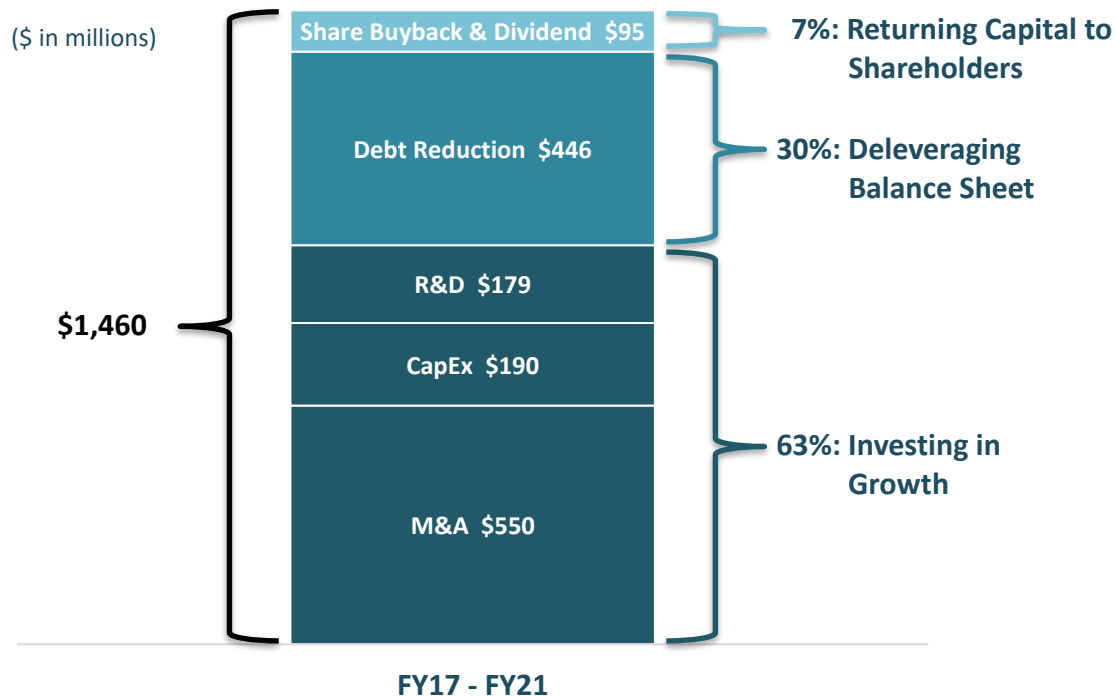

Strong Free Cash Flow and Returns

* See Appendix for reconciliation to GAAP

** Fiscal Year 2021 Weighted Average Cost of Capital of 9.0% per Bloomberg

Capital Allocation History and Strategy

Balanced Capital Allocation Strategy

- Pay Down Debt when Appropriate
- Return Capital to Shareholders via Share Purchases and Dividend
 - Announced \$100M Share Buyback Program on March 31, 2021
 - Announced 27% Increase in Dividend on June 17, 2021
- Invest in Growth via R&D & CapEx
- Accretive Acquisitions

Deleveraging Balance Sheet

(\$ in millions)

- Consistently Deleveraging Since Grakon Acquisition in FY19 Q2
- Net Debt / TTM EBITDA* of **0.04** at End of FY21
- Balance Sheet Well-Positioned for Potential M&A

* See Appendix for reconciliation to GAAP
