- Seara began its operation at a new chicken breaded plant in Rolândia (PR). This is Seara's most automated plant and one of the most modern at JBS. The objective of this investment is to give a new meaning to the breaded category, expanding Seara's portfolio of products and serving all consumption occasions.
- JBS USA Pork began operation of its first Italian specialty meats plant in North America in January 2023, located in the city of Columbia, Missouri, which is aligned with the Company's strategy of adding value to its portfolio of products.
- JBS was once again chosen to be part of B3's Carbon Efficient Index (ICO2) portfolio, yet another recognition of the Company's commitment to the best sustainable practices.

# MESSAGE FROM THE CEO

---

We started 2023 facing many challenges, but our globally diversified platform continues to be a fortress. Operational management measures and a significant improvement in the outlook are already pointing to a more positive performance in line with our potential.

As we pointed out last quarter, this period faced high input costs, persistent inflation, and supply and demand imbalances, in addition to being a traditionally weaker period for the global protein industry. All necessary actions to reduce the impact of these circumstances have been taken.

Beyond market conditions, two businesses were particularly impacted this quarter: Beef USA and Seara. In the United States, we faced high cattle prices and a compression of margins. Additionally, commercial and industrial performance fell below our expectations, which are issues that have already been addressed.

In Seara, we faced challenges of falling prices in exports, high grain costs, and low productivity in agriculture, which impacted costs and volume. We have taken measures to reverse productivity in the field, and the cost of grain is already showing more favorable results.

The increase in our leverage was already expected due to the normalization of margins. Therefore, the company prepared for this scenario by extending the average term and reducing the cost of debt, improving liquidity through the increase in revolving credit lines, and aligning bond clauses with those of the latest issuances when the company was already Investment Grade. We do not have any significant maturities until 2027. In addition, we have already identified the potential to release US\$ 1.2 billion in working capital.

The upcoming quarters in the US market are historically stronger with the grilling season approaching, when the consumption of protein and value-added products is heightened. Global logistics conditions are also improving, with a reduction in container costs boding well for Asian exports. A significant decrease in cornmeal prices is ongoing in important producer markets, which has positive impacts on our poultry and pork facilities globally.

In Australia, the cattle cycle is starting to show favorable signs, with continued improvement in supply expected throughout 2023. In Brazil, the resumption of China exports, new export authorizations in the US, Canada, the Philippines, and Mexico, as well as strengthened domestic supplier relationship programs, provide the Brazilian business beef with a very strong outlook in the months ahead.

Our diversification strategy has been complemented in recent years by our investments in value-added products and strong brands in the countries where we operate, providing a more resilient portfolio. Over the past few years, we have made several investments that will begin to bear good fruit. This includes the recent opening of a new Italian specialties facility in Columbia, Missouri, in the United States, and the new breaded products factory in Rolândia, Paraná, Brazil.

All these factors are already leading to a gradual recovery of margins in our businesses.

In the last 12 years, during which we already had a global platform, this is the first quarter that we have faced adversities in almost all countries where we operate. This makes us believe more than ever that our team members and our geographical and protein diversification are our greatest strengths, especially during challenging times.

## NET REVENUE

In 1Q23, JBS recorded consolidated net revenue of R\$86.7 billion, which represents a decrease of 4.6% compared to 1Q22.

For the period, approximately 77% of JBS global sales were made in the domestic markets in which the Company operates and 23% through exports.

In the last 12 months, net revenue reached R\$370.7 billion (US\$71.9 billion).

## ADJUSTED EBITDA

In 1Q23, JBS adjusted EBITDA was R\$2.2 billion, a decrease of 78.6%, compared to a very strong EBITDA disclosed in 1Q22, combined with production costs which remained high during the quarter and an oversupply of protein, mainly in chicken and hogs during the period. Adjusted EBITDA margin was 2.5% in the quarter.

In the last 12 months, adjusted EBITDA reached R\$26.6 billion (US\$5.2 billion), with an adjusted EBITDA margin of 7.2%.

## NET INCOME

In 1Q23, JBS recorded a net loss of R\$1.5 billion.

## CASH FLOW FROM OPERATING ACTIVITIES AND FREE CASH FLOW

In 1Q23, cash flow from operating activities was negative by R\$3 billion, explained by the challenging scenario in the period. Free cash flow, after adding property, plant and equipment, interest paid and received, was negative by R\$6 billion.

It is worth mentioning that the first quarter of the year has, seasonally, the characteristic of consuming cash, due to the concentration of payments from cattle and hog suppliers, and restocking of inventories, mainly in grains.

## NET CASH PROVIDED (USED) BY INVESTING ACTIVITIES

In 1Q23, the total amount of cash flow from JBS investment activities was R\$1.6 billion, with the main investment being the addition of fixed assets (CAPEX) in the amount of R\$1.7 billion in the quarter.

In 1Q23, Seara recorded a net revenue of R\$10.3 billion, an increase of 8.9% compared to 1Q22, mainly as a result of the 7% growth in volume and the 2% increase in average selling prices.

During the 1Q23, production costs remained high, alongside a scenario of global chicken oversupply, impacted profitability, mainly in the export market. As a result, adjusted EBITDA was R\$147 million, with an EBITDA margin of 1.4%.

In the export market, net revenue in dollars was US\$991 million, which represents an increase of 5.3% compared to 1Q22, thanks to an 11% growth in sales volumes, as dollar prices were 5% lower in the annual comparison. In the quarter, the reduction in prices was a result of the global oversupply of poultry, which affected dollar prices.

Sales in the domestic market, which accounted for half of the business unit's revenue in the period, totaled R\$5.2 billion, 13.5% higher than in 1Q22. The prepared foods category grew 13% YoY, as a result 10% higher prices than in 1Q22 and 3% higher volumes in the same period. In line with its strategy of investing in innovation, variety and quality, Seara inaugurated in March its new breaded chicken plant in Rolândia, and launched a new line of Seara breaded products, the most complete line of breaded products made with 100% chicken breast.

Investments in the Seara brand continue to bring positive results for the Company. In addition to consolidating itself as the most present brand in Brazilian homes in several categories, the repeat purchase rate continues to grow. In addition, Caliber, a global management reputational consultancy, released its ranking of brands for the 1Q23 and Seara was nominated leader in the Trust and Admiration indicator in the Food and Beverage category.

In 1Q23, JBS Brasil recorded a net revenue of R\$12.2 billion (-15% YoY), mainly as a result of lower volumes and prices in the export market.

In the domestic market, sales in the fresh beef category fell 5% YoY in the face of a challenging macroeconomic scenario. Despite the 6% drop in average prices, partially offset by the 1% increase in volumes, the Company follows its strategy of: (i) increasing the number of key customers through the Friboi+ loyalty program (Açougue Nota 10); (ii) growing the higher value-added portfolio; (iii) increasing the number of customers in the food service channel; (iv) bringing the Friboi and Swift brands closer to retailers and end consumers; and (v) continuing to improve commercial execution.

In the export market, net revenue in dollars fell 39% when compared to 1Q22. After the confirmation of an atypical case of bovine spongiform encephalopathy (BSE) in the state of Pará, popularly known as the mad cow disease, the Brazilian Ministry of Agriculture and Livestock promoted a self-embargo on beef exports to China, which is the main destination of Brazilian exports. Thus, this suspension, which lasted approximately one month, impacted prices and volumes in the beef export market in 1Q23.

EBITDA totaled R\$296.6 million, with an EBITDA margin of 2.4% in 1Q23. This result was impacted by the reduction in net revenue, given the suspension of exports to China, but which was also partially offset by lower prices of live cattle during the quarter. According to data published by CEPEA-ESALQ, the price of live cattle during the quarter was approximately R\$286/arroba (-16.3% YoY).

In IFRS and reais, net revenue in 1Q23 was R\$27.4 billion, a decrease of 5.6% compared to 1Q22, with an adjusted EBITDA of R\$116 million, and an adjusted EBITDA margin of 0.4%. These results include the impact of the 0.6% appreciation of the average exchange rate, which went from R\$5.22 in 1Q22 to R\$5.19 in 1Q23.

In USGAAP and US\$, net revenue was US\$5.3 billion, a decrease of 4.9% compared to 1Q22 and adjusted EBITDA was a negative US\$23.2 million, with a negative EBITDA margin of 0.4%. The main difference this quarter between EBITDA under USGAAP and IFRS was due to the accounting impact for beef product inventories at market value under USGAAP and at average cost under IFRS.

In the quarter, beef margins in North America suffered a material impact compared to the previous year, as a result of changes in market conditions due to the turn of the cattle cycle, reducing the availability of animals for processing. In this scenario, according to the USDA, live cattle prices remained at high levels, increasing 16% YoY in 1Q23 to US\$160/cwt, while wholesale beef prices grew only 2% YoY in the same period.

In 1Q23, weaker demand from Asian countries impacted US beef exports, which volumes dropped 8.6% YoY, according to the USDA. The top 3 US export destinations remain South Korea, Japan and China.

Despite a more challenging scenario, JBS continues to focus on improving operational efficiency, increasing the share of higher value-added products, as well as the global distribution of products, mainly through its main commercial partners.

Considering results in IFRS and reais, net revenue in 1Q23 was R\$7.2 billion (-2.3% y/y) and adjusted EBITDA was a negative R\$17.7 million, with an EBITDA margin of -0.2%.

In USGAAP and US\$, net revenue was US\$1.4 billion (-1.6% YoY) in 1Q23. These results include the impact of the 0.6% appreciation of the average exchange rate, which went from R\$5.22 in 1Q22 to R\$5.19 in 1Q23. In the quarter, adjusted EBITDA was US\$18.5 million in 1Q23, with an EBITDA margin of 1.3%.

Domestic market sales, which accounted for 40% of the total revenue in the quarter, were 9% higher than in 1Q22, driven by higher growth in sales volume. In the export market, net revenue increased by 1% compared to 1Q22, mainly explained by the greater demand from the Asian market.

Net revenue from the beef business was stable compared to the same period of the previous year, due to a lower demand in the domestic market, offset by a higher export volume. The EBITDA margin for this business contracted given the high purchase price of cattle available in the feedlot, which remained at high levels for most of the quarter. On the other hand, cattle prices have been improving due to the greater availability in the market.

The aquaculture business continues to grow due to greater demand, which is reflected in price increases.

Pork business net revenue grew as a result of the herd health improvement program and better carcass optimization.

Primo, the prepared foods unit, recorded a 12% increase in net revenue as a result of price increases, accompanied by volume growth.

In IFRS and reais, net revenue in 1Q23 was R\$9.4 billion, 6% lower than 1Q22 and adjusted EBITDA was R\$231.7 million, with adjusted EBITDA margin of 2.5%. These results include the impact of the 0.6% appreciation of the average exchange rate, which went from R\$5.22 in 1Q22 to R\$5.19 in 1Q23.

In USGAAP and US\$, net revenue was US\$1.8 billion, a decrease of 4.9% compared to 1Q22, with adjusted EBITDA of US\$66.4 million and a margin of 3.7%. The main difference this quarter between EBITDA under USGAAP and IFRS was due to the impact of accounting for biological assets at market value under IFRS and at average cost under USGAAP.

In the domestic market, according to information from the USDA, pork production grew approximately 2% for the period, which contributed to the increase in inventory levels. As a result, wholesale pork prices fell by approximately 20% YoY in 1Q23. Additionally, grain and labor costs remained at high levels, also pressuring results.

In the international market, USDA figures show that the total export volume of US pork grew 12.3% YoY in the first quarter, mainly to Mexico, Japan, South Korea and China.

The Company continues to invest in innovation, expansion of the product portfolio with better margins and productivity actions. Thus, the first JBS Italian specialty meat plant in North America began its activities in January 2023, located in Columbia, Missouri.

<sup>1</sup>The difference in JBS USA Pork EBITDA in IFRS and USGAAP, in addition to the FX, is attributed to the adoption of IFRS16 from 1Q19 onwards and different accounting criteria. In IFRS, the inventories are measured through the average cost while in USGAAP they are marked-to-market and biological assets are marked to market, while in USGAAP they are measured through the average cost. Volume and price calculations exclude the impact of acquisitions.

Considering results in IFRS and reais, PPC posted a net revenue of R\$21.6 billion in 1Q23, a 2.5% decrease compared to 1Q22, and an adjusted EBITDA of R\$1.4 billion, with an EBITDA margin of 6.5%. These results include the impact of the 0.6% appreciation of the average exchange rate, which went from R\$5.22 in 1Q22 to R\$5.19 in 1Q23.

In USGAAP and US\$, PPC's net revenue in 1Q23 was US\$4.2 billion, 1.8% lower than in 1Q22, and adjusted EBITDA was US\$151.9 million with a margin of 3.6%.

In the United States, during 1Q23, PPC continued to face an adverse scenario in the prices of products for the use of raw materials (Big Bird), mainly at the beginning of the quarter, which were offset by PPC's diversified portfolio, increased supply of branded products and partnerships with key customers. Additionally, PPC continues to invest in automation projects, innovation and initiatives to increase operational and commercial efficiency, aiming at increasing profitability.

In Mexico, after a challenging second half in the face of an unbalanced supply and demand scenario, mainly in live chicken operations, market fundamentals returned to more normalized levels. Added to this, the focus on commercial execution, mainly on the needs of key customers, has returned margins to historical levels.

In Europe, the improvement in profitability is the result of several important operational and commercial steps that began last year. Among them are the optimization of the manufacturing network, consolidation of back-office activities, innovation and growth of partnerships with key customers.

## **Independent auditors' report on the individual and consolidated interim financial information**

To the Management, Board of Directors and Shareholders of  
**JBS S.A.**  
São Paulo - SP

### **Introduction**

We have reviewed the accompanying individual and consolidated interim financial information of JBS S.A. ("the Company") contained in the Quarterly Information Form - ITR for the quarter ended March 31, 2023, which comprises the statement of financial position as of March 31, 2023 and the respective statements of income (loss), comprehensive income (loss), changes in equity and cash flows for the three-month period then ended, including the explanatory notes.

The Company's management is responsible for the preparation of this individual and consolidated interim financial information in accordance with Technical Pronouncement CPC 21 (R1) – *Demonstração Intermediária* and IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board - IASB, as well as for the presentation of this information in accordance with standards issued by the *Comissão de Valores Mobiliários - CVM*, applicable to the preparation of Quarterly Information Form - ITR. Our responsibility is to express a conclusion on this interim financial information based on our review.

### **Scope of review**

We conducted our review in accordance with the Brazilian and International standards on review engagements of interim financial information (NBC TR 2410 - *Revisão de Informações Intermediárias Executada pelo Auditor da Entidade* and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for the financial and accounting matters and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the auditing standards and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### **Conclusion on the individual and consolidated interim financial information**

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual and consolidated interim financial information included in the Quarterly Information Form – ITR referred to above has not been prepared, in all material respects, in accordance with CPC 21 (R1) and IAS 34, issued by IASB, applicable to the preparation of Quarterly Information Form - ITR, and presented in accordance with the standards issued by the *Comissão de Valores Mobiliários – CVM*.

**Other matters****Statements of Value Added**

The interim financial information mentioned above includes Statements of Value Added, individual and consolidated, for the three-month period ended March 31, 2023, prepared under the responsibility of the Company's management and presented as supplementary information for the purposes of IAS 34. These statements were submitted to review procedures together with the review of the Quarterly Information, with the objective of concluding whether they are reconciled with the interim financial information and accounting records, as applicable, and whether their form and content are in accordance with the criteria defined in Technical Pronouncement CPC 09 – *Demonstração do Valor Adicionado*. Based on our review, nothing has come to our attention that causes us to believe that it has not been prepared, in all material respects, in accordance with the criteria defined in this Pronouncement and consistent with the individual and consolidated interim financial information taken as a whole.

**Audit of the corresponding balances related to the prior year and review of the corresponding balances to the first quarter of the prior year**

The corresponding balances related to the individual and consolidated balance sheets as of December 31, 2022 were audited by other independent auditors, who issued an unqualified opinion dated March 21, 2023, and the individual and consolidated interim statements of income, comprehensive income, changes in shareholders' equity and cash flows for the three-month period ended March 31, 2022 were reviewed by other independent auditors who issued an unqualified review report dated May 11, 2022. The corresponding balances related to the individual and consolidated statements of value added for the three-month period ended March 31, 2022 were submitted to the same review procedures by those independent auditors and, based on their review, those independent auditors reported that they were not aware of any fact that would lead them to believe that the statement of value added was not prepared, in all material respects, in accordance with the individual and consolidated interim accounting information taken as a whole.

## JBS S.A.

Notes to the condensed financial statements for the three month period ended at March 31, 2023 and 2022  
(Expressed in thousands of Brazilian reais)

### 1 Background Information

JBS S.A. ("JBS" or the "Company"), is a corporation with its headquarters office in Brazil, in the City of São Paulo, and is controlled by J&F Investimentos S.A. The Company has its shares publicly traded and listed on the "Novo Mercado" segment of the Sao Paulo Stock Exchange (B3 - Bolsa de Valores, Mercadorias & Futuros) under the ticker symbol "JBSS3". In addition, American Depository Receipts related to shares issued by JBS are also publicly traded in the United States of America under the symbol "JB SAY". The consolidated financial statements comprise the Company and its subsidiaries (collectively, the "Company") for the period ended March 31, 2023 and were authorized by the Board of Directors on May 10, 2023.

The financial statements presented herein include the Company's individual operations in Brazil as well as the activities of its subsidiaries in Brazil and abroad.

### 2 Basis of preparation and presentation of financial statements

The financial statements were prepared in accordance with the Technical Pronouncement CPC 21 (R1) - Interim Statements, approved by the Brazilian Accounting and equivalent to International Accounting Standard "IAS" 34 - Interim Financial Reporting, issued by the International Accounting Standards Board (IASB). Therefore, these interim financial statements as of March 31, 2023 were not completely presented due to redundancy in relation to what is presented in the individual and consolidated annual financial statements (December 31, 2022) prepared in accordance with the accounting practices adopted in Brazil (BRGAAP) and with International Financial Reporting Standards (IFRS), approved by the Board of Directors on March 21, 2023. The parent company's individual financial statements are identified as "Company" and the consolidated financial statements are identified as "Consolidated".

#### 2.1 Functional and representation currency

These condensed interim financial statements are presented in Brazilian reais (R\$), which is the Company's presentation and functional currency. All financial information is presented in thousands of reais, except when indicated otherwise.

#### 2.2 New standards, amendments and interpretations

##### a. Standards, amendments and interpretations recently issued and adopted by the Company

##### Accounting Policies, Changes in Accounting Estimates and Errors: Amendments to IAS 8/CPC 23

As of January 1, 2023, the amendments clarify the distinction between changes in accounting estimates and changes in accounting policies, changes in accounting estimates and correction of errors, to assist in correctly applying the guidance. The Company is following the discussions and has so far not identified any significant impacts as a result of this change.

##### Deferred Tax related to Assets and Liabilities arising from a Single Transaction: Amendments to IAS 12/CPC 32

As of January 1, 2023, the amendments narrow the scope of the initial recognition exemption (IRE) so that it no longer applies to transactions that, among other things, on initial recognition, give rise to equal taxable and deductible temporary differences. As a result, a deferred tax asset and a deferred tax liability should be recognized for temporary differences arising on initial recognition of a lease and decommissioning provision. The Company is following the discussions and has so far not identified any significant impacts as a result of this change.

##### a. New standards, amendments and interpretations that are not yet effective

##### Presentation of Financial Statements: Amendments to IAS 1/CPC 26

As of January 1, 2023, sets out the requirements to defer settlement of a liability and whether the Company has reached these requirements at the end of the reporting period and, also, whether the classification between current and non-current would impact the entity's ability to exercise the postponement right.. The amendments also clarify that a derivative embedded in a convertible liability does not affect the classification of the liability if the derivative itself is an equity instrument. The Company is following the discussions and so far has not identified significant impacts as a result of this change.

### 3 Business Combination

The acquisitions in business combinations are presented below. <sup>(1)</sup> The Company and its subsidiaries recognize investments grants given by State governments which are mainly presumed and/or granted ICMS (Value-added tax on sales and services) credits which are granted as a encouragement to implement or expand economic enterprises. In other jurisdictions, the Company recognizes investments grants related to energy and training. When the income tax expense reduces and reflects the deductibility of these incentives, all conditions related to the government grants were in compliance. The investments grants are recognized under the caption "Sales deductions - Sales taxes" in the Statements of income

<sup>(1)</sup> The Company and its indirect subsidiary Seara Alimentos carry out transactions with financial institutions that allow the suppliers to anticipate their receivables in the domestic market. It should be emphasized, operationally and commercially, there are no identifiable changes to the conditions applied in the negotiations with suppliers such as price or flexibility on payment terms. In addition, this operation did not bring any other cost to the Group and all financial costs of the operation are the responsibility of the suppliers.

The Company enters into purchase agreements for livestock with certain suppliers, including the related party JBJ Agropecuária Ltda. ("JBJ"), ensuring a fixed price, or to fix, when purchasing cattle, without a cash impact in the Company until the receiving the cattle or maturity date of these commitments. Based on this future commitment contract, JBJ has already advanced this operation with the banks under the supply chain finance modality. At March 31, 2023 the balance of this transaction was R\$530,103 (R\$451,800 at December 31, 2022).

### In the subsidiary JBS USA:

a. **Civil Proceedings:** Refers to several class action lawsuits, alleging violations of federal and state antitrust, unfair competition, unfair enrichment, deceptive trade practice, and consumer protection laws on sales of beef, pork and chicken. For the three month period ended at March 31, 2023 the indirect subsidiary JBS USA recognized an accrual in the amount of US\$13.7 million (R\$69,601 at March 31, 2023) and no payment was made in the quarter. At March 31, 2023, the remaining accrual is US\$187.9 million (R\$976,273 at March 31, 2023).

The Company, together with its legal department and hired external offices, continues to monitor the developments of the antitrust proceedings and understand that the accounting provisions measured and known up to the date of approval of these financial statements are sufficient for risk coverage.

## 21 Equity

a. **Share capital:** Share capital on March 31, 2023 and December 31, 2022 was R\$23,576,206, represented by 2,218,116,370 common shares, having no nominal value.

### b. Profit reserve:

b1. **Treasury shares:** Treasury shares include own shares acquired by the Company. On March 31, 2023, the Company had no balance in treasury shares.

c. **Other comprehensive income:** Composed by gain on cash flow hedge, Gains (losses) associated with pension and other postretirement benefit obligations, valuation adjustments to equity in subsidiaries, loss on net investment in foreign operations and gain on foreign currency translation adjustments. In the financial statement which includes the foreign entity, such exchange variations must be recognized, initially, in other comprehensive income in a specific equity account, and must be transferred from equity to the income statement when the net investment is written off.

c1. **Net investment in foreign operations:** The Company has certain intercompany loans balances with the subsidiaries JBS Luxembourg S.à.r.l and JBS Investments Luxembourg S.à.r.l which will not be settled through cash but with equity transactions, through capital reduction. Therefore, the Company understands that these balances are an extension of the subsidiary's investment, thus they are considered as net investment on foreign operations. The exchange variation is reclassified from income statement to equity, during the period.

#### 22.1 Customer contract balances

##### Contract balances

Customer contract liabilities relate to payments received in advance of satisfying the performance obligation under the contract. Moreover, a contract liability is recognized when the Company has an obligation to transfer products to a customer from whom the consideration has already been received. The recognition of the contractual liability occurs at the time when the consideration is received and settled. The Company recognizes revenue upon fulfilling the related performance obligation. Contract liabilities are presented as advances from customers in the balance sheet.

**Fair value of assets and liabilities through profit or loss:** The Company and its subsidiaries determine fair value measurements in accordance with the hierarchical levels that reflect the significance of the inputs used in the measurement, with the exception of those maturing at short term, equity instruments without an active market and contracts with discretionary characteristics that the fair value can not be measured reliably, according to the following levels:

Level 1 - Quoted prices in active markets (unadjusted) for identical assets or liabilities;

Level 2 - Inputs other than Level 1, in which prices are quoted for similar assets and liabilities, either directly by obtaining prices in active markets or indirectly through valuation techniques that use data from active markets;

Level 3 - Inputs used for fair value calculations which are not derived from an active market. The Company and its subsidiaries do not have any financial instruments that utilize level 3 inputs.

**Fair value of assets and liabilities carried at amortized cost:** The fair value of the Notes under Rule 144-A and Regulation S, are estimated using the closing sale price of these securities informed by a financial newswire on March 31, 2023 and December 31, 2022, considering there is an active market for these financial instruments. The book value of the remaining fixed-rate loans approximates fair value since the interest rate market, the Company's credit quality, and other market factors have not significantly changed since entering into the loans. The book value of variable-rate loans and financings approximates fair value given the interest rates adjust for changes in market conditions and the quality of the Company's credit rating has not substantially changed. For all other financial assets and liabilities, book value approximates fair value due to the short duration of the instruments. The following details the estimated fair value of loans and financings:

<sup>(1)</sup> For currency hedging purposes, the Company includes in its exposure the net debt of foreign subsidiaries. Although these debts do not generate currency exposure in the Company's results (since they are abroad, and in the functional currency of each country), these debts in the consolidation are affected by the exchange rate, impacting shareholders' equity as exchange variation on investment, influencing the consolidated debt of the Company, and consequently the leverage indicators.

**c. Commodity price risk**

The Company operates globally (the entire livestock protein chain and related business) and during the regular course of its operations is exposed to price fluctuations in feeder cattle, live cattle, lean hogs, corn, soybeans, and energy, especially in the North American, Australian and Brazilian markets. Commodity markets are characterized by volatility arising from external factors including climate, supply levels, transportation costs, agricultural policies and storage costs, among others. The Risk Management Department is responsible for mapping the exposures to commodity prices of the Company and proposing strategies to the Risk Management Committee, in order to mitigate such exposures.

**c3. Hedge accounting of Seara Alimentos:**

From the third quarter of 2021, the indirect subsidiary Seara Alimentos reviewed its hedge policies and started to apply hedge accounting in grain operations, aiming at bringing stability to the subsidiary's results. The designation of these instruments is based on the guidelines outlined in the Financial and Commodity Risk Management Policy defined by the Risk Management Committee and approved by the Board of Directors.

Financial instruments designated for hedge accounting were classified as cash flow hedge. The effective amount of the instrument's gain or loss is recognized under "Other comprehensive income (expense)" and the ineffective amount under "Financial income (expense), net", and the accumulated gains and losses are reclassified to profit and loss or to the balance sheet when the object is recognized, adjusting the item in which the hedged object was recorded.

In these hedge relationships, the main sources of ineffectiveness are the effect of the counterparties and the Company's own credit risk on the fair value of the forward foreign exchange contracts, which is not reflected in the change in the fair value of the hedged cash flows attributable to the change in exchange rates; and changes in the timing of the hedged transactions.

The derivative financial instruments designated at the March 31, 2023, as hedge accounting, according to the cash flow method, to protect the operating results in relation to the price of commodities are:

Hedge accounting - Derivative instruments	Risk factor	Quantity	Notional	Fair value
Future contracts	Commodities	761	(27,287)	(35,964)
Non-Deliverable Forwards	Commodities	400	101,608	(43)
				<b>(36,007)</b>

Seara Alimentos also designates derivatives to hedge the fair value of debt instruments with floating interest rates through swaps of fixed interest rates, measured in accordance with fair value hedge accounting.

**c3.1. Hedge accounting:**

Below is shown the effects on income for the period, on other comprehensive income and on the balance sheet of derivative financial instruments contracted for hedging exchange rates, commodity prices and interest rates (cash flow and fair value hedges):

The indirect subsidiary JBS USA and its subsidiaries, has securities pledged as collateral for derivative transactions with the commodities and futures whose balance at March 31, 2023 is R\$280,453 (R\$518,055 at December 31, 2022). This guarantee is larger than its collateral.

Also, the direct subsidiary Seara Alimentos has securities pledged as collateral for derivative transactions with the commodities and futures whose balance at March 31, 2023 is R\$91,458,183 (R\$80,902 in 31 de dezembro de 2022). This guarantee is larger than its collateral.

As disclosed in Note 17 – Loans and financings, the Company has a bank loan that contains a loan covenant. A future breach of covenant may require the Company to repay the loan earlier than indicated in the above table.

The interest payments on variable interest rate loans and bond issues in the table above reflect market forward interest rates at the reporting date and these amounts may change as market interest rates change. The future cash flows on contingent consideration and derivative instruments may be different from the amount in the above table as interest rates and exchange rates or the relevant conditions underlying the contingency change. Except for these financial liabilities, it is not expected that the cash flows included in the maturity analysis could occur significantly earlier, or at significantly different amounts.

## 28 Subsequent events

- On April 4, 2023, PPC completed a sale of US\$1.0 billion (equivalent of R\$5.08 billions) aggregate principal amount of its 6.25% senior notes due 2033 ("6.25% Notes 2033"). PPC used the net proceeds to repay existing debt.
- The Company and its subsidiaries have subsidies granted by the state governments, by way of presumed credit, partial and full reduction of the ICMS (Value-added tax on sales and services) calculation basis of certain goods in its production chain, in accordance with the regulations of each State. The appropriate amounts of these tax incentives as revenue in the result, are excluded in the calculation of taxes on profit, when the requirements provided for in the current legislation are met. During the quarter ended March 2023, the Company and its subsidiaries recorded the amount of government subsidies in the amount of R\$2.03 billion, of which R\$694,156 was presumed credit and R\$1.34 billion was ICMS reduction and exemption, excluded from its income tax and social contribution calculation basis, see note 10.

The exclusion of this tax benefit from the basis of calculation of income tax and social contribution on net income reflected a tax gain for the quarter ended March 31, 2023 of R\$236,013 related to presumed credit and R\$456,474 of exemption and base reduction.

On April 26, 2023, the STJ (Superior Court of Justice) reported the finalization of the judgment of the Special Appeals Resp. 1,945,110 and 1,987,158 (Repetitive Theme 1182), in which the requirement of IRPJ and CSLL on amounts related to ICMS tax incentives, distinct from those granted in the form of presumed credits, is discussed. Considering, however, that the decision of the STJ has not yet been made available, and the effectiveness of the decision itself is suspended by determination of the STF (Federal Supreme Court), the Company informs that it monitors and will evaluate the possible impacts as soon as the definitive outcome of the case occurs.
