Report Highlights:

The U.S.-Japan Trade Agreement (USJTA) entered Year 5 of the agreement implementation on April 1, 2023. This report is one in a series of product briefs highlighting the tariff benefits for specific commodities and products from Year 5 (2023) to Year 7 (2025) of the Agreement. Additional information is available at www.usdajapan.org/usjta/.

Overview: In 2022, the United States exported \$1.5 billion of pork products to Japan, making Japan the #2 overseas market for U.S. pork. The United States accounted for nearly one third of Japan’s total pork imports. Under the U.S.-Japan Trade Agreement, the United States obtained tariff treatment for pork equal to the countries in the Comprehensive and Progressive Agreement for Trans-Pacific Partnership. The years below correspond to Japan’s fiscal year beginning April 1.

Safeguard: Under the agreement, Japan applies U.S.-specific safeguards for carcasses/half carcasses, meat, and prepared pork products. The safeguard for meat started at 112% of the highest import volume of the previous three years. If the safeguard volume is surpassed, tariffs on certain U.S. pork exports will increase for the remainder of that year. The safeguard will be eliminated in Year 10 (2028).

Market Considerations: Japan imports around 50 percent of its pork supply. Pork is one of the most popular protein choices for Japanese households and is likely to overtake fish as the most consumed protein within the next few years. Ground seasoned pork (GSP) is a key ingredient for domestic sausage manufacturers. The U.S.-Japan Trade Agreement puts the United States on equal tariff footing with other major pork suppliers like Canada and the European Union.
