

# H.C. Wainwright Annual Investor Conference

SEPTEMBER 2021

Nasdaq: LGND

# SAFE HARBOR STATEMENT

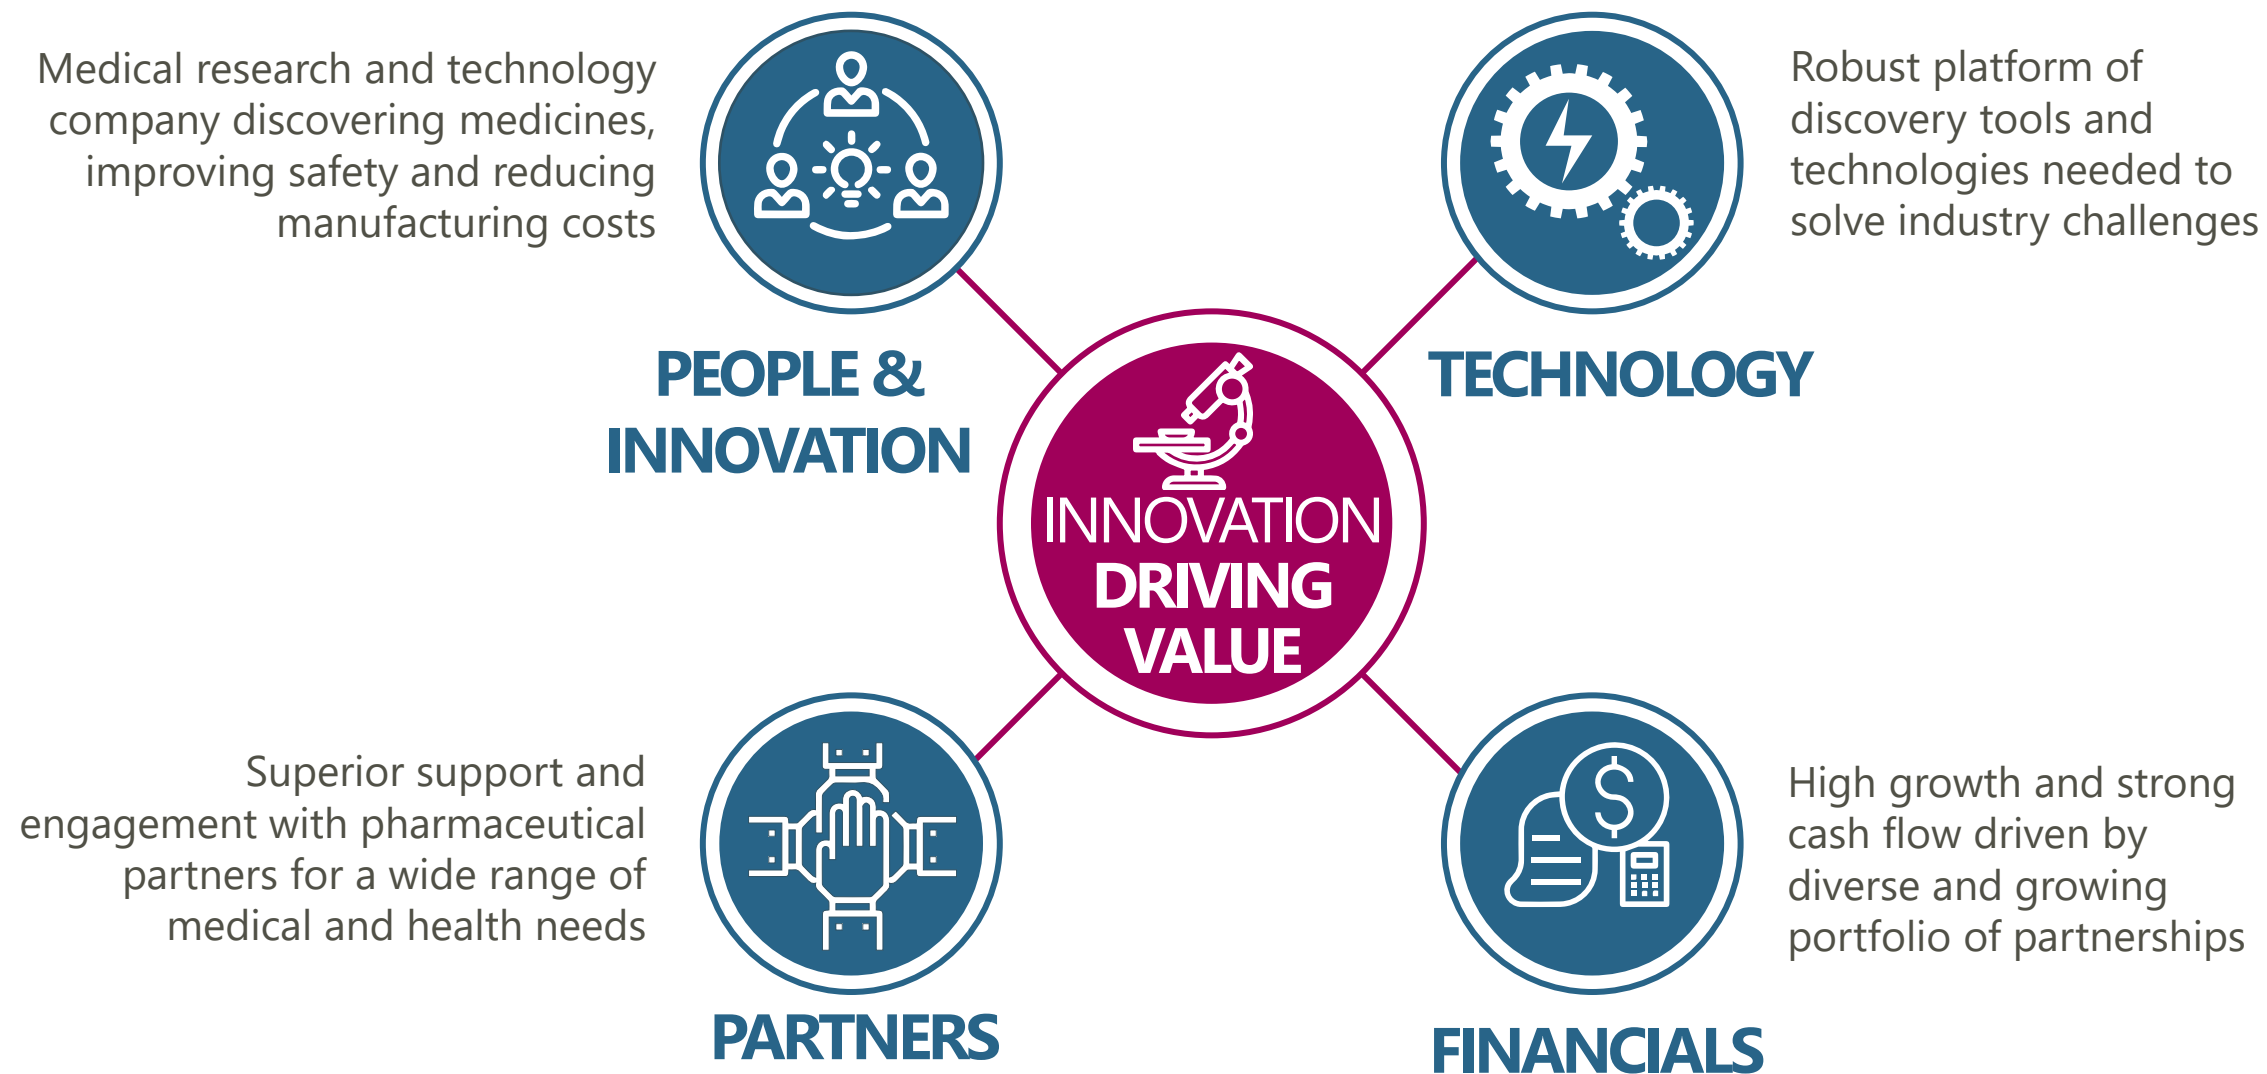

The following presentation contains forward-looking statements by Ligand and its partners that involve risks and uncertainties and reflect Ligand's and its partners' judgment as of the date of this presentation. Words such as "plans," "believes," "expects," "projects," "could," "anticipates," and "will," and similar expressions, are intended to identify forward-looking statements. These forward-looking statements include, without limitation, expectations regarding research and development programs, the timing of the initiation or completion of preclinical studies and clinical trials by Ligand and its partners, expectations regarding product approvals and potential for future revenue growth, and launches by Ligand or its partners and the timing thereof, total addressable market for antibodies. Actual events or results may differ from Ligand's expectations due to risks and uncertainties inherent in Ligand's business, including the inherent risks of clinical development and regulatory approval of product candidates, including that FDA or foreign regulatory authorities may not agree with our or our partners' conclusions regarding the results of clinical trials; Ligand may be unable to successfully integrate operations from acquired businesses or may face other difficulties as a result of acquisitions such as strain on operational resources; the total addressable market for antibodies or other therapeutics may be smaller than estimated; we face competition with respect to our technology platforms, including OmniAb, which may demonstrate greater market acceptance or superiority; partnered commercial products may not perform as expected; Ligand relies on collaborative partners for milestone and royalty payments, royalties, materials revenue, contract payments and other revenue projections; Ligand does not have contractual relationships with certain parties identified as partners and is dependent on WuXi Biologics Ireland Limited to enforce any contractual rights such as payment of royalties or milestones; the possibility that Ligand's and its partners' drug candidates might not be proved to be safe and efficacious and uncertainty regarding the commercial performance of Ligand's and/or its partners' products; and other risks and uncertainties described in its public filings with the Securities and Exchange Commission, available at [www.sec.gov](http://www.sec.gov). Additional risks may apply to forward-looking statements made in this presentation. Information regarding partnered products and programs comes from information publicly released by our partners. This presentation describes the typical roles and responsibilities of Ligand and our partners and is not intended to be a complete description in all cases. Our trademarks, trade names and service marks referenced herein include Ligand, Captisol, Pelican Expression Technology, OmniAb, OmniChicken, OmniRat, OmniMouse, OmniFlic, OmniClic and OmniTaur. Each other trademark, trade name or service mark appearing in this presentation belongs to its owner.

The process for reconciliation between the non-GAAP adjusted financial numbers presented on slide 10 and the corresponding GAAP figures is shown in the earnings press release for the second quarter ended June 30, 2021 available at <https://investor.ligand.com/press-releases>. However, other than with respect to total revenues, the Company only provides financial guidance on an adjusted basis and does not provide reconciliations of such forward-looking adjusted measures to GAAP due to the inherent difficulty in forecasting and quantifying certain amounts that are necessary for such reconciliation. Ligand disclaims responsibility for any statement by a person other than its employees and the views expressed by persons other than Ligand employees do not necessarily reflect the views of Ligand.

Readers are cautioned not to place undue reliance on these forward-looking statements, which reflect our good faith beliefs (or those of the indicated third parties) and speak only as of the date hereof. All forward-looking statements are qualified in their entirety by this cautionary statement, and Ligand undertakes no obligation to revise or update this presentation to reflect events or circumstances or update third party research numbers after the date hereof. This caution is made under the safe harbor provisions of Section 21E of the Securities Exchange Act of 1934.

**GLOBALLY-RECOGNIZED  
SCIENCE AND TEAM**

*HISTORY OF FIRSTS IN GENETIC ENGINEERING  
EXPANDING TEAM OF SCIENTISTS*

# ANTIBODIES AND INDUSTRY DEMAND

HIGHER SUCCESS RATES FOR ANTIBODY MEDICINES DRIVE OUR INDUSTRY'S NEED FOR DISCOVERY TECHNOLOGY

## Increasing Antibody Market

**>\$250 Billion Total Addressable Market** for Antibodies by 2025

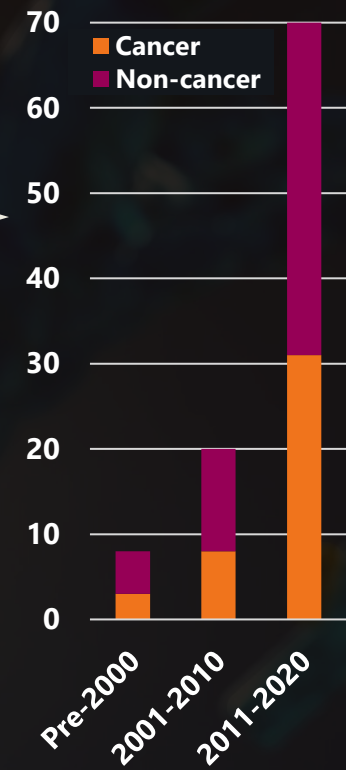

## Higher Success Rates

Type of Drug	Likelihood of Approval at Phase 1 Stage
Small molecules	6.2%
Biologics/Antibodies	<b>11.5%</b>

Historical success rates for antibody classes is **nearly twice the rate** of small molecules

Substantial growth in number of new antibody therapeutics

## Acceleration of Regulatory Approvals

# OMNIAB HISTORY

OVER 12 YEARS OF INVESTMENT BUILT OUR *BEST-IN-CLASS* PLATFORM

- Next generation animals (Bispecifics, HCO, etc.)
- Expanded state-of-the art labs and added capacity
- Bioinformatics capabilities powered by AI
- Characterization and optimization team

Strategically built tech stack to optimally harness the unparalleled power of **BIOLOGICAL INTELLIGENCE™**

# OMNIAB OUR PHILOSOPHY AND APPROACH

## LEVERAGING OUR TECH STACK TO SERVE A FAST-GROWING AND CRITICALLY IMPORTANT INDUSTRY

We apply proprietary, AI-powered antigen generation techniques to highly-optimized next-generation transgenic animals.

We then tap into the unparalleled powers of **biological intelligence**<sup>™</sup> and *in vivo* maturation to generate massive numbers of target-specific antibodies.

Those antibodies are efficiently mined with validated state-of-the-art high-throughput screening technologies designed to deliver highest quality therapeutic candidates for a wide range of human diseases.

### THE OMNIAB TECH STACK

AbInitio Antigen

OmniRat<sup>®</sup>, OmniMouse<sup>®</sup> and OmniChicken<sup>®</sup>

OmniFlic<sup>®</sup> and OmniClic<sup>™</sup>

OmniTaur<sup>™</sup>

xPloration<sup>®</sup> and GEM

Discovery and Antibody Optimization  
algorithm technologies and services

**A Validated Platform: 19 OmniAb antibodies are in clinical development** (with 1 approved and 1 awaiting approval)

OmniAb partners enjoy access to the **most comprehensive and cutting-edge** stack of antibody discovery technologies available

# THE OMNIAB OFFERING CONTINUUM

OUR *BEST-IN-CLASS* TECH STACK AND CAPABILITIES

A CORE COMPETENCY FOR **HIGH-VALUE ION CHANNEL TARGETS**  
FURTHER DIFFERENTIATES OUR *BEST-IN-CLASS* TECH STACK

Proprietary cell lines enable high speed antigen production

*Antigen Design*

*Antibody  
Generation*

*Deep Screening*

*Discovery*

*Optimization*

Novel assays facilitate high-throughput screens in GEM and xPloration platforms

Validated assays leveraged for discovery and characterization of Ion Channel Abs

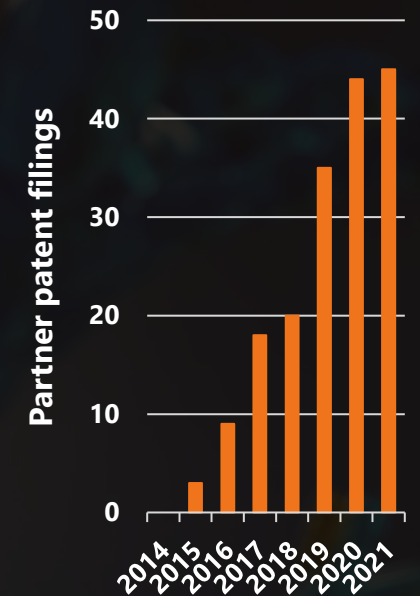

Within OmniAb is the industry's best capabilities set for viable *target-to-lead* delivery for difficult and high-value Ion Channel antibody targets

# OMNIAB INTELLECTUAL PROPERTY ADVANTAGE

PARTNERS FILING PATENTS ON OMNIAB ANTIBODIES CREATE DURABLE ROYALTY STREAMS AND A LENGTHY INTELLECTUAL PROPERTY TAIL

- We maintain a broad intellectual property estate with multiple long duration patent families covering each major element of our tech stack
- Licenses are structured so that royalties are linked to the patents for the antibodies discovered with OmniAb, thereby creating a **lengthy coverage “tail”**

**Novel Antibody Patents  
filed by Partners**

Now approaching **50 patent filings by our partners** claiming an OmniAb-derived antibody as primary invention, with expiries up to 2041

Over **300 patents worldwide** (pending and issued) on the OmniAb tech stack

A detailed 3D molecular model of an antibody, showing its characteristic Y-shape. The structure is composed of two heavy chains and two light chains, with various amino acid side chains visible as small spheres. The model is rendered in a semi-transparent, wireframe-like style, allowing the internal structure to be seen. The color scheme is primarily white and light gray, with some red and orange highlights on specific regions, possibly indicating binding sites or specific amino acid types. The background is a dark, textured blue with some lighter, hazy areas, suggesting a biological or scientific environment.

OmniAb  
Antibodies

# ZIMBERELIMAB APPROVED

## FIRST OMNIAB ANTIBODY APPROVAL

- On August 30, zimberelimab (GLS-010), an OmniAb-derived fully human anti-PD-1 mAb, was approved in China for the treatment of recurrent or refractory classical Hodgkin's lymphoma
  - Marks the first approval of an OmniAb-derived mAb
- In 2015, GloriaBio contracted with WuXi Biologics to discover and develop zimberelimab in China using Ligand's transgenic rat platform, OmniRat®
  - Zimberelimab entered clinic in March 2017, and NDA was submitted to China NMPA in February 2020
- GloriaBio is also investigating zimberelimab in advanced solid tumors, and was granted Breakthrough Therapy Designation for treatment of patients with recurrent/metastatic cervical cancer in March 2021
- Zimberelimab is being developed by Arcus Bioscience, in collaboration with Gilead, in North America, Europe, Japan and certain other territories through a 2017 license agreement

# THE POWER OF OMNIAB PARTNER CASE STUDIES

## Partner A

### Emerging Biotech

- **Novel multi-transmembrane target** for triple negative breast cancer
- All previously-known antibodies to target could only bind to denatured or fixed form, **therefore unsuitable for therapeutic use**
- **Our antigen tech** was applied to deliver mg-scale quantities of purified receptor **in native conformation** for immunization and screening
- **OmniChicken immunization then led to discovery of a large and diverse panel of fully-human antibodies** capable of binding target on live tissues

## Partner B

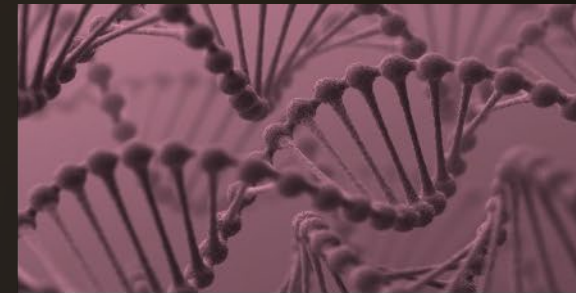

### Big Pharma

- Growth factor target, **highly conserved among mammals**
- Human version of target non-immunogenic in other rodents; **no titer achieved despite numerous immunization attempts at partner**
- Genetic knockout of target gene attempted in mice **but was lethal**
- **OmniChicken** immunization led to robust titers and diverse fully-human antibody panels
- **>90% of sequences recovered had excellent developability profiles** based on multi-parameter *in-silico* analysis

## Partner C

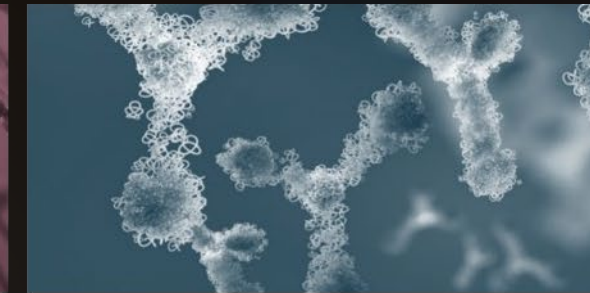

### Established Biotech

- Partner has history of success in *first-in-class* and *best-in-class* antibodies, **with large discovery group and expanding novel biology**
- Need flexible fully-human antibody discovery toolbox to **start dozens of new programs every year**
- Deep collaboration including parallel pilot testing of **next-gen rodents on active novel programs**
- Clinical candidates identified with Phase 1 and 2 data readouts in next 18 months, and **multiple candidates to enter clinical development in the coming years**

## Partner D

### Global Pharma

- Asia-based **global pharma player**
- **Establishing new and substantial presence in antibody space** with large investment and expansion of global antibody team
- **Selected OmniAb as core technology** to feed robust discovery and development efforts
- Developed three-way collaboration with **deep repertoire analysis to rapidly identify best binders** for bispecific antibodies

# FINANCIAL REVIEW

MINING ONE OF THE LARGEST GREENFIELDS IN A GROWING INDUSTRY

# OMNIAB KEY PERFORMANCE INDICATORS

## ADVANCED PIPELINE DRIVING DIVERSIFIED REVENUE

### Key information

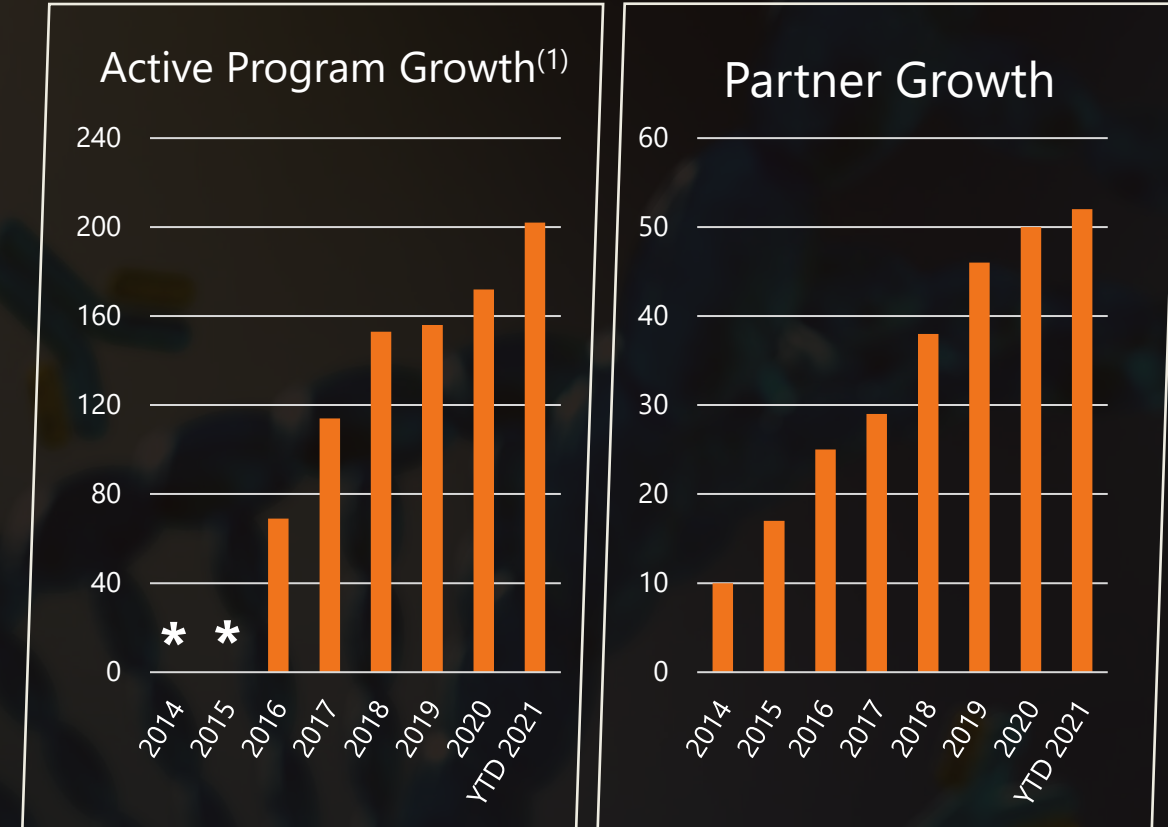

- *Significant active program growth since acquisition*
- *Expanded to over 50 partners with access to our technology*
- *Royalty revenue expected to grow significantly over next decade starting in late 2021 with average royalty rate across all partners of 3-4%*
- *Iterative improvements of antibody discovery engine should continue driving **royalty rates** and **market share** higher*

Royalties represent **majority** of partnership value

# OMNIAB KEY PERFORMANCE INDICATORS

## HIGHLY SCALABLE BUSINESS MODEL

- Strong consistent growth in key performance indicators
  - Active Programs<sup>(1)</sup>: >35% annual growth
  - Active Partners: >25% annual growth
- Highly scalable, with significant number of programs performed entirely by partners

\*Active programs not tracked prior to acquisition

(1) This represents currently active programs where partner has selected lead. We believe this represents antibodies that have advanced far enough where homogenous development risk can be applied. Cumulative number of antibody campaign starts is over 500.

A detailed 3D molecular model of an antibody, showing its characteristic Y-shaped structure. The model is composed of numerous small, interconnected spheres in shades of red, orange, and grey, set against a dark blue background with a subtle, larger-scale molecular pattern.

# PELICAN EXPRESSION TECHNOLOGY

## Overview

# PELICAN SOLVING OUR INDUSTRY'S PROTEIN PRODUCTION CHALLENGES

Ligand's Pelican Expression Technology™ Platform uniquely enables **complex protein drug production** with quality and efficiency

- Global therapeutic protein market estimated at **\$100B+** and growing
- Clinical and commercial success achieved with protein therapeutics is **increasing demand for technologies** that deliver competitively positioned products with desired physical properties
- Protein therapeutics are often of a physical size that is orders of magnitude larger than small-molecule drugs and exhibit **complex secondary, tertiary and quaternary structures that must be maintained in production** – critical to enable *state-of-the-art* drugs relevant to the industry today and in the future

**PELICAN**  
*P. fluorescens* expression technology

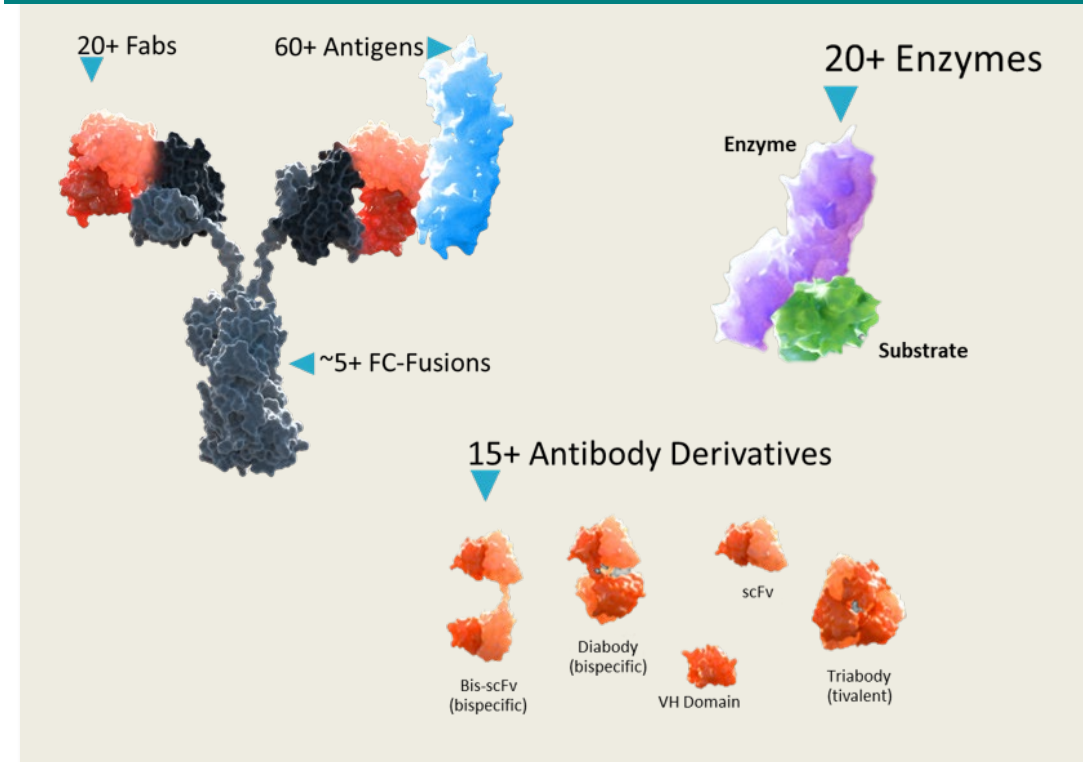

# PELICAN A UNIQUE VALUE-DRIVING PLATFORM

**PELICAN**<sup>™</sup>  
*P. fluorescens* expression technology

- Pelican delivers **significant competitive advantages to our partners**, including:
  - ✓ Speed to identifying production strain
  - ✓ Success rates in a variety of formats resulting in minimization of time/cost of development
  - ✓ Efficiency and decreased long-term cost-of-goods
- Significant institutional knowledge of protein production developed over **three decades**
- A commercially validated platform with **four recent approvals**, including latest in 2021 via partnerships with Jazz and Merck

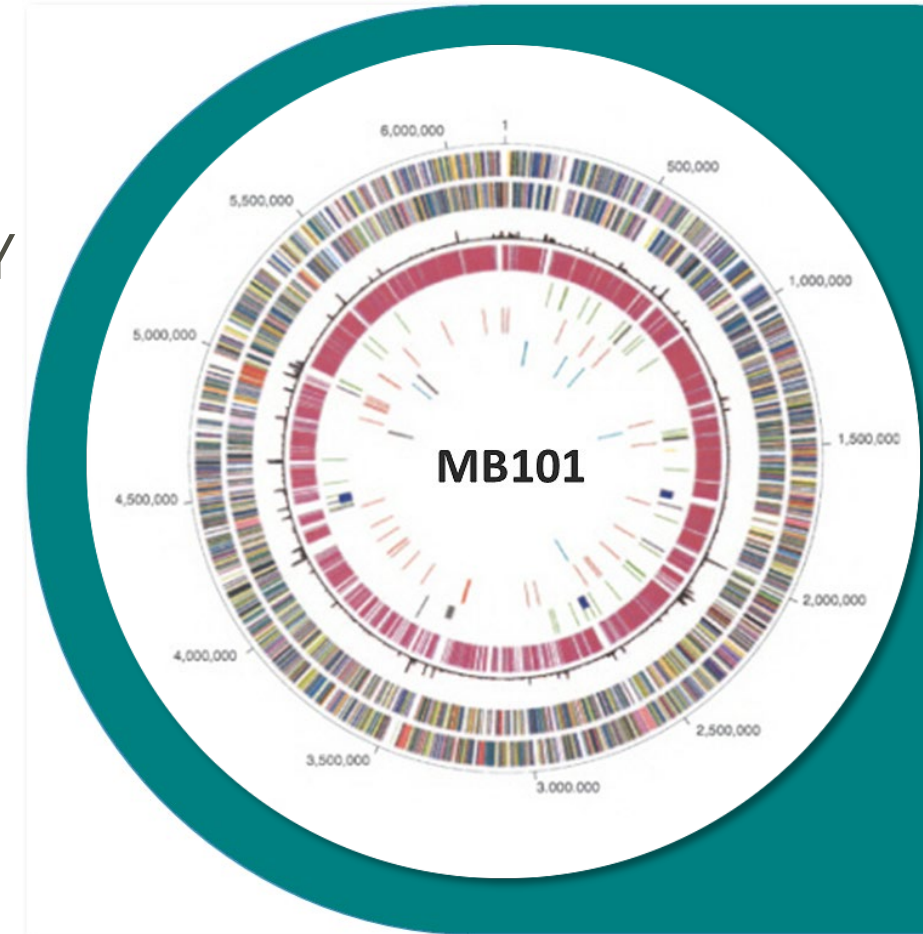

The Pelican Expression Platform<sup>™</sup> has maintained a **success rate of over 80%** in expressing a variety of “lead” protein candidates

# PELICAN THE INDUSTRY'S DEEPEST PROKARYOTIC PROTEIN PRODUCTION PLATFORM

The Pelican Platform leverages *P. fluorescens* - A GRAM-NEGATIVE, NON-PATHOGENIC, METABOLICALLY VERSATILE ORGANISM:

- Genomic, RNAseq, and proteomics data leveraged to engineer host strains and design expression plasmids
- Animal origin-free and used with antibiotic-free processes
- High-throughput growth and test methods
- Rapid fermentation and purification development and scale-up **expedite partners' program timelines**

# RYLAZE™ PELICAN PARTNERSHIP

## RECENT APPROVAL

**RELY ON RYLAZE—THE ONLY RECOMBINANT ERWINIA ASPARAGINASE  
APPROVED FOR THE TREATMENT OF ALL/LBL<sup>1</sup>**

- Jazz' Rylaze™ is a Recombinant Erwinia asparaginase for ALL/LBL, enabled by the Pelican Expression Technology™
  - High quality, reliable supply for a major unmet need
  - >\$200 M market potential in US alone
- Approved in US on June 30, launched July 15, 2021
  - 1+ year supply available at launch
- Jazz launch focused on pediatric oncologists; majority of ALL incidence in children
  - Education and awareness campaigns on-going
- National Comprehensive Cancer Network® added Rylaze™ to ALL Clinical Practice Guidelines
- EU filing anticipated in 2022; Japan submission to follow

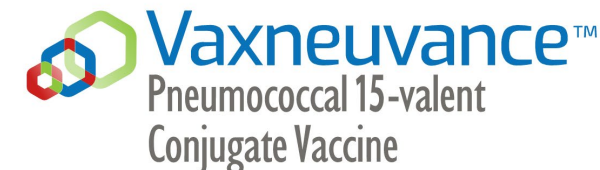

# CRM197 PELICAN PARTNERSHIP

## VAXNEUVANCE™ PNEUMOCOCCAL VACCINE RECENT APPROVAL

- Merck's Vaxneuvance™ approved in the US on July 16, 2021, for the prevention of pneumococcal disease in adults
  - 15-valent pneumococcal vaccine utilizing Ligand's CRM197 vaccine carrier protein produced using the Pelican Expression Technology platform
- Vaxneuvance will compete directly with Pfizer's Prevnar13® (2020 worldwide sales of \$5.9 B) and the recently-approved Prevnar20™
- Vaxneuvance sBLA for pediatric population anticipated by year-end, 1-2 years ahead of estimated Prevnar20 pediatric submission
  - If approved, market opportunity estimated to more than double
- Merck's follow-on pneumococcal vaccine candidate V116, currently in Phase 2, also uses CRM197 produced using the Pelican Expression Technology™
