#### REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of CDTi Advanced Materials, Inc.

## **Opinion on the Financial Statements**

We have audited the accompanying consolidated balance sheet of CDTi Advanced Materials, Inc. (the Company) as of December 31, 2019, and the related consolidated statements of comprehensive loss, stockholders' equity, and cash flows for the year ended December 31, 2019, and the related notes (collectively referred to as the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Company as of December 31, 2019, and the results of its operations and its cash flows for the year ended December 31, 2019, in conformity with accounting principles generally accepted in the United States of America.

#### **Basis for Opinion**

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's consolidated financial statements based on our audit. We are required to be independent with respect to the Company in accordance with the relevant ethical requirements relating to our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States) and in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audit, we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audit included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audit provides a reasonable basis for our opinion.

Rose, Snyder & Jacobs LLP

#### **Notes to Consolidated Financial Statements**

#### 1. Description of Business

CDTi Advanced Materials, Inc. ("CDTi" or the "Company") is a leading provider of advanced technology for process and emission catalyst markets. The Company possesses market leading expertise in catalyst design and engineering for automotive, off-road and process catalyst applications.

The Company has a proven ability to develop proprietary technology and materials incorporating various base metals that can enhance catalytic performance and reduce the use of costly platinum group metals ("PGMs") in catalyst coatings. The Company delivers its technology to customers through catalyst coatings as well as catalytic material supply and licensing arrangements. Customers include automotive and off-road catalyst manufacturers and distributors, automotive OEMs and mining and oil and gas equipment and servicing companies.

The Company's business is driven by increasingly stringent global emission standards for internal combustion engines, which are major sources of a variety of harmful pollutants. It has operations in the United States ("U.S."), the United Kingdom and Sweden.

# 2. Significant Accounting Policies

## Principles of Consolidation

The consolidated financial statements include the financial statements of the Company and its wholly owned subsidiaries. All intercompany transactions, including intercompany profits and losses and intercompany balances, have been eliminated in consolidation.

#### Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the U.S requires management of the Company to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent liabilities. These estimates and assumptions are based on management's best estimates and judgment. On an ongoing basis, the Company evaluates its estimates and assumptions, including those related to long-lived assets, stock-based compensation, the fair value of financial instruments including warrants, allowance for doubtful accounts, inventory valuation, taxes and contingent and accrued liabilities. The Company bases its estimates on historical experience and various other factors, including the current economic environment, which it believes to be reasonable under the circumstances. Estimates and assumptions are adjusted when facts and circumstances dictate. Actual results may differ from these estimates under different assumptions and conditions. Management believes that the estimates are reasonable.

#### Cash

Cash consists of cash balances on hand and on deposit at banks. Cash on deposit at banks at times may exceed the Federal Deposit Insurance Corporation (FDIC) limits. The Company believes no significant concentration of credit risk exists with respect to these cash balances.

# Accounts Receivable

Accounts receivable are recorded at the invoiced amount and do not bear interest. The allowance for doubtful accounts is the Company's best estimate of the amount of probable credit losses in the Company's existing accounts receivable. The Company determines the allowance based on historical write-off experience and past due balances over 90 days that are reviewed individually for collectability. Account balances are charged off against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote. The Company does not have any off balance sheet credit exposure related to its customers.

#### **Inventories**

Inventories are stated at the lower of cost (FIFO method) or market (net realizable value). Finished goods inventory includes materials, labor and manufacturing overhead. The Company establishes provisions for inventory that is obsolete or when quantities on hand are in excess of estimated forecasted demand. The creation of such provisions results in a write-down of inventory to net realizable value and a charge to cost of sales.

The Company's inventory includes precious metals (platinum, palladium and rhodium) for use in the manufacturing of catalysts. The precious metals are valued at the lower of cost or market (net realizable value), consistent with the Company's other inventory.

### **Property and Equipment**

Property and equipment is capitalized at cost and is stated at cost less accumulated depreciation and amortization. Depreciation and amortization is determined using the straight line method over the estimated useful lives of the various asset classes. Machinery and equipment are depreciated over 2 to 10 years; furniture and fixtures, computer hardware and software and vehicles are depreciated over 2 to 5 years. Property and equipment held under capital leases and leasehold improvements are amortized over the shorter of estimated useful lives or the lease term. Repairs and maintenance are charged to expense as incurred and major replacements or betterments are capitalized.

# Intangible Assets

The Company's intangible assets consist of trade names and acquired patents and technology and have finite lives. Intangible assets are carried at cost, less accumulated amortization. Amortization is computed on a straight-line or accelerated basis over the estimated useful lives of the respective assets, ranging from 4 to 20 years.

#### Long Lived Assets

Assets such as property and equipment and amortizable intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. An impairment loss is recognized when the sum of the expected undiscounted future net cash flows of an asset or asset group is less than its carrying amount and is measured as the amount by which the carrying amount of the asset or asset group exceeds its fair value.

#### Warrants and Derivative Liabilities

The Company accounts for the issuance of Company derivative equity instruments in accordance with Accounting Standards Codification ("ASC") 815-40 "Derivative and Hedging". The Company reviews common stock purchase warrants at each balance sheet date based upon the characteristics and provision of each particular instrument and classifies them on the balance sheet as equity or a liability. Below are some of the factors the Company considers with the corresponding balance sheet classification:

- Equity if the awards (i) require physical settlement or net-share settlement, or (ii) give the Company a choice of net-cash settlement or settlement in the Company's own shares (physical settlement or net-share settlement), or as
- Liabilities if the awards (i) require net-cash settlement (including a requirement to net-cash settle the contract if an event occurs and if that event is outside the Company's control), or (ii) give the counterparty a choice of net-cash settlement or settlement in shares (physical settlement of net-share settlement).

The Company assesses classification of common stock purchase warrants and other freestanding derivatives at each reporting date to determine whether a change in classification between assets and liabilities and equity is required.

#### **Income Taxes**

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance against deferred tax assets is required if, based on

the weight of available evidence, it is more likely than not that some portion or all of the deferred tax assets will not be realized. The valuation allowance should be sufficient to reduce the deferred tax assets to the amount that is more likely than not to be realized.

The Company recognizes the effect of income tax positions only if those positions are more likely than not of being sustained. Changes in recognition or measurement are reflected in the period in which the change occurs. The Company records interest and penalties related to unrecognized tax benefit in income tax expense.

#### Revenue Recognition

Net sales include products and shipping and handling charges, net of estimates for product returns as well as royalties earned under licensing agreements. Revenue for products and shipping and handling charges are measured as the amount of consideration the Company expects to receive in exchange for transferring products. All revenue is recognized when the Company satisfies its performance obligations under the contract. The Company recognizes revenue by transferring the promised products to the customer, with revenue recognized at the point in time the customer obtains control of the products. The Company recognizes revenue for shipping and handling charges at the time the products are delivered to or picked up by the customer. The Company estimates product returns based on historical return rates. The majority of the Company's contracts have a single performance obligation and are short term in nature. The Company recognizes revenue for its usage based royalties when the usage has occurred.

Sales taxes and value added taxes in foreign jurisdictions that are collected from customers and remitted to governmental authorities are accounted for on a net basis and therefore excluded from the transaction price and net sales.

# Research and Development

Research and development costs are generally expensed as incurred. These expenses include compensation expense for employees and contractors engaged in research, design and development activities, as well costs paid to outside parties for testing, validation and certification of our products. Also included is any depreciation related to assets utilized in the development of new products.

# Stock-Based Compensation

Equity awards consist of stock options and restricted stock units ("RSUs"). The Company measures the compensation cost for all stock-based awards at fair value on the date of grant and recognizes it on a straight-line basis over the service period for awards expected to vest, which is generally three years.

The Company measures the fair value of stock options using the Black-Scholes option-pricing model and certain assumptions, including the expected life of the stock options, an expected forfeiture rate and the expected volatility of its common stock. The fair value of RSUs is based on the closing price of the Company's common stock on the grant date.

### **Product Warranty**

The Company provides for the estimated cost of product warranties in cost of sales, at the time product revenue is recognized. Warranty costs are estimated primarily using historical warranty information in conjunction with current engineering assessments applied to the Company's expected repair or replacement costs.

### Foreign Currency

The functional currency of our subsidiary Engine Control Systems Europe AB in Sweden is the Swedish krona and the Clean Diesel Technologies Limited U.K. subsidiary, is the British pound sterling. Accordingly, the assets and liabilities of the foreign locations are translated into U.S. dollars at period-end exchange rates. Revenue and expense accounts are translated at the average exchange rates for the period. The resulting foreign currency exchange adjustments are charged or credited directly to other comprehensive income or loss as a separate component of stockholders' equity. Unrealized foreign currency exchange gains and losses on certain intercompany transactions that are of a long-term investment nature (i.e. settlement is not planned or anticipated in the foreseeable future) are also recorded in other comprehensive income or loss in stockholders' equity. Accumulated other comprehensive loss contained only foreign currency translation adjustments as of December 31, 2019

The Company has exposure to multiple currencies. The primary exposure is between the U.S. dollar, the Euro, British pound sterling and Swedish krona. Gains and losses arising from transactions denominated in currencies other than the functional currency of the entity are included in other income (expense) in the consolidated statements of comprehensive loss. Gains and losses arising from transactions denominated in foreign currencies are primarily related to inter-company loans that have been determined to be temporary in nature, cash, accounts receivable and accounts payable denominated in non-functional currencies.

#### Fair Value Measurements

Fair value is defined as an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset and liability. As a basis for considering such assumptions, a fair value hierarchy has been established that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: Inputs other than quoted prices included within Level 1 that are either directly or indirectly observable
  including quoted prices for similar instruments in active markets and quoted prices for identical or similar instruments
  in markets that are not active; and
- Level 3: Unobservable inputs in which little or no market activity exists, therefore requiring an entity to develop its own assumptions about the assumptions that market participants would use in pricing.

#### Fair Value of Financial Instruments

ASC Topic 825, "Financial Instruments", requires disclosure of the fair value of financial instruments for which the determination of fair value is practicable. The fair values of the Company's cash, trade accounts receivable, prepaid expenses and other current assets, accounts payable and accrued expenses and other current liabilities approximate carrying values due to the short maturity of these instruments. The fair value for the warrants classified as liability and the bifurcated derivative liabilities were calculated using level 3 inputs, including Black-Scholes option-pricing model as well as Monte Carlo Simulation model. These inputs are disclosed in Note 10 "Fair Value Measurements"

#### 3. Inventories

Inventories consist of the following (in thousands):

	Decemb	er 31,
	2019	,
Raw materials	\$	351
Finished goods	<u></u>	943
	<u>\$</u>	1,294

# 4. Property and Equipment

Property and equipment consists of the following (in thousands):

	Decemb	er 31,
	2019	,
Furniture and fixtures	\$	461
Computer hardware and software		42
Machinery and equipment		2,761
		3,264
Less accumulated depreciation	(	2,980)
	\$	284

Depreciation expense was \$0.1 million for the year ended December 31, 2019.

# 5. Intangible Assets

Intangible assets consist of the following (in thousands):

	Useful Life	De	cember 31,
	in Years		2019
Trade name	15 - 20	\$	1,208
Patents and know-how	5 - 12		1,266
			2,474
Less accumulated amortization			(1,747)
		\$	727

The Company recorded amortization expense related to amortizable intangible assets of \$0.2 million for the year ended December 31, 2019.

Estimated amortization expense for existing intangible assets for each of the next five years is as follows (in thousands):

Tears chang December 31.	Years	ending	December	31:
--------------------------	-------	--------	----------	-----

2020	\$	162
2021		162
2022		143
2023		71
2024		71
Thereafter		118
	<u>\$</u>	727

# 6. Accrued Expenses and Other Current Liabilities

Accrued expenses and other current liabilities consist of the following (in thousands):

	D	ecember 31,
		2019
Accrued salaries and benefits	\$	116
Accrued warranty(1)		51
Warrant liability(2)		9
PGM liability		745
Other		519
	\$	1,440

(1) For additional information, refer to Note 8, "Accrued Warranty".

(2) For additional information, refer to Note 10, "Fair Value Measurements".

# 7. Severance and Other Charges

The following summarizes the activity in the Company's accrual for severance and other exit costs (in thousands):

	Se	verance	Total
December 31, 2018	\$	311	\$ 311
Provision		_	_
Payments		(311)	(311)
December 31, 2019	\$	_	\$ _

# 8. Accrued Warranty

The Company establishes reserves for future product warranty costs that are expected to be incurred pursuant to specific warranty provisions with its customers. The Company generally warrants its products against defects between one and five years from date of shipment, depending on the product. The warranty reserves are established at the time of sale and updated throughout the warranty period based upon numerous factors including historical warranty return rates and expenses over various warranty periods. Historically, warranty returns have not been material.

The following summarizes the activity in the Company's accrual for product warranty (in thousands):

	 Years Ended December 31,	
	2019	
Balance at beginning of period	\$ 87	
Accrued warranty expense	20	
Warranty claims paid/reduction in reserve	(56)	
Balance at end of period	\$ 51	

# 9. Warrants

From time to time, the Company issues warrants to purchase its common stock. Warrants have been issued for consulting services, in connection with the Company's issuance of debt and sales of its common stock.

Warrants activity is summarized as follows:

	Shares(1)	Weighted Average Exercise Price	Range of Exercise Prices
Outstanding at December 31, 2018	176,906 \$	24.87	\$2.50 - \$105.00
Issued			_
Exercised	_	_	_
Expired	(13,720) \$	39.61	_
Outstanding at December 31, 2019	163,186 \$	23.63	\$11.00 - \$66.25
Exercisable at December 31, 2019	163,186 \$	23.63	\$11.00 - \$66.25

Warrant Liability

The Company's warrant liability is carried at fair value and is classified as Level 3 in the fair value hierarchy because the warrants are valued based on unobservable inputs.

#### 10. Fair Value Measurements

The Company measures certain financial assets and liabilities at fair value in accordance with a hierarchy which requires an entity to maximize the use of observable inputs which reflect market data obtained from independent sources and minimize the use of unobservable inputs. There are three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: Inputs other than quoted prices included within Level 1 that are either directly or indirectly observable including quoted prices for similar instruments in active markets and quoted prices for identical or similar instruments in markets that are not active; and

Level 3: Unobservable inputs in which little or no market activity exists, therefore requiring an entity to develop its own assumptions about the assumptions that market participants would use in pricing.

Assets and liabilities measured at fair value on the Company's balance sheet on a recurring basis include the following at December 31, 2019 (in thousands):

Warrant Liability	Level 1	Level 2	Level 3	
December 31, 2019	_	_	\$	9

There were no transfers in and out of Level 1 and Level 2 fair value measurements during the year ended December 31, 2019.

# 11. Stock-Based Compensation

The Clean Diesel Technologies, Inc. Stock Incentive Plan (formerly known as the Clean Diesel Technologies, Inc. 1994 Incentive Plan), as amended (the "Plan"), provides for the awarding of incentive stock options, non-qualified stock options, stock appreciation rights, restricted shares, performance awards, bonuses or other forms of share-based awards, or combinations of these to the Company's directors, officers, employees, consultants and advisors (except consultants or advisors in capital-raising transactions) as determined by the board of directors. At the Company's Annual Meeting of Shareholders held on May 23, 2012, the Company's shareholders approved certain amendments to the Plan, the most significant of which changed the Plan name, removed the evergreen provision and established a maximum number of 1.4 million shares to be reserved for issuance under the Plan, disallowed the repricing of outstanding stock options without shareholder approval, removed the ability to issue cash bonus awards under the Plan and modified the change in control provisions within the Plan.

Effective December 16, 2016, the Company adopted the Clean Diesel Technologies, Inc. 2016 Omnibus Incentive Plan (the "Omnibus Plan"), pursuant to the approval of the Omnibus plan by the Company's stockholders by written consent dated October 24, 2016. The Omnibus plan was adopted by the Company's Board of Directors (the "Board") on October 11, 2016. Under the Omnibus Plan, the Company is authorized to grant equity-based awards in the form of stock options, restricted common stock, restricted stock units, stock appreciation rights, and other stock based awards to employees (including executive officers), directors and consultants of the Company and its subsidiaries. The Omnibus Plan authorized the issuance of 2,250,000 shares of the Company's common stock.

Total stock-based compensation expense was \$0.2 million for the year ended December 31, 2019.

Stock Options

Stock option activity is summarized as follows:

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (thousands)
Outstanding at December 31, 2018	312,864	\$ 10.71	7.7	_
Granted	120,000	0.28	9.6	
Exercised	_	_	_	_
Canceled	(93,964)	\$ 9.71	_	_
Outstanding at December 31, 2019	338,900	\$ 6.77	8.3	\$
Vested and expected to vest at December 31, 2019	338,900	\$ 6.77	8.3	\$ —
Exercisable at December 31, 2019	235,231	\$ 8.59	8.1	\$

The aggregate intrinsic value represents the difference between the exercise price and the Company's closing stock price on the last trading day of the year.

Stock options granted under the Plan typically expire ten years from the date of grant and are issued at a price equal to the fair market value of the underlying stock on the date of grant. The Company's board of directors may establish such vesting and other conditions with respect to options as it deems appropriate.

The Company estimates the fair value of stock options using a Black-Scholes option-pricing model. The weighted-average assumptions and grant date fair value for the options granted during year ended December 31, 2019 were as follows:

Expected volatility	54.8%
Risk-free interest rate	1.6%
Dividend yield	_
Expected life in years	5.0
Weighted average grant date fair value	\$ 0.14

The expected term of the options has historically been based upon the historical term until exercise or expiration of all granted options. Due to the significant change in the Company following the Merger and significant change in the terms of the options granted, CDTI's pre-Merger historical exercise data was not considered to provide a reasonable basis for estimating the expected term for current option grants. As such, the expected term of stock options granted in 2015 and later was determined using the "simplified method" as allowed under ASC 718-10-S99, "Compensation—Stock Compensation: Overall: SEC Materials." The "simplified method" calculates the expected term as the average of the vesting term and original contractual term of the options. The expected volatility is based on the volatility of the Company over the corresponding expected term of the option. The risk-free interest rate is the constant maturity rate published by the U.S. Federal Reserve Board that corresponds to the expected term of the option. The dividend yield is assumed as 0% because the Company has not paid dividends and does not expect to pay dividends in the future.

Compensation costs for stock options that vest over time are recognized over the vesting period on a straight-line basis. As of December 31, 2019, the Company had \$0.2 million of unrecognized compensation cost related to stock option grants that remained to be recognized over vesting periods. These costs are expected to be recognized over a weighted average period of 1.0 years.

Restricted Stock Units
RSU activity is as follows:

	Shares	Weighted Average Grant Date Fair Value
Nonvested at December 31, 2018	46,152	\$ 1.95
Granted	_	_
Vested (1)	(30,768)	\$ 1.95
Forfeited	(15,384)	\$ 1.95
Nonvested units at December 31, 2019		_

<sup>(1)</sup> Included 30,768 restricted stock units that have vested but have not converted into common stock.

As of December 31, 2019, the Company had no unrecognized compensation expense related to RSUs.

#### 12. Income Taxes

Income (loss) from operations before income taxes include the following components (in thousands):

	December 31,	
	2019	
U.Sbased operations	\$ (337)	
Non U.Sbased operations	 828	
	\$ 491	

Income tax expense (benefit) attributable to income from operations is summarized as follows (in thousands):

	Current	Deferred	Total
Year ended December 31, 2019:			
U.S. Federal	\$ —	\$	\$
State and local	9	_	9
Foreign	101	1	102
Total	\$ 110	\$ 1	\$ 111

Income taxes attributable to income from operations differ from the amounts computed by applying the U.S. federal statutory rate of 21% to income from operations before income taxes as shown below (in thousands):

	==	Years Ended December 31,	
		2019	
Expected tax provision	\$	103	
Net tax effects of:			
Foreign tax rate differential		(8)	
State taxes, net of federal benefit		2	
Return to provision adjustment		(38)	
Research and other credits		_	
Permanent difference on convertible notes and warrants		1	
Other		30	
Change in deferred tax asset valuation allowance		21	
	\$	111	

Deferred tax assets and liabilities consist of the following (in thousands):

Deferred tax assets:	2019
Deferred tax assets:	
Research and development credits	\$ 2,486
Other credits	_
Operating loss carry forwards	7,491
Interest	315
Inventories	397
Allowance for doubtful accounts	(3)
Depreciation	136
Deferred research and development expenses for income tax	(3)
Non-cash compensation	932
Other	419
Total gross deferred tax assets	 12,170
Valuation allowance	(12,034)
Net deferred tax assets	\$ 136
Deferred tax liabilities:	 
Other identifiable intangible assets	\$ (126)
Total gross deferred tax liabilities	(126)
Net deferred tax assets (liabilities)	\$ 10

The Company had approximately \$25 million and \$21 million of federal and state income tax net operating loss carryforwards at December 31, 2019, respectively. The foreign net operating losses can be carried forward indefinitely. Future utilization of the federal and state net operating losses and credit carryforwards is subject to a substantial annual limitation due to ownership change limitations as required by Sections 382 and 383 of the Internal Revenue Code of 1986, as amended (the "Code"), as well as similar state limitations.

Of the \$25 million federal loss carryforwards approximately \$4.9 million of the loss will be subject to an annual limitation of \$0.4 million within the next 5 years and \$0.2 million for the next 15 years. In addition, approximately \$6.9 million of the loss will be subject to an annual limitation of \$0.9 million within the next 5 years and \$0.1 million for the following 15 years. The federal net operating loss carryforwards will expire in fiscal year 2038. As a result of the "ownership change" the federal research and development credits have been limited and based on the limitation the Company does not anticipate being able to use any of these credits that existed as of the date of the Merger in future tax years.

Of the \$21 million of state net operating loss carryforwards approximately \$1.4 million of the loss will be subject to an annual limitation of \$0.1 million for the next 20 years. The state net operating loss carryforwards will expire in fiscal year 2038. The Company has state research and development credits of \$3.1 million. The Company has a full valuation allowance against the related deferred tax assets for its U.S. and U.K. entities as it is more likely than not that they will not be realized by the Company.

In assessing the potential realization of deferred tax assets, consideration is given to whether it is more likely than not that some portion or all of the deferred tax assets will be realized. The ultimate realization of deferred tax assets is dependent upon the Company attaining future taxable income during the periods in which those temporary differences become deductible. In addition, the utilization of net operating loss carryforwards may be limited due to restrictions imposed under applicable federal

and state tax laws due to a change in ownership. Based upon the level of historical operating losses and future projections, management believes it is more likely than not that the Company will not realize the deferred tax assets.

The Company has not recognized a deferred tax liability on undistributed earnings of its foreign subsidiaries, because these earnings are intended to be permanently reinvested. The amount of the unrecognized deferred tax liability depends on judgment required to analyze the withholding tax due, the applicable tax law and factual circumstances in effect at the time of any such distributions. Therefore, the Company believes it is not practicable at this time to reliably determine the amount of unrecognized deferred tax liability related to its undistributed earnings; however, these undistributed earnings are immaterial. If circumstances change and it becomes apparent that some or all of the undistributed earnings of a subsidiary will be remitted and income taxes have not been recognized by the parent entity, the parent entity shall accrue as an expense of the current period income taxes attributable to that remittance.

The following changes occurred in the amount of unrecognized tax benefits including related interest and penalties, included in the income taxes payable on the consolidated balance sheet (in thousands):

	=	Years Ended December 31,	
		2019	
Balance at beginning of year	\$	774	
Additions for current year tax provisions		50	
Additions/Reduction for tax positions of prior years		_	
Reduction for prior year tax provisions		_	
Balance at end of year	\$	824	

If recognized, the entire amount of the unrecognized tax benefits would affect the effective tax rate. As of December 31, 2019 the Company had \$0.2 million accrued for payment of interest and penalties related to unrecognized tax benefits.

The Company operates in multiple tax jurisdictions, both within and outside of the United States. Although the timing of the resolution and/or closure of audits is not certain, the Company does not believe it is reasonably possible that its unrecognized tax benefits would materially change in the next twelve months. The following tax years remain open to examination by the major domestic taxing jurisdictions to which it is subject:

	Open Tax Years
United States—Federal	2016 – 2019
United States—State	2015 – 2019
Canada	2014 – 2019
Sweden	2017 – 2019
United Kingdom	2015 - 2019

# 13. Commitments and Contingencies

#### Lease Commitments

The Company leases its facilities under operating leases that expire through 2020. The Company recognizes its minimum lease payments, including escalation clauses, on a straight-line basis over the minimum lease term of the lease. Rent expense was \$0.3 million during the year ended December 31, 2019.

Future minimum lease payments under non-cancelable operating leases (with initial or remaining lease terms in excess of one year) as of December 31, 2019 are (in thousands):

Years ending December 31:	
2020	\$ 25
2021	_
2022	
2023	_
2024 and thereafter	 
Total minimum lease payments	\$ 25

# Litigation

The Company is involved in legal proceedings from time to time in the ordinary course of its business. Management does not believe that any of these claims and proceedings against it is likely to have, individually or in the aggregate, a material adverse effect on the Company's consolidated financial condition, results of operations or cash flows. Accordingly, the Company cannot determine the final amount, if any, of its liability beyond the amount accrued in the consolidated financial statements as of December 31, 2019, nor is it possible to estimate what litigation-related costs will be in the future.

#### Applied Utility Systems, Inc.

The Company is undergoing a sales and use tax audit by the State of California (the "State") with respect to Applied Utility Systems, Inc., a former subsidiary of the Company that was sold in 2009, for the period of 2007 through 2009. The audit has identified a project performed by the Company during that time period for which sales tax was not collected and remitted and for which the State asserts that proper documentation of resale may not have been obtained and that the Company owes sales tax of \$1.5 million, inclusive of interest. The Company contends and believes that it received sufficient and proper documentation from its customer to support not collecting and remitting sales tax from that customer and is actively disputing the audit report with the State. On August 12, 2013, the Company appeared at an appeals conference with the State Board of Equalization ("BOE"). On July 21, 2014, the Company received a Decision and Recommendation ("D&R") from the BOE. The D&R's conclusion was that the basis for the calculation of the aforementioned \$1.5 million tax due should be reduced from \$12.2 million to \$9.0 million with a commensurate reduction in the tax owed to the State. Regardless of this finding, the Company continues to believe that it will prevail in this matter, as it believes that the State did not adequately address the legal arguments related to the Company's acceptance of the valid resale certificate from its customer. The Company has not agreed to these findings, and therefore, it will be appealing at a higher level at the BOE. Based on a re-audit, the BOE lowered the tax due to \$0.9 million, inclusive of interest. The Company continues to disagree with these findings based on the aforementioned reasons. However, in October 2015, the Company offered to settle this case for \$0.1 million, which is based on the expected cost of continuing to contest this audit. Accordingly, an accrual was charged to discontinued operations during the year ended December 31, 2015 to reflect the offer to settle this case. Should the Company not prevail with the offer to settle this case, it plans to continue with the appeals process. Further, should the Company not prevail in this case, it will pursue reimbursement from the customer for all assessments from the State.

# 14. Geographic Information

Net sales by geographic region based on location of sales organization is as follows (in thousands):

	Years Ended December 31,
	2019
United States	\$ 4,128
Canada	524
Central and South America	47
Europe	3,571
Asia	509
Total international	4,651
Total revenues	\$ 8,779

Property and equipment, net and total assets by geographic region as of December 31, 2019 is as follows (in thousands):

	Property and Equipment, net	Total Assets
	2019	2019
United States	\$ 282	\$ 4,144
Europe	2	1,571
Total international		1,571
Total	\$ 284	\$ 5,715

#### 15. Concentrations

For the year ended December 31, 2019, no customer represent 10% or more of the Company's revenues, however one customer accounts for 18% of the accounts receivable balance as of December 31, 2019.

For the year ended December 31, 2019, the Company had one supplier that accounted for approximately 31% of the Company's material purchases.

# 16. Subsequent event

The Company has evaluated subsequent events and transactions for potential recognition or disclosure in the financial statements through May 6, 2020, the date the financial statements were available to be issued. The World Health Organization declared the COVID 19 coronavirus a pandemic on March 11, 2020. The effects of this pandemic on the Company's business cannot be determined, but it is expected that it may have a negative impact on customer orders and possibly cause supply chain disruption.
