

Life Is A *Celebration*

A virtual exhibition of works by
artists from Trinidad and Tobago

Life is a Celebration

The Central Bank Museum is pleased to launch the second installation of the Life is a Celebration virtual exhibition.

On February 15, 2021, we launched the first installation which featured works of art from the Bank's permanent collection; this gallery can still be viewed on our website [here](#). It featured the work of several local artists who used various media and styles to express the theme of celebration. Some of the events highlighted in that selection of work were Hosay, Carnival, Kartik and activities such as bele dancing, steelpan playing and limbo dancing.

For the current showcase, we are featuring work by artists from across Trinidad and Tobago.. The response was truly amazing and we appreciate all the creatives who took the time to submit work and to be part of our show.

Enter this virtual gallery and view works from all 49 of our talented artists. We know that nothing beats seeing works of art in person; however, given the current situation that we face, we felt it important to keep our programming going and to continue to facilitate access and dialogue between the artist, the public and our institution.

We hope you enjoy!
