

# 31 March 2021 Pillar 3 report

UBS Group and significant regulated subsidiaries and sub-groups

# Table of contents

## Introduction and basis for preparation

### UBS Group

- 6 Section 1 Key metrics
- 8 Section 2 Risk-weighted assets
- 12 Section 3 Going and gone concern requirements and eligible capital
- 13 Section 4 Leverage ratio
- 15 Section 5 Liquidity coverage ratio

### Significant regulated subsidiaries and sub-groups

- 18 Section 1 Introduction
- 18 Section 2 UBS AG standalone
- 23 Section 3 UBS Switzerland AG standalone
- 29 Section 4 UBS Europe SE consolidated
- 30 Section 5 UBS Americas Holding LLC consolidated

### Appendix

- 31 Abbreviations frequently used in our financial reports
- 33 Cautionary statement

### Scope of Basel III Pillar 3 disclosures

The Basel Committee on Banking Supervision (the BCBS) Basel III capital adequacy framework consists of three complementary pillars. Pillar 1 provides a framework for measuring minimum capital requirements for the credit, market, operational and non-counterparty-related risks faced by banks. Pillar 2 addresses the principles of the supervisory review process, emphasizing the need for a qualitative approach to supervising banks. Pillar 3 requires banks to publish a range of disclosures, mainly covering risk, capital, leverage, liquidity and remuneration.

This report provides Pillar 3 disclosures for the UBS Group and prudential key figures and regulatory information for UBS AG standalone, UBS Switzerland AG standalone, UBS Europe SE consolidated and UBS Americas Holding LLC consolidated in the respective sections under "Significant regulated subsidiaries and sub-groups."

As UBS is considered a systemically relevant bank (an SRB) under Swiss banking law, UBS Group AG and UBS AG are required to comply with regulations based on the Basel III framework as applicable to Swiss SRBs on a consolidated basis. Capital and other regulatory information as of 31 March 2021 for UBS Group AG consolidated is provided in the "Capital management" section of our first quarter 2021 report and for UBS AG consolidated in the "Capital management" section of the UBS AG first quarter 2021 report, both available under "Quarterly reporting" at [ubs.com/investors](https://ubs.com/investors).

Local regulators may also require the publication of Pillar 3 information at a subsidiary or sub-group level. Where applicable, these local disclosures are provided under "Holding company and significant regulated subsidiaries and sub-groups" at [ubs.com/investors](https://ubs.com/investors).

### Significant BCBS and FINMA capital adequacy, liquidity and funding, and related disclosure requirements

This Pillar 3 report has been prepared in accordance with Swiss Financial Market Supervisory Authority (FINMA) Pillar 3 disclosure requirements (FINMA Circular 2016/1 "Disclosure – banks") as revised on 31 October 2019, the underlying BCBS guidance "Revised Pillar 3 disclosure requirements" issued in January 2015, the "Frequently asked questions on the revised Pillar 3 disclosure requirements" issued in August 2016, the "Pillar 3 disclosure requirements – consolidated and enhanced framework" issued in March 2017 and the subsequent "Technical Amendment – Pillar 3 disclosure requirements – regulatory treatment of accounting provisions" issued in August 2018.

### Significant regulatory developments, and disclosure requirements and changes effective in this quarter

#### COVID-19 temporary regulatory measures

The program established by the Swiss Federal Council in March 2020 to support small and medium-sized entities (SMEs) by granting loans closed on 31 July 2020. As of that date, we had committed CHF 2.7 billion of loans up to CHF 0.5 million, which are 100% guaranteed by the Swiss government, and CHF 0.6 billion of loans between CHF 0.5 million and CHF 20 million, which are 85% government-guaranteed. The total amount drawn on our loan commitments under the program was CHF 1.8 billion on 31 March 2021.

We remain committed to donating any economic profits from the government-backed lending program to COVID-19 relief efforts. However, we did not make any profits from this program in the first quarter of 2021.

In addition, the temporary exemption from FINMA for banks to exclude central bank sight deposits from the leverage ratio denominator (the LRD) for the purpose of calculating going concern ratios applied until 1 January 2021 and was not extended thereafter.

#### FINMA's assessment of the recovery and resolution planning

In March 2021, FINMA published its annual assessment of the recovery and resolution plans of systemically important financial institutions in Switzerland. The report noted that FINMA had approved UBS's group recovery plan and assessed its Swiss Emergency Plan as effective. It also highlighted that UBS has made further progress in improving its global resolvability by building up the necessary capabilities and removing obstacles to the implementation of the resolution strategy, while pointing out areas for further improvement.

#### US measures on capital adequacy, capital distribution restrictions and leverage capital relief

In March 2021, US banking regulators decided to not extend the temporary exclusion of central bank deposits and US Treasury securities from the leverage exposure calculation for the supplementary leverage ratio beyond March 2021. The temporary exemption was applicable to UBS Americas Holding LLC (UBSAH) with respect to US regulatory capital requirements. In addition, the Federal Reserve announced that the limits on capital distributions imposed during the COVID-19 pandemic would be removed after 30 June 2021. As a result, capital distributions by UBSAH will generally be permitted for as long as it meets regulatory capital requirements, including the incremental stress capital buffer set by the Federal Reserve Board as part of its Comprehensive Capital Analysis and Review stress test (CCAR). UBSAH's stress capital buffer requirement, currently 6.7%, will be assessed and may be revised in the 2021 CCAR process, the results of which are expected to be announced by the Federal Reserve Board in June 2021.

#### Methodology change for credit valuation adjustment risk related to Lombard derivative exposures

A methodology change related to credit valuation adjustment (CVA) risk for derivative exposures with Lombard clients resulted in an increase of USD 1.1 billion in risk-weighted assets (RWA) in the first quarter of 2021.

#### Phase-in of RWA effects

Effective from the third quarter of 2020, we began to phase in RWA increases related to the fourth quarter of 2020 release of new probability of default (PD) and loss given default (LGD) parameters for mortgage portfolios in the US. As agreed with FINMA, the RWA effects of such model updates will be phased in over six quarters, until the end of 2021, with an estimated quarterly RWA increase of USD 0.5 billion.

#### Frequency and comparability of Pillar 3 disclosures

FINMA has specified the reporting frequency for each disclosure, as outlined in the table on pages 7–9 of our 31 December 2020 Pillar 3 report, available under "Pillar 3 disclosures" at [ubs.com/investors](https://ubs.com/investors).

In line with the FINMA-specified disclosure frequency and requirements for disclosure with regard to comparative periods, we provide quantitative comparative information as of 31 December 2020 for disclosures required on a quarterly basis. Where specifically required by FINMA and / or the BCBS, we disclose comparative information for additional reporting dates.

UBS Group

## Section 1 Key metrics

---

### Key metrics of the first quarter of 2021

The KM1 and KM2 tables on the following pages are based on the Basel Committee on Banking Supervision (the BCBS) Basel III rules. The KM2 table includes a reference to the total loss-absorbing capacity (TLAC) term sheet, published by the Financial Stability Board (the FSB). The FSB provides this term sheet at [fsb.org/2015/11/total-loss-absorbing-capacity-tlac-principles-and-term-sheet](https://www.fsb.org/2015/11/total-loss-absorbing-capacity-tlac-principles-and-term-sheet).

During the first quarter of 2021, our common equity tier 1 (CET1) capital increased by USD 0.5 billion to USD 40.4 billion, mainly reflecting operating profit before tax of USD 2.3 billion, partly offset by negative foreign currency translation effects of USD 0.8 billion, current tax expenses of USD 0.4 billion, accruals for capital returns to shareholders of USD 0.3 billion and negative defined benefit plans effects of USD 0.2 billion.

Total capital decreased by USD 2.4 billion to USD 58.8 billion, mainly reflecting the call of a EUR 2 billion tier 2 capital instrument amounting to USD 2.4 billion.

The TLAC available as of 31 March 2021 included CET1 capital, additional tier 1 and tier 2 capital instruments eligible under the TLAC framework, and non-regulatory capital elements of TLAC. Under the Swiss systemically relevant bank (SRB) framework, including transitional arrangements, TLAC excludes

45% of the gross unrealized gains on debt instruments measured at fair value through other comprehensive income for accounting purposes, which for regulatory capital purposes are measured at the lower of cost or market value. This amount was negligible as of 31 March 2021, but is included as available TLAC in the KM2 table in this section.

Our available TLAC decreased by USD 1.1 billion to USD 100.7 billion, mainly reflecting the aforementioned call of a EUR 2 billion tier 2 capital instrument, partly offset by a net increase of USD 1.3 billion from non-regulatory capital elements of TLAC.

Risk-weighted assets (RWA) decreased by USD 1.3 billion to USD 287.8 billion, including a reduction related to currency effects of USD 5.6 billion, mainly reflecting decreases in credit risk RWA of USD 2.4 billion and market risk RWA of USD 1.5 billion, partially offset by increases in investment in funds RWA of USD 1.2 billion, credit valuation adjustment RWA of USD 1.1 billion and counterparty credit risk RWA of USD 0.3 billion.

The leverage ratio exposure was stable at USD 1,038 billion as the increases in derivative and securities financing transactions (SFTs) exposures were largely offset by the decrease in on-balance sheet exposures (excluding derivatives and SFTs).

The average high-quality liquid assets (HQLA) increased by USD 7.1 billion to USD 221.4 billion, due to higher cash balances, partly offset by higher funding consumption in the business divisions. Average total net cash outflows increased by USD 5.4 billion to USD 146.3 billion, due to an increase in average customer deposit balances.

6a	Does the subordination exemption in the antepenultimate paragraph of Section 11 of the FSB TLAC Term Sheet apply?			No		
6b	Does the subordination exemption in the penultimate paragraph of Section 11 of the FSB TLAC Term Sheet apply?			No		
6c	If the capped subordination exemption applies, the amount of funding issued that ranks pari passu with excluded liabilities and that is recognized as external TLAC, divided by funding issued that ranks pari passu with excluded liabilities and that would be recognized as external TLAC if no cap was applied (%)			N/A – Refer to our response to 6b.		

<sup>1</sup> Resolution group level is defined as the UBS Group AG consolidated level. <sup>2</sup> The fully loaded ECL accounting model excludes the transitional relief of recognizing ECL allowances and provisions in CET1 capital in accordance with FINMA Circular 2013/1 "Eligible capital – banks." <sup>3</sup> Leverage ratio exposures and leverage ratios for the respective periods in 2020 do not reflect the effects of the temporary exemption that applied from 25 March 2020 until 1 January 2021 and was granted by FINMA in connection with COVID-19. Refer to the "Introduction and basis for preparation" section and to "Application of the temporary COVID-19-related FINMA exemption of central bank sight deposits" in the "Going and gone concern requirements and eligible capital" section of our 31 December 2020 Pillar 3 report, available under "Pillar 3 disclosures" at [ubs.com/investors](https://ubs.com/investors), for more information.

## Section 2 Risk-weighted assets

### Our approach to measuring risk exposure and risk-weighted assets

Depending on the intended purpose, the measurement of risk exposure that we apply may differ. Exposures may be measured for financial accounting purposes under International Financial Reporting Standards (IFRS), for deriving our regulatory capital requirements or for internal risk management and control purposes. Our Pillar 3 disclosures are generally based on measures of risk exposure used to derive the regulatory capital required under Pillar 1. Our risk-weighted assets (RWA) are calculated according to the Basel Committee on Banking Supervision (the BCBS) Basel III framework, as implemented by the Swiss Capital Adequacy Ordinance issued by the Swiss Federal Council and by the associated circulars issued by the Swiss Financial Market Supervisory Authority (FINMA).

For information about the measurement of risk exposures and RWA, refer to pages 13–15 of our 31 December 2020 Pillar 3 report, available under “Pillar 3 disclosures” at [ubs.com/investors](https://ubs.com/investors).

### Overview of RWA and capital requirements

The OV1 table on the following page provides an overview of our RWA and the related minimum capital requirements by risk type. The table presented is based on the respective FINMA template and empty rows indicate current non-applicability to UBS.

During the first quarter of 2021, RWA decreased by USD 1.3 billion to USD 287.8 billion, including a reduction related to currency effects of USD 5.6 billion, mainly reflecting decreases in credit risk RWA of USD 2.4 billion and market risk RWA of USD 1.5 billion, partially offset by increases in investment in funds RWA of USD 1.2 billion, credit valuation adjustment RWA of USD 1.1 billion and as counterparty credit risk RWA of USD 0.3 billion.

Credit risk RWA under the internal ratings-based approach and the standardized approach decreased by USD 2.4 billion, mainly driven by a reduction related to currency effects, partially offset by increases in loans and loan commitments in the Investment Bank and loans in Global Wealth Management. The RWA increase related to investments in funds of USD 1.2 billion was due to a business-driven investment in Asset Management. The increase in credit valuation adjustment RWA of USD 1.1 billion was primarily due to a methodology and policy change related to derivatives for Lombard clients in Global Wealth Management. Counterparty credit risk RWA increased by USD 0.3 billion, driven by higher derivatives RWA due to higher trading activity, partially offset by currency effects.

Market risk RWA decreased by USD 1.5 billion, driven by a decrease in asset size and other movements in the Investment Bank’s Global Markets business resulting from lower stressed value-at-risk (SVaR) levels, mainly due to its equities trading business. This was partially offset by an increase in regulatory VaR RWA.

The flow tables for credit risk, counterparty credit risk and market risk RWA in this section provide further details regarding the movements in RWA in the first quarter of 2021.

More information about capital management and RWA, including details regarding movements in RWA during the first quarter of 2021, is provided on pages 39–40 of the “Capital management” section of our first quarter 2021 report, available under “Quarterly reporting” at [ubs.com/investors](https://ubs.com/investors).

## OV1: Overview of RWA

USD million	RWA		Minimum capital requirements <sup>1</sup>
	31.3.21	31.12.20	
<b>1 Credit risk (excluding counterparty credit risk)</b>	<b>137,485</b>	<b>139,846</b>	<b>10,999</b>

<b>26 Floor adjustment<sup>5</sup></b>			
<b>27 Total</b>	<b>287,828</b>	<b>289,101</b>	<b>23,026</b>

<sup>1</sup> Calculated based on 8% of RWA. <sup>2</sup> Excludes settlement risk, which is separately reported in line 15 "Settlement risk." Includes RWA with central counterparties. The split between the sub-components of counterparty credit risk refers to the calculation of the exposure measure. <sup>3</sup> Not applicable until the implementation of the final rules on the minimum capital requirements for market risk (the Fundamental Review of the Trading Book). <sup>4</sup> Includes items subject to threshold deduction treatment that do not exceed their respective threshold and are risk-weighted at 250%. Items subject to threshold deduction treatment include significant investments in common shares of non-consolidated financial institutions (banks, insurance and other financial entities) and deferred tax assets arising from temporary differences. <sup>5</sup> No floor effect, as 80% of our Basel I RWA, including the RWA equivalent of the Basel I capital deductions, does not exceed our Basel III RWA, including the RWA equivalent of the Basel III capital deductions.

**RWA flow statements of credit risk exposures under IRB**

The CR8 table below provides a breakdown of the credit risk RWA movements in the first quarter of 2021 across movement categories defined by the BCBS. These categories are described on page 48 of our 31 December 2020 Pillar 3 report, available under "Pillar 3 disclosures" at [ubs.com/investors](https://ubs.com/investors).

Credit risk RWA under the advanced internal ratings-based (A-IRB) approach decreased by USD 2.1 billion to USD 106.2 billion during the first quarter of 2021.

The RWA increase from asset size movements of USD 2.8 billion was predominantly due to new loan commitments in the Investment Bank and an increase in Lombard loans in Global Wealth Management.

The RWA from asset quality decreased by USD 1.5 billion, mainly due to improvements in counterparty ratings and loss given default during the first quarter of 2021 in Global Wealth Management and Personal & Corporate Banking. Model updates of USD 0.6 billion were mainly driven by the recalibration of risk parameters for real estate and sovereign portfolios in Global Wealth Management and Group Functions. RWA decreased by USD 4 billion related to foreign exchange movements, mainly due to the strengthening of the US dollar against the Swiss franc, primarily in the Swiss mortgages portfolio in Personal & Corporate Banking and Global Wealth Management.

**CR8: RWA flow statements of credit risk exposures under IRB**

<i>USD million</i>		<i>RWA</i>
<b>1</b>	<b>RWA as of 31.12.20</b>	<b>108,281</b>

<b>9</b>	<b>RWA as of 31.3.21</b>	<b>106,186</b>

**RWA flow statements of counterparty credit risk exposures under the IMM and VaR**

Counterparty credit risk (CCR) RWA on derivatives under the internal model method (IMM) was unchanged at USD 19.4 billion during the first quarter of 2021, primarily as an asset size increase in the Investment Bank, mainly as a result of higher trading activity, was offset by a decrease in RWA related to foreign exchange movements, credit quality, and model updates.

CCR RWA on securities financing transactions (SFTs) under the VaR approach decreased by USD 1 billion to USD 7.4 billion during the first quarter of 2021, mainly due to an asset size decrease primarily related to market volatility, as well as foreign exchange movements.

**CCR7: RWA flow statements of CCR exposures under the internal model method (IMM) and value-at-risk (VaR)**

## RWA flow statements of market risk exposures under an IMA

The three main components that contribute to market risk RWA are value-at-risk (VaR), stressed value-at-risk (SVaR) and incremental risk charge (IRC). VaR and SVaR components include the RWA charge for risks not in VaR (RniV).

The MR2 table below provides a breakdown of the movement in market risk RWA in the first quarter of 2021 under an internal models approach across those components, pursuant to the movement categories defined by the BCBS. These categories are described on page 78 of our 31 December 2020 Pillar 3 report, available under "Pillar 3 disclosures" at [ubs.com/investors](https://ubs.com/investors).

Market risk RWA under an internal models approach decreased by USD 1.6 billion to USD 9.8 billion in the first quarter of 2021, driven primarily by a decrease in asset size and other movements in the Investment Bank's Global Markets business resulting from lower stressed VaR levels, mainly due to its equities trading business. This was partially offset by an increase in regulatory VaR RWA.

The VaR multiplier was unchanged compared with the prior quarter, at 3.0.

### MR2: RWA flow statements of market risk exposures under an internal models approach<sup>1</sup>

<b>Total loss-absorbing capacity</b>				
<b>Required total loss-absorbing capacity</b>	<b>24.55</b>	<b>70,661</b>	<b>8.63</b>	<b>89,626</b>
<b>Eligible total loss-absorbing capacity</b>	<b>34.98</b>	<b>100,669</b>	<b>9.70</b>	<b>100,669</b>
<b>Risk-weighted assets / leverage ratio denominator</b>				
Risk-weighted assets		<b>287,828</b>		
Leverage ratio denominator				<b>1,038,225</b>

<sup>1</sup> Includes applicable add-ons of 1.08% for RWA and 0.375% for LRD. <sup>2</sup> Our minimum CET1 leverage ratio requirement of 3.375% consists of a 1.5% base requirement, a 1.5% base buffer capital requirement, a 0.25% LRD add-on requirement and a 0.125% market share add-on requirement based on our Swiss credit business. <sup>3</sup> Includes outstanding low-trigger loss-absorbing additional tier 1 (AT1) capital instruments, which are available under the Swiss SRB framework to meet the going concern requirements until their first call date. As of their first call date, these instruments are eligible to meet the gone concern requirements. <sup>4</sup> A maximum of 25% of the gone concern requirements can be met with instruments that have a remaining maturity of between one and two years. Once at least 75% of the minimum gone concern requirement has been met with instruments that have a remaining maturity of greater than two years, all instruments that have a remaining maturity of between one and two years remain eligible to be included in the total gone concern capital. <sup>5</sup> The gone concern requirement after the application of the rebate for resolvability measures and the reduction for the use of higher quality capital instruments is floored at 8.6% and 3% for the RWA- and LRD-based requirements, respectively. This means that the combined reduction may not exceed 5.34 percentage points for the RWA-based requirement of 13.94% and 1.875 percentage points for the LRD-based requirement of 4.875%.

## Section 4 Leverage ratio

### Basel III leverage ratio

The Basel Committee on Banking Supervision (the BCBS) leverage ratio, as summarized in the "KM1: Key metrics" table in section 1 of this report, is calculated by dividing the period-end tier 1 capital by the period-end leverage ratio denominator (LRD).

The LRD consists of International Financial Reporting Standards (IFRS) on-balance sheet assets and off-balance sheet items. Derivative exposures are adjusted for a number of items, including replacement values and eligible cash variation margin netting, the current exposure method add-on and net notional amounts for written credit derivatives. The LRD also includes an additional charge for counterparty credit risk related to securities financing transactions (SFTs).

The table below shows the difference between total IFRS assets per IFRS consolidation scope and the BCBS total on-balance sheet exposures. Those exposures are the starting point for calculating the BCBS LRD, as shown in the LR2 table in this section.

The difference is due to the application of the regulatory scope of consolidation for the purpose of the BCBS calculation. In addition, carrying amounts for derivative financial instruments and SFTs are deducted from IFRS total assets. They are measured differently under BCBS leverage ratio rules and are therefore added back in separate exposure line items in the LR2 table.

### Difference between the Swiss SRB and BCBS leverage ratio

The LRD is the same under Swiss systemically relevant bank (SRB) and BCBS rules. However, there is a difference in the capital numerator between the two frameworks. Under BCBS rules only common equity tier 1 and additional tier 1 capital are included in the numerator. Under Swiss SRB rules we are required to meet going and gone concern leverage ratio requirements. Therefore, depending on the requirement, the numerator includes tier 1 capital instruments, tier 2 capital instruments and / or total loss-absorbing capacity (TLAC)-eligible senior unsecured debt.

### Reconciliation of IFRS total assets to BCBS Basel III total on-balance sheet exposures excluding derivatives and securities financing transactions

<i>USD million</i>	31.3.21	31.12.20 <sup>1</sup>
<b>On-balance sheet exposures</b>		
IFRS total assets	1,107,712	1,125,765
Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	(21,535)	(21,166)
Adjustment for investments in banking, financial, insurance or commercial entities that are outside the scope of consolidation for accounting purposes but consolidated for regulatory purposes		
Adjustment for fiduciary assets recognized on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure		
Less carrying amount of derivative financial instruments in IFRS total assets <sup>2</sup>	(183,352)	(192,370)
Less carrying amount of securities financing transactions in IFRS total assets <sup>3</sup>	(112,593)	(105,587)
Adjustments to accounting values		
<b>On-balance sheet items excluding derivatives and securities financing transactions, but including collateral</b>	<b>790,233</b>	<b>806,642</b>
Asset amounts deducted in determining BCBS Basel III tier 1 capital	(12,632)	(12,754)
<b>Total on-balance sheet exposures (excluding derivatives and securities financing transactions)</b>	<b>777,601</b>	<b>793,888</b>

<sup>1</sup> The respective period shown ending on 31 December 2020 does not reflect the effects of the temporary exemption that applied from 25 March 2020 until 1 January 2021 and was granted by FINMA in connection with COVID-19. Refer to the "Introduction and basis for preparation" section and to "Application of the temporary COVID-19-related FINMA exemption of central bank sight deposits" in the "Going and gone concern requirements and eligible capital" section of our 31 December 2020 Pillar 3 report, available under "Pillar 3 disclosures" at [ubs.com/investors](https://ubs.com/investors), for more information. <sup>2</sup> Consists of derivative financial instruments and cash collateral receivables on derivative instruments in accordance with the regulatory scope of consolidation. <sup>3</sup> Consists of receivables from securities financing transactions (SFTs), margin loans, prime brokerage receivables and financial assets at fair value not held for trading related to SFTs in accordance with the regulatory scope of consolidation.

During the first quarter of 2021, the LRD was stable at USD 1,038 billion. On-balance sheet exposures (excluding derivatives and SFTs) decreased by USD 16 billion, mainly driven by currency effects of USD 25 billion and lower high-quality liquid asset (HQLA) securities, partly offset by increases in

lending assets and cash and balances at central banks. Derivative exposures increased by USD 10 billion, mainly reflecting higher potential future exposure and market-driven movements. SFTs increased by USD 8 billion, mainly driven by excess cash re-investment and an increase in securities borrowing activities.

## LR2: BCBS Basel III leverage ratio common disclosure

## Section 5 Liquidity coverage ratio

### Liquidity coverage ratio

We monitor the liquidity coverage ratio (the LCR) in all significant currencies in order to manage any currency mismatch between high-quality liquid assets (HQLA) and the net expected cash outflows in times of stress.

Pillar 3 disclosure requirement	First quarter 2021 report section	Disclosure	First quarter 2021 report page number
Concentration of funding sources	Balance sheet and off-balance sheet	– Liabilities by product and currency	47

#### High-quality liquid assets

HQLA must be easily and immediately convertible into cash at little or no loss of value, especially during a period of stress. HQLA are assets that are of low risk and are unencumbered. Other characteristics of HQLA are ease and certainty of valuation, low correlation with risky assets, listing of the assets

on a developed and recognized exchange, existence of an active and sizeable market for the assets, and low volatility. Our HQLA predominantly consist of assets that qualify as Level 1 in the LCR framework, including cash, central bank reserves and government bonds.

#### High-quality liquid assets

	Average 1Q21 <sup>1</sup>			Average 4Q20 <sup>1</sup>		
	Level 1 weighted liquidity value <sup>2</sup>	Level 2 weighted liquidity value <sup>2</sup>	Total weighted liquidity value <sup>2</sup>	Level 1 weighted liquidity value <sup>2</sup>	Level 2 weighted liquidity value <sup>2</sup>	Total weighted liquidity value <sup>2</sup>
<i>USD billion</i>						
Cash balances <sup>3</sup>	145		145	133		133
Securities (on- and off-balance sheet)	58	18	76	63	18	81
<b>Total high-quality liquid assets<sup>4</sup></b>	<b>203</b>	<b>18</b>	<b>221</b>	<b>196</b>	<b>18</b>	<b>214</b>

<sup>1</sup> Calculated based on an average of 63 data points in the first quarter of 2021 and 63 data points in the fourth quarter of 2020. <sup>2</sup> Calculated after the application of haircuts and, where applicable, caps on Level 2 assets. <sup>3</sup> Includes cash and balances with central banks and other eligible balances as prescribed by FINMA. <sup>4</sup> Calculated in accordance with FINMA requirements.

### LCR development during the first quarter of 2021

In the first quarter of 2021, the UBS Group LCR decreased 1 percentage point to 151%, remaining above the prudential requirement communicated by the Swiss Financial Market Supervisory Authority (FINMA). The average LCR decrease was

primarily driven by increased net cash outflows from higher customer deposit balances. These outflows were mostly offset by higher high-quality liquid assets (HQLA) due to higher cash balances, partly offset by higher funding consumption in the business divisions.

### LIQ1: Liquidity coverage ratio

<i>USD billion, except where indicated</i>		Average 1Q21 <sup>1</sup>		Average 4Q20 <sup>1</sup>

## Section 1 Introduction

---

The sections on the following pages include capital and other regulatory information as of 31 March 2021 for UBS AG standalone, UBS Switzerland AG standalone, UBS Europe SE consolidated and UBS Americas Holding LLC consolidated.

Capital information in the following sections is based on Pillar 1 capital requirements. Entities may be subject to significant additional Pillar 2 requirements, which represent additional amounts of capital considered necessary and agreed with regulators based on the risk profile of the entities.

## Section 2 UBS AG standalone

---

### Key metrics of the first quarter of 2021

The table on the next page is based on the Basel Committee on Banking Supervision (the BCBS) Basel III rules.

During the first quarter of 2021, common equity tier 1 (CET1) capital was stable at USD 50.2 billion, as the operating profit before tax was offset by accruals for capital returns to UBS Group AG, current tax expenses and other items. Total capital decreased by USD 2.5 billion to USD 67.1 billion, mainly reflecting the call of a EUR 2 billion on-lend tier 2 capital instrument amounting to USD 2.4 billion.

Risk-weighted assets (RWA) increased by USD 12.2 billion to USD 317.8 billion during the first quarter of 2021, primarily driven by increases in credit and counterparty credit risk RWA,

including the gradual increase of risk weights for investments in the Swiss and foreign-domiciled subsidiaries in accordance with the relevant FINMA decree.

The leverage ratio exposure increased by USD 16 billion to USD 611 billion, mainly driven by higher derivative exposures and higher exposures from securities financing transactions.

The average high-quality liquid assets (HQLA) decreased by USD 1.9 billion to USD 82.0 billion driven by a reduction of cash balances. Average total net cash outflows decreased by USD 4.9 billion to USD 47.9 billion due to higher inflows from interbank funding provided.

<sup>1</sup> The fully loaded ECL accounting model excludes the transitional relief of recognizing ECL allowances and provisions in CET1 capital in accordance with FINMA Circular 2013/1 "Eligible capital – banks."

<sup>2</sup> Calculated as 8% of total RWA, based on total capital minimum requirements, excluding CET1 buffer requirements. <sup>3</sup> Swiss SRB going and gone concern requirements and information for UBS AG standalone are provided on the following pages in this section. <sup>4</sup> The temporary exemption that applied from 25 March 2020 until 1 January 2021 and was granted by FINMA in connection with COVID-19 had no net effect on UBS AG standalone in 2020. Refer to the "Introduction and basis for preparation" section and to the "UBS AG standalone" section of our 31 December 2020 Pillar 3 report, available under "Pillar 3 disclosures" at [ubs.com/investors](https://ubs.com/investors), for more information. <sup>5</sup> Calculated based on quarterly average. Refer to "Liquidity coverage ratio" in this section for more information.

### Swiss SRB going and gone concern requirements and information

The tables below and on the next page provide details of the Swiss systematically relevant bank (SRB) RWA- and leverage ratio denominator (LRD)-based going and gone concern requirements and information as required by FINMA; details regarding eligible gone concern instruments are provided on the next page.

More information about the going and gone concern requirements and information is provided on page 112 of our 31 December 2020 Pillar 3 report, available under "Pillar 3 disclosures" at [ubs.com/investors](https://ubs.com/investors).

## Section 3 UBS Switzerland AG standalone

### Key metrics of the first quarter of 2021

The table below is based on the Basel Committee on Banking Supervision (the BCBS) Basel III rules.

During the first quarter of 2021, common equity tier 1 (CET1) capital increased by CHF 0.2 billion to CHF 12.4 billion, mainly as a result of net profit. Tier 1 capital and total capital increased by CHF 0.4 billion to CHF 17.8 billion, reflecting the aforementioned increase in CET1 capital and a new additional tier 1 (AT1) capital issuance of CHF 0.7 billion, partly offset by the call of a CHF 0.5 billion AT1 capital instrument.

Risk-weighted assets (RWA) increased by CHF 2.9 billion to CHF 110.2 billion, primarily due to increased exposures across Lombard loans and securities financing transactions.

The leverage ratio exposure increased by CHF 10 billion to CHF 345 billion, mainly driven by on-balance sheet exposures from lending assets, as well as securities financing transactions.

The average high-quality liquid assets (HQLA) increased by CHF 4.5 billion to CHF 96.4 billion driven by higher cash balances. Average total net cash outflows increased by CHF 3.8 billion to CHF 65.8 billion, due to higher customer deposit balances.

**Swiss SRB going and gone concern requirements and information**

UBS Switzerland AG is considered a systemically relevant bank (an SRB) under Swiss banking law and is subject to capital regulations on a standalone basis. As of 31 March 2021, the going concern capital and leverage ratio requirements for UBS Switzerland AG standalone were 13.96%, including a countercyclical buffer of 0.02%, and 4.875%, respectively.

The gone concern requirements were 8.64% for the RWA-based requirement and 3.02% for the leverage ratio denominator (LRD)-based requirement.

The Swiss SRB framework and requirements applicable to UBS Switzerland AG standalone are the same as those applicable to UBS Group AG consolidated, with the exception of a lower gone concern requirement effective from 1 January 2020, corresponding to 62% of the Group's gone concern requirement (before applicable reductions).

<sup>1</sup> The leverage ratio denominator (LRD) and leverage ratios for 31 December 2020 do not reflect the effects of the temporary exemption that applied from 25 March 2020 until 1 January 2021 and was granted by FINMA in connection with COVID-19. Refer to the "Introduction and basis for preparation" section and to the "UBS Switzerland AG standalone" section of our 31 December 2020 Pillar 3 report, available under "Pillar 3 disclosures" at [ubs.com/investors](https://ubs.com/investors), for more information.

## Leverage ratio information

### Swiss SRB leverage ratio denominator

<i>CHF billion</i>	31.3.21	31.12.20 <sup>1</sup>
<b>Leverage ratio denominator</b>		
Swiss GAAP total assets	325.9	316.8
Difference between Swiss GAAP and IFRS total assets	4.5	4.5
Less: derivative exposures and SFTs <sup>2</sup>	(14.9)	(10.6)
<b>On-balance sheet exposures (excluding derivative exposures and SFTs)</b>	<b>315.5</b>	<b>310.7</b>
Derivative exposures	5.8	5.7
Securities financing transactions	8.1	3.8
Off-balance sheet items	15.7	15.2
Items deducted from Swiss SRB tier 1 capital	(0.2)	(0.2)
<b>Total exposures (leverage ratio denominator)</b>	<b>344.9</b>	<b>335.3</b>

<sup>1</sup> The respective period shown ending on 31 December 2020 does not reflect the effects of the temporary exemption that applied from 25 March 2020 until 1 January 2021 and was granted by FINMA in connection with COVID-19. Refer to the "Introduction and basis for preparation" section and to the "UBS Switzerland AG standalone" section of our 31 December 2020 Pillar 3 report, available under "Pillar 3 disclosures" at [ubs.com/investors](https://ubs.com/investors), for more information. <sup>2</sup> Consists of derivative financial instruments, cash collateral receivables on derivative instruments, receivables from securities financing transactions, and margin loans, as well as prime brokerage receivables and financial assets at fair value not held for trading, both related to securities financing transactions, in accordance with the regulatory scope of consolidation, which are presented separately under Derivative exposures and Securities financing transactions in this table.

## Liquidity coverage ratio

In the first quarter of 2021, the liquidity coverage ratio (LCR) of UBS Switzerland AG, which is a Swiss SRB, was 146%, remaining above the prudential requirement communicated by the Swiss Financial Market Supervisory Authority (FINMA) in connection with the Swiss Emergency Plan.

### Liquidity coverage ratio

<i>CHF billion, except where indicated</i>	Weighted value <sup>1</sup>	
	Average 1Q21 <sup>2</sup>	Average 4Q20 <sup>2</sup>
High-quality liquid assets	96	92
Total net cash outflows	66	62
<i>of which: cash outflows</i>	94	89
<i>of which: cash inflows</i>	29	27
<b>Liquidity coverage ratio (%)</b>	<b>146</b>	<b>148</b>

<sup>1</sup> Calculated after the application of haircuts and inflow and outflow rates, as well as, where applicable, caps on Level 2 assets and cash inflows. <sup>2</sup> Calculated based on an average of 63 data points in the first quarter of 2021 and 63 data points in the fourth quarter of 2020.

## Section 4 UBS Europe SE consolidated

The table below provides information about the regulatory capital components, capital ratios, leverage ratio and liquidity of UBS Europe SE consolidated based on the Pillar 1 requirements.

During the first quarter of 2021, common equity tier 1 (CET1) capital remained stable. Risk-weighted assets increased by EUR 1 billion to EUR 14.1 billion, driven by increases in market risk due to a change in model permissions and credit risk. Leverage ratio exposure increased by EUR 2.2 billion to EUR 43.6 billion, mainly reflecting an increase in securities financing transactions,

derivative instruments and other cash balances, partly offset by a decrease in high-quality liquid asset (HQLA)-eligible bonds.

The average liquidity coverage ratio increased by 6%, mainly due to a EUR 0.3 billion decrease in total net cash outflows.

Entities may also be subject to significant Pillar 2 requirements, which represent additional amounts of capital considered necessary and agreed with regulators based on the risk profile of the entities.

<sup>1</sup> Based on applicable EU regulatory rules. <sup>2</sup> There is no local disclosure requirement for the net stable funding ratio as at 31 March 2021. <sup>3</sup> Comparative figures have been restated to align with the UBS Europe SE Pillar 3 report and other regulatory reports as submitted to the European Central Bank (the ECB), which reflect the ECB's recommendation to EU financial institutions to refrain from making capital distributions until the ECB changes its guidance on dividend payments. <sup>4</sup> Calculated as 8% of total RWA, based on total capital minimum requirements, excluding CET1 buffer requirements. <sup>5</sup> This represents the CET1 ratio that is available for meeting buffer requirements. It is calculated as the CET1 ratio minus 4.5% and after considering, where applicable, CET1 capital that has been used to meet tier 1 and / or total capital ratio requirements under Pillar 1. <sup>6</sup> On the basis of tier 1 capital. <sup>7</sup> Figures are calculated on a twelve-month average.

## Section 5 UBS Americas Holding LLC consolidated

The table below provides information about the regulatory capital components and capital ratios, as well as the leverage ratio, of UBS Americas Holding LLC consolidated, based on the Pillar 1 requirements and in accordance with US Basel III rules.

Effective 1 October 2020, UBS Americas Holding LLC is subject to a stress capital buffer (an SCB) of 6.7%, in addition to the minimum capital requirements. The SCB was determined by the Federal Reserve Board following the completion of the annual Dodd-Frank Act Stress Testing (DFAST) and the Comprehensive Capital Analysis and Review (and based on DFAST results and planned future dividends). The SCB, which replaces the static capital conservation buffer of 2.5%, is subject to change on an annual basis or as otherwise determined by the Federal Reserve Board.

During the first quarter of 2021, the common equity tier 1 (CET1) ratio decreased from 22.5% to 21.2%, due to a USD 5.6 billion increase of risk-weighted assets (RWA), mainly driven by an increase in credit risk RWA. Leverage ratio exposure, calculated on an average basis, increased by USD 14.8 billion to USD 169.4 billion. The increase was due to a USD 14.7 billion increase in average assets, resulting from increases in cash held at Federal Reserve Banks and lending exposure.

Entities may also be subject to significant Pillar 2 requirements, which represent additional amounts of capital considered necessary and agreed with regulators based on the risk profile of the entities.

<sup>1</sup> The adoption of ASU 2019-12 in the second quarter of 2020 resulted in a retrospective removal of cumulative tax expense and related balances pertaining to UBS Americas Holding LLC within the IHC tax group for financial reporting purposes. For the purpose of regulatory reporting, this accounting change has been applied prospectively and the corresponding comparative regulatory key figures have not been restated.

<sup>2</sup> There is no local disclosure requirement for liquidity coverage ratio or net stable funding ratio for UBS Americas Holding LLC. <sup>3</sup> UBS Americas Holding LLC, as a designated category III bank, has been subject to a simplification of regulatory capital rules since 1 April 2020. The revisions simplify the framework for regulatory capital deductions and increase risk weights for certain assets, impacting the CET1 ratio by 0.3% as of 31 March 2021, 31 December 2020, 30 September 2020 and 30 June 2020. <sup>4</sup> Refer to the "Introduction and basis for preparation" section of the 31 December 2020 Pillar 3 report, available under "Pillar 3 disclosures" at [ubs.com/investors](https://ubs.com/investors), for information on the restatement of comparative information, as applicable. <sup>5</sup> Calculated as 8% of total RWA, based on total capital minimum requirements, excluding CET1 buffer requirements. <sup>6</sup> This represents the CET1 ratio that is available for meeting buffer requirements. It is calculated as the CET1 ratio minus 4.5%. <sup>7</sup> On the basis of tier 1 capital. <sup>8</sup> UBS Americas Holding LLC, as a designated category III bank, has been subject to supplementary leverage ratio (SLR) reporting since 1 April 2020. US Regulatory authorities temporarily eased the requirements for the SLR, allowing for the exclusion of US Treasury securities and deposits at the Federal Reserve Banks from the SLR denominator through March 2021. This exclusion resulted in an increase in the SLR of 187 bps on 31 March 2021, 170 bps on 31 December 2020, 136 bps on 30 September 2020 and 135 bps on 30 June 2020.

**Cautionary Statement** | This report and the information contained herein are provided solely for information purposes, and are not to be construed as solicitation of an offer to buy or sell any securities or other financial instruments in Switzerland, the United States or any other jurisdiction. No investment decision relating to securities of or relating to UBS Group AG, UBS AG or their affiliates should be made on the basis of this report. Refer to UBS's first quarter 2021 report and its Annual Report 2020, available at [ubs.com/investors](https://ubs.com/investors), for additional information.

**Rounding** | Numbers presented throughout this report may not add up precisely to the totals provided in the tables and text. Percentages and percent changes are calculated on the basis of unrounded figures. Information about absolute changes between reporting periods, which is provided in text and which can be derived from figures displayed in the tables, is calculated on a rounded basis.

**Tables** | Within tables, blank fields generally indicate that the field is not applicable or not meaningful, or that information is not available as of the relevant date or for the relevant period. Zero values generally indicate that the respective figure is zero on an actual or rounded basis. Percentage changes are presented as a mathematical calculation of the change between periods.
