Livestock and Poultry Statistics of the Philippines is a publication of the Philippine Statistics Authority (PSA). The PSA reserves exclusive right to reproduce this publication in whatever form. Should any portion of this publication be included in a report/article, the title of the publication and the PSA should be cited as the source of data. The PSA will not be responsible for any error committed by user/s from copying or further processing of data contained in this publication.

## FOREWORD

This publication is the fifth edition of the statistical report entitled **Livestock and Poultry Statistics of the Philippines**. It presents the 2017 to 2021 data on the volume of production, inventory of livestock and poultry commodities and their corresponding average farmgate prices. These commodities include carabao, cattle, goat, swine, chicken, and duck. The report also includes data on the number of animals slaughtered in slaughterhouses and/or dressed in poultry dressing plants. Chicken egg, duck egg, and dairy production are likewise discussed in this report. The data are disaggregated down to the provincial level. The nine (9) commodities are those highlighted in the Value of Production in Philippine Agriculture and Fisheries (formerly Report on the Performance of Agriculture) which is released quarterly by the Philippine Statistics Authority (PSA).

This report serves as a ready reference for the various clients and stakeholders of the PSA in the agriculture sector. It is released annually every October through the PSA Website.

The PSA would appreciate comments and suggestions from our data users and readers for further improvement of this report.

## I. HIGHLIGHTS ON THE LIVESTOCK AND POULTRY INDUSTRY

### PRODUCTION

The **carabao** production was decreasing annually from 2017 to 2020. Production rebounded in 2021 to 129.34 thousand metric tons, liveweight from 120.41 thousand metric tons, liveweight in 2020 or an annual growth rate of 7.4 percent. In 2021, carabao production was highest in Western Visayas among regions and Negros Occidental among provinces. (Figure 1, and Tables 1 and 7)

From 2017 to 2021, the volume of **cattle** production dropped at an average annual rate of -2.8 percent in which the highest annual decline of -12.1 percent was recorded in 2020. The total volume of cattle production in 2021 was estimated at 236.11 thousand metric tons, liveweight. This was higher by 3.0 percent than the previous year's record of 229.13 thousand metric tons, liveweight. Cattle production in 2021 remained highest in Northern Mindanao among regions and Bukidnon among provinces. (Figure 2, and Tables 1 and 13)

In 2021, **goat** production was estimated at 73.04 thousand metric tons, liveweight. This was higher by 1.8 percent than the previous year's output of 71.72 thousand metric tons, liveweight. Central Visayas ranked first among regions and Cebu among provinces in terms of goat production in 2021. (Figure 3, and Tables 1 and 19)

Downtrend in **hog** production was noted from 2019 to 2021 with an average annual rate of -9.5 percent. In 2021, hog production was estimated at 1.70 million metric tons, liveweight, which was lower by -20.8 percent than the previous year's output of 2.14 million metric tons, liveweight. Northern Mindanao was the top hog producing region and Bukidnon province remained the top hog producing province in 2021. (Figure 4, and Tables 1 and 25)

Annual volume of **dairy** production from 2017 to 2021 went up at an average annual rate of 3.8 percent, registering the highest annual rate of 9.6 percent in 2020. Dairy production in 2021 was estimated at 26.30 thousand metric tons. This was lower by -1.5 percent than the previous year's record of 26.71 thousand metric tons. (Figure 5 and Table 1)

In 2021, the country's total **chicken** production declined at a slower rate of -3.6 percent as compared with -6.1 percent drop in 2020. Central Luzon and Bulacan both registered highest in terms of chicken production in 2021 among regions and provinces, respectively. (Figure 6, and Tables 1 and 31)

The total volume of **duck** production from 2017 to 2021 was decreasing annually at an average rate of -1.6 percent. In terms of level, the duck production in 2021 was estimated at 29.10 thousand metric tons, liveweight, lower by -1.5 percent than the 2020 production of 29.55 thousand metric tons, liveweight. Central Luzon was the highest duck producing region and Bulacan remained the top duck producing province in the country in 2021. (Figure 7, and Tables 1 and 38)

From 2017 to 2021, the volume of **chicken egg** production was consistently increasing annually with 2019 and 2021 both registering the highest annual growth rate of 9.2 percent. The total

volume of chicken egg production in 2021 was estimated at 661.39 thousand metric tons. This was higher by 9.2 percent than the previous year's record of 605.79 thousand metric tons. The chicken egg production in 2021 was highest in CALABARZON among regions and Batangas was considered the chicken egg basket of the Philippines. (Figure 8, and Tables 1 and 43)

In the last five years, **duck egg** production increased at an average rate of 2.7 percent annually. The production of duck egg in 2021 was estimated at 50.45 thousand metric tons or slightly lower by -0.1 percent than the 50.48 thousand metric tons duck egg production in 2020. In 2021, the top grossers among the regions and provinces were in Central Luzon and Bulacan, respectively. (Figure 9, and Tables 1 and 44)

## INVENTORY

From 2017 to 2021, **carabao** inventory decreased annually except in 2018. In 2021, the total carabao inventory reached 2,849.01 thousand heads. This was lower by -0.6 percent than the previous year's count of 2,865.72 thousand heads. Among the regions, Bicol Region had the highest carabao inventory in 2021. At the provincial ranking, the highest carabao inventory was registered in the province of Leyte in 2021. (Figure 10, and Tables 2 and 8)

**Cattle** inventory exhibited an upward trend from 2017 to 2021, except in 2019 where inventory slightly decreased by -0.7 percent. Cattle inventory in 2021 was estimated at 2,605.26 thousand heads or 2.5 percent higher than its previous year's level of 2,541.96 thousand heads. Cattle inventory was highest in Central Visayas among regions and in Cebu among provinces where most of cattle stocks were raised in 2021. (Figure 11, and Tables 2 and 14)

During the period of 2017 to 2021, **goat** inventory showed a slight increase in numbers over the years. In 2021, the total goat inventory reached 3,868.34 thousand heads. It increased by 1.4 percent compared with the previous year's count of 3,813.45 thousand heads. Goat inventory was highest in Central Visayas in 2021, while the highest goat inventory among provinces was recorded in the province of Cebu. (Figure 12, and Tables 2 and 20)

In 2021, the total **swine** inventory significantly dropped by -22.3 percent compared with the previous year's count of 12,795.72 thousand heads. Swine inventory for 2021 was highest in Western Visayas among regions. The province of Bukidnon ranked first among provinces with the highest swine population in 2021. (Figure 13, and Tables 2 and 26)

In 2021, the total **chicken** inventory reached 176,819.89 thousand birds. This was lower by -0.8 percent than the previous year's count of 178,264.95 thousand birds. Chicken population in 2021 was dominantly raised in Central Luzon. Meanwhile, highest stocks for chicken was noted in the province of Batangas. (Figure 15, and Tables 2.1 and 32)

Most of the native/improved chicken were raised in Western Visayas. On the other hand, broiler chicken inventory was highest in Central Luzon. For layer chicken, CALABARZON ranked first in terms of inventory among regions. (Figure 15, and Tables 2.1, 33, 34, and 35)

**Duck** inventory continue to exhibit a positive growth rate from 2017 to 2021 with an average annual growth rate of 3.7 percent. Duck inventory in 2021 was estimated at 12,511.67 thousand heads or 6.1 percent higher than its previous year's level of 11,794.40 thousand heads. In 2021, most of the duck inventory were raised in Central Luzon, particularly in the province of Bulacan. (Figure 14, and Tables 2 and 39)

## PRICES

Farmgate prices of **carabao** for slaughter from backyard farms increased at an average annual rate of 7.8 percent. In terms of price level, the 2021 average farmgate price of carabao for slaughter from backyard farms was quoted at PhP 124.51 per kilogram, liveweight, or an annual increase of 12.9 percent compared with the previous year's average farmgate price of PhP 110.28 per kilogram, liveweight in 2020. (Figure 27 and Table 5)

The average farmgate price of carabao for slaughter in commercial farms increased annually in years 2018, 2020 and 2021. The average farmgate price of carabao for slaughter in commercial farms in 2021 was PhP 150.18 per kilogram, liveweight. It increased by 19.0 percent from previous year's farmgate price level of PhP 126.15 per kilogram, liveweight. (Figure 30 and Table 6)

The average farmgate price of **cattle** for slaughter in backyard farms showed an increasing trend with an average annual rate of 7.7 percent. In 2021, the average farmgate price of cattle for slaughter was quoted at PhP 145.80 per kilogram, liveweight. This was higher by 13.3 percent than the previous year's average farmgate price level of PhP 128.71 per kilogram, liveweight. (Figure 27 and Table 5)

On the other hand, average farmgate price of cattle for slaughter in commercial farms increased at an average annual rate of 11.2 percent from 2017 to 2021. In terms of price level, the 2021 average farmgate price of cattle for slaughter was quoted at PhP 170.73 per kilogram, liveweight, or an increase of 25.1 percent compared with the previous year's same farmgate price level of PhP 136.52 per kilogram, liveweight. (Figure 30 and Table 6)

Farmgate prices of **goat** for slaughter from backyard farms increased at an average annual rate of 7.6 percent. In terms of price level, the 2021 average farmgate price of goat for slaughter from backyard farms was quoted at PhP 168.97 per kilogram, liveweight, or an annual increase of 12.7 percent compared with the previous year's average farmgate price level of PhP 149.94 per kilogram, liveweight in 2020. (Figure 27 and Table 5)

Moreover, the average farmgate price of goat for slaughter in commercial farms also increase annually. The average farmgate price of goat for slaughter in commercial farms in 2021 at PhP 195.92 per kilogram, liveweight increased by 20.0 percent from previous year's farmgate price level of PhP 163.33 per kilogram, liveweight. (Figure 30 and Table 6)

Meanwhile, the average farmgate price of **hog** for slaughter in backyard farms showed an increasing trend, except in 2019, with an average annual rate of 11.0 percent. In 2021, the average farmgate price of hog for slaughter was quoted at PhP 155.80 per kilogram, liveweight.

This was 39.1 percent higher than the previous year's average farmgate price level of PhP 111.98 per kilogram, liveweight. (Figure 27 and Table 5)

On the other hand, average farmgate price of hog for slaughter in commercial farms increased at an average annual rate of 11.4 percent. In terms of price level, the 2021 average farmgate price of hog for slaughter was quoted at PhP 166.82 per kilogram, liveweight, or a significant increase of 40.8 percent compared with the previous year's average farmgate price level of PhP 118.46 per kilogram, liveweight. (Figure 30 and Table 6)

From 2017 to 2021, the average farmgate price of **broiler chicken** in backyard farms increased annually. In terms of price level, the 2021 average farmgate price of broiler chicken in backyard farms was quoted at PhP 118.52 per kilogram, liveweight, or an annual increase of 8.0 percent compared with the previous year's average farmgate price level of PhP 109.71 per kilogram, liveweight. (Figure 28 and Table 5)

Meanwhile, farmgate price of broiler chicken in commercial farms increased annually during the period covered except in 2019. The average farmgate price of broiler chicken in commercial farms in 2021 was quoted at PhP 101.42 per kilogram, liveweight. It posted an increase of 10.7 percent from previous year's average farmgate price level of PhP 91.62 per kilogram, liveweight. (Figure 31 and Table 6)

The average annual farmgate price of chicken native/improved from 2017 to 2021 continued to increase. In 2021, the average farmgate price of chicken native/improved was quoted at PhP 170.57 per kilogram, liveweight. This was 8.4 percent higher than the previous year's average farmgate price level of PhP 157.41 per kilogram, liveweight. (Figure 28 and Table 5)

From 2017 to 2021, farmgate price of **duck for meat** in backyard farms expanded at an average annual rate of 11.0 percent. In terms of price level, the 2021 average farmgate price of duck for meat in backyard farms was quoted at PhP 185.98 per kilogram, liveweight, or an annual increase of 11.6 percent compared with the previous year's average farmgate price level of PhP 166.65 per kilogram, liveweight in 2020. (Figure 28 and Table 5)

Meanwhile, the farmgate price of duck for meat in commercial farms increased annually from 2019 to 2020, except in 2018 and 2021. The average farmgate price of duck for meat in commercial farms in 2021 quoted at PhP 80.20 per kilogram, liveweight, posted a slight decrease of -0.2 percent from previous year's farmgate price level of PhP 80.38 per kilogram, liveweight. (Figure 31 and Table 6)

During the five-year reference period, average annual farmgate price of **chicken egg** in backyard farms showed varying trend. In 2021, the average farmgate price of chicken egg in backyard farms was quoted at PhP 6.78 per piece. This was lower by -2.3 percent than the previous year's average farmgate price of PhP 6.94 per piece. (Figure 29 and Table 5)

Farmgate price of chicken egg in commercial farms increased annually from 2019 to 2020. In terms of price level, the 2021 average farmgate price of chicken egg in commercial farms was quoted at PhP 5.46 per piece or a decrease of -2.8 percent compared with the previous year's farmgate price level of PhP 5.62 per piece. (Figure 32 and Table 6)

From 2017 to 2021, **duck egg** farmgate price at the backyard level rose at 2.8 percent average annual rate. In terms of price level, the 2021 average farmgate price of duck egg in backyard farms was quoted at PhP 7.24 per piece, or an annual increase of 3.4 percent compared with the previous year's average farmgate price of PhP 7.00 per piece. (Figure 29 and Table 5)

In 2017 to 2021, duck egg farmgate price at the commercial level increased annually, with the highest rate of increase in 2020 at 4.5 percent. The average farmgate price of duck egg in commercial farms in 2021 was quoted at PhP 7.15 per piece, or a 1.6 percent increase from previous year's average farmgate price level of PhP 7.04 per piece. (Figure 32 and Table 6)

# **STATISTICAL TABLES and FIGURES**

Table 1. Volume of Production of Livestock and Poultry by Animal Type  
Philippines: 2017-2021  
(in metric tons)

Animal Type	2017	2018	2019	2020	2021
Carabao*	144,409	143,143	140,661	120,410	129,345
Cattle*	266,301	263,310	260,624	229,127	236,106

# TECHNICAL NOTES

## TECHNICAL NOTES

### I. Introduction

The Livestock and Poultry Statistics of the Philippines publication presents data series on volume of production, inventory, number of animals slaughtered in slaughterhouses and dressed in poultry dressing plants, and average farmgate prices. It serves as a ready reference for the various clients and stakeholders of the Philippine Statistics Authority (PSA) in the agriculture sector.

The data for this report were collected by PSA through the two surveys, namely, Backyard Livestock and Poultry Survey (BLPS) and the Commercial Livestock and Poultry Survey (CLPS).

The BLPS aims to generate estimates on the supply and disposition of livestock and poultry commodities at the household level. In 2021, the number of sample households covered was 22,144 in 1,145 sample barangays nationwide. On the other hand, the CLPS seeks to generate estimates on the supply and disposition of livestock and poultry commodities from commercial farms/establishments. There were 141 samples for **carabao**; 719 samples for **cattle**; 444 samples for **goat**; 1,379 samples for **swine**; 733 sample layer farms and 866 broiler commercial farms for **chicken**; and 449 samples for **duck** covered in 2021.

Both surveys are conducted every quarter in all provinces. Moreover, the commodities covered in the surveys include: cattle; carabao; swine; and goat for livestock, while chicken; chicken eggs; duck; and duck eggs for poultry.

The data on the number of carabao, cattle, goat, hog, goat slaughtered in slaughterhouses and chicken dressed in dressing plants were sourced from the Compilation of Data from Slaughterhouses and Poultry Dressing Plants (CDSPDP), an administrative-based activity of the PSA. This activity covers 1,278 licensed to operate meat establishments (LTOMEs) and Locally Registered Meat Establishments (LRMEs) nationwide. This is undertaken in coordination with the National Meat Inspection Service (NMIS) and the Local Government Units (LGUs).

### II. Data Collection

#### A. Backyard Livestock and Poultry Survey

##### 1. Data collection procedure

The schedule of field data collection is every first seven (7) days of the month after the reference quarter. However, the data collection for 4th quarter is done one (1) month earlier to comply with the Philippine System of National Accounts (PSNA) calendar. The data collection is undertaken by hired Statistical Researchers (SRs) and is done through face-to-face interview with qualified respondents of the sample households. Prior to data collection, training of selected staff from Central Office, and Field Offices, including SRs, is conducted to ensure uniform understanding of concepts and proper implementation of survey procedures. Field and manual editing of the accomplished questionnaires is done to ensure completeness, consistency and reasonableness of the information gathered.

## 2. Survey Questionnaire

The BLPS Questionnaire is a thirteen-page form composed of 16 blocks that aims to gather information on the basic characteristics and operations of the household.

The data items included in the survey are as follows:

- a. Type of Operation/Purpose
- b. Inventory
- c. Number of breeders that gave birth
- d. Number of born live
- e. Number of acquired animals
- f. Slaughtered in the household
- g. Sold live for slaughter and for other purposes
- h. Disposition by areas of destination
- i. Average liveweight
- j. Average farmgate price
- k. Number of deaths/losses and cause/reason
- l. Milk production indicators for carabao, cattle and goat

## B. Commercial Livestock and Poultry Survey

### 1. Data collection procedure

The schedule of field data collection is during the last ten (10) days of the quarter. However, the data collection for the fourth quarter is done one (1) month earlier to comply with the Philippine System of National Accounts (PSNA) calendar. The data collection is undertaken by hired Statistical Researchers (SRs) and is done through a face-to-face interview with qualified respondents of the farm/establishment. Prior to data collection, training of Central Office and Field Office personnel, including SRs, is conducted to ensure that the procedures and concepts of the survey are understood and properly implemented. Field and manual editing of the accomplished questionnaires is done to ensure completeness, consistency and reasonableness of the information gathered.

### 2. Survey Questionnaire

The CLPS Survey Questionnaire is a two-page questionnaire that aims to gather necessary information on supply and disposition of carabao, cattle, goat, swine, broiler, and layer commercial farms/establishment.

The data items included in the survey are as follows:

- a. Type of Operation/Purpose
- b. Inventory
- c. Number of breeders that gave birth
- d. Number of born live/hatched live
- e. Number of acquired animals
- f. Slaughtered in the farm/establishment
- g. Sold live for slaughter and for other purposes
- h. Disposition by areas of destination
- i. Average liveweight
- j. Average farmgate price
- k. Number of deaths/losses and cause/reason

- l. Egg production indicators
- m. Milk production indicator for carabao, cattle and goat

### **C. Compilation of Data from Slaughterhouses and Poultry Dressing Plants**

#### **1. Data collection procedure**

The schedule of field data collection is during first ten (10) days of the month and is undertaken by regular Provincial Statistics Office (PSO) personnel. The data is obtained from the administrative records of National Meat Inspection Service (NMIS) and Locally Registered Meat Establishment (LRME) supervised by the Local Government Unit (LGUs).

#### **2. Collection Forms**

The collection forms used in CDSPDP consists of two (2) forms, namely CDSPDP Form 1a (Livestock) and CDSPDP Form 1b (Poultry). These forms aim to gather information on the number of livestock and poultry commodities slaughtered/dressed in slaughterhouses/poultry dressing plants.

The data items included in the forms are as follows:

- a. Number of Heads/Birds
- b. Total Carcass/Dressed weight

## **III. Sampling Design**

### **A. Backyard Livestock and Poultry Survey**

#### **1. Sampling Frame**

The BLPS sampling frame is based on the results of the 2017 Listing of Farm Household (LFH) and 2012 Census of Agriculture and Fisheries (CAF). For barangays not covered in the 2017 LFH, the list of households was taken from the 2012 CAF. The sampling frame is updated quarterly based on the status of the sampled households using structured form - Frame Maintenance form (FMF) submitted by the PSOs every quarter.

#### **2. Sample Selection Procedure**

The BLPS uses two-stage sampling design. The first stage is the selection of barangays using probability proportional to size where the measure of size is the total animal inventory. The number of sample barangays is based on a target coefficient of variation of five (5) percent. The sample barangays are the same for all quarters of 2022.

The second stage is the selection of sample households that are engaged in livestock and poultry raising in the sampled barangays using systematic sampling.

The number of sample households per selected barangay is 20 but this could be less if the selected barangay has less than 20 households. The sample households per quarter are independent.

### 3. Estimation Procedure

#### a. Sampling Weights

##### a.1 Base Weight

The base weight is computed as follows:

$$w_{1i} = \begin{cases} \frac{\sum_{k=1}^A X_i - X_{\text{certain}}}{a'X_i} & , \text{if non - certainty brgy} \\ 1 & , \text{if certainty brgy} \end{cases}$$

$$w_{2ij} = \begin{cases} \frac{N_i}{n_i} & , \text{if household has at most 3 operators} \\ \frac{N_i}{n_i} \times \frac{M_{ij}}{m_{ij}} & , \text{if household has greater than 3 operators} \end{cases}$$

$$w_{ij} = w_{1i} \times w_{2ij}$$

Where:

$w_{ij}$  = base weight of household j in barangay i

$w_{1i}$  = 1<sup>st</sup> stage weight

$w_{2ij}$  = 2<sup>nd</sup> stage weight

$A$  = total number of barangays in the domain

$a$  = barangay sample size in the domain

$a'$  = non-certainty barangay sample size in the domain; equal to  $a$  if there are no certainty barangays

$X_{\text{certain}}$  = total animal inventory of all certainty barangays

$X_i$  = size measure of barangay i

$N_i$  = total number of households in barangay i

$n_i$  = number of sample households in barangay i

$M_{ij}$  = total number of operators in household j in barangay i

$m_{ij}$  = number of sample operators in household j in barangay i

$i$  = subscript for barangay

$j$  = subscript for household

##### a.2 Adjustment Factor

The adjustment factor formula is given as follows:

$$A_p = \frac{\sum_{i=1}^a \sum_{j=1}^{n_i} w_{ij} X_{1ij}}{\sum_{i=1}^a \sum_{j=1}^{n_i} w_{ij} X_{2ij}}$$

Where:

$A_p$  = adjustment factor for domain p

$X_{1ij}$  = eligible status of household j in barangay i (1 if eligible, 0 otherwise)

$X_{2ij}$  = responding status of household j in barangay i (1 if eligible, 0 otherwise)

The status applicable for eligible households are:

- Interview completed;
- Refused to be interviewed without replacement;
- Temporarily away/Not at home without replacement; and
- Household temporarily not accessible without replacement.

The status applicable for not eligible households are:

- Resides outside the barangay;
- Unknown in the locality;
- Deceased (No other member in the household).

### a.3 Final Weights

The final weights formula is given as follows:

$$w'_{ij} = w_{ij} \times A_p$$

Where:

$w'_{ij}$  = final weights for domain p

$w_{ij}$  = base weight of household j in barangay i

$A_p$  = adjustment factor for domain p

### b. Estimation of Total

#### b.1 Estimation of Provincial Total

Estimation of domain total is done per animal type and the formula is given as follows:

$$\hat{Y}_{qp} = \sum_{i=1}^a \sum_{j=1}^{n_i} w'_{ij} y_{ij}$$

Where:

$\hat{Y}_{qp}$  = estimated total for domain p at quarter q

$y_{ij}$  = survey data (inventory, production, etc.) for household j in barangay i

#### b.2 Estimation of Regional and National Total

The regional estimates are obtained by aggregating the estimates of the provinces within the region, while the national estimate is derived by adding all the regional estimates.

## B. Commercial Livestock and Poultry Survey

### 1. Sampling Frame

The CLPS frame is based on the results of the 2010 Livestock Population Survey (LPS). It is updated quarterly based on the results of visit of the sample farms/establishments using the Frame Maintenance Form (FMF).

### 2. Sample Selection Procedure

The CLPS uses a stratified sampling design with the maximum farm/housing capacity as stratification variable. Stratum boundaries are obtained using Dalenius-Hodges method. Sample size is determined using Neyman procedure with a target coefficient of variation of five percent (5%). A minimum of five (5) samples are taken when the population for the stratum is greater than

or equal to five (5). For stratum with population less than five (5), all farms will be enumerated. The number of strata per province ranges from two (2) to four (4) depending on the homogeneity of the stratification variable.

Complete Enumeration (CE) is applied for provinces with less than 25 commercial farms/establishments, otherwise, stratified sampling design is used.

### 3. Estimation Procedure

#### a. For Certainty Stratum (Complete Enumeration)

The total estimate for the province is obtained by aggregating the responses of commercial farms/establishments in the province using the following formula:

$$\hat{Y} = \sum_{i=1}^N y_i$$

where:

$\hat{Y}$  = estimated total for the province

$N$  = total number of farms in province p'

$y_i$  = survey data (inventory, production, etc.) for establishment i

#### b. For Non-certainty Stratum (Sampling)

##### b.1 Sampling weights

##### a. Base Weights

The base weights for CLPS is computed by animal type and province. The formula for base weights is given as follows:

$$w_h = w_{hi} = \left( \frac{N_h}{n_h} \right)$$

$w_{hi}$  = weight of commercial farm/establishment i in stratum h

$N_h$  = total number of establishments in stratum h

$n_h$  = number of sample establishments in stratum h

##### b. Adjustment Factor

The adjustment factor is given as follows:

$$A_h = \frac{\sum_{i=1}^{n_h} w_{hi} X_{1hi}}{\sum_{i=1}^{n_h} w_{hi} X_{2hi}}$$

$A_h$  = adjustment factor at stratum h

$w_{hi}$  = base weight of establishment i at stratum h

$n_h$  = number of sample establishments in stratum h

$X_{1hi}$  = eligible status of sample establishment i at stratum h  
(1 if eligible, 0 otherwise)

$X_{2hi}$  = responding status of sample establishment i at stratum h  
(1 if responding, 0 otherwise)

$$X_{1hi} \text{ (Eligible)} = \begin{cases} 1, & \text{if result of final visit is 1a, 1b, 2a, 3a, and 3b} \\ 0, & \text{otherwise} \end{cases}$$

$$X_{2hi} \text{ (Responding)} = \begin{cases} 1, & \text{if result of final visit is 1a} \\ 0, & \text{otherwise} \end{cases}$$

#### Result of Final Visit

Code 1a (Interview Completed - Operational)

Code 1b (Interview Completed – Temporarily closed)

Code 2a (Not interviewed – Temporarily closed)

Code 3a (Non-response – Refused to give data)

Code 3b (Non-response – Cannot be contacted/Not accessible/  
Temporarily away)

#### c. Final Weights

The final weight formula is given as follows:

$$w'_{hi} = w_{hi} \times A_h$$

$w'_{hi}$  = final weight of establishment i at stratum h

$w_{hi}$  = base weight of establishment i at stratum h

$A_h$  = Adjustment factor

#### b.2 Estimation by Stratum

Each stratum yields an independent estimate. The formula to be used is given as follows:

$$\hat{Y}_h = \sum_{i=1}^{n_h} w'_{hi} y_{hi}$$

$\hat{Y}_h$  = estimated total for stratum h of the province

$w'_{hi}$  = final weight of establishments i at stratum h

$n_h$  = no. of sample establishments in stratum h

$y_{hi}$  = survey data (inventory, production, etc.) for establishment i in  
stratum h

#### c. Estimation of Total

##### c.1 Estimation of Provincial Total

The total estimate for the province is obtained by simply aggregating all the expanded stratum estimates in the province. Hence, the statement of the total for the p<sup>th</sup> province is given by:

$$\hat{Y} = \sum_{h=1}^L \hat{Y}_h$$

where:

$\hat{Y}$  = estimated total for the province

$\hat{Y}_h$  = estimated total for stratum h of the province

$L$  = total number of strata

### c.2 Estimation of Regional and National Total

The regional estimates are obtained by aggregating the estimates of the provinces within the region, while the national estimate is derived by adding all the regional estimates.

## IV. Concepts and Definitions of Terms

**Commercial farm** – a farm or establishment that raises livestock animals. Moreover, it must satisfy at least one of the following criteria:

1. Tending at least 21 heads of adult and zero head of young;
2. Tending at least 41 heads of young animals;
3. Tending at least 10 heads of adult and 22 heads of young;
4. Tending 500 layers or 1,000 broilers;
5. Tending 100 layers and 100 broilers if raised in combination; or
6. Tending at least 100 ducks regardless of age

All livestock and poultry raisers that did not satisfy the above criteria were considered as **Backyard Farm**.

**Farmgate price** refers to the price received by raisers for their produce at the location of farm. Thus, marketing costs such as transport and other marketing costs (if any) incurred in selling the produce is not included in the farmgate prices.

**Inventory** refers to the actual number of carabao, cattle, goat, swine, chicken and duck in heads/birds, present in the farm as of a specific reference date.

**Licensed to Operate Meat Establishment (LTOME)** refers to premises/facilities where food animals are slaughtered for human consumption. These were then referred as accredited slaughterhouses and poultry dressing plants.

**Locally Registered Meat Establishment (LRME)** refers to slaughterhouses, meat processing plants, Poultry Dressing Plants, meat cutting plants, and cold storages that are allowed to operate by the city/municipal government but are not accredited by the NMIS.

**Poultry Dressing Plant (PDP)** refers to premises that are approved and registered by the controlling authority in which poultry are dressed for human consumption.

**Slaughterhouses (SH)** are premises that are approved and registered by the NMIS and LGUs in which food animals are slaughtered for human consumption.

**Slaughtered in slaughterhouses** refers to animals slaughtered in accredited (AAA, AA, A) slaughterhouses including number of animals slaughtered in LRMEs.

**Volume of production** refers to the number of tended/raised animals disposed for slaughter including animals shipped-out for slaughter (in “head/bird” and in “liveweight equivalent”).

## V. Dissemination of Results and Revision

The PSA disseminates the Livestock and Poultry Statistics of the Philippines annually with a 5-year series. This report is uploaded in the PSA Website.

The data on volume of production and inventory is released 45 days after the reference quarter.

The livestock and poultry statistics follows the revision policy as stipulated in the PSA Board Resolution No. 1, Series of 2017-119 approving the revision of quarterly estimates on agricultural production, prices and related statistics to be limited to the immediately preceding quarter and for the past three years with quarterly breakdown to be done only during May of the current year.

This presents how the Technical Notes will be cited by users in their research works. It contains the following information:

1. Philippine Statistics Authority
2. Date of Publication/Release of the Technical Note
3. Title of the Technical Notes
4. Link to the Technical Notes

## VI. Contact Information

Marisol T. Fallarme  
 Chief Statistical Specialist  
 Livestock and Poultry Statistics Division  
 Economic Sector Statistics Service  
 Sectoral Statistics Office  
 Philippine Statistics Authority  
 Email Address: m.fallarme@psa.gov.ph

For data request, you may contact the:  
**Knowledge Management and Communications Division**  
 Telephone: (632) 8462-6600 loc. 839  
 Email Address: info@psa.gov.ph
