

Advaxis Issues Letter to Stockholders Regarding Recent Special Meeting Results

December 9, 2021

Stockholders passed Proposals 1 (the Merger) and 4 (Executive Compensation)

Advaxis urges stockholders to vote "FOR" Proposal 2 at the upcoming special meeting in order to best position the company to build long term stockholder value

MONMOUTH JUNCTION, N.J., Dec. 09, 2021 (GLOBE NEWSWIRE) -- Advaxis, Inc. (Nasdaq: ADXS), a clinical-stage biotechnology company focused on the development and commercialization of immunotherapy products, today issued the following statement to stockholders:

Dear Fellow Advaxis Stockholders:

We are writing to you with highlights of the voting results of the reconvened special meeting of stockholders held on December 7, 2021. We are pleased that a majority of voting stockholders signaled support for the Biosight merger by approving Proposal 1 - the issuance of shares of common stock of Advaxis to shareholders of Biosight, pursuant to the terms of the merger agreement and the change of control resulting from the merger (the "merger proposal") and Proposal 4 - the compensation that will or may become payable by Advaxis to its named executive officers in connection with the merger.

While Proposal 2, the reverse stock split proposal, has also received the support of the majority of votes cast thus far, this proposal has a higher vote threshold and requires the support of the majority of total shares outstanding. Given that the approval of Proposal 1 signaling your support for the merger, the Company elected to adjourn the meeting to allow all stockholders adequate time to consider and vote on Proposal 2 at the second reconvened stockholders meeting on December 16, 2021.

As a reminder, approval of Proposal 2 is a condition for completing the merger of Advaxis and Biosight. As we have stated in previous communications with our stockholders, we strongly believe that the Biosight merger provides significant value to all Advaxis stockholders. Approval of Proposal 2 is required in order to consummate this transaction and would ensure that the combined company meets Nasdaq listing requirements.

A clear majority of stockholders who have voted thus far support the merger and reverse split proposals. In order to effectuate this, we need your support on Proposal 2. We believe that by passing Proposal 2 we can move forward toward building a stronger franchise for you. Due to the higher voting threshold on Proposal 2, not voting is essentially a vote against the Proposal and therefore against the merger.

It is important to realize that your vote matters:

- o No matter how many shares you own
- o Whether you previously voted against Proposal 2
- o Even if you already sold your shares but you were a shareholder of record on September 17, 2021

Your vote makes a difference in completing the merger!

If you still have questions regarding Proposal 2 and why it is so critical to securing our future as Biosight Therapeutics, please click [here](#) for a video.

In addition, two leading independent proxy advisory firms, Institutional Shareholder Services (ISS) and Glass Lewis & Co., have recommended that stockholders vote "FOR" all of the proposals at the special meeting. We strongly urge you to vote today in support of the remaining proposals.

How to Vote

To vote, or if you have already voted and would like to change your vote, or if you have any questions or need assistance voting your shares, please call the firm assisting us with the solicitation of proxies:

About Advaxis, Inc.

Advaxis, Inc. is a clinical-stage biotechnology company focused on the development and commercialization of proprietary *Lm*-based antigen delivery products. These immunotherapies are based on a platform technology that utilizes live attenuated *Listeria monocytogenes (Lm)* bioengineered to secrete antigen/adjuvant fusion proteins. These *Lm*-based strains are believed to be a significant advancement in immunotherapy as they integrate multiple functions into a single immunotherapy and are designed to access and direct antigen presenting cells to stimulate anti-tumor T cell immunity, activate the immune system with the equivalent of multiple adjuvants, and simultaneously reduce tumor protection in the tumor microenvironment to

enable T cells to eliminate tumors.
