Sustainability Approach: 5 Core Themes

Enablers

Sustainability Policies | R&D | Industry Collaboration | Contractor Declaration | Training & Development | Risk Management | Stakeholder Engagement

Lundin Energy

Sustainability Approach: Goals and Targets

- Carbon neutral operations by 2023
- 50% absolute emissions reduction target by 2023
- Best-in-class carbon intensity of ~1 kg CO₂/boe by 2023
- 100% of net electricity usage matched by renewable power generation by end 2023

- Zero fatalities
- Zero serious incidents
- Zero lost time incidents
- Zero process safety incidents

- Promote our Code of Conduct through our value chain
- Uphold highest anti-corruption standards
- Promote fair competition
- Maintain clear whistleblowing procedure

- Oily water discharges <15 ppm
- Produced water reinjection rate > 95%
- Waste recovery >90%
- Zero spills to sea

- Increase gender balance and diversity
- Maintain robust labour practices and promote human rights
- Create positive societal impact through Lundin Foundation and engaging with local communities

Our Sustainability Approach

Lundin Energy

Oil and Gas: A Major Source of Energy for Decades to Come

World primary energy demand by fuel and related CO₂ emissions by scenario

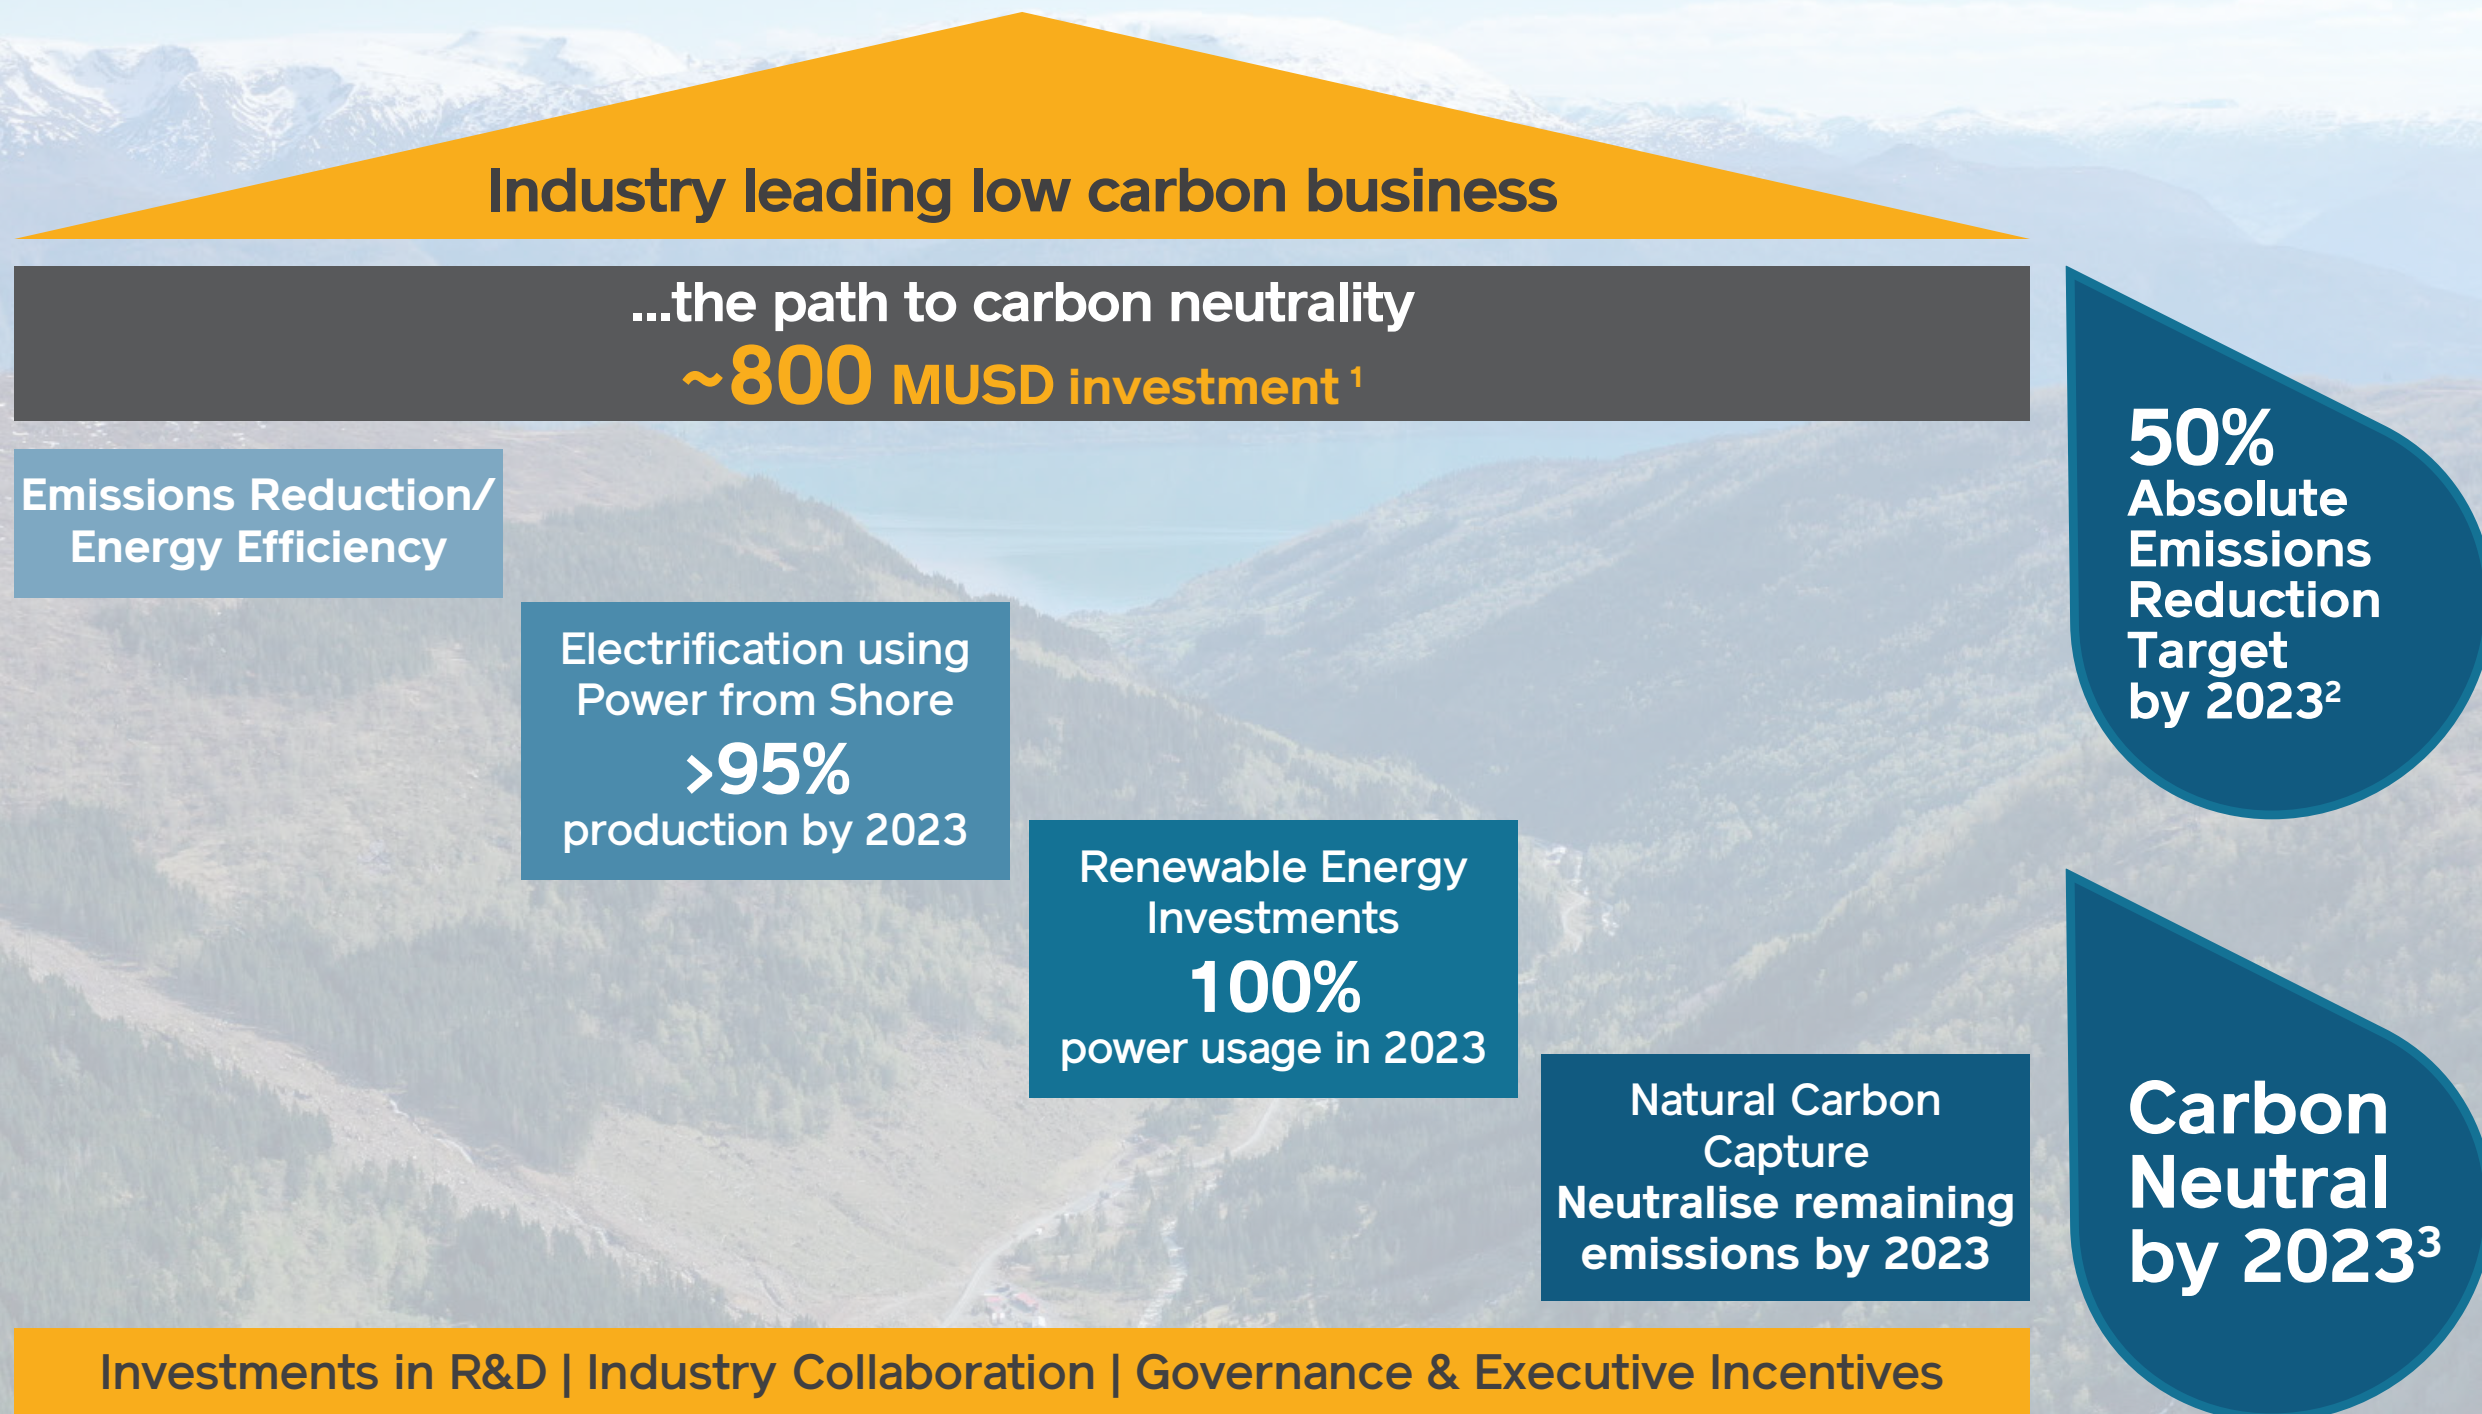

- Oil will still comprise a significant portion of the energy mix in 2040, alongside other forms of energy
- Over this same time frame, to meet climate targets set out in the Paris Agreement, global annual greenhouse gas emissions will need to be halved
- Oil will be used differently in a <2 degree future, with less used in transportation, significant decarbonisation of industry and carbon capture

Source: IEA World Energy Outlook 2020

Lundin Energy

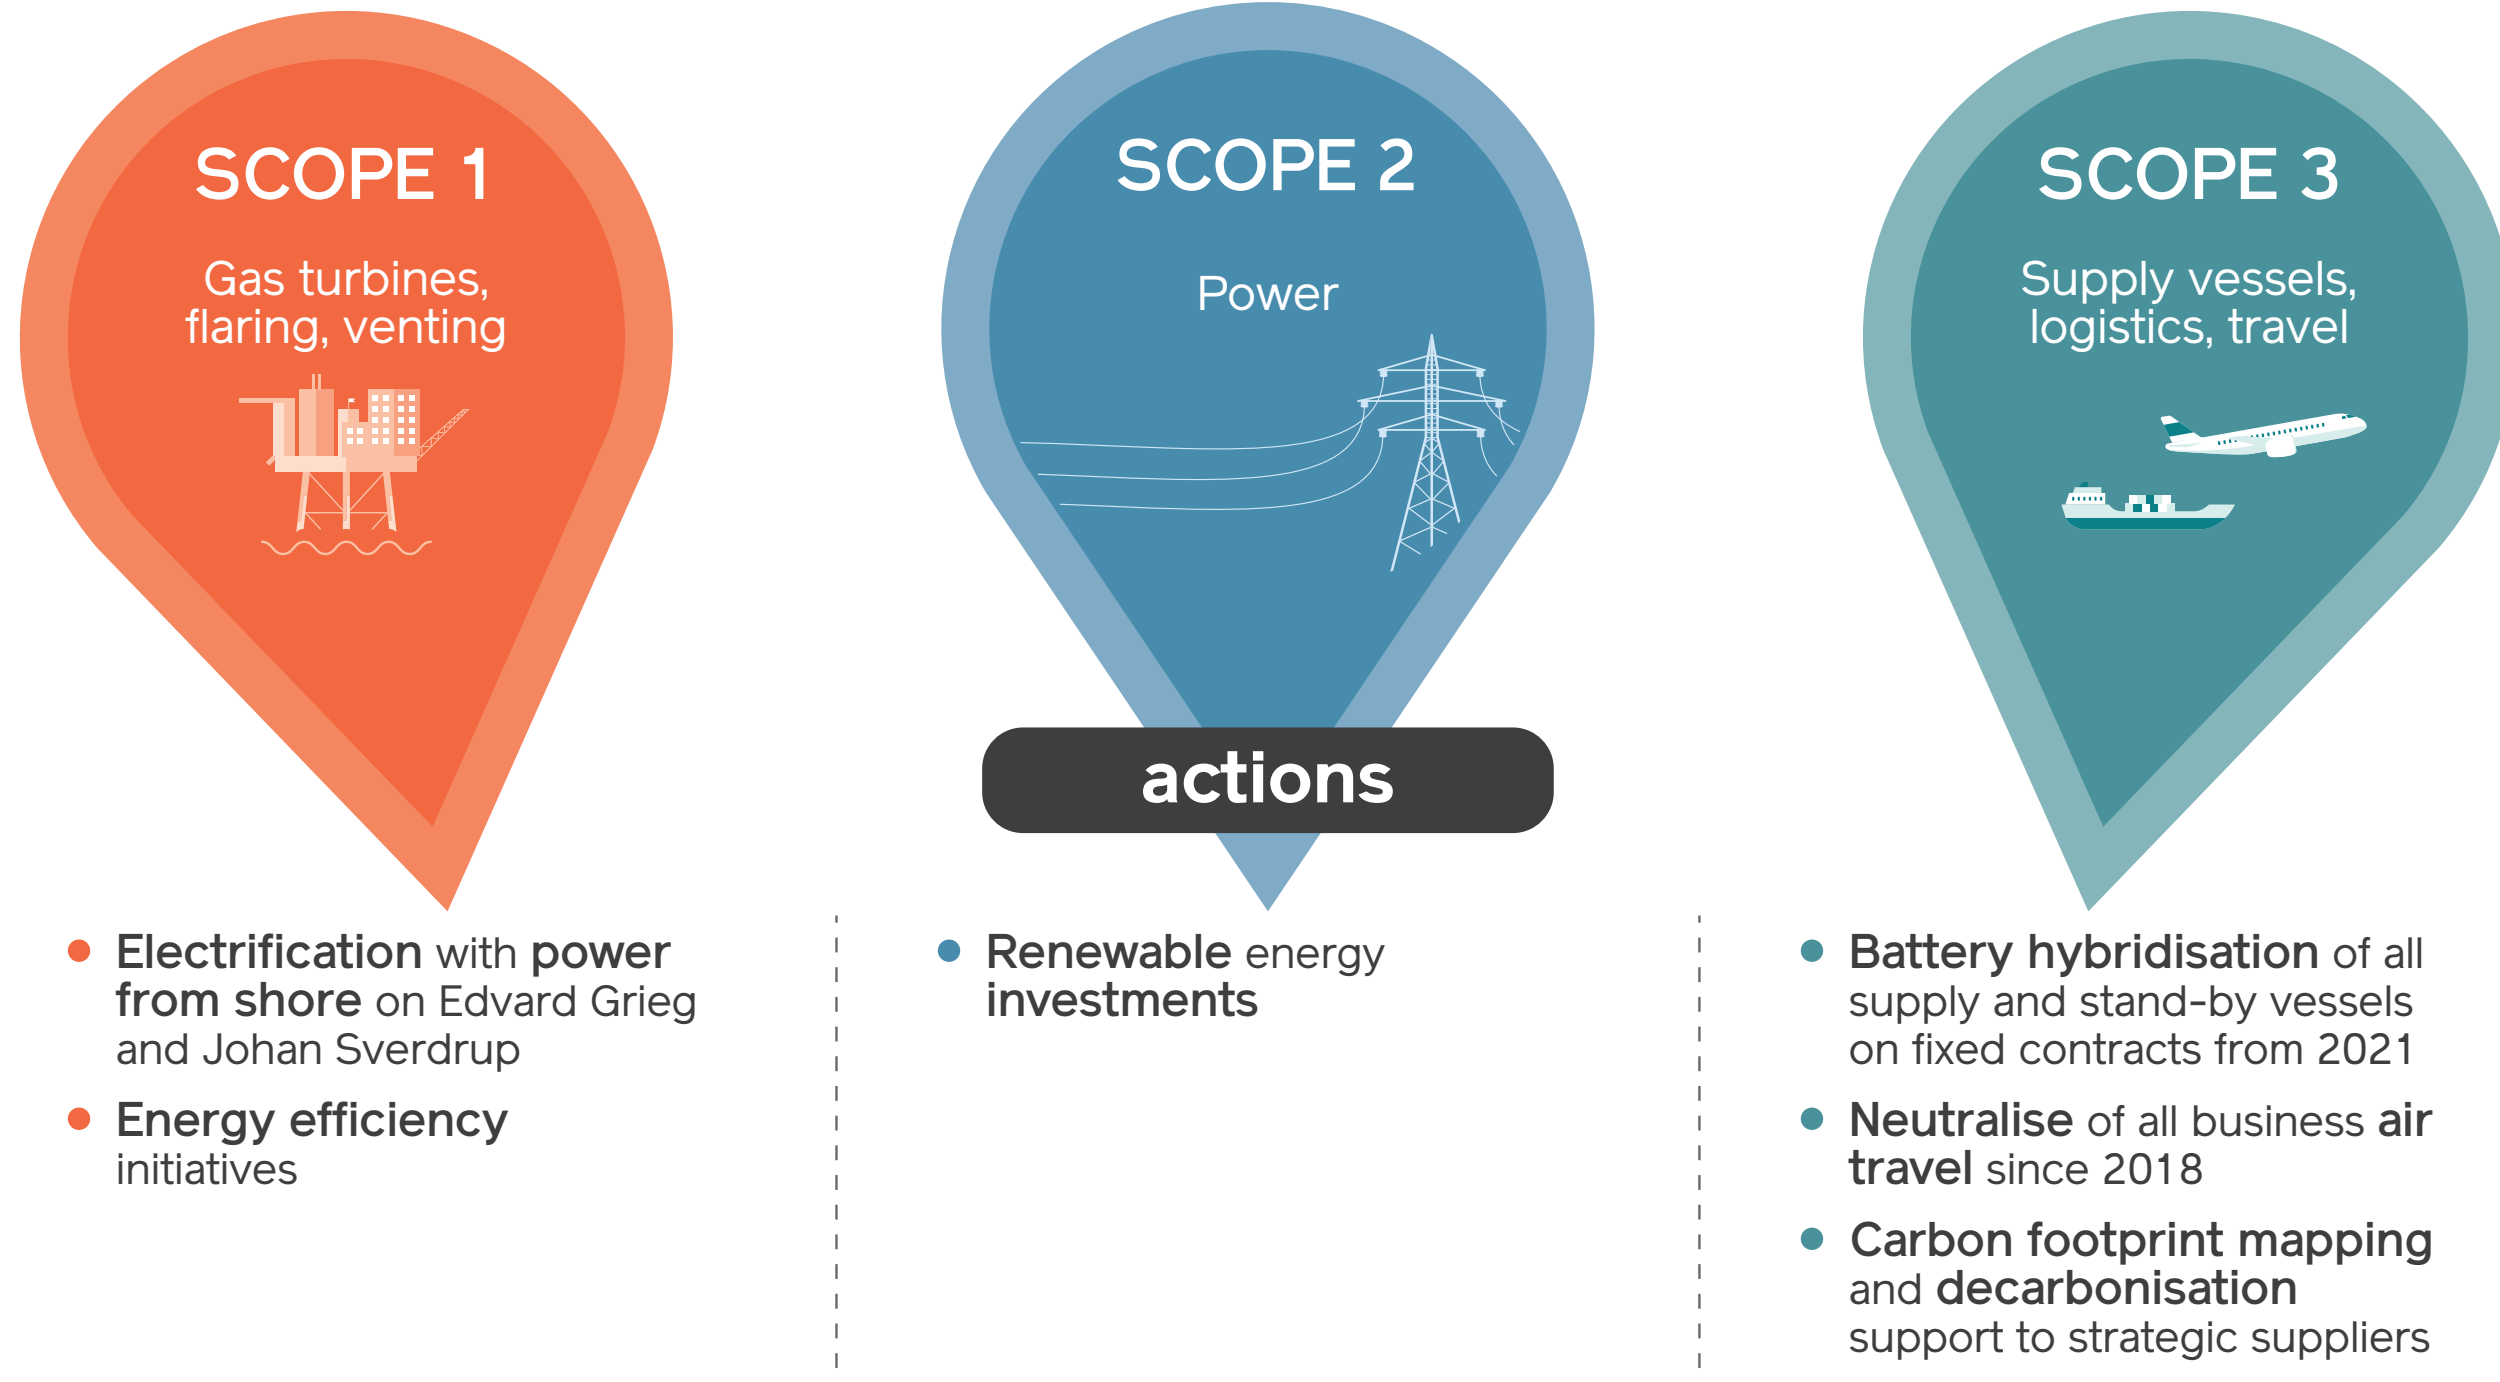

Decarbonising to Achieve Carbon Neutrality by 2023

¹ >55% spent to date

² Net Scope 1 and 2 emissions, from 2020 levels

³ Operational emissions (Scope 1, 2 and Scope 3 supply chain emissions - supply vessels, logistics and business travel)

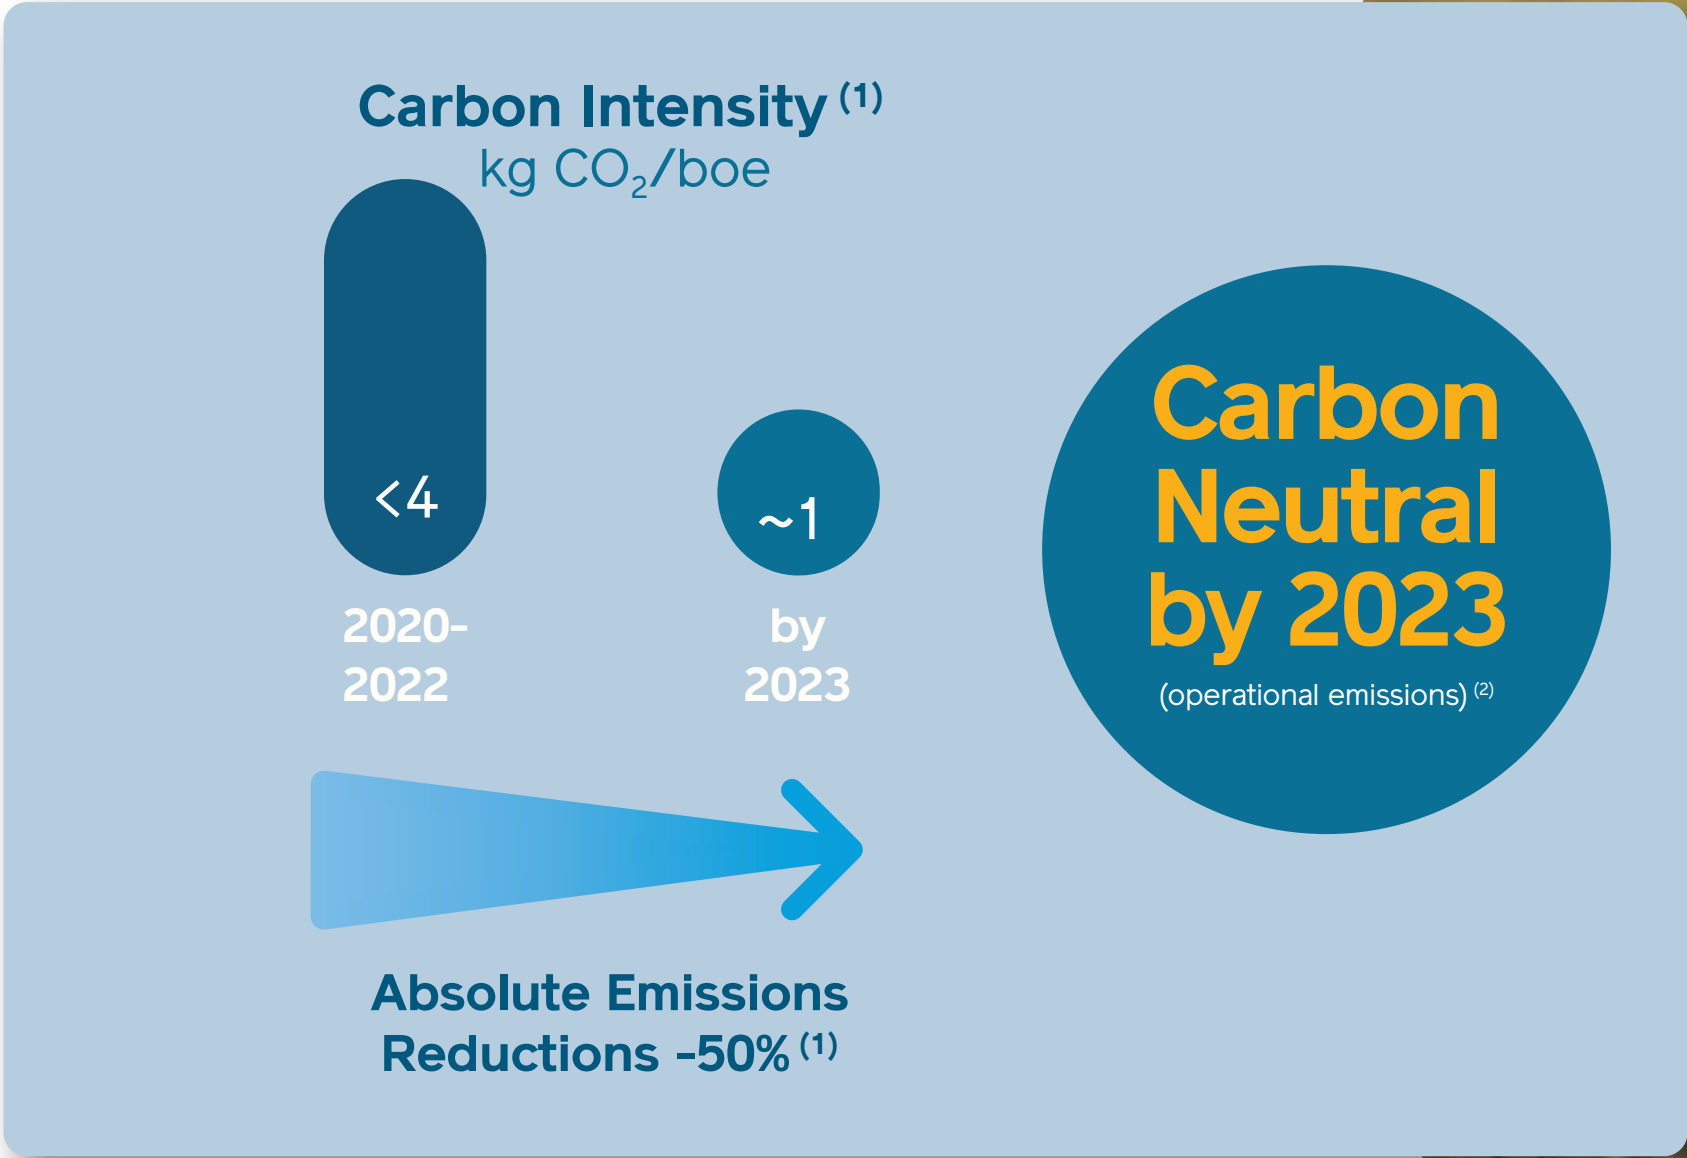

- **Natural carbon capture:** MUS\$ ~50 invested in proprietary reforestation projects and high quality marked based carbon credits to neutralise residual emissions

Lundin Energy

Carbon Neutral by 2023

~60%
of production
carbon neutral
in 2021

⁽¹⁾ Net equity Scope 1 and 2 emissions
⁽²⁾ Scope 1, 2 and Scope 3 supply chain emissions

Lundin Energy

Carbon Performance Well Above the Offshore Industry Average

Carbon intensity
(kg CO₂e/boe)

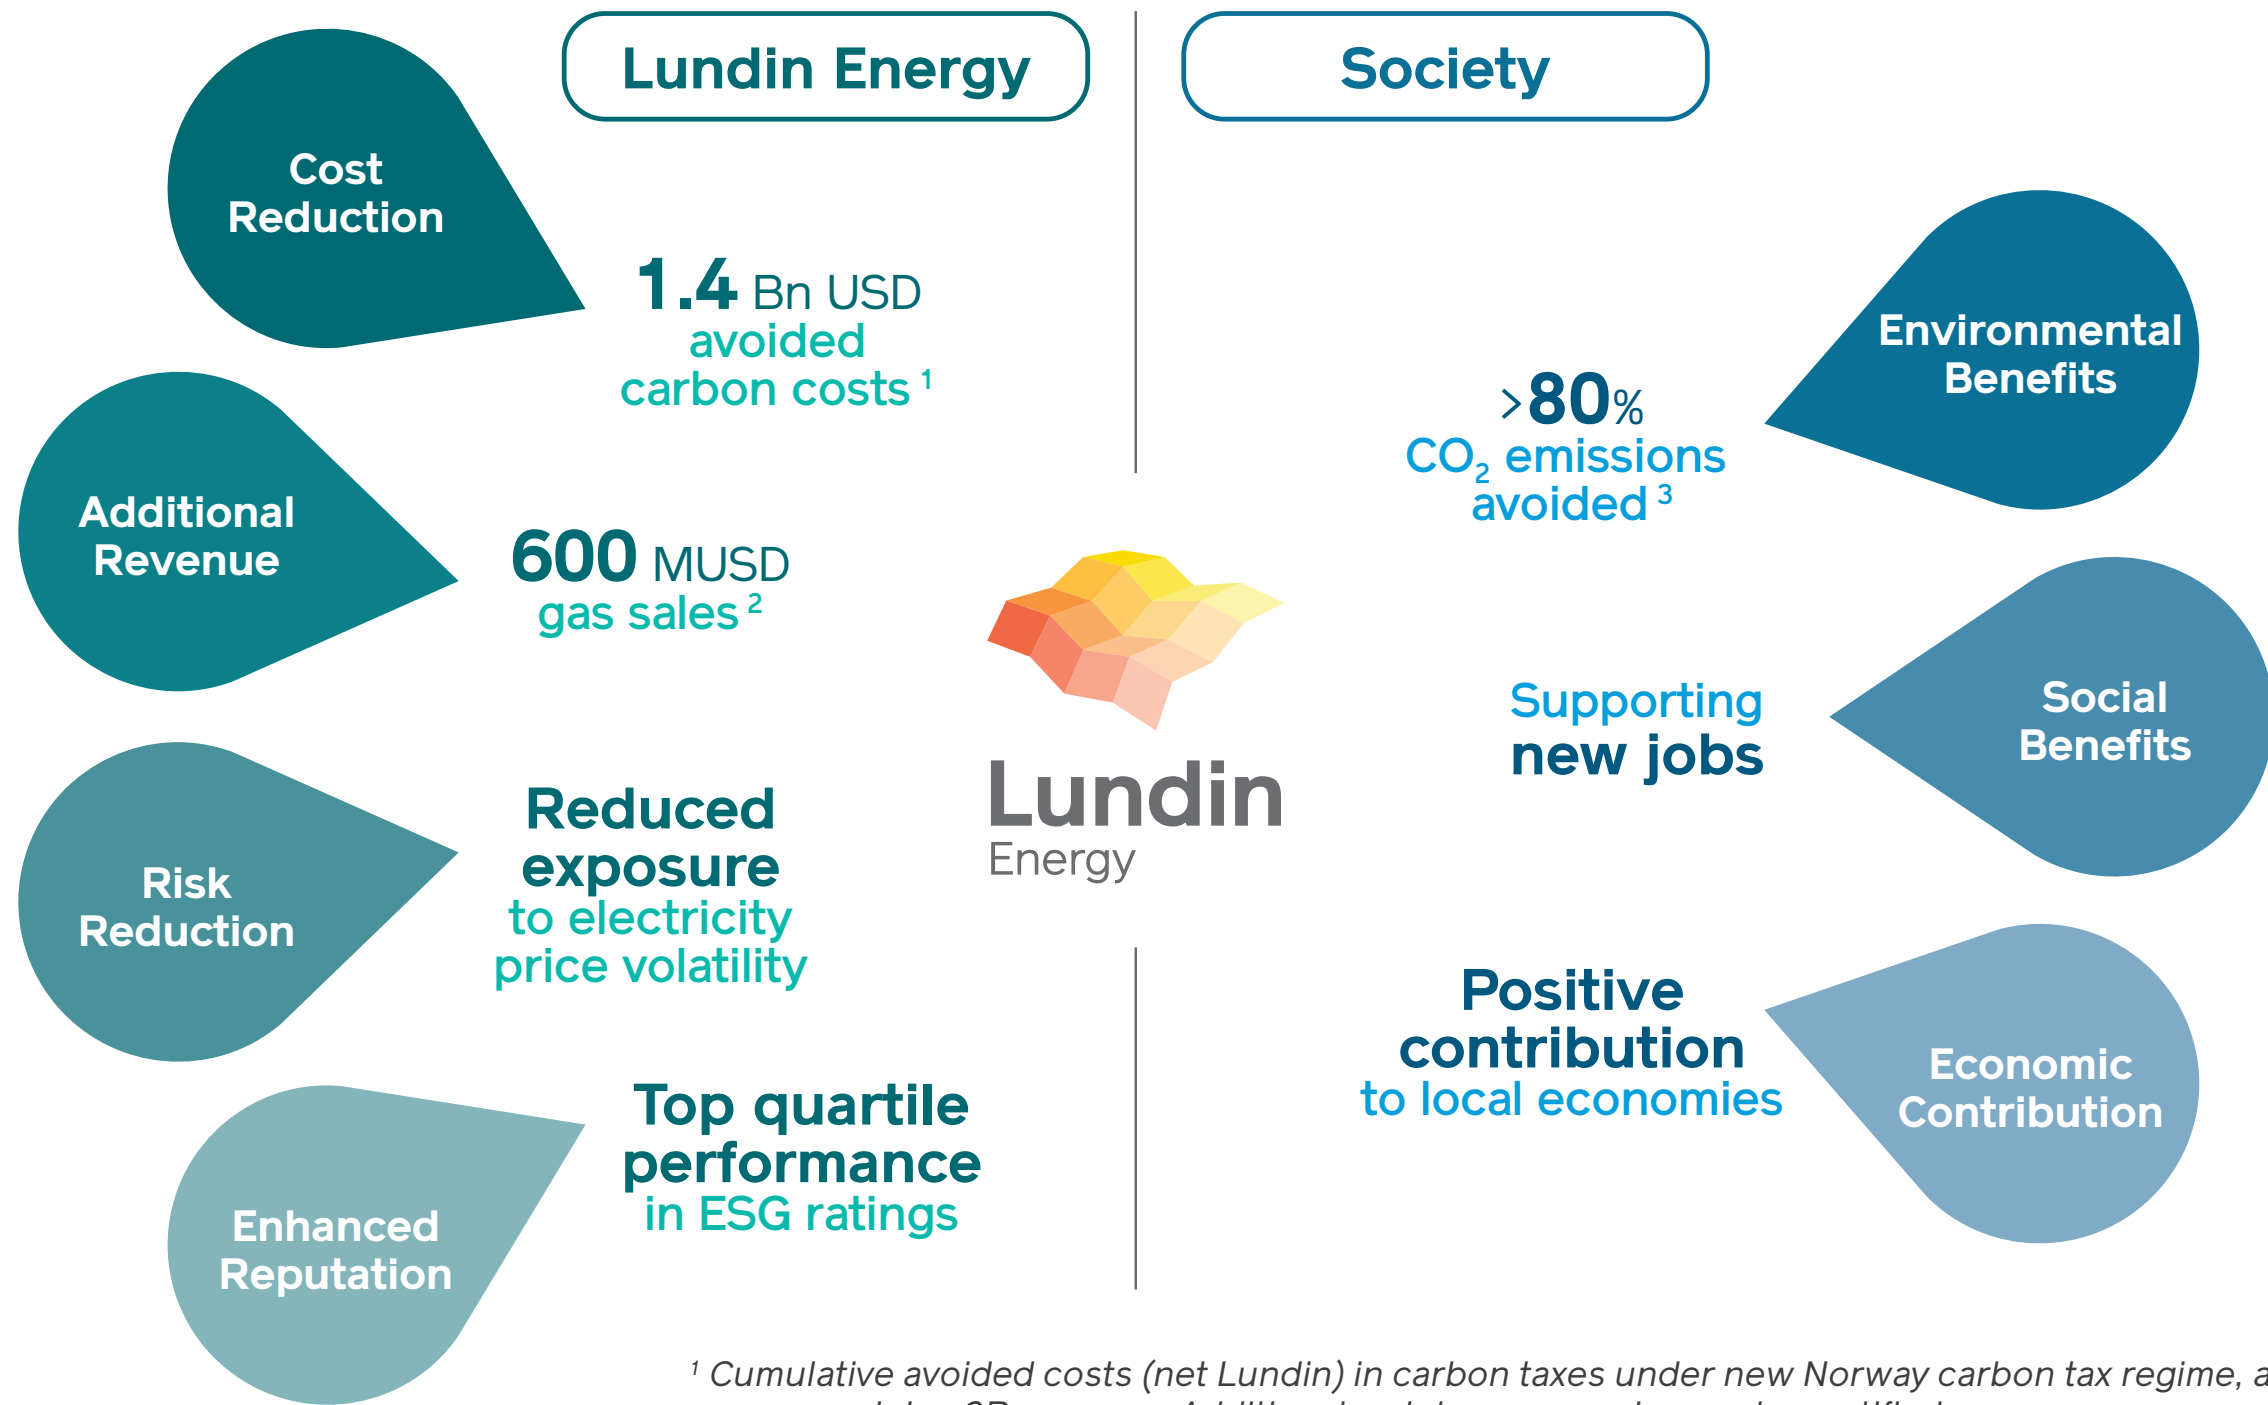

➤ Lundin Energy performs **well above the benchmark** for conventional shelf assets

➤ Lundin Energy's carbon intensity will be **>15x better** than industry average

Source: Carbon Intensity – not all assets are created equal (Wood Mackenzie, 2018)

Lundin Energy

Our Decarbonisation Strategy Creates Value for All

¹ Cumulative avoided costs (net Lundin) in carbon taxes under new Norway carbon tax regime, and EU allowances, over remaining 2P reserves. Additional maintenance savings not quantified.

² Additional gas sales (net Lundin) over remaining 2P reserves. Additional value possible from increased uptime.

³ From electrification of Johan Sverdrup and Evdard Grieg. All figures are nominal.

Lundin Energy

Contributing to Development of a Low-carbon Industry

2020 R&D Investments

R&D spend on environmental projects

Spend on environmental performance improvement

Total no. of R&D projects¹

Industry Collaboration

Clean Highly Efficient Offshore Power:
Developing efficient fuel cell power systems for marine use

Hybrid Energy System Offshore:
Hybridisation of renewable energy generation for offshore assets

Norwegian Carbon, Capture, transport and Storage Research Centre (NCCS):
CCS technology deployment in the Norwegian Continental Shelf

Low Emission Research Centre:
Developing new technologies for low carbon offshore energy systems

¹ Total no. of projects that contribute to environmental benefits

Environmental Protection

Lundin Energy

Supporting a Range of Innovative, Sustainable Businesses

LUNDIN
FOUNDATION

Lundin
Energy
**Investing for
the Future**

Katapult Climate (Oslo, Norway):

Launched by Katapult and Lundin Foundation with the goal of supporting climate tech startups to advance low carbon innovations

Ocean Harvesting Technologies (Karlskrona, Sweden):

Prototyping infinity wave power technology, a modular and scalable wave energy conversion system capable of capturing and converting wave energy in a highly cost-efficient manner

Trine (Gothenburg, Sweden):

Supports renewable energy for households in developing countries

Evoy (Bergen, Norway):

Develops high-speed electric engine and propulsion systems for small and medium sized commercial boats

Katapult Ocean (Oslo, Norway):

Launched by leading Norwegian business incubator Katapult and WWF with the goal of developing solutions to preserve the health of our ocean

Charge (Oslo, Norway):

Supports first generation immigrants to launch and grow businesses

Governance and Ethics

Lundin Energy
Our Sustainability Approach

Lundin Energy

Upholding our Code of Conduct

➤ Core set of principles to conduct activities in a responsible and sustainable way

- Upholding ethical business practices across the value chain
- Minimizing impact on the environment
- Providing a safe working environment for employees and contractors
- Respecting and engaging with the owners of the resources
- Sustaining a good return on investment for shareholders

“Lundin Energy is only as good as the people who work for us. Our success depends on people sharing the same entrepreneurial spirit coupled with shared vision and values. At Lundin Energy everyone can make a difference.”

Ian H. Lundin
Chairman of the Board

Lundin Energy

Adhering to the Highest Level of Ethical Conduct

➔ Our actions as guided by our Corporate Policies:

- ➔ All forms of corruption prohibited under our **Anti-Corruption Policy**
- ➔ Transparent means to report potential misconduct through our **Whistleblowing Policy** and **Procedure**
- ➔ Follow industry best-practice as per our **Competition Law Policy**
- ➔ Maintain strict ethical internal controls on business practices as outlined in our **Anti-Fraud**, **Anti-Money Laundering** and **Corporate Tax Policies**
- ➔ Employees and the Board receive **mandatory training** across core sustainability policies and Code of Conduct

Governance-related Policies

Disclaimer

Forward-looking Statements

Certain statements made and information contained herein constitute “forward-looking information” (within the meaning of applicable securities legislation). Such statements and information (together, “forward-looking statements”) relate to future events, including Lundin Energy’s future performance, business prospects or opportunities. Forward-looking statements include, but are not limited to, statements with respect to estimates of reserves and/or resources, future production levels, future capital expenditures and their allocation to exploration and development activities, future drilling and other exploration and development activities. Ultimate recovery of reserves or resources are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management.

All statements other than statements of historical fact may be forward-looking statements. Statements concerning proven and probable reserves and resource estimates may also be deemed to constitute forward-looking statements and reflect conclusions that are based on certain assumptions that the reserves and resources can be economically exploited. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as “seek”, “anticipate”, “plan”, “continue”, “estimate”, “expect”, “may”, “will”, “project”, “predict”, “potential”, “targeting”, “intend”, “could”, “might”, “should”, “believe” and similar expressions) are not statements of historical fact and may be “forward-looking statements”. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. No assurance can be given that these expectations and assumptions will prove to be correct and such forward-looking statements should not be relied upon. These statements speak only as on the date of the information and Lundin Energy does not intend, and does not assume any obligation, to update these forward-looking statements, except as required by applicable laws. These forward-looking statements involve risks and uncertainties relating to, among other things, operational risks (including exploration and development risks), productions costs, availability of drilling equipment, reliance on key personnel, reserve estimates, health, safety and environmental issues, legal risks and regulatory changes, competition, geopolitical risk, and financial risks. These risks and uncertainties are described in more detail under the heading “Risk management” and elsewhere in Lundin Energy’s Annual Report. Readers are cautioned that the foregoing list of risk factors should not be construed as exhaustive. Actual results may differ materially from those expressed or implied by such forward-looking statements. Forward-looking statements are expressly qualified by this cautionary statement.
