## 8. LOSS PER SHARE ATTRIBUTABLE TO OWNERS OF THE COMPANY

The calculation of basic loss per share amount was based on the loss for the period attributable to owners of the Company of HK\$323,785,000 (Six months ended 31 January 2021: HK\$797,153,000), and the weighted average number of ordinary shares of 587,740,000 (Six months ended 31 January 2021 (adjusted): 480,748,000) in issue during the period.

No adjustment has been made to the basic loss per share amounts presented for the periods ended 31 January 2022 and 2021 in respect of a dilution as the impact of the share options of the Company, LSD, eSun and Lai Fung Holdings Limited (“Lai Fung”) had an anti-dilutive effect on the basic loss per share amounts presented.

The basic and diluted loss per share for the six months ended 31 January 2021 have been adjusted to reflect the effect of a rights issue of the Company during the current period.

## 9. DEBTORS

The Group (other than the eSun Group) maintains various credit policies for different business operations in accordance with business practices and market conditions in which the respective subsidiaries operate. Sales proceeds receivable from the sale of properties are settled in accordance with the terms of the respective contracts. Rent and related charges in respect of the leasing of properties are receivable from tenants, and are normally payable in advance with rental deposits received in accordance with the terms of the tenancy agreements. Hotel and restaurant charges are mainly settled by customers on a cash basis except for those corporate clients who maintain credit accounts with the respective subsidiaries, the settlement of which is in accordance with the respective agreements. The Group's trade receivables related to a large number of diversified customers and there is no significant concentration of credit risk. Trade receivables of the Group are non-interest-bearing. The Group's finance lease receivables related to a creditworthy third party.

The trading terms of the eSun Group with its customers are mainly on credit. Invoices are normally payable within 30 to 90 days of issuance, except for certain well-established customers, where the terms are extended to 120 days. Each customer has a maximum credit limit. The eSun Group seeks to maintain strict control over its outstanding receivables and has a credit control policy to minimise its credit risk. Overdue balances are regularly reviewed by senior management. Since the eSun Group trades only with recognised and creditworthy third parties, there is no requirement for collateral. Concentrations of credit risk are managed by customer/counterparty, by geographical region and by industry sector. There are no significant concentrations of credit risk within the eSun Group as the customer bases of the eSun Group's trade receivables are widely dispersed in different sectors and industries. The eSun Group's trade receivables are non-interest-bearing.

Other than rental deposits received, the Group does not hold any collateral or other credit enhancements over these balances.

The fair value of equity-settled share options granted by the Company during the period was estimated using the Binomial Option Pricing Model ("**Binomial Model**"), taking into account the terms and conditions upon which the options were granted. The following table lists the inputs to the model used:

Closing share price (HK\$ per share)	3.670
Exercise price (HK\$ per share)	3.874
Option life (years)	10
Risk-free interest rate (%)	1.8446
Dividend yield (%)	0.0
Expected volatility (%)	39.153
Historical volatility (%)	39.153
Forfeiture rate (%)	2.8

The expected volatility reflects the assumption that the historical volatility is indicative of future trends, which may also not necessarily be the actual outcome. The value of the share options is subject to a number of assumptions and with regard to the limitation of the Binomial Model. Therefore, the value may be subjective and would change should any of the assumptions change.

## 15. FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS (CONTINUED)

### Valuation techniques

Fair value measurement using significant observable inputs (Level 2)

The fair values of certain financial assets at fair value through profit or loss are based on the fair values of the underlying investment portfolio provided by the fund managers.

Fair value measurement using significant unobservable inputs (Level 3)

Each year, the Group's management appoints external valuers to be responsible for the external valuations of the Group's financial instruments (the "**Financial Instrument Valuers**"). Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. The Group's management has discussions with the Financial Instrument Valuers on the valuation assumptions and valuation results twice a year when the valuation is performed for interim and annual financial reporting.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The methods and assumptions used to estimate the fair values of the principal financial instruments are stated as follows:

- (i) Fair value of the equity interest in an investee company, classified as financial assets at fair value through other comprehensive income, has been estimated using the fair value of investment properties held by the investee company, which is mainly determined by income approach. Income approach is an approach to valuation that provides an indication of value by converting future cash flows to a single current capital value. The current capital value is projected based on discounted cash flow method. It is a process of valuing an investment property or asset by undertaking an estimation of future cash flows and taking into account the time value of money.
- (ii) Fair values of the equity interest in another investee company have been determined by equity value allocation model with Black-Scholes option pricing formula. Under this valuation methodology, the underlying total equity value has been determined based on the most recent transaction of share subscription by an independent third-party investor in the investee company.
- (iii) Derivative financial instruments — CCSs, are measured using valuation techniques similar to forward pricing and swap models, using present value calculations. The models incorporate various market observable inputs including the credit quality of counterparties, foreign exchange spot rates and interest rate curves as well as other unobservable inputs. The carrying amounts of the derivatives financial instruments are the same as their fair values.

## Management Discussion and Analysis

### BUSINESS REVIEW AND OUTLOOK

Two years after the outbreak of the COVID-19 pandemic, the global economy has been experiencing a gradual recovery. However, the momentum for growth, especially in most major economies has slowed considerably since the end of 2021 and the outlook remains uncertain in the midst of, amongst other factors, new waves of Omicron variant infections, ongoing geopolitical conflicts especially between Russia and Ukraine, rising global inflation, lingering supply-chain disruptions, as well as persistent labour market challenges. While some of these events are likely to linger in the near future and continue to cast a shadow on the global economic recovery, we remain cautiously optimistic about the future prospects of the cities in which the Group has exposure, especially in the Greater Bay Area in southern China, and continue to regard Hong Kong, where our headquarters is situated, as one of the major beneficiary cities.

### Hong Kong and Overseas Property Market

Despite continued disruption, Hong Kong's economy saw a recovery in 2021 and turned to a strong year-on-year expansion of 6.4%, after contracting by 6.5% in 2020, thanks to the rebound of global demand, a well contained pandemic situation and higher vaccination rates, as well as the consumption voucher scheme that had boosted local spending and supported the retail, catering, and services sectors. However, the growth is expected to be moderate in 2022 as the fifth wave of COVID-19 infection cases since January 2022 along with the stringent "zero-COVID-19" measures adopted by the Hong Kong government has taken a heavy toll on local economic activities and dented the market sentiment.

The property sector in Hong Kong as a whole has been showing resilience and robustness since the emergence of COVID-19 epidemic in January 2020, while the unprecedented outbreak in the fifth wave of COVID-19 epidemic has posed uncertainties and challenges to the business activities of Hong Kong property market in 2022. The retail segment remained reliant on domestic consumption as the pandemic-induced closure of the border with Mainland China and travel restrictions continued. The tightened social distancing and containment measures amid the recent resurgence of Omicron COVID-19 variant infections in the community have severely dampened consumer sentiment and impacted footfall in most shopping centers in both core and non-core areas. The growth momentum in the office leasing market seen in the second half of 2021 has also been inevitably disrupted. Although the Central business district, especially premium Grade-A offices, continued to be underpinned by the anticipated return of US-listed Chinese enterprises and the growing appetite from finance and cryptocurrency firms, tenants in other commercial areas tend to be cautious and have slowed down their relocation or expansion plans in the face of mounting uncertainties, resulting in subdued leasing sentiment and a low level of activity. Market activities also slowed down in both the primary and secondary residential markets, owing to the outbreak of the fifth wave of the COVID-19 pandemic. Home viewings have been largely restricted by the latest social distancing measures and new launches have been postponed or rescheduled by some property developers. However, unique and exclusive luxury properties are still sought-after by wealthy house hunters and investors and premium residential sites in the land sale market are still receiving enthusiastic responses from local property developers, reflecting their confidence in the outlook for the luxury residential market in Hong Kong.

## BUSINESS REVIEW AND OUTLOOK *(CONTINUED)*

### Hong Kong and Overseas Property Market *(Continued)*

During the six months ended 31 January 2022, prolonged social distancing measures and travel restrictions in Hong Kong continued to impact many industries to varying degrees. Amid weak business sentiment, slowdown of retail leasing activities and soaring vacancies in the market, the Group's major Hong Kong properties performed relatively steadily at over 80% occupancy. Given the severe epidemic situation of the latest and worst COVID-19 outbreak in Hong Kong since January 2022, the Group will work closely with its stakeholders, including its tenants, to try to find a mutually beneficial solution and progress through unprecedented challenging times. With the planning consent approved by the City of London's Planning and Transportation Committee, Lai Sun Development Company Limited ("**LSD**") and its subsidiaries (together, "**LSD Group**") keeps monitoring the market conditions in London closely for the potential redevelopment of the three properties on Leadenhall Street in London, comprising 100, 106 and 107 Leadenhall Street ("**Leadenhall Properties**"). Despite the pandemic challenges and the increasingly complicated Russia-Ukraine tensions, which may cause near-term uncertainties around the UK economy, the Group is of the view that the City of London's positioning as a major financial and business centre should remain unchanged. The potential redevelopment of the Leadenhall Properties set to be a mixed-use development has been designed by Skidmore, Owings & Merrill. The 56-storey commercial building will target a carbon net zero strategy in line with RIBA 2030 standards thereby meeting the demands of all major global occupiers by the time of delivery. Knight Frank and CBRE have been appointed as Office Leasing and Development advisers. London & Oriental LLP are the UK Client Representative and Development Adviser.

Despite the uncertain economic outlook brought by the prolonged pandemic, the residential property market in Hong Kong has demonstrated resilience primarily due to limited supply, solid pent-up demand driven by local end-users and the prevailing low interest rate environment. During the period under review, the Group continued to source and evaluate suitable land acquisition opportunities to restock its development land bank and successfully secured 3 residential projects. In September 2021, LSD Group acquired a 3-storey building at No. 116 Waterloo Road in Ho Man Tin and the transaction was completed with vacant possession in March 2022. LSD Group intends to redevelop the site into residential units with total gross floor area ("**GFA**") of approximately 46,100 square feet. In October 2021, LSD Group successfully won the tender for the residential site of approximately 23,900 square feet at No. 79 Broadcast Drive, Kowloon Tong, formerly the Educational Television Centre of Radio Television Hong Kong. LSD Group plans to develop a high-quality luxury residential project offering around 46 medium-large sized units including 3 houses and the maximum permissible GFA is approximately 71,600 square feet. In January 2022, LSD Group acquired two adjacent buildings at Nos. 1&1A Kotewall Road in Mid-Levels, Hong Kong Island for redevelopment purposes and the transaction was completed with vacant possession in March 2022. LSD Group intends to redevelop the site into a luxury residential project with a total GFA of approximately 57,500 square feet, offering around 25 medium-large sized residential units.

Construction work of the Hang On Street Project and the Tai Kei Leng Project are on schedule and completions are expected to be in the fourth quarter of 2023 and the first quarter of 2024, respectively. Upon completion, these two residential projects are expected to add a total GFA of approximately 64,000 square feet and 42,200 square feet, respectively, to the development portfolio of LSD Group. Subject to the COVID-19 epidemic situation in Hong Kong, the pre-sale of the Hang On Street Project and the Tai Kei Leng Project are expected to be launched in 2022. The planning and design work of the residential project at the Wong Chuk Hang Station Package Five Property Development is in progress. Construction is expected to be completed in the first half of 2025.

Handover of the residential units which have been sold has been substantially completed.

The Group will continue its prudent and flexible approach and be prepared to capture the development opportunities as soon as the economy is on track for a recovery.

### Mainland China Property Market

People's Republic of China ("PRC" or "China") has targeted slower economic growth of around 5.5% this year at the fifth session of the 13<sup>th</sup> National People's Congress held in March 2022 amid the rising domestic constraints and uncertain global recovery. Notwithstanding the soften economic conditions due to policy tightening across real estate, technology and education sectors, recurrent COVID-19 outbreaks and lockdown measures, as well as slower export growth, the Chinese government has set stability as its top priority for economic achievement for the year. We believe that the Chinese government will continue to forge ahead and deliver stable economic performance through a combination of more neutral fiscal policy and moderately supportive monetary policy. We remain optimistic about the long-term prospects and sustainability of the business environment in China in light of the dual circulation development model emphasising on the rebalancing of domestic and overseas demand and are fully confident about future prospects of the cities in which the Group has exposure in, especially the Greater Bay Area in southern China, and continue to regard Hong Kong, where our headquarters is situated, as one of the major beneficiary cities.

The regional focus and rental-led strategy of Lai Fung Holdings Limited ("**Lai Fung**") and its subsidiaries (together, "**Lai Fung Group**") has demonstrated resilience in recent years. The rental portfolio of approximately 4.5 million square feet in Shanghai, Guangzhou, Zhongshan and Hengqin, being Tier 1 cities in China and cities within the Greater Bay Area delivered steady performance in rental income for the period under review. Top tier cities and the Greater Bay Area will remain as the primary drivers for Lai Fung Group's rental growth in coming years. Upon completion of construction works of the existing projects on hand, which include the combined redevelopment of Shanghai Northgate Plaza I, Northgate Plaza II and the Hui Gong Building ("**Shanghai Northgate Plaza Redevelopment Project**"), the development of Guangzhou Haizhu Plaza Project and Phase II ("**Novotown Phase II**") of the Novotown project in Hengqin ("**Novotown**"), Lai Fung Group will have a rental portfolio of approximately 6.8 million square feet. The Shanghai Northgate Plaza Redevelopment Project has been officially named as "Skyline Tower" and pre-leasing is in progress. Lai Fung Group also launched the pre-leasing of Guangzhou Haizhu Plaza Project, officially named as "Lai Fung International Center", the construction of which is expected to be completed by end of 2022.

Leasing of the commercial area of Phase I of Novotown (“**Novotown Phase I**”) is underway with approximately 73% of the leasable area having been leased and key tenants include two themed indoor experience centres, namely “Lionsgate Entertainment World®” and “National Geographic Ultimate Explorer Hengqin”, Pokiddo Trampoline Park, Adidas Outlet, Paulaner Wirtshaus Hengqin, Oyster King, Starbucks, McDonald’s and an indoor gun shooting range.

Construction of Novotown Phase II is in progress. This mixed-used development project is expected to be completed in phases by 2024, providing commercial and experiential entertainment facilities, office and serviced apartment spaces of 357,100 square feet, 1,585,000 square feet and 578,400 square feet, respectively. Part of the office and serviced apartment spaces have been designated as for-sale properties. During the period under review, Novotown Phase II was awarded as a winner under the Retail & Leisure International (“**RLI**”) Best Placemaking Scheme category at the Global RLI Awards for 2021 and was awarded the 5 Star – Best Mixed-use Architecture for Guangdong Province, China at Asia Pacific Property Awards 2021-2022. Lai Fung Group remains confident that the deepening of cooperation between Hengqin and Macau, and the continuous development of the Guangdong-Macau In-Depth Cooperation Zone in Hengqin will encourage more businesses and population to reside in Hengqin which will further enhance the tourism market, making Novotown a new contributor to Lai Fung Group’s results in the long run.

Shanghai Wuli Bridge Project, the high-end luxury residential project located by the Huangpu River in Huangpu District providing 28 residential units and 43 car parking spaces was launched for sale in September 2020 and has received an enthusiastic response from the market. Up to the date of this Interim Report, two residential units and 14 car parking spaces remain unsold, of which the contracted sales for one residential unit and one car parking space as at 31 January 2022 amounted to approximately HK\$35.0 million. Construction of remaining phases of Zhongshan Palm Spring has been completed and handover of pre-sold units is in progress. The residential units and the unsold serviced apartment units in Zhongshan Palm Spring, the cultural studios, cultural workshops and office of Hengqin Novotown Phase I, as well as the remaining residential unit in Shanghai Wuli Bridge Project are expected to contribute to the income of Lai Fung Group in coming financial years.

Lai Fung Group will consider replenishing its landbank as and when opportunities arise, and will take into account, amongst other factors, overall macroeconomic conditions, Lai Fung Group’s existing presence in the relevant cities and allocation of risks etc.

## BUSINESS REVIEW AND OUTLOOK *(CONTINUED)*

### Cinema Operation/Media and Entertainment/Film Production and Distribution

The COVID-19 pandemic has had a drastic impact on every facet of the global economy, including the entertainment industry. Although vaccination programs have been launched on a massive scale in Hong Kong and Mainland China, the sector remains at the mercy of the coronavirus, with the recent new waves of Omicron COVID-19 variant infections affecting business confidence and the risks of future outbreaks ever present.

Due to the relaxation of social distancing measures and the release of a number of blockbuster movies, the cinema operation of eSun Holdings Limited (“**eSun**”) and its subsidiaries (together, “**eSun Group**”) recovered gradually in 2021 from the worst of the COVID-19 pandemic. During the period under review, eSun Group’s cinemas in Hong Kong were allowed to operate at 85% capacity for all screens before the surge of the fifth wave COVID-19 cases in January 2022 and have been requested to close since 7 January 2022 as part of the government’s ramped up measures to contain the spread of the Omicron variant. Cinemas in Mainland China re-opened in late July 2020 and the box office has shown a recovery in 2021 driven by the success of patriotic blockbusters. However, business performance of cinema operation in Hong Kong and Mainland China are still suffering from the social distancing measures such as restrictions on the seating capacity and food and beverage consumption within the cinema houses. Despite the challenging operating environment under the COVID-19 pandemic, eSun Group remains cautiously optimistic about the fundamental demand for entertainment in the long run and continues to evaluate opportunities to maintain and enhance its market positioning as a leading multiplex cinema operator in Hong Kong.

In February 2022, eSun Group extended the tenancy agreement of the Festival Grand Cinema in Festival Walk for 3 years commencing on 1 February 2024. Festival Walk is one of the most popular shopping and leisure destinations in Hong Kong with direct connection to the Kowloon Tong MTR Station and eSun Group has been operating the cinema since June 2016. Given its strategic location, eSun Group considers that the continued use of the premise after the expiry of the existing tenancy will be beneficial to the cinema operation of eSun Group and will further enhance its market position as a leading multiplex cinema operator in Hong Kong. eSun Group also secured the cinema site at Plaza Hollywood in Diamond Hill, Kowloon through a joint venture company with one of major cinema operators in Hong Kong and the new cinema is expected to commence business in the third quarter of 2022. eSun Group is closely monitoring the market conditions and will continue to improve its overall operating efficiency and take a prudent approach in evaluating opportunities for further expansion of its footprint.

The outbreak of COVID-19 also posted unprecedented challenges to the media and entertainment industry, with entertainment spending affected severely by the accompanying social distancing measures. The entertainment consumption of the PRC markets started to recover amid the novel coronavirus epidemic. However, the recent surge of Omicron COVID-19 variant infections in Hong Kong posed a challenge to the local entertainment market. Media Asia Group Holdings Limited (“**MAGHL**”, a non-wholly-owned subsidiary of the Company, together with its subsidiaries, “**MAGHL Group**”), being the media and entertainment arm of eSun Group will continue to focus on producing high quality and commercially viable products to rise to the challenge, and has also been directing its resources towards development of online content for streaming platforms and e-commerce to capture the related market opportunities.

## LIQUIDITY AND FINANCIAL RESOURCES *(CONTINUED)*

The Group's major assets and liabilities and transactions were denominated in Hong Kong dollars, United States dollars, Pound Sterling and Renminbi. The Group has investments in United Kingdom with the assets and liabilities denominated in Pound Sterling. These investments were primarily financed by bank borrowings denominated in Pound Sterling in order to minimise the net foreign exchange exposure. Lai Fung Group has a net exchange exposure to Renminbi as their assets are principally located in Mainland China and the revenues are predominantly in Renminbi. Other than the abovementioned, the remaining monetary assets and liabilities of the Group were denominated in Euro, Malaysian Ringgit and Vietnamese Dong which were insignificant as compared with the Group's total assets and liabilities.
