Sandy Spring Bancorp

Forward Looking Statements

Sandy Spring Bancorp's forward-looking statements are subject to the following principal risks and uncertainties: risks, uncertainties and other factors relating to the COVID-19 pandemic, including the effect of the pandemic on our borrowers and their ability to make payments on their obligations, the effectiveness of vaccination programs, and the effect of remedial actions and stimulus measures adopted by federal, state and local governments; general economic conditions and trends, either nationally or locally; conditions in the securities markets; changes in interest rates; changes in deposit flows, and in the demand for deposit, loan, and investment products and other financial services; changes in real estate values; changes in the quality or composition of the Company's loan or investment portfolios; changes in competitive pressures among financial institutions or from non-financial institutions; the Company's ability to retain key members of management; changes in legislation, regulations, and policies; the possibility that any of the anticipated benefits of acquisitions will not be realized or will not be realized within the expected time period; and a variety of other matters which, by their nature, are subject to significant uncertainties. Sandy Spring Bancorp provides greater detail regarding some of these factors in its Form 10-K for the year ended December 31, 2021, including in the Risk Factors section of that report, and in its other SEC reports. Sandy Spring Bancorp's forward-looking statements may also be subject to other risks and uncertainties, including those that it may discuss in its filings with the SEC, accessible on the SEC's Web site at www.sec.gov.

Q2 Financial Highlights

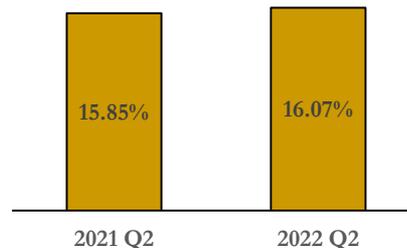

Disciplined Balance Sheet Growth

Fee Income (\$MM)

Total Risk-Based Capital

- **Strong commercial loan growth of 17% or \$1.3 billion**, excluding PPP loans, over 2Q2021. Total mortgage loans grew 22% or \$249.7 million as a greater number of conventional 1-4 family mortgages were retained to grow the portfolio
- **Core return on average assets of 1.37%⁽¹⁾** for 2Q2022 after adjustments for amortization of intangible assets, gain on disposal of assets, investment securities gains, and merger, acquisition and disposal expense
- **Non-interest income increased 34%** over 2Q2021 as a result of the \$16.7 million gain from the disposition of the insurance subsidiary
- **Wealth management income remained flat** over 2Q2021 despite weak performance of financial markets
- **Service charges on deposits up 25%** over 2Q2021 and **bank card fees grew 1%**
- Strong **total risk-based capital ratio of 16.07%**, up 22 bps over the prior year
- **Stable non-GAAP efficiency ratio⁽¹⁾ of 49.79%** for 2Q2022

Net Income

(Dollars in millions)

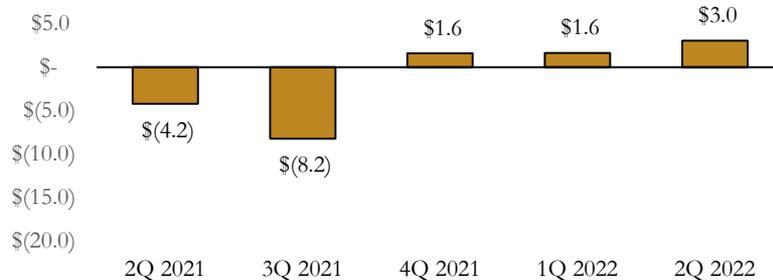

Pre-Tax Pre-Provision Net Income⁽¹⁾

(Dollars in millions)

Provision (Credit) for Credit Losses

(Dollars in millions)

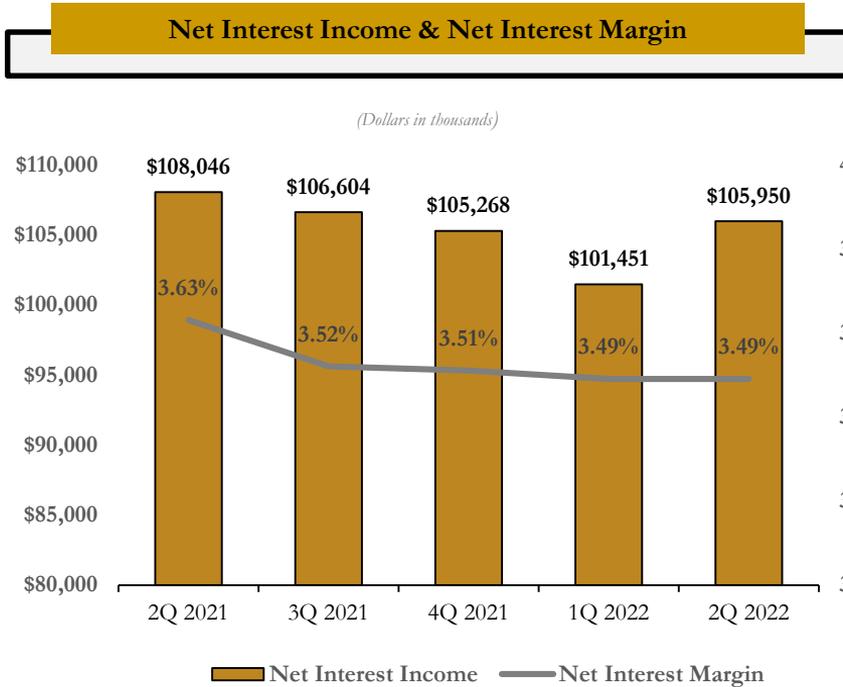

- Primary driver of the decline in net income from 2Q2021 to 2Q2022 was the provision for credit losses, as the prior year's results contained a significant credit to the allowance versus the current year's charge to the allowance
- Excluding the gain on the disposition of the Company's insurance business, 2Q2022 reflected a decline in both net interest income and non-interest income compared to 2Q2021, and an increase in non-interest expense. Income from mortgage banking activities declined \$4.3 million and other non-interest income declined \$3.4 million compared to 2Q2021

Income Statement

Net Interest Income

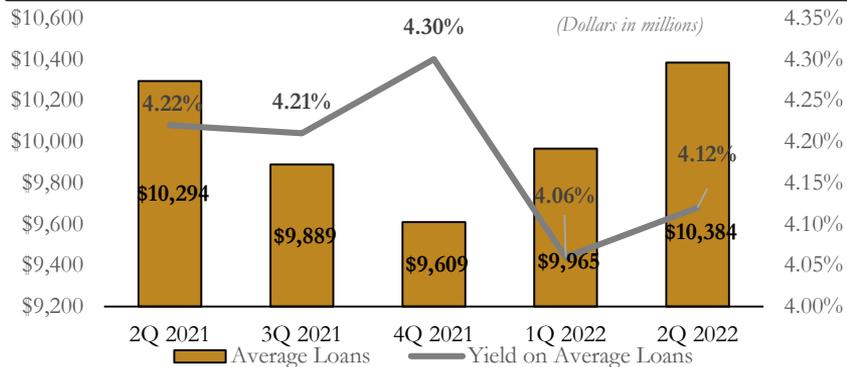

- The net interest margin for 2Q 2022 was 3.49% as compared to 3.63% for the same quarter of the prior year, as the yield on interest-earning assets declined 11 basis points and the rate paid on interest-bearing liabilities increased 6 basis points
- Net interest margin, excluding the effects of amortization of the fair value marks derived from acquisitions and interest and fees from PPP loans was 3.45% for the current quarter compared to 3.49% for 2Q 2021
- The decline in net interest income over 2Q 2022 was driven by a \$12.0 million decline in interest on PPP loans substantially offset by interest income from other commercial loan categories and an increase in investment securities income. The increase in interest expense was driven by the interest expense associated with the issuance of subordinated debt late in 1Q 2022

Interest Rate Sensitivity

Change in Net Interest Income – Year 1

Change in Economic Value of Equity – Year 1

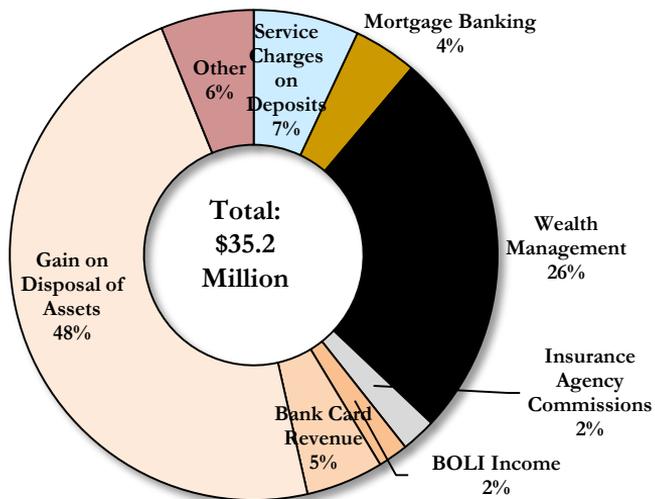

Interest Rate Sensitivity Highlights

- The core deposit premium increased significantly from December 30, 2021. The increase is due to higher market rates, an increase in DDA (\$350 mm) and treating the PPP deposits as core as compared to 2021
- The Economic Value of Equity (EVE) at risk increased in all rising shock bands. More fixed rate loans and higher market rates resulting in lower market values on loans and securities are driving the increase in risk
- Compared to December 31, 2021, the balance sheet's sensitivity as of June 30, 2022 decreased. All risk measures are within our prescribed policy limits of 10% - 23.5%

Other Income	2,173	117	(3,476)
Non-interest Income	\$ 35,245	\$ 14,650	\$ 8,986

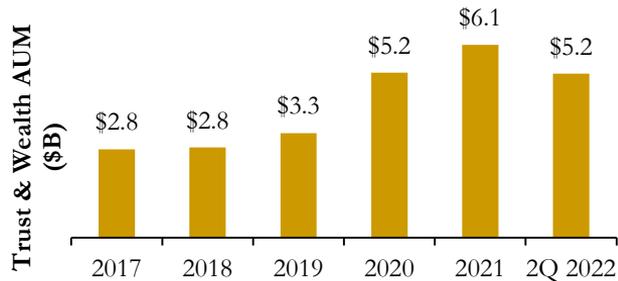

- Non-interest income for the current quarter increased by 34% or \$9.0 million compared to the prior year quarter as a result of a \$16.7 million gain from disposition of the Company's insurance business. Excluding the disposal gain, non-interest income declined 29% compared to the prior year quarter. Income from mortgage banking activities declined 74% and other non-interest income declined 62% compared to the prior year quarter. These decreases were partially offset by 25% growth in service charges on deposit accounts

Other Expense	7,321	1,238	1,439
Non-interest Expense	\$ 64,991	\$ 2,844	\$ 2,016

- Non-interest expense for the current quarter increased \$2.0 million or 3% compared to the prior year quarter. The majority of the increase was \$1.1 million of merger, acquisition and disposal expense associated with the sale of the Company's insurance business in 2Q 2022. Other expense increased \$1.4 million relating to higher expenses for provision for lines of credit, franchise taxes and other operating costs offset by a \$0.8 million decrease in professional fees

- The combination of a decline in net interest income and non-interest income and the increase in non-interest expense resulted in the erosion of the non-GAAP efficiency ratio compared to prior year quarter

Allowance for Credit Losses	\$ 123,961	\$ 107,920	\$ 109,145	\$ 110,588	\$ 113,670

- \$113.7 million ACL-loans and leases, or 1.05% of loan balances and 261% of non-performing loans, at June 30, 2022
- Provision of \$3.0 million for the current quarter is a reflection of the growth in the loan portfolio during the quarter and management's consideration of the increased potential for an economic recession. These factors exceeded the impact derived from continuing improvement in forecasted macroeconomic indicators
- Utilized June Moody's baseline forecast in quantitative model

Allowance for Credit Losses: 2Q 2022 Change

(Dollars in millions)

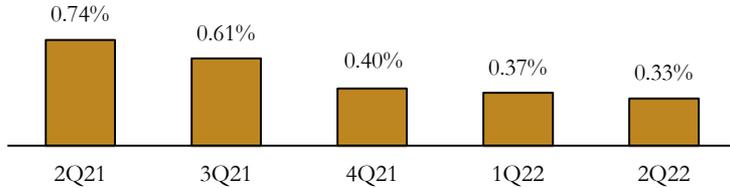

- Increase in 2Q 2022 ACL was mainly driven by the growth in loan portfolio balances in combination with the quarterly updates to qualitative adjustments. These increases were partially offset by continued improvement in projected near-term economic variables and changes in non-discounted cash flow assumptions

Digital Transformation and Technology

Technology and digital investments will provide a flexible platform for future growth and enhance the client experience. We are investing \$15 - \$20 million through 2024 to:

- Build an omni-channel banking platform, including Backbase, that supports future client facing enhancements.

- Implement an enterprise-wide integration layer with MuleSoft that will enable the design and build of APIs that support new and customized service offerings

- Create a holistic data infrastructure that will integrate with our existing Salesforce implementation and enable use cases to both drive revenue and more effectively manage the business

- Enhance the nCino commercial loan origination system to enhance client experience

- Implement Zelle as a digital payment option

Non-GAAP Reconciliation

This presentation contains financial information and performance measures determined by methods other than in accordance with generally accepted accounting principles in the United States (“GAAP”). Sandy Spring Bancorp’s management believes that the supplemental non-GAAP information provides a better comparison of period-to-period operating performance. Additionally, Sandy Spring Bancorp believes this information is utilized by regulators and market analysts to evaluate a company’s financial condition and, therefore, such information is useful to investors. Non-GAAP measures used in this presentation consist of the following:

- efficiency ratio
- tangible common equity
- core earnings

Efficiency Ratio. Management views the GAAP efficiency ratio as an important financial measure of expense performance and cost management. The ratio expresses the level of non-interest expenses as a percentage of total revenue (net interest income plus total non-interest income). Lower ratios indicate improved productivity. In general, the efficiency ratio is non-interest expenses as a percentage of net interest income plus non-interest income. Non-interest expenses used in the calculation of the non-GAAP efficiency ratio excludes intangible asset amortization, loss on FHLB redemption, and merger, acquisition and disposal expense from non-interest expense, securities gain, and gain on asset sales from non-interest income and adds the tax- equivalent adjustment to net interest income. The measure is different from the GAAP efficiency ratio, which also is presented in this document. The GAAP measure is calculated using non-interest expense and income amounts as shown on the face of the Consolidated Statements of Income. The GAAP and non-GAAP efficiency ratios are reconciled and provided in the following table.

Tangible Common Equity. Tangible equity, tangible assets and tangible book value per share are non-GAAP financial measures calculated using GAAP amounts. Tangible common equity and tangible assets exclude the balances of goodwill and other intangible assets from stockholder’s equity and total assets, respectively. Management believes that this non-GAAP financial measure provides information to investors that may be useful in understanding our financial condition. Because not all companies use the same calculation of tangible equity and tangible assets, this presentation may not be comparable to other similarly titled measures calculated by other companies.

Core Earnings. Core earnings is a non-GAAP financial measure calculated using GAAP amounts. Core earnings reflect net income for the period exclusive of merger, acquisition and disposal expense, amortization of intangible assets, loss on FHLB redemption, and investment securities gain, and gain on asset sales in each case net of tax. Management believes that this non-GAAP financial measure provides helpful information to investors in understanding the Company’s core operating earnings and provides a better comparison of period-to-period operating performance of the Company.
