1. Nature of Operations and Going Concern

Noble Mineral Exploration Inc., ("the Company" or "Noble") is in the mineral exploration and evaluation business. Noble has a wholly-owned US subsidiary, Hawk Uranium USA, Inc. ("Hawk USA") which is inactive.

The Company is incorporated under the laws of the Province of Ontario, Canada, and its head office is located at 120 Adelaide Street West, Suite 2500, Toronto, Ontario, M5H 1T1.

The business of exploring for minerals involves a high degree of risk and there can be no assurance that planned exploration programs will result in profitable operations. The recoverability of amounts shown for exploration and evaluation assets is dependent upon completion of the acquisition of the property interests, the discovery of economically recoverable reserves, confirmation of the Company's interest in the underlying claims, the ability of the Company to obtain necessary financing to complete the development and future profitable production or, alternatively, upon disposition of such property at a profit. Changes in future conditions could require material write-downs of the carrying values of exploration and evaluation assets.

The Company's major mineral properties are Project 81, Nagagami, Cere Villabon Newfoundland, Buckingham, Holdsworth and Hearst properties. Unless the Company acquires or develops additional material properties, the Company will be mainly dependent upon the Project 81 property. If no additional major mineral properties are acquired by the Company, any adverse development affecting this property would have a material adverse effect on the Company's financial condition and results of its operations.

Although the Company has taken steps to verify title to the property on which it is conducting exploration and it has acquired an interest (and has obtained title insurance on most of the properties comprising Project 81), in accordance with industry standards for the current stage of exploration of such property, these procedures do not guarantee the Company's title. Title to certain properties may be subject to unregistered prior agreements, aboriginal claims, and non-compliance with regulatory requirements.

As at February 29, 2024, the Company had working capital of \$5,270,563 (August 31, 2023 - \$4,445,892) and an accumulated deficit of \$18,431,876 (August 31, 2023 - \$19,486,135). In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. The Company's ability to continue operations and fund its exploration and evaluation assets expenditures is dependent on management's ability to secure additional financing. Management is actively pursuing such additional sources of financing, and while it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future. Management is aware, in making its assessment, of material uncertainties related to events or conditions that may cast significant doubt upon the entity's ability to continue as a going concern. Accordingly, these consolidated financial statements do not give effect to adjustments that would be necessary should the Company be unable to continue as a going concern and therefore to realize its assets and liquidate its liabilities and commitments in other than the normal course of business and at amounts different from those in the accompanying consolidated financial statements. These adjustments could be material.

2. Accounting Policies

14. Fair Value Measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy establishes three levels to classify the inputs to valuation techniques used to measure fair value. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices in markets that are not active, quoted prices for similar assets or liabilities in active markets, inputs other than quoted prices that are observable for the asset or liability, or inputs that are derived principally from or corroborated by observable market data or other means. Level 3 inputs are unobservable (supported by little or no market activity). The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs.

(a) Assets and liabilities measured at fair value on a recurring basis:

	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Aggregate fair value
As at February 29, 2024				
Marketable securities	\$ 5,789,243	\$ 525	\$ -	\$ 5,789,768
