

FORWARD LOOKING INFORMATION

This presentation may contain "forward-looking information" within the meaning of applicable Canadian securities legislation. All information, other than statements of historical facts, included in this presentation that address activities, events or developments that the Corporation expects or anticipates will or may occur in the future, including such things as future business strategy, competitive strengths, goals, expansion and growth of the Corporation's businesses, operations, plans and other such matters are forward-looking information.

When used in this presentation, the words "estimate", "plan", "anticipate", "expect", "intend", "believe" and similar expressions are intended to identify forward-looking information. This information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Corporation to be materially different from any future results, performance or achievements expressed or implied by such forward-looking information.

Examples of such forward-looking information include information pertaining to, without limitation, inherent hazards associated with mining operations, the future price of gold and silver, the market and global demand for gold and silver, the estimation of the Mineral Reserves and Mineral Resources, the realization of Mineral Reserve and Mineral Resource estimates, the timing and amount of estimated future production, costs of production, expansion of production capabilities, expected capital expenditures, costs and timing of development of new deposits, success of exploration activities, permitting risk in development projects, the ability to obtain surface rights to support planned infrastructure at the Corporation's exploration and development projects, currency fluctuations, requirements for additional capital, government regulation of mining operations, environmental risks and hazards, title disputes or claims and limitations on insurance coverage.

For a more detailed discussion of these factors and other risks, see "Risk Factors" as more fully described in the Company's filings with the Canadian Securities Administrators, including its Annual Information Form for the year ended December 31, 2020, available on SEDAR at www.sedar.com.

Although the Corporation has attempted to identify important factors that could cause actual results to differ materially, there may be other factors that cause results not to be as anticipated, estimated, or intended. There can be no assurance that such information will prove to be accurate as actual developments or events could cause results to differ materially from those anticipated. These include, among others, the factors described or referred to elsewhere herein, and include unanticipated and/or unusual events. Many of such factors are beyond the Corporation's ability to predict or control.

Readers of this presentation are cautioned not to put undue reliance on forward-looking information due to its inherent uncertainty. The Corporation disclaims any intent or obligation to update any forward-looking information, whether as a result of new information, future events or results or otherwise, unless require under applicable laws. This forward-looking information should not be relied upon as representing management's views as of any date subsequent to the date of this presentation.

References to dollars or "\$" are to U.S. dollars unless specified otherwise.

Upside with Reduced Risk

OPERATIONS

- Record Quarterly Production
- Record Quarterly Revenue
- Strong Cash Flow
- Solid Earnings

EXPLORATIO

- Magino exploration at depth
- La Colorada exploration below El Crestón pit

DEVELOPMENT

- Magino construction progress
- Florida Canyon convey and stack project
- San Agustin leach pad expansion

Argonaut's Commitment to Sustainability

2020 Highlights & 2021 Ongoing Programs

- Reduction in water consumption by 8% by switching to drip irrigation at operations.
- Reduced GHG by ~84 tonnes/year by installing solar panels.
- Plant and species rescue programs.
- Regular air quality monitoring.
- Regular environmental training programs and workshops.
- Community focused cleaning campaigns.

Upcoming Initiatives

- Switching to grid power at operations.
- Changes at Florida Canyon which reduces haul truck distances and fuel consumption, which reduces GHG.

Sustainability Report published April 2021

North American Focused Intermediate Producer

discussion of these Non-IFRS Measures.

Three Year Snapshot

	2019A	2020A	2021E		
GEO ⁽¹⁾ production	186,615	203,483 ⁽³⁾	210k – 250k		PRODUCTION rising
Cash costs ⁽²⁾ \$ per oz Au	\$1,041	\$936	950 – 1,050	\rightarrow	COSTS relatively flat
AISC ⁽²⁾ \$ per oz Au	\$1,299	\$1,244	1,250 – 1,350		Totalively flat
Cash Flow Activities from Operating Activities before changes in non-cash operating working capital	\$73.8M	\$95.0M	\$90M - \$140M ⁽⁴⁾	>	CASH FLOW rising

⁴ Assumes \$1,700 per ounce gold.

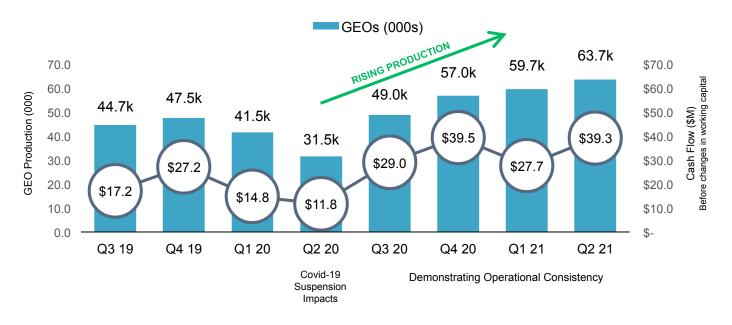

¹ GEOs are based on a conversion ratio of 85:1 for silver to gold for 2021, 80:1 for 2020 and 75:1 for 2019. The silver to gold ratio is based on the three-year trailing average silver to gold ratio.

² Please refer to section on slide 37 entitled "Non-IFRS Measures" for a discussion of these Non-IFRS Measures.

³ Florida Canyon production during Q1 2020 and Q2 2020 was under Alio Gold Inc. prior to the closing of the merger between Alio Gold Inc. and Argonaut on July 1, 2020. 2020 GEO production combined full year 2020 production from the El Castillo, San Agustin, La Colorada and Florida Canyon.

Recent Quarterly Production and Cash Flow

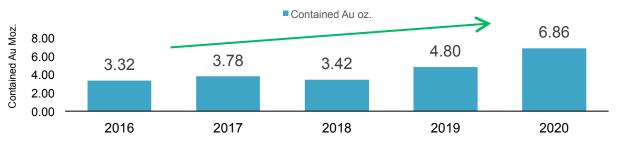

- Three consecutive quarters of record GEO production.
- Record cash flow in two of the past three quarters.

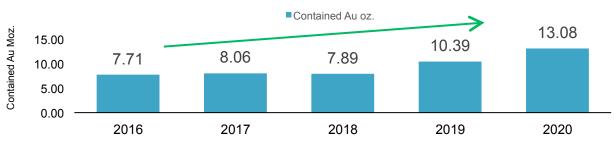

5 Year Mineral Reserves & Resources Growth

Consolidated M&I Mineral Resources¹

Consistently increasing our Mineral Reserve and Mineral Resource base through exploration and smart acquisition

¹ Please refer to Mineral Resource disclosure on slide 37 for full details.

Tracking vs. 2021 Guidance

2021 Production and Cost Guidance

	First Half 2021	Full Year 2021	Tracking vs.Guidance through H1 2021			
	FIRST HAIT 2021	Guidance	Below	Low End	High End	Above
GEO production	123,452	210,000 – 250-000			/	
Cash cost per gold ounce sold ¹	\$936	\$950 - \$1,050	/			
AISC per gold ounce sold ¹	\$1,247	\$1,250 - \$1,350	/			
Operating Cash Flow	67.0M	\$90M - \$140M			/	

On track to achieve 2021 consolidated production and cost guidance.

² Assumes exchanges rates of MXN:USD of 20:1 and CAD:USD of 1.25:1.

¹ Please refer to section on slide 37 entitled "Non-IFRS Measures" for a discussion of these Non-IFRS Measures.

Argonaut's Vision & Strategy

Transitioning our production and cost profile:

High-Cost Producer

Low-Cost Intermediate Producer

150k – 200k oz per year

300k – 500k oz per year

SUSTAINABLE GROWTH & REPLACEMENT of ounces

Executing Our Strategy - Our 3-Phase Approach

- HARVEST cash from existing operations
- Record annual cash flow from operating activities in 2020

 REPLACE depleted gold ounces through exploration at existing assets

- GROWTH through the development project pipeline
- All development stage assets provide much longer mine life and significantly lower operating costs

Phase 1 – HARVEST CASH Not sexy assets, but they make MONEY!

Notes and Disclosures

Argonaut Gold is a Canadian gold company engaged in exploration, mine development and production. Its primary assets are the EI Castillo mine and San Agustin mine, which together form the EI Castillo Complex in Durango, Mexico, the La Colorada mine in Sonora, Mexico and the Florida Canyon mine in Nevada, USA. The Company also holds the construction stage Magino project, the advanced exploration stage Cerro del Gallo project and several other exploration stage projects, all of which are located in North America.

QUALIFIED PERSON

Technical information included in this presentation was supervised and approved by Brian Arkell, Argonaut Gold's Vice President of Exploration, and a Qualified Person under National Instrument 43-101 – Standards of Disclosure for Mineral Projects. ("NI 43-101").

NATIONAL INSTRUMENT 43-101

Brian Arkell, Argonaut Gold's Vice-President of Exploration and a Qualified Person under NI 43-101, has read and approved the scientific and technical information in this presentation as it relates to Argonaut. This presentation contains information regarding mineral resources that are not mineral reserves and do not have demonstrated economic viability.

CAUTIONARY NOTE TO U.S. INVESTORS CONCERNING ESTIMATES OF MEASURED, INDICATED AND INFERRED RESOURCES

This presentation uses the terms "Measured", "Indicated" and "Inferred" Resources as defined in accordance with NI 43-101. United States readers are advised that while such terms are recognized and required by Canadian securities laws, the United States Securities and Exchange Commission does not recognize them. Under United States standards, mineralization may not be classified as a "reserve" unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve calculation is made. United States readers are cautioned not to assume that all or any part of the mineral deposits in these categories will ever be converted into reserves. In addition, "Inferred Resources" have a great amount of uncertainty as to their existence, and as to their economic and legal feasibility. It cannot be assumed that all or any part of an Inferred Resource will ever be upgraded to a higher category. United States readers are also cautioned not to assume that all or any part of an Inferred Resource exists, or is economically or legally mineable.

NON-IFRS MEASURES

The Company has included certain non-IFRS measures including "Cash cost per gold ounce sold", "All-in sustaining cost per gold ounce sold", "Adjusted net income" and "Adjusted earnings per share - basic" in this presentation to supplement its financial statements which are presented in accordance with IFRS. The Company believes that these measures provide investors with an alternate view to evaluate the performance of the Company by providing information on control of production costs, trends in cash costs of the Company and the underlying operating performance of the core mining business. Management also uses these measures to monitor internal performance. Non-IFRS measures do not have any standardized meaning prescribed under IFRS. Therefore, they may not be comparable to similar measures employed by other companies. The data is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS.

Please see the management's most recent discussion and analysis ("MD&A") for full disclosure on non-IFRS measures.

This presentation should be read in conjunction with the Company's unaudited interim condensed consolidated financial statements for the three and six months ended June 30, 2021 and associated MD&A, for the same period, which are available from the Company's website, www.argonautgold.com, in the "Investors" section under "Financial Filings", and under the Company's profile on SEDAR at www.sedar.com.

Mineral Resource Notes and Disclosures

(1) Mineral Reserves and Mineral Resources have been estimated as at December 31, 2020 in accordance withNational Instrument ("NI") 43-101 as required by Canadian securities regulatory authorities. Mineral Resources are presented inclusive of Mineral Reserves. Numbers may not sum due to rounding.

(2)The Mineral Reserves for El Castillo and San Agustin, which together form the El Castillo Complex, set out in the above table are based on updated models, mine plans and topography, including depletion through mining activities and changes to recovery and cost assumptions as of December 31, 2020. El Castillo used a gold price of \$1,500 per ounce; San Agustin used a gold price of \$1,500 per ounce and silver price of \$18.75 per ounce. Cut-off grades for El Castillo range from 0.10 g/t Au to 0.51 g/t Au depending on ore type; cut-off grades at San Agustin were 0.13 g/t Au.

(3)The Mineral Reserves for La Colorada set out in the above table are based on updated models, mine plans and topography as well as updated recoveries and cost assumptions as of December 31, 2020. La Colorada used a gold price of \$1,500 per ounce and a silver price of \$18.75 per ounce. Cut-off grade for La Colorada was 0.11 g/t gold equivalent ("AuEQ").

(4)The Mineral Reserves for Florida Canyon set out in the above table are based on updated models, mine plans and topography as well as updated recoveries and cost assumptions as of December 31, 2020. Florida Canyon used a gold price of \$1,500 per ounce. Cut-off grade for Florida Canyon was 0.17 g/t Au.

(5)The Mineral Reserves for the Magino Project set out in the table above were taken from the Magino Technical Report. The Mineral Reserves were estimated at a gold price of \$1,200 per ounce. The Mineral Reserves used a gold cutoff grade of 0.41 g/t.

(6)The Mineral Reserves for Cerro del Gallo set out in the table above were taken from the Cerro del Gallo Technical Report. The Mineral Reserves were estimated at a gold price of \$1,200 per ounce and a silver price of \$14.50 per ounce. The Mineral Reserves used a gold cutoff grade of between 0.30 g/t AuEQ and 0.39 g/t AuEQ depending on ore type.

(7)The Mineral Reserves for Ana Paula set out in the table above were taken from the Ana Paula Technical Report. The Mineral Reserves were estimated at a gold price of \$1,200 per ounce and a silver price of \$17.00 per ounce. The Mineral Reserves used a gold cutoff grade of 0.67 g/t Au.

(8)The M&I Mineral Resources and Inferred Mineral Resources for El Castillo and San Agustin, which together form the El Castillo Complex, set out in the above table were based on pit cones using \$1,800 per ounce gold and \$22.50 per ounce silver. Cut-off grades range from 0.08 g/t Au to 0.43 g/t Au for El Castillo and 0.10 to 0.23 g/t AuEQ for San Agustin, depending on ore type.

(9)The M&I Mineral Resources and Inferred Mineral Resources for La Colorada set out in the above table were based on pit cones using \$1,800 per ounce gold and \$22.50 per ounce silver. Cut-off grade was 0.09 g/t AuEQ.

(10)The M&I Mineral Resources and Inferred Mineral Resources for Florida Canyon set out in the above table were based on pit cones using \$1,800 per ounce gold. Cut-off grade was 0.15 g/t Au.

(11)The M&I Mineral Resources and Inferred Mineral Resources for the Magino Project set out in the table above were taken from the Magino Technical Report. The Mineral Resources were estimated at a gold price of \$1,300 per ounce. The Mineral Resources used a gold cutoff of 0.25 g/t.

(12)The M&I Mineral Resources and Inferred Mineral Resources for the Cerro del Gallo Project set out in the table above were taken from the Cerro del Gallo Technical Report. The Mineral Resources were estimated at a gold price of \$1,600 per ounce and a silver price of \$20.00 per ounce. Cut-off grades range from 0.25 g/t AuEQ to 0.30 g/t AuEQ depending on ore type.

(13) The M&I Mineral Resources and Inferred Mineral Resources for Ana Paula set out in the table above were taken from the Ana Paula Technical Report. The Mineral Resources were estimated at a gold price of \$1,350 per ounce and a silver price of \$17.00 per ounce. The Mineral Resources used a gold cutoff grade of 0.60 g/t Au for the Mineral Resources amenable to open pit extraction and 1.65 g/t Au for the Mineral Resources amenable to underground extraction.

(14)The M&I Mineral Resources and Inferred Mineral Resources for the San Antonio Project set out in the table above were taken from the San Antonio Technical Report. The Mineral Resources were estimated at a gold price of \$1,500 per ounce using a cutoff grade of 0.11 g/t Au for oxide and transition and 0.15 g/t Au for sulphide.
