States Schedule Public Hearings on Spiny Dogfish Draft Addendum VII

Arlington, VA – The Atlantic coastal states of New Jersey, Maryland, and Virginia have scheduled hearings to gather public input on the Draft Addendum VII to the Interstate Fishery Management Plan for Spiny Dogfish, which considers potential measures to maintain consistency with the federal Fishery Management Plan in response to the proposed rule to implement Spiny Dogfish Framework Adjustment 6.

In addition to the December 11 hearing where all stakeholders are welcome to participate, if you are unable to attend your state’s scheduled hearing, you are welcome to participate in any of the virtual hearings. The public hearing details follow:

Date and Hearing Format	State/Agency	Contact
Wednesday, December 11 Hybrid Hearing 6:00 – 8:00 p.m.	All Participating States (ME – FL)	James Boyle 703.842.0740
Tuesday, December 17 Webinar Hearing 6:00 – 8:00 p.m.	New Jersey Dept. of Environmental Protection	Joe Cimino (VA) 609.748.2063
Wednesday, December 18 Webinar Hearing 6:00 – 8:00 p.m.	Maryland Dept. of Natural Resources & Virginia Marine Resources Commission	Michael Luisi (MD) 443.758.6547 Pat Geer (VA) 757.247.2236

The Mid-Atlantic and New England Fishery Management Councils developed Spiny Dogfish Framework Adjustment 6 in response to a 2021 Biological Opinion and 2022 Action Plan that called for reducing bycatch of Atlantic sturgeon in spiny dogfish gillnet fisheries. The coastwide Atlantic sturgeon population is made up of five distinct population segments, all of which are listed as threatened or endangered under the Endangered Species Act, and Atlantic sturgeon harvest has been under a coastwide moratorium in federal and state waters since 1998. The Commission’s Fishery Management Plan for Atlantic Sturgeon maintains the moratorium

The Atlantic States Marine Fisheries Commission was formed by the 15 Atlantic coastal states in 1942 for the promotion and protection of coastal fishery resources. The Commission serves as a deliberative body of the Atlantic coastal states, coordinating the conservation and management of nearshore fishery resources, including marine, shell and diadromous species.

through at least 2038, and while the [2024 stock assessment update](#) showed signs of improvement, the stock remains depleted coastwide.

The Board initiated Draft Addendum VII in August 2024 after the Councils recommended measures to NOAA Fisheries to prohibit overnight soaks for federal spiny dogfish permit holders on gillnets with 5"-10" mesh in November and May for a certain area of state and federal waters off of New Jersey, as well as for gillnets of 5.25"-10" mesh in November through March in specified areas off of Maryland and Virginia. The options in the Draft Addendum aim to establish equivalent overnight soak restrictions for spiny dogfish harvesters in state waters that do not possess a federal spiny dogfish permit.
