BUMI WIN HUMAN RIGHTS RISK ASSESSMENT AWARD FROM THE MINISTRY OF HUMAN RIGHTS ON 75th WORLD HUMAN RIGHTS DAY

Jakarta, 15 December 2023

PT Bumi Resources Tbk. ("BUMI" or "Company") won a prestigious award through the Business and Human Rights Risk Assessment (PRISMA) at the 75th World Human Rights Day in Jakarta (10/12), attended by the Minister of Communication and Information, Chairman of KPU RI (Indonesia General Election Commission, Chairman of Komnas HAM (National Commission of Human Rights), Acting Governor of DKI Jakarta, and other regional leaders. The award was conferred directly by the Minister of Law and Human Rights of the Republic of Indonesia, Yasona Laoly, to BUMI and 4 other companies who succeeded in winning the best award in managing business risks towards human rights.

PRISMA was developed by the Ministry of Law and Human Rights and is followed by all domestic companies to assess and identify the risks of human rights violations that could occur in companies. PRISMA is a human rights risk assessment that is in line with the mandate of Presidential Regulation Number 60 of 2023 concerning the National Strategy for Business and Human Rights.

BUMI is one of the pioneer companies in Indonesia that respects and upholds human rights in doing business. As a company engaged in the mining business, BUMI supports the enforcement and respect of human rights, which has become the main commitment for BUMI's sustainability.

BUMI President Director Adika Nuraga Bakrie said, "As a company engaged in the mining business, we strongly encourage that PRISMA assessment be followed by all companies, allowing them to assess and identify the risks of human rights violations that could occur in a company. He further assessed that the mining business, which is an extractive industry, is of important value and has high and complex risks. Thus, it is important to mitigate mining risks, one of which is through human rights risk assessments."

Mr. Aga added, "Apart from that, BUMI also upholds the principles of occupational health and safety, especially in mining operations as well as freedom of association for its employees."
