**Security Description:**

*The goal of this section is to provide a clear understanding of the material rights and privileges of the securities issued by the company. Please provide the below information for each class of the company's equity securities, as applicable:*

**1. For common equity, describe any dividend, voting and preemption rights.**

Each share of Common Stock shall have, for all purposes one (1) vote per share. Subject to the preferences applicable to Preferred Stock outstanding at any time, the holders of shares of Common Stock shall be entitled to receive such dividends and other distributions in cash, property or shares of stock of the Corporation as may be declared thereon by the Board of Directors from time to time out of assets or funds of the Corporation legally available, therefore. The holders of Common Stock issued and outstanding have and possess the right to receive notice of shareholders meetings and to vote upon the election of directors or upon any other matter as to which approval of the outstanding shares of Common Stock or approval of the common shareholders is required or requested.

**2. For preferred stock, describe the dividend, voting, conversion, and liquidation rights as well as redemption or sinking fund provisions.**

The number of shares constituting the Series A Preferred Stock shall be One Million (1,000,000). Such number of shares may not be increased or decreased without the vote of the holder(s) of the Series A Preferred Stock. The holders of any shares of Series A Preferred Stock shall not be entitled to dividends or any distribution in the case

of liquidation of the Corporation. The holders of Series A Preferred Stock shall have the right to vote 51% of the then issued and outstanding common stock or equivalent equity of the Corporation. The shares of Series A Preferred Stock shall not be convertible into any class of equity of the Corporation. The Certificate of Incorporation of the Corporation shall not be further amended in any manner which would materially alter or change the powers, preferences or special rights of the Series A Preferred Stock so as to affect them adversely without the affirmative vote of the holders of at least eighty-five percent (85%) of the outstanding shares of Series A Preferred Stock, voting together as a single class.

**(1) Describe any other material rights of common or preferred stockholders.**

The Series A Preferred Stock shall rank (i) senior to any other class or series of outstanding Preferred Shares or series of capital stock of the Corporation, (ii) prior to all of the Corporation's common stock, and (iii) prior to any other class of series of capital stock of the Corporation hereafter created ("Junior Securities") and in each case as to distributions of assets upon liquidation, dissolution or winding up of the Corporation, whether voluntary or involuntary (all such distributions being referred to collectively as "Distributions")

**4. Describe any material modifications to rights of holders of the company's securities that have occurred over the reporting period covered by this report.**

There have been no material modifications to the rights of holders of the Company's securities that have occurred over the reporting period covered by this report.

**3) Issuance History**

*The goal of this section is to provide disclosure with respect to each event that resulted in any changes to the total shares outstanding of any class of the issuer's securities in the past two completed fiscal years and any subsequent interim period.*

#### 4) Issuer's Business, Products and Services

The purpose of this section is to provide a clear description of the issuer's current operations. Ensure that these descriptions are updated on the Company's Profile on [www.OTCMarkets.com](http://www.OTCMarkets.com).

A. Summarize the issuer's business operations (If the issuer does not have current operations, state "no operations")

3DX Industries, Inc. is focused on the additive metal manufacturing segment within the manufacturing industry. 3DX has the capability of manufacturing a wide variety of products using its 3D metal printing system, 3D plastic printing as well as more traditional methods of precision manufacturing. 3DX offers additive and traditional manufacturing services as well as product design, engineering and assembly services to its customers. Our comparative period over period revenue increased slightly year over year, however, anticipated growth continues to be restricted due to a lack of capital for expansion.

The Company's manufacturing services include additive manufacturing through its 3D Metal Printing and Process, and more traditional manufacturing methods using CNC precision machining processes. 3DX uses a binder jet additive manufacturing system for 3D Metal printing. The 3D Metal printing process materializes an object—or mold for an object—layer by layer out of powdered material, a chemical binder and a digital file. The process of metal printing allows for the creation, or materialization of Complex internal geometries, undercuts, angled passages and multi-piece assemblies with accuracy and less waste/environmental impact. The 3D Printing Process is highly accurate and capable of printing complex geometric parts.

3DX also has a fully operational CNC machine shop in house consisting of various CNC machining centers including four fanuc robo-drills and numerous additional support equipment. Having a precision machining center under the same roof as our additive manufacturing systems allows for the complete one stop shop advantage we offer to our customers. 3DX will continually seek to expand the range of size and geometric complexity of the parts we can make using these processes. The Company will continue to expand the variety of materials we are able to support and to identify additional manufacturing processes to which we can apply using the latest technology in order to better serve our client base.

We have the ability to serve product developers worldwide who bring new ideas to market in the form of products, industrial and consumer, containing one or more custom parts and components. Many of these product developers use 3D CAD software to create digital models representing their custom part designs that are then used to create physical parts for prototyping, functional testing, market evaluation and/or production. Custom prototype parts play a critical role in the product development process, as they provide product developers with the ability to confirm their intended performance requirements and explore design alternatives.

Additive manufacturing processes such as 3D Metal Printing can be used to quickly and efficiently produce a physical representation of a part or product. As technology in this area continues to evolve these parts are becoming more accurate and are able to meet the product developers' requirements for dimensional accuracy, cosmetics and material properties. There are instances where the use of more traditional manufacturing processes is required such as CNC Precision machining, in order to finalize the proto-type or production part. As a supplement to additive manufacturing, our CNC machining facility can be used to produce extreme precision, high-quality custom parts in metal or plastic.

The ability to meet our clients' needs both in the additive manufacturing sector and in the traditional precision machining arena will make 3DX Industries a leader in the manufacturing market. Having both processes in house is a significant time and cost saving advantage for 3DX's clients and will allow 3DX to integrate seamlessly into the metal printing market. 3DX is in a position to provide 3D Metal Printing, Precision Tooling, 3D Rapid Proto-Typing, CNC Milling, Large Capacity Milling and Injection Mold Tooling.

C. Describe the issuers' principal products or services.

3DX is capable of manufacturing a wide variety of products and components both consumer and industrial, using its inhouse 3D Metal Printing System, and through its more traditional precision machining services.

## **5) Issuer's Facilities**

*The goal of this section is to provide investors with a clear understanding of all assets, properties or facilities owned, used or leased by the issuer and the extent in which the facilities are utilized.*

In responding to this item, please clearly describe the assets, properties or facilities of the issuer. Describe the location of office space, data centers, principal plants, and other property of the issuer and describe the condition of the properties. Specify if the assets, properties, or facilities are owned or leased and the terms of their leases. If the issuer does not have complete ownership or control of the property, describe the limitations on the ownership.

Our current business address is 6920 Salashan Pkwy Suite D101, Ferndale, WA 98248. The space is approximately 8,588 square feet. On February 29, 2016, the Company extended a lease agreement originally entered into in January 2014 for a term of five years expiring February 28, 2021. On February 22, 2021, the Company extended the lease agreement for a further five years expiring February 28, 2026. We currently rent this space for approximately \$5,410 per month, with base rent escalating by \$1,032 year over year.

Future minimum lease payments are set out below:

Fiscal year ended 2024	16,488
Fiscal year ended 2025	68,704
Fiscal year ended 2026	23,016
Total future minimum lease payments	108,208

It is our belief that the space is adequate for our immediate needs. Additional space may be required as we expand our operations. We do not foresee any significant difficulties in obtaining any required additional facilities.

**3DX INDUSTRIES, INC.**  
**Notes to Unaudited Condensed Financial Statements**  
**For The Nine Months Ended July 31, 2024 and 2023**

**NOTE 1 - ORGANIZATION AND BASIS OF PRESENTATION**

3DX Industries, Inc. (the “Company”) was incorporated in the State of Nevada on October 23, 2008. The Company’s principal activity presently is manufacturing, and our head office is located near Bellingham WA, USA. The Company manufactures consumer and corporate products using an additive manufacturing method through 3D Metal printing technology and conventional precision manufacturing processes.

**Going Concern**

The Company has accumulated losses since inception, and as of July 31, 2024, had a combined accumulated deficit of \$23 million and had negative working capital of \$3.4 million. These conditions raise substantial doubt as to the Company's ability to continue as a going concern. These financial statements do not include any adjustments that might result from the outcome of this uncertainty. These financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

Management recognizes that the Company must generate additional funds to enable it to continue operating. Management intends to raise additional financing through debt and or equity financing and by other means that it deems necessary, with the goal of moving forward and sustaining a prolonged growth in its strategy phases. However, no assurance can be given that the Company will be successful in raising additional capital. Further, even if the company raises additional capital, there can be no assurance that the Company will achieve profitability or positive cash flow. If management is unable to raise additional capital and expected significant revenues do not result in positive cash flow, the Company will not be able to meet its obligations and may have to cease operations.

**NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**Basis of Presentation**

The accompanying condensed financial statements have been prepared by the Company in accordance with accounting principles generally accepted in the United States (“GAAP”), and pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”).

**Use of Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

**Cash and Cash Equivalents**

The Company considers all highly liquid debt instruments and other short-term investments with a maturity date of six months or less, when purchased, to be cash equivalents.

**Concentration of Credit Risk**

Financial instruments that potentially subject the Company to the concentration of credit risk consist principally of cash deposits. Accounts at each institution are insured by the Federal Deposit Insurance Corporation (“FDIC”) up to \$250,000. At July 31, 2024 and October 31, 2023, the Company had no balances in excess of the FDIC insured limit.

**For The Nine Months Ended July 31, 2024 and 2023**

**NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Business Acquisitions**

In accordance with ASC 805, *Business Combinations*, acquisitions are recorded using the acquisition method of accounting. The Company includes the operating results of acquired entities from their respective dates of acquisition. The Company recognizes and measures the identifiable assets acquired and liabilities assumed as of the acquisition date fair value, where applicable. The excess, if any, of total consideration transferred in a business combination over the fair value of identifiable assets acquired and liabilities assumed is recognized as goodwill. Costs incurred as a result of a business combination other than costs related to the issuance of debt or equity securities are recorded in the period the costs are incurred.

**Property and Equipment**

Property and equipment are stated at cost. Major renewals and improvements are charged to the asset accounts while replacements, maintenance and repairs that do not improve or extend the lives of the respective assets are expensed. At the time property and equipment are retired or otherwise disposed of, the asset and related accumulated depreciation accounts are relieved of the applicable amounts. Gains or losses from retirements or sales are credited or charged to income.

**Long-Lived Assets**

The Company accounts for its long-lived assets in accordance with Accounting Standards Codification (“ASC”) Topic 360-10-05, “Accounting for the Impairment or Disposal of Long-Lived Assets.” ASC Topic 360-10-05 requires that long-lived assets be reviewed for impairment whenever events or changes in circumstances indicate that the historical cost carrying value of an asset may no longer be appropriate. The Company assesses recoverability of the carrying value of an asset by estimating the future net cash flows expected to result from the asset, including eventual disposition. If the future net cash flows are less than the carrying value of the asset, an impairment loss is recorded equal to the difference between the asset’s carrying value and fair value or disposable value.

**Fair Value of Financial Instruments**

Pursuant to ASC No. 820, “Fair Value Measurements and Disclosures,” the Company is required to estimate the fair value of all financial instruments included on its balance sheet. The Company’s financial instruments consist of accounts payables and notes and loans payable. The Company considers the carrying value of such amounts in the financial statements to approximate their fair value due to the short-term nature of the respective instrument.

**Convertible Debt Instruments**

If the conversion features of conventional debt instruments provide for a rate of conversion that is below market value at issuance, this feature is characterized as a beneficial conversion feature (“BCF”). A BCF is recorded by the Company as a debt discount pursuant to ASC Topic 470-20 “Debt with Conversion and Other Options.” In those circumstances, the convertible debt is recorded net of the discount related to the BCF, and the Company amortizes the discount to operations over the life of the debt using the effective interest method.

**Revenue Recognition**

The Company applies ASC 606 — Revenue from Contracts with Customers. Under ASC 606, the Company recognizes revenue from the commercial sales of products, licensing agreements and contracts to perform pilot studies by applying the following steps: (1) identify the contract with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to each performance obligation in the contract; and (5) recognize revenue when each performance obligation is satisfied. The Company generally recognizes revenue upon the shipment of finished goods and issuance of an associated invoice. Freight billed to customers is included in revenues, and all freight expenses paid by the Company are included in the general and administrative expense.

**NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**Accounts Receivable and Allowance for Doubtful Accounts**

Accounts receivable is reported at the invoiced amount less an allowance for doubtful accounts. On a periodic basis, the Company evaluates its accounts receivable and establishes an allowance for doubtful accounts based on a combination of specific customer circumstances and credit conditions taking into account the history of write-offs and collections. A receivable is considered past due if payment has not been received within the period agreed upon in the invoice. Accounts receivable is written off after all collection efforts have been exhausted. Recoveries of trade receivables previously written off are recorded when received.

**Stock-Based Compensation**

The Company records stock-based compensation in accordance with ASC 718, *Compensation - Stock Compensation*, using the fair value method on grant date. All transactions in which goods or services are the consideration received for the issuance of equity instruments are accounted for based on the fair value of the equity instruments issued. The expense attributable to the Company's directors is recognized over the period the amounts are earned and vested, and the expense attributable to the Company's non-employees is recognized when vested.

**ASC 842 Leases**

ASU No. 2016-02. In February 2016, the Financial Accounting Standards Board ("FASB") issued ASU 2016-02, *"Lease (Topic 842)"*, a new lease standard requiring lessees to recognize lease assets and lease liabilities for most leases classified as operating leases under previous U.S. GAAP. A lessee should recognize in the statement of financial position a liability to make lease payments (the lease liability) and a right-of-use asset ("ROU" asset) representing its right to use the underlying asset for the lease term. The guidance is effective for fiscal years beginning after December 15, 2018, with early adoption permitted. The Company has adopted this standard effective January 1, 2019.

**Loss Per Share of Common Stock**

In accordance with ASC Topic 280 – "Earnings Per Share", the basic loss per common share is computed by dividing net loss available to common stockholders by the weighted average number of common shares outstanding. Diluted loss per common share is computed similar to basic loss per common share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common shares had been issued and if the additional common shares were dilutive.

The following potential common shares have been excluded from the computation of diluted net loss per share for the period ended July 31, 2024, because the effect would have been antidilutive:

Common Shares issuable - convertible notes	5,386,585
Common Shares issuable - compensation	<u>9,450,000</u>
Total	<u>14,836,585</u>

**Recent Accounting Pronouncements**

The Company's management has evaluated all recent accounting pronouncements since the last audit through the issuance date of these financial statements. In the Company's opinion, none of the recent accounting pronouncements will have a material effect on the financial statements.

**NOTE 3 - MINING CLAIMS**

**Rodeo Creek Project, Nevada**

On February 22, 2010, the Company entered into an agreement with Carlin Gold Resources, Inc., (“Carlin”) in which Carlin assigned the Company all of its rights, title, and interest in an exploration agreement between it and Trio. The assigned exploration agreement was dated January 28, 2010. Trio leased and had an option to purchase a 100% interest in 29 unpatented lode mining claims located in Nevada within the Carlin Gold Trend (the “Claims”). The Claims are subject to a 1.5% net smelter return (“NSR”).

In December 2014, the Company notified Trio of its intent to terminate its agreement on the Rodeo Creek Property. The Company will have no further interest in this project. The Company has earned a 2% Net Smelter Royalty on the property, however such NSR has not been formally recorded as at the date of this report.

**NOTE 6 – ACCRUED COMPENSATION, CONVERTIBLE NOTE**

On January 15, 2013, the Company granted a third-party corporation the option to convert up to 25% of all accrued compensation resulting from unpaid consulting fees due to it at that date into shares of the Company's common stock at a conversion price of \$0.001 per share, and to convert the remaining 75% of accrued compensation due it at that date into shares of the Company's common stock at a conversion price of \$0.01 per share. The agreement could be cancelled by either party. At January 15, 2013, the amount of accrued compensation due the consultant was \$175,000. Pursuant to ASC Topic 470-20, "Debt with Conversion and Other Options," the accrued compensation was recorded net of a discount that includes the debt's beneficial conversion feature of \$148,077. Since the accrued compensation is immediately convertible into common stock, discounts arising from beneficial conversion features are directly charged to expense pursuant to ACS 470-20-35. The beneficial conversion features were calculated using trading prices ranging from \$0.001 to \$0.01 per share and an effective conversion price of \$0.02 per share.

Effective December 18, 2013, the terms of the above noted conversion feature were modified limiting the number of conversion shares the consultant can receive and hold at any point in time to no more than 9.99% of the Company's common stock then outstanding. In June 2014, the consultant assigned \$1,000 of accrued, payable compensation to a third party, who converted the \$1,000 into 1,000,000 shares of the Company's common stock at a conversion price of \$.001 per share.

On August 28, 2017, the Company and the third party entered into a share conversion amendment agreement. Under the agreement, the conversion price of any and all remaining debt shall be set at \$0.02 per share, equaling a maximum of 8,700,000 shares available upon conversion, and the maximum debt that can be converted per quarter shall not exceed 10% of outstanding debt. The amendment was effective as of July 30, 2017.

Effective on September 28, 2020, the Company and the third party entered into a share conversion amendment agreement. Under the agreement, the conversion price of any and all remaining debt shall be set at \$0.01 per share, equaling a maximum of 17,400,000 shares available upon conversion. The holder, and all persons affiliated with the holder, may not own more than 9.5% of the Company's Common Stock then outstanding after any notice of conversion.
