About HSC Technology Group

HSC provides a range of Connected Health and Smart Home solutions.

The HSC assistive technology platforms allow seniors and people with disabilities to live independently via “Ageing in Place” solutions, through the use of data analysis, as well as human monitoring, to determine residents’ routines and detect anomalies. These early insights allow for better decision-making by care providers and families, allowing more focused service, minimising unnecessary care and facilitating welfare checks in a more responsive manner.

HSC helps protect and connect our elderly and people with disabilities with a scalable healthcare technology platform integrated with leading third party providers to ensure end-to-end solutions for Connected health.

HSC Technology Group’s Software as a Service (SaaS) data analytics platform TALIOUS uses next generation Machine Learning and Artificial Intelligence to deliver decision-making insights that improves people’s safety, independence, autonomy and most importantly improves their lives.
