Adacel opens new office in Tallinn, Estonia

Tallinn, Estonia, 23 November 2022–Adacel Technologies Limited (**Adacel**), an industry leader in advanced air traffic management solutions and simulation and training systems, is proud to announce the opening of its new office in Tallinn, Estonia.

The new business expansion is the result of the virtual ATC tower acquisition, which was completed in May 2022 and launched as REVAL at the 2022 World ATM Congress in June.

The new Tallinn office will focus exclusively on developing and growing Adacel's virtual ATC business, while working in close collaboration with Estonian Air Navigation Services to deliver its vision to fully digitize Estonia's regional airports by 2025.

"We are excited to reach this growth milestone in our company's history. Besides solidifying our presence in Europe, we are happy to offer our customers REVAL's advanced technology. This modern system will bring new operational efficiencies with major benefits, especially for small regional airports in Estonia and around the world," shares Michael Saunders, Adacel's V.P., Business Development and Strategy.

Built on modular, open architecture principles, REVAL is suitable for a variety of functional needs, including integration with existing or new air traffic management, communication, navigation, and surveillance systems.

"Adacel's mission is to leverage our industry expertise with the infinite potential of technology to advance safety and efficiency in aviation. With the opening of our new office in Tallinn, Estonia, we are committed to carry out our vision with the new team and the new REVAL ATC virtual tower system," adds Daniel Verret, Adacel's CEO.

About Adacel:

Established in 1987, Adacel is a publicly traded company listed on the ASX. The company plays a significant role in global air space safety. A world-leader in its industry, Adacel applies cutting-edge technologies to develop advanced air traffic control simulation and training systems and state-of-the-art air traffic management solutions. Adacel's customers include international air navigation service providers (ANSPs), military, defense & security organizations, universities, and airport authorities. More than 21% of the world's airspace is managed with Adacel's Aurora ATM software. MaxSim Tower Simulator and Training systems lead the industry with the highest number of installations worldwide. Adacel's latest flagship system, REVAL, a digital Air Traffic Control (ATC) tower system delivers a wide spectrum of digital tower operational solutions, from consulting services to system design, development, deployment, and support.
