MATERIAL FACT

Log-In Announces the Acquisition of Containership

Log-In - Logística Intermodal S.A. (“Log-In” or “Company” - B3: LOGN3), in compliance with Article 157, Paragraph 4, of Law 6.404/76 and CVM Instruction 358/02 of the Brazilian Securities and Exchange Commission, informs its shareholders and the market in general that, on February 23, 2021, its wholly-owned subsidiary Log-In International GmbH (“Log-In GmbH”), based in Austria, concluded the purchase of a containership. The vessel was acquired from Klaveness Container AS and the transaction value was USD 20.0 million.

The vessel, with a nominal capacity of 2,550 TEUs (Twenty-foot Equivalent Unit), to be named as “Log-In Discovery”, was built at the Chinese shipyard Jiangsu Yangzijiang Shipbuilding. It provides 536 plugs for transporting refrigerated containers (Reefers), length overall of 208.90m and breadth of 29.80m.

The containership was selected because it has relevant characteristics to the composition of Log-In's fleet and its operations. It is a modern construction project, with the latest equipment, efficient consumption, generating fewer pollutant emissions, and greater bunker savings (ship's fuel), in addition to having a ballast water treatment system already installed.

In the context of the Company's strategy, the Log-In Discovery vessel may be used to expand services and in eventual operational needs.

The acquisition of the Log-In Discovery vessel is an additional milestone in the growth and modernization process of the Company's fleet, with a constant focus on safety, sustainability, operational excellence, and the ability to provide essential integrated logistics services.

Rio de Janeiro, February 23, 2021.

Pascoal Cunha Gomes
CFO and Investor Relations Officer
