### Appeal

June 10, 2022

FCC Commission

RE: Appeal on FRN 2299055307 discount approved

To whom it may concern:

For some reason, the EPC eliminated the profile information sent and instead reflected an enrollment of only one student (1) and NSLP count of zero (0). For E-rate 2021 funding, our Institution reflected its complete information in the profile and had 90% awarded. In 2022 funding, when the FCDL wave arrived, we realized that the system altered the profile information, thus affecting the discount for which we qualify. However, in the PIA Review process, no representative noticed this or requested evidence to corroborate the data. For this reason, we wish to appeal USAC approval of a 20% discount for FRN 2299055307.

The Institution requested funds for the 2022 funding under FCC Form 471 #221037268, FRN 2299055307. This fund was approved on April 23, 2022, with a 20% discount, taking into consideration the erroneous information that appeared in the profile (enrollment 1 and NSLP count 0). We proceeded to appeal the decision of USAC, since the Institution qualifies for the maximum discount percentage according to the numbers of the submitted NSLP (Appeal #262543), however it was denied on May 11, 2022. Attached is the NSLP submitted where it is confirmed that the Institution qualifies for the maximum discount percentage.

Attached you will find a copy of the following documentations: Appeal submitted to USAC, NSLP Count submitted with the appeal, and Revised Funding Commitment Decision Letter.

Respectfully,

Luis Castro  
IBAHS General Director
