The leading contributor to the September 2024 tourism industry performance was the U.S. market with 519,987 visitors and registered as the second highest September visitor count on record (the highest September number occurred in 2022 with 566,189 visitors). The September 2024 U.S. visitor count was 18.4 percent higher than the same month in 2019. For the first nine months of 2024, the U.S. visitor count was 6.0 percent higher than the same period in 2019.

The rebound of Hawai'i's cruise industry, which has surpassed pre-pandemic 2019 levels, was also a contributing factor in September's performance. Nine out-of-state cruise ships brought 18,655 visitors to the islands in September 2024, more than double the number of visitors who came by cruise ships in September 2023 and 3.0 percent higher than September 2019. For the first nine months of 2024, there were 58 arrivals from out-of-state cruise ships that carried more than 106,000 visitors, a growth of 11.5 percent compared to year-to-date 2019.

Current airlift and travel agency bookings data indicate that the U.S. market will still be leading Hawai'i's tourism recovery in the future months. We expect that the foreign exchange rate will be more favorable to foreign visitors and the international market will improve in the near future. During the first nine months of 2024, the recovery of foreign visitors was at 63.6 percent, while Japanese visitor recovery was at 44.5 percent.
