Management Commentary

Commenting on the first quarter results, Robert E. Cauley, Chairman and Chief Executive Officer, said, "The current economic and interest rate cycle that began with the onset of the COVID-19 pandemic in 2020 followed by the Federal Reserve (the "Fed") raising its policy rate by 525 basis points in a little over a year in 2022 and 2023 was supposed to end in early 2024 as the Fed pivoted and started to remove its tight monetary policy. The economy and inflation are simply too strong for this to occur, at least not yet. While market participants still expect some easing of monetary policy over the course of 2024, as reflected in the pricing of forward overnight rates, the starting point continues to get pushed out further and further into the future and the magnitude of eases continues to decrease. Incoming economic data so far in 2024 is consistent with firming inflation and a solid economy, and the labor market shows no signs of weakness. Stimulative fiscal policy out of Washington is working against restrictive monetary policy from the Fed. While inflation has decreased significantly from the peak seen in 2023, it still remains far above the Fed's target level of 2.0%.

"In spite of the ongoing strength of the economy and interest rates retracing much of the declines seen over the last two months of 2023, Agency RMBS securities performed fairly well during the first quarter of 2024. Our Agency RMBS portfolio outperformed our hedge positions as mortgage spreads tightened, and we had a modest increase in book value for the quarter in spite of interest rate increases. Orchid has continued to shift away from the lower coupon bias we maintained throughout the tightening cycle that began in 2022 and have added new origination, higher coupon securities. We continue to hold a significant allocation to some lower coupon securities as we believe these securities still offer superior total return potential to newer origination, higher coupon securities. However, we have used the proceeds from capital raising activity and paydowns to add higher coupon, low pay-up specified pools and hedged these positions predominantly with swaps. We expect to continue to add higher coupons to mitigate the lower carry of our legacy assets, thus allowing us to retain their higher return potential in the event of a normalization of rates and U.S. Treasury curve shape.

"Looking forward, at this juncture it is unclear how the economy and inflation will evolve. In turn this will dictate what actions, if any, the Fed will take and whether or not interest rates will continue to rise, and to what extent. As for Agency RMBS, when the first quarter of 2024 ended, the spread of the current coupon, 30-year fixed rate security was trading at a spread to comparable duration U.S. Treasuries near the low end of the prevailing range in place since mid-2022, shortly after the Fed began its policy firming. As with the economy, inflation and interest rates, the outlook for the performance of Agency RMBS is unclear and there is the possibility the sector could underperform in the near term if the current trends discussed above continue."

Details of First Quarter 2024 Results of Operations

The Company reported net income of \$19.8 million for the three month period ended March 31, 2024, compared with net income of \$3.5 million for the three month period ended March 31, 2023. Interest income on the portfolio in the first quarter was down approximately \$0.7 million from the fourth quarter of 2023. The yield on our average Agency RMBS increased from 4.71% in the fourth quarter of 2023 to 5.03% for the first quarter of 2024, repurchase agreement borrowing costs increased from 5.15% for the fourth quarter of 2023 to 5.54% for the first quarter of 2024. Book value increased by \$0.02 per share in the first quarter of 2024. The increase in book value reflects our net income of \$0.38 per share and the dividend distribution of \$0.36 per share. The Company recorded net realized and unrealized losses of \$0.50 per share on Agency RMBS assets and derivative instruments, including net interest income on interest rate swaps.

Prepayments

For the quarter ended March 31, 2024, Orchid received \$74.3 million in scheduled and unscheduled principal repayments and prepayments, which equated to a 3-month constant prepayment rate (“CPR”) of approximately 6.0%. Prepayment rates on the two RMBS sub-portfolios were as follows (in CPR):

Three Months Ended	Structured		Total Portfolio (%)
	PT RMBS Portfolio (%)	RMBS Portfolio (%)	
March 31, 2024	6.0	5.9	6.0
December 31, 2023	5.4	7.9	5.5

(1) Effective duration is the approximate percentage change in price for a 100 basis point change in rates. An effective duration of 4.550 indicates that an interest rate increase of 1.0% would be expected to cause a 4.550% decrease in the value of the RMBS in the Company's investment portfolio at March 31, 2024. An effective duration of 4.400 indicates that an interest rate increase of 1.0% would be expected to cause a 4.400% decrease in the value of the RMBS in the Company's investment portfolio at December 31, 2023. These figures include the structured securities in the portfolio, but do not include the effect of the Company's funding cost hedges. Effective duration quotes for individual investments are obtained from The Yield Book, Inc.

Financing, Leverage and Liquidity

As of March 31, 2024, the Company had outstanding repurchase obligations of approximately \$3,711.5 million with a net weighted average borrowing rate of 5.46%. These agreements were collateralized by RMBS and U.S. Treasury securities with a fair value, including accrued interest, of approximately \$3,891.0 million and cash pledged to counterparties of approximately \$7.4 million. The Company's adjusted leverage ratio, defined as the balance of repurchase agreement liabilities divided by stockholders' equity, at March 31, 2024 was 7.7 to 1. At March 31, 2024, the Company's liquidity was approximately \$215.7 million consisting of cash and cash equivalents and unpledged RMBS (not including unsettled securities purchases). To enhance our liquidity even further, we may pledge more of our structured RMBS as part of a repurchase agreement funding, but retain the cash in lieu of acquiring additional assets. In this way we can, at a modest cost, retain higher levels of cash on hand and decrease the likelihood we will have to sell assets in a distressed market in order to raise cash. Below is a list of our outstanding borrowings under repurchase obligations at March 31, 2024.

Hedging

In connection with its interest rate risk management strategy, the Company economically hedges a portion of the cost of its repurchase agreement funding against a rise in interest rates by entering into derivative financial instrument contracts. The Company has not elected hedging treatment under U.S. generally accepted accounting principles ("GAAP") in order to align the accounting treatment of its derivative instruments with the treatment of its portfolio assets under the fair value option election. As such, all gains or losses on these instruments are reflected in earnings for all periods presented. At March 31, 2024, such instruments were comprised of U.S. Treasury note ("T-Note") and Secured Overnight Financing Rate ("SOFR") futures contracts, dual digital options, interest rate swap agreements, interest rate swaption agreements, interest rate caps, interest rate floors and contracts to sell to-be-announced ("TBA") securities.

The table below presents information related to the Company's T-Note and SOFR futures contracts at March 31, 2024.

(2) Cost basis represents the forward price to be paid (received) for the underlying Agency RMBS.

(3) Market value represents the current market value of the TBA securities (or of the underlying Agency RMBS) as of period-end.

(4) Net carrying value represents the difference between the market value and the cost basis of the TBA securities as of period-end and is reported in derivative assets (liabilities) at fair value in our balance sheets.

Dividends

In addition to other requirements that must be satisfied to qualify as a REIT, we must pay annual dividends to our stockholders of at least 90% of our REIT taxable income, determined without regard to the deduction for dividends paid and excluding any net capital gains. We intend to pay regular monthly dividends to our stockholders and have declared the following dividends since our February 2013 IPO.

(1) On April 10, 2024, the Company declared a dividend of \$0.12 per share to be paid on May 30, 2024. The effect of this dividend is included in the table above but is not reflected in the Company's financial statements as of March 31, 2024.

Book Value Per Share

The Company's book value per share at March 31, 2024 was \$9.12. The Company computes book value per share by dividing total stockholders' equity by the total number of shares outstanding of the Company's common stock. At March 31, 2024, the Company's stockholders' equity was \$481.6 million with 52,826,169 shares of common stock outstanding.

Capital Allocation and Return on Invested Capital

The Company allocates capital to two RMBS sub-portfolios, the pass-through RMBS portfolio, consisting of mortgage pass-through certificates issued by Fannie Mae, Freddie Mac or Ginnie Mae (the “GSEs”) and collateralized mortgage obligations (“CMOs”) issued by the GSEs (“PT RMBS”), and the structured RMBS portfolio, consisting of interest-only (“IO”) and inverse interest-only (“IIO”) securities. As of March 31, 2024, approximately 95.6% of the Company’s investable capital (which consists of equity in pledged PT RMBS, available cash and unencumbered assets) was deployed in the PT RMBS portfolio. At December 31, 2023, the allocation to the PT RMBS portfolio was also approximately 95.6%.

The table below details the changes to the respective sub-portfolios during the quarter.

Stock Offerings

On October 29, 2021, we entered into an equity distribution agreement (the “October 2021 Equity Distribution Agreement”) with four sales agents pursuant to which we could offer and sell, from time to time, up to an aggregate amount of \$250,000,000 of shares of our common stock in transactions that were deemed to be “at the market” offerings and privately negotiated transactions. We issued a total of 9,742,188 shares under the October 2021 Equity Distribution Agreement for aggregate gross proceeds of approximately \$151.8 million, and net proceeds of approximately \$149.3 million, after commissions and fees, prior to its termination in March 2023.

On March 7, 2023, we entered into an equity distribution agreement (the “March 2023 Equity Distribution Agreement”) with three sales agents pursuant to which we may offer and sell, from time to time, up to an aggregate amount of \$250,000,000 of shares of our common stock in transactions that are deemed to be “at the market” offerings and privately negotiated transactions. Through March 31, 2024, we issued a total of 14,680,114 shares under the March 2023 Equity Distribution Agreement for aggregate gross proceeds of approximately \$143.2 million, and net proceeds of approximately \$140.9 million, after commissions and fees.

Stock Repurchase Program

On July 29, 2015, the Company’s Board of Directors authorized the repurchase of up to 400,000 shares of our common stock. The timing, manner, price and amount of any repurchases is determined by the Company in its discretion and is subject to economic and market conditions, stock price, applicable legal requirements and other factors. The authorization does not obligate the Company to acquire any particular amount of common stock and the program may be suspended or discontinued at the Company’s discretion without prior notice. On February 8, 2018, the Board of Directors approved an increase in the stock repurchase program for up to an additional 904,564 shares of the Company’s common stock. Coupled with the 156,751 shares remaining from the original 400,000 share authorization, the increased authorization brought the total authorization to 1,061,316 shares, representing 10% of the Company’s then outstanding share count. On December 9, 2021, the Board of Directors approved an increase in the number of shares of the Company’s common stock available in the stock repurchase program for up to an additional 3,372,399 shares, bringing the remaining authorization under the stock repurchase program to 3,539,861 shares, representing approximately 10% of the Company’s then outstanding shares of common stock. On October 12, 2022, the Board of Directors approved an increase in the number of shares of the Company’s common stock available in the stock repurchase program for up to an additional 4,300,000 shares, bringing the remaining authorization under the stock repurchase program to 6,183,601 shares, representing approximately 18% of the Company’s then outstanding shares of common stock. This stock repurchase program has no termination date.

From the inception of the stock repurchase program through March 31, 2024, the Company repurchased a total of 5,081,134 shares at an aggregate cost of approximately \$77.0 million, including commissions and fees, for a weighted average price of \$15.16 per share. About Orchid Island Capital, Inc.

Orchid Island Capital, Inc. is a specialty finance company that invests on a leveraged basis in Agency RMBS. Our investment strategy focuses on, and our portfolio consists of, two categories of Agency RMBS: (i) traditional pass-through Agency RMBS, such as mortgage pass-through certificates, and CMOs issued by the GSEs, and (ii) structured Agency RMBS, such as IOs, IIOs and principal only securities, among other types of structured Agency RMBS. Orchid is managed by Bimini Advisors, LLC, a registered investment adviser with the Securities and Exchange Commission.

Forward Looking Statements

Statements herein relating to matters that are not historical facts, including, but not limited to statements regarding interest rates, inflation, liquidity, pledging of our structured RMBS, funding levels and spreads, prepayment speeds, portfolio composition, positioning and repositioning, hedging levels, leverage ratio, dividends, growth, return opportunities, the supply and demand for Agency RMBS and the performance of the Agency RMBS sector generally, the effect of actual or expected actions of the U.S. government, including the Fed, market expectations, capital raising, future opportunities and prospects of the Company, the stock repurchase program, geopolitical uncertainty and general economic conditions, are forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. The reader is cautioned that such forward-looking statements are based on information available at the time and on management's good faith belief with respect to future events, and are subject to risks and uncertainties that could cause actual performance or results to differ materially from those expressed in such forward-looking statements. Important factors that could cause such differences are described in Orchid Island Capital, Inc.'s filings with the Securities and Exchange Commission, including its most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q. - (1) Average RMBS, borrowings and stockholders' equity balances are calculated using two data points, the beginning and ending balances.
- (2) The adjusted leverage ratio is calculated by dividing ending repurchase agreement liabilities by ending stockholders' equity.
- (3) The economic leverage ratio is calculated by dividing ending total liabilities adjusted for net notional TBA positions by ending stockholders' equity.
- (4) Portfolio yields and costs of funds are calculated based on the average balances of the underlying investment portfolio/borrowings balances and are annualized for the quarterly periods presented.
- (5) Represents the interest cost of our borrowings and the effect of derivative agreements attributed to the period related to hedging activities, divided by average borrowings.
- (6) Average interest rate spread is calculated by subtracting average cost of funds from average yield on RMBS.
- (7) Average economic interest rate spread is calculated by subtracting average economic cost of funds from average yield on RMBS.
