1H FY2021 vs 1H FY2020 Performance

Delivering Strong Portfolio Performance

Gross Revenue and NPI Distributable Income

■ Gross Revenue and NPI increased <u>15.2% and 17.1%</u> to S\$66.6 mil and S\$51.4 mil respectively. Stronger performance mainly driven by incremental revenue from the Australian portfolio acquisition, stronger performance across the portfolio and appreciation of the Australian dollar.

(S\$ mil)

- Distributable income was <u>36.6% higher</u> in 1H FY2021 as compared to 1H FY2020 mainly due to higher NPI and contributions from ALOG's investments in the New LAIVS Trust and Oxford Property Fund⁽²⁾.
- On a like-for-like basis, including the S\$2.0 mil retained distributable income in 1H FY2020 and excluding the S\$0.6 mil capital distribution in 1H FY2021, distributable income would have also been up **24.4%**⁽¹⁾.

Notes:

For the purpose of like-for-like comparison.

Including the S\$2.0 mil retained distributable income in 1H FY2020.

Healthy Balance Sheet

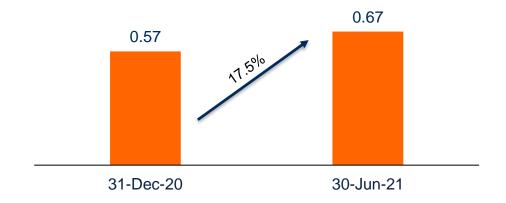

As at 30 June 2021

- Total Investment Portfolio increased by 38.5% to S\$1,773.8 million as at 30 June 2021 from S\$1,281.0 million as at 31 December 2020. This is mainly due to:
 - Addition of the new Australian portfolio (including fund investments) following the acquisition completion; and
 - Compression of capitalization rates, led by assets in Australia followed by Singapore resulting in a valuation uplift of S\$104.0 million.
- NAV per Unit increased by 17.5% to S\$0.67 as at 30 June 2021 from S\$0.57 as at 31 December 2020.

Green Initiatives and Sustainability Efforts

Reducing Carbon **Footprint**

Energy and Emission Management

Green **Financing**

- Over 21,000 solar panels installed across the rooftops of three of ALOG's warehouses⁽¹⁾ with a combined capacity of 8.0 Megawatt peak
- Avoidance of over four million kilogrammes of carbon dioxide emissions a year
- Equivalent to powering more than 2,000 four-room flats for a year
- Committed our Singapore logistics properties to net zero carbon under direct control by 2030, as part of ARA Group's signatory to the WorldGBC Net Zero Carbon Buildings Commitment
- Progressive upgrading of mechanical & electrical fittings with energy efficient technology and use of motion sensors to reduce energy consumption within the properties
- Minimise reliance on equipment with heavy energy consumption and shifting towards energy efficient design

- Dialogues and discussions with tenants to highlight key benefits of reduced and responsible energy usage
- Encouraging environmental practices among tenants and suppliers by including environmental issues in business discussions and initiatives
- Incorporate United Nations-supported Principles of Responsible Investment into our investment and asset management processes
- Successfully launched inaugural S\$80 million green interest rate swap ("IRS") in July 2021 to strengthen ALOG's green funding sources
- Bespoke sustainability-linked IRS that aligns economic terms to specific ESG KPIs
- IRS economic terms linked to two specific green targets: (i) progressive reduction of carbon emission intensity of the multi-tenanted buildings within ALOG's Singapore portfolio; and (ii) increased usage of renewable energy annually by a pre-determined figure

Logistics Market Poised for Strong Growth

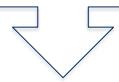

ARALOGOS LOGISTICS TRUST

Strong Underlying Fundamentals

Requirements for Inventory Buffer Leading to Higher Demand

- General change of supply chain strategy by users from "Just in time" to Just in case" to mitigate inventory disruptions brought about by Covid-19 and freight congestion.
- National stockpiling requirements to provide inventory buffer for essential products.

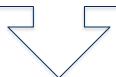

Robust Demand for Warehouse Space with Increasing Storage Needs

Growing Demand for Cold-Storage Facilities

- Growing demand for greater variety and quality of food products due to growing affluence of consumers.
- Increased trade in perishable products requiring cold storage.
- Omnichannel distribution of groceries leading to higher demand for cold storage space.

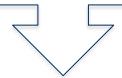

Increasing Appetite for More and Larger Cold Storage Facilities

Acceleration of E-commerce Growth

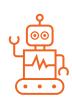

- Significant shift in consumer behaviour from physical to online purchases, accelerated by movement restrictions brought about by Covid-19.
- Ongoing demand for last mile delivery facilities to support the need for quick turnaround delivery schedules to maintain competitiveness in the e-fulfillment landscape.

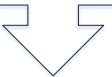

Heightened Demand for Strategically Located Warehouse Space

Growth of 3PLs Securing Quality Warehouses with Good Specifications

- High-cost automation systems such as Automatic Storage & Retrieval Systems (ASRS) and Automated Sorting Systems are increasingly popular among large e-commerce companies.
- The increased reliance on such automation systems to enhance warehousing operating efficiency is expected to further stimulate demand for quality warehouses with good specifications to be able to house such systems.

More Demand for Modern and Quality Warehouses with High Specs

Market Outlook

Singapore

- Continued healthy demand for logistics/warehouse space, underpinned by requirements from 3PL players, e-commerce and food logistics segments. Leasing activity also remained stable in 1H 2021. Transactions were led mainly by lease renewals and consolidation of multiple smaller sites into a single larger site, followed by new take-up and expansion.
- While the demand for short-term requirements for government-related stock piling has tapered, limited new supply and sustained demand has continued to keep warehouse vacancy levels low.
- Prime logistics rents are expected to see slight increases due to continued demand from occupiers for prime locations to ensure shorter delivery timings.

Market Outlook

Australia

- Higher spending on consumer staples and rise in the manufacturing and storage of pharma goods helped to drive demand for new space. Strong appetite is also seen from logistics occupiers trying to fulfil mandates for 3PL contract space.
- Demand continues to be underpinned by the transport, postal warehousing, and wholesale retail sectors, making industrial and logistics an attractive class for investors. Growth in e-commerce activity and infrastructure investment is supporting the logistics sector as well as demand for warehouses in strategic locations.
- Looking ahead, in view of further confidence that e-commerce penetration rate will continue to increase and drive a higher structural demand for industrial and logistics space, developers have continued to move forward with new projects. 2021 is forecasted to reach a new tipping point with more than 2.2 million sqm of new industrial supply expect to be completed.
