NOTE 1: BASIS OF PRESENTATION

The consolidated financial statements include First Foundation Inc. ("FFI") and its wholly owned subsidiaries: First Foundation Advisors ("FFA"), First Foundation Bank ("FFB" or the "Bank") and First Foundation Insurance Services ("FFIS"), a wholly owned subsidiary of FFB (collectively referred to as the "Company"). All inter-company balances and transactions have been eliminated in consolidation. The results of operations reflect any interim adjustments, all of which are of a normal recurring nature and which, in the opinion of management, are necessary for a fair presentation of the results for the interim period presented. The results for the 2014 interim periods are not necessarily indicative of the results expected for the full year.

The consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America and prevailing practices within the banking industry. In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sh eet and revenues and expenses for the period. Actual results could differ significantly from those estimates.

The accompanying unaudited consolidated financial statements include all information and footnotes required for interim financial statement presentation. The financial information provided herein is written with the presumption that the users of the interim financial statements have read, or have access to, the most recent Annual Report which contains the latest available audited consolidated finan cial statements and notes thereto, as of December 31, 2013.

Certain reclassifications have been made to the prior year consolidated financial statements to conform to the 2014 presentation.

Accounting pronouncements: In January 2014, the FASB issued ASU No . 2014-04, "Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure. "The objective of this guidance is to clarify when an in substance repossession or foreclosure occurs, that is, when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan receivable should be derecognized and the real estate property recognized. ASU No. 2014-04 states that an in substance repossession or foreclosure occurs, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either (1) the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure or (2) the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. Additionally, ASU No. 2014-04 requires interim and annual disclosure of both (1) the amount of foreclosed residential real estate property held by the creditor and (2) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. ASU No. 2014-04 is effective for interim and annual reporting periods beginning after December 15, 2014. The adoption of ASU No. 2014-04 is not expected to have a material impact on the Company's Consolidated Financial Statements.

NOTE 2: FAIR VALUE

Fair value is the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Current accounting guidance establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize t he use of unobservable inputs when measuring fair value. The guidance describes three levels of inputs that may be used to measure fair value:

- Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.
- Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.
- Level 3: Significant unobservable inputs that reflect an entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level input t hat is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

NOTE 2: FAIR VALUE – (Continued)

The carrying amounts and estimated fair values of financial instruments are as follows as of:

	(Carrying	Fair Value Measurement Level							
(dollars in thousands)		Value		1		2		3		Total
March 31, 2014:										
Assets:										
Cash and cash equivalents	\$	50,287	\$	50,287	\$	-	\$	-	\$	50,287
Securities AFS		73,257		-		73,257		-		73,257
Loans		938,694		-		-		985,195		985,195

Liabilities:										
Deposits		854,684		579,932		274,745		-		854,677
Borrowings		140,875		-		119,000		21,875		140,875
December 31, 2013:										
Assets:										
Cash and cash equivalents	\$	56,954	\$	56,954	\$	-	\$	-	\$	56,954
Securities AFS		59,111		-		59,111		-		59,111
Loans		893,730		-		-		933,695		933,695
Investment in FHLB stock		6,721		-		-		6,721		6,721
Liabilities:										
Deposits		802,037		556,171		245,920		-		802,091
Borrowings		141,063		-		134,000		7,063		141,063

These estimates do not reflect any premium or discount that could result from offering the Company's entire holdings of a particular financial instrument for sale at one time, nor do they attempt to estimate the value of anticipated future business related to the instruments. In addition, the tax ramifications related to the realization of unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in any of these estimates.

The following methods and assumptions were used by management to estimate the fair value of its financial instruments:

<u>Cash and Cash Equivalents</u>: The carrying amounts of cash and short-term instruments approximate fair values and are classified as Level 1.

<u>Securities Available-for-Sale:</u> Fair values for securities available for sale are generally determined by matrix pricing, which is a mathematical technique widely used in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities (Level 2).

<u>Loans</u>: Fair values of loans, excluding loans held for sale, are estimated using discounted cash flow analyses, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality resulting in a Level 3 classification. The methods utilized to estimate the fair value of loans do not necessarily represent an exit price.

<u>Investment in FHLB Stock:</u> The carrying amount approximates fair value, as the stock may be sold back to the FHLB at carrying value and no other market exists for the sale of this stock (Level 3).

<u>Deposits:</u> The fair values disclosed for demand deposits, including interest and non- interest demand accounts, savings, and certain types of money market accounts are, by definition, equal to the carrying amount at the reporting date resulting in a Level 1 classification. Fair values for fixed rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities on time deposits resulting in a Level 2 classification.

NOTE 2: FAIR VALUE – (Continued)

<u>Borrowings:</u> The carrying value of overnight FHLB advances approximates fair values because of the short-term maturity of this instrument, resulting in a Level 2 classification. The \$21.9 million term loan is a variable rate loan for which the rate adjusts quarterly, and as such, its fair value is based on its carrying value resulting in a Level 3 classification.

Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding current economic conditions, risk characteristics of various financial instruments and other factors. Those estimates that are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision a re included in Level 3. Changes in assumptions could significantly affect the fair values presented.

The following table provides quantitative information about the Company's nonrecurring Level 3 fair value measurements of its REO as of:

(dollars in thousands)	Valuation Technique	Unobservable Input	Estimate Used	Fa	ir Value
March 31, 2014:	m: 1D . A . 1	G 11:	0.00/	Φ.	1.075
Undeveloped land	Third Party Appraisal	Selling costs	9.0%	\$	1,875
December 31, 2013: Undeveloped land	Third party appraisal	Selling costs	9.0%	\$	375

Appraisals are performed by certified general appraisers (for commercial properties) or certified residential appraisers (for residential properties) whose qualifications and licenses have been reviewed and verified by the Company. Once received, a member of the Appraisal Department reviews the assumptions and approaches utilized in the appraisal as well as the overall resulting fair value in comparison with independent data sources such as recent market data or industry-wide statistics. Adjustments are rou tinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available.

In certain cases we use discounted cash flow or similar internal modeling techniques to determine the fair value of our Level 3 assets and liabilities. Use of these techniques requires determination of relevant inputs and assumptions, some of which represent significant unobservable inputs. Accordingly, changes in these unobservable inputs may have a significant impact on fair value. Certain of these unobservable inputs will (in isolation) have a directionally consistent impact on the fair value of the instrument for a given change in that input. Alternatively, the fair value of the instrument may move in an opposite direction for a given change in another input. Where multiple inputs are used within the valuation technique of an asset or liability, a change in one input in a certain direction may be offset by an opposite change in another input having a potentially muted impact to the overall fair value of that particular instrument. Additionally, a change in one unobservable input may result in a change to another unobservable input (that is, changes in certain inputs are interrelated to one another), which may counteract or magnify the fair value impact.

NOTE 3: SECURITIES

The following table provides a summary of the Company's securities AFS portfolio as of:

	Aı	nortized	Gross Unrealized					Estimated		
(dollars in thousands)	Cost		Cost Gains		Gains	Losses			Fair Value	
March 31, 2014:										
US Treasury securities	\$	300	\$	-	\$		\$	300		
FNMA and FHLB Agency notes		10,496		-		(528)		9,968		
Agency mortgage-backed securities		64,329		108		(1,448)		62,989		
Total	\$	75,125	\$	108	\$	(1,976)	\$	73,257		
December 31, 2013:										
US Treasury securities	\$	300	\$	-	\$	-	\$	300		
FNMA and FHLB Agency notes		10,496		-		(716)		9,780		
Agency mortgage-backed securities		50,983		-		(1,952)		49,031		
Total	\$	61,779	\$	_	\$	(2,668)	\$	59,111		

NOTE 3: SECURITIES – (Continued)

The US Treasury securities are pledged as collateral to the State of California to meet regulatory requirements related to the Bank's trust operations.

All unrealized losses had been in a continuous loss position less than 12 months as of March 31, 2014. Unrealized losses on FNMA and FHLB agency notes and agency mortgage-backed securities have not been recognized into income because the issuer bonds are of high credit quality, management does not intend to sell and it is not more likely than not that management would be required to sell the securities prior to their anticipated recovery, and the decline in fair value is largely due to changes in interest r ates. The fair value is expected to recover as the bonds approach maturity.

The scheduled maturity of securities AFS and the related weighted average yield is as follows as of March 31, 2014:

(dollars in thousands)	s than Year	Through 5 years	Through 10 Years	 After 10 Years	 Total
Amortized Cost:					
US Treasury securities	\$ 300	\$ -	\$ -	\$ -	\$ 300
FNMA and FHLB Agency notes	-	-	10,496	-	10,496
Total	\$ 300	\$	\$ 10,496	\$ -	\$ 10,796
Weighted average yield	0.21%	0.00%	1.78%	0.00%	1.74%
Estimated Fair Value:					
US Treasury securities	\$ 300	\$ -	\$ -	\$ -	\$ 300
FNMA and FHLB Agency notes	-	-	9,968	-	9,968
Total	\$ 300	\$ -	\$ 9,968	\$ -	\$ 10,268

Agency mortgage backed securities are excluded from the above table because such securities are not due at a single maturity date. The weighted average yield of the agency mortgage backed securities as of March 31, 2014 was 2.57 %.

NOTE 4: LOANS

The following is a summary of our loans as of:

(dollars in thousands)		March 31, 2014	De	December 31, 2013		
Outstanding principal balance:				_		
Loans secured by real estate:						
Residential properties:						
Multifamily	\$	401,877	\$	405,984		
Single family		263,922		227,096		
Total real estate loans secured by residential properties		665,799		633,080		
Commercial properties		166,290		154,982		
Land and construction		2,345		3,794		
Total real estate loans		834,434		791,856		
Commercial and industrial loans		97,248		93,255		
Consumer loans		17,201		18,484		
Total loans		948,883		903,595		
Premiums, discounts and deferred fees and expenses		(39)		50		
Total	\$	948,844	\$	903,645		

As of March 31, 2014 and December 31, 2013, the principal balances shown above are net of unaccreted discount related to loans acquired in an acquisition of \$2.1 million and \$3.1 million, respectively.

NOTE 4: LOANS – (Continued)

In 2012, the Company purchased loans, for which there was, at acquisition, evidence of deterioration of credit quality since origination and it was probable, at acquisition, that all contractually required payments would not be collected. The carrying amount of these purchased credit impaired loans is as follows as of:

(dollars in thousands)		March 31, 2014		
Outstanding principal balance:				
Loans secured by real estate:				
Commercial properties	\$	5,007	\$	5,543
Land		-		2,331
Total real estate loans		5,007		7,874
Commercial and industrial loans		2,467		2,489
Consumer loans		257		260
Total loans		7,731		10,623
Unaccreted discount on purchased credit impaired loans		(1,921)		(2,945)
Total	\$	5,810	\$	7,678

Accretable yield, or income expected to be collected on purchased credit impaired loans, is as follows as of:

(dollars in thousands)	arch 31, 2014	ember 31, 2013
Beginning balance	\$ 2,349	\$ 1,531
Accretion of income	(200)	(730)
Reclassifications from nonaccretable difference	-	1,879
Disposals	_	(331)
Ending balance	\$ 2,149	\$ 2,349

The following table summarizes our delinquent and nonaccrual loans as of:

	Past Due and Still Accruing 90 Days					Total Past Due and							
(dollars in thousands)	30-	59 Days	60-	89 Days		r More	No	naccrual		naccrual	Current		Total

NOTE 4: LOANS – (Continued)

Accrual of interest on loans is discontinued when reasonable doubt exists as to the full, timely collection of interest or principal and, generally, when a loan becomes contractually past due for ninety days or more with respect to principal or interest. The accrual of interest may be continued on a well-secured loan contractually past due ninety days or more with respect to principal or interest if the loan is in the process of collection or collection of the principal and interest is deemed probable. The Bank considers a loan to be impaired when, based upon current information and events, it believes it is probable that the Bank will be unable to collect all amounts due according to the contractual terms of the loan agreement. The determination of past due, nonaccrual or impairment status of loans acquired in an acquisition, other than loans deemed purchased impaired, is the same as loans we originate.

As of March 31, 2014 and December 31, 2013, the Company had one loan with a balance of \$0.1 million classified as a troubled debt restructurings ("TDR") which is included as nonaccrual in the table above. This loan was classified as a TDR as a result of a reduction in required principal payments and an extension of the maturity date of the loan.

NOTE 5: ALLOWANCE FOR LOAN LOSSES

The following is a rollforward of the Bank's allowance for loan losses for the quarters ended March 31:

(dollars in thousands)	Beginning Balance		Provision for Loan Losses		Charge-offs		Recoveries	Ending Balance
2014:						<u> </u>	-	
Real estate loans:								
Residential properties	\$	6,157	\$	98	\$	-	\$ -	\$ 6,255
Commercial properties		1,440		153		-	=	1,593
Commercial and industrial loans		2,149		8		-	=	2,157
Consumer loans		169		(24)		-	-	145
Total	\$	9,915	\$	235	\$	_	\$ -	\$ 10,150
2013:

The column labeled "Unaccreted Credit Component Other Loans" represents the amount of unaccreted credit component discount for loans acquired in the Merger that were not classified as purchased impaired or individually evaluated for impairment as of the dates indicated, and the stated principal balance of the related loans. The unaccreted credit component discount is equal to 1.12% and 1.23% of the stated principal balance of these loans as of March 31, 2014 and December 31, 2013, respectively. In addition to this unaccreted credit component discount, an additional \$0.2 million of the ALLL has been provided for these loans as of March 31, 2014.

NOTE 5: ALLOWANCE FOR LOAN LOSSES – (Continued)

The Bank categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as current financial information, historical payment experience, collateral adequacy, credit documentation, and current economic trends, among other factors. The Bank analyzes loans individually by classifying the loans as to credit risk. This analysis typically includes larger, non-homogeneous loans such as loans secured by multifamily or commercial real estate and commercial and industrial loans. This analysis is performed on an ongoing basis as new information is obtained. The Bank uses the following definitions for risk ratings:

Pass: Loans classified as pass are strong credits with no existing or known potential weakne sses deserving of management's close attention.

Special Mention: Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the r epayment prospects for the loan or of the institution's credit position at some future date.

Substandard: Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Impaired: A loan is considered impaired, when, based on current information and events, it is probable that the Bank will be unable to collect all amounts due according to the contractual terms of the loan agreement.

Additionally, all loans classified as troubled debt restructurings ("TDRs") are considered impaired. Purchased credit impaired loans are not considered impaired loans for these purposes.

Loans listed as pass include larger non-homogeneous loans not meeting the risk rating definitions above and smaller, homogeneous loans not assessed on an individual basis.

Based on the most recent analysis performed, the risk category of loans by class of loans is as follows as of:

(dollars in thousands)	Pass		Special Mention		Substandard		Impaired		 Total
March 31, 2014:									
Real estate loans:									
Residential properties	\$	662,315	\$	-	\$	-	\$	3,484	\$ 665,799

Consumer loans		_				_				
Total	\$	2,471	\$	2,471	\$	3,597	\$	3,597	\$	1,115

The weighted average annualized average balance of the recorded investment for impaired loans, beginning from when the loan became impaired, and any interest income recorded on impaired loans after they became impaired is as follows for the:

		Quarter March	Year Ending December 31, 2013					
(dollars in thousands)	Re	verage corded estment	Interest Income after Impairment		Average Recorded Investment		Inco	terest ne after airment
Real estate loans:	'							
Residential properties	\$	2,660	\$	8	\$	2,250	\$	32
Commercial properties		819		5		323		22
Land and construction		-		-		-		-
Commercial and industrial loans		3,009		40		2,690		168
Consumer loans		-		-		-		-
Total	\$	6,488	\$	53	\$	5,263	\$	222

There was no interest income recognized on a cash basis in either 2014 or 2013 on impaired loans.

NOTE 6: DEPOSITS

The following table summarizes the outstanding balance of deposits and average rates paid thereon as of:

	March 3	December	31, 2013	
(dollars in thousands)	 Amount	Weighted Average Rate	Amount	Weighted Average Rate
Demand deposits:				
Noninterest-bearing	\$ 225,473	- \$	217,782	-
Interest-bearing	228,587	0.497%	217,129	0.504%
Money market and savings	125,872	0.496%	121,260	0.499%
Certificates of deposits	274,752	0.557%	245,866	0.606%
Total	\$ 854,684	0.385%	802,037	0.398%

At March 31, 2014, of the \$258.9 million of certificates of deposits of \$100,000 or more, \$233.2 million mature within one year and \$25.7 million mature after one year. Of the \$15.9 million of certificates of deposit of less than \$100,000, \$13.7 million mature within one year and \$2.2 million mature after one year. At December 31, 2013, of the \$229.9 million of certificates of deposits of \$100,000 or more, \$207.7 million mature within one year and \$22.2 million mature after one year. Of the \$15.9 million of certificates of deposit of less than \$100,000, \$13.6 million mature within one year and \$2.3 million mature after one year.

NOTE 7: BORROWINGS

At March 31, 2014, our borrowings consisted of \$119.0 million of overnight FHLB advances and a \$21.9 million note payable by FFI. At December 31, 2013, our borrowings consisted of \$134.0 million of overnight FHLB advances and a \$7.1 million note payable by FFI. The FHLB advances were paid in full in the early part of April 2014 and January 2014, respectively, and bore interest rates of 0.11% and 0.06%, respectively. Because the Bank utilizes overnight borrowings, the balance of outstanding borrow ings fluctuates on a daily basis.

In the second quarter of 2013, FFI entered into a loan agreement to borrow \$7.5 million for a term of five years. This note bears interest at a rate of ninety day Libor plus 4.0% per annum. In the first quarter of 2014, FFI entered into an amendment to this loan agreement pursuant to which we obtained an additional \$15,000,000 of borrowings. As a result, as of March 31, 2014, the outstanding principal amount of the loan was \$21,875,000. The First Amendment did not alter a ny of the terms of the Loan Agreement or the loan, other than the \$15,000,000 increase in the principal amount of the loan and a corresponding increase in the amount of the monthly installments of principal and interest payable on the Loan. The amended loan agreement requires us to make monthly payments of principal of \$0.2 million plus interest, with a final payment of the unpaid principal balance, in the amount of approximately \$12.1 million, plus accrued but unpaid interest, at the maturity date of the loan in May 2018. We have the right, in our discretion, to prepay the loan at any time in whole or, from time to time, in part, without any penalties or premium. We are required to meet certain financial covenants during the term of the loan. As security for our repayment of the loan, we pledged all of the common stock of FFB to the lender.

NOTE 8: EARNINGS PER SHARE

Basic earnings per share excludes dilution and is computed by dividing net income or loss available to common stockholders by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if contracts to issue common stock were exercised or converted into common stock that would then share in earnings.

The following table sets forth the Company's unaudited earnings per share calculations for the quarters ended March 31:

	2	2013				
(dollars in thousands, except per share amounts)	Basic	Diluted	Basic	Diluted		
Net income	\$ 1,462	\$ 1,462	\$ 1,058	\$ 1,058		
Basic common shares outstanding	7,733,514	7,733,514	7,376,988	7,376,988		
Effect of options and restricted stock		361,300		236,246		
Diluted common shares outstanding		8,094,814		7,613,234		
Earnings per share	\$ 0.19	\$ 0.18	\$ 0.14	\$ 0.14		

Based on a weighted average basis, options to purchase 66,125 and 627,857 shares of common stock were excluded for the quarters ended March 31, 2014 and 2013, respectively, because their effect would have been anti-dilutive.

NOTE 9: SEGMENT REPORTING

For the quarters ending March 31, 2014 and 2013, the Company had two reportable business segments: Banking (FFB) and Wealth Management (FFA). The results of FFI and any elimination entries are included in the column labeled Other. The following tables show key operating results for each of our business segments used to arrive at our consolidated totals for the quarters ending March 31:

(dollars in thousands)	Banking			/ealth agement	(Other	Total	
2014:								
Interest income	\$	10,675	\$	-	\$	-	\$	10,675

I TEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis is intended to facilitate the understanding and assessment of significant changes and trends in our results of operations in the quarter ended March 31, 2014 as compared to our results of operations in the quarter ended March 31, 2013; our financial condition at March 31, 20 14 as compared to our financial condition at December 31, 2013; This discussion and analysis is based on and should be read in conjunction with our consolidated financial statements and the accompanying notes thereto contained elsewhere in this report. This information is intended to facilitate the understanding and assessment of significant changes and trends related to our results of operations or financial condition. In addition to historical information, this discussion contains forward-looking statements that involve risks, uncertainties and assumptions that could cause results to differ materially from management's expectations.

Forward Looking Statements

Statements contained in this report that are not historical facts or that discuss our expectations, beliefs or views regarding our future financial performance or future financial condition, or financial or other trends in our business or in the markets in which we operate, constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Forward-looking statements can be identified by the fact that they do not relate strictly to historical or current facts. Often, they include words such as "believe," "expect," "anticipate," "intend," "plan," "estimate," "project," "forecast" or words of similar meaning, or future or conditional verbs such as "will," "would," "should," "could," or "may." Such forward-looking statements are based on current information that is available to us, and on assumptions that we make, about future events or economic or financial conditions or trends over which we do not have control. In addition, our businesses and the markets in which we operate are subject to a number of risks and uncertainties. Those risks and uncertainties, and unexpected future events, could cause our financial condition or actual operating results in the future to differ significantly from our expected financial condition and operating results that are set forth in the forward looking statements contained in this report.

The principal risks and uncertainties to which our businesses are subject are discussed in Item 1A in our Annual Report on Form 10-K for our fiscal year ended December 31, 2013 (our "2013 10-K") that we filed with the Securities and Exchange Commission (the "SEC") on March 25, 2014, and in this Item 2 below. Therefore, you are urged to read not only the information contained in this Item 2, but also the risk factors and other cautionary information contained in Item 1A of our 2013 10-K, which qualify the forward looking statements contained in this report.

Due to these risks and uncertainties, you are cautioned not to place undue reliance on the forward-looking statements contained in this report and not to make predictions about our future financial performance based solely on our historical financial performance. We also disclaim any obligation to update forward-looking statem ents contained in this Report or in our 2013 10-K or any other of our filings previously made with the SEC, except as may otherwise be required by applicable law or government regulations.

Critical Accounting Policies

Our consolidated financial statements are prepared in accordance with generally accepted accounting principles in the United States ("GAAP") and accounting practices in the banking industry. Certain of those accounting policies are considered critical accounting policies, because they require us to make estimates and assumptions regarding circumstances or trends that could materially affect the value of those assets, such as economic conditions or trends that could impact our ability to fully collect our lo ans or ultimately realize the carrying value of certain of our other assets. Those estimates and assumptions are made based on current information available to us regarding those economic conditions or trends or other circumstances. If changes were to occur in the events, trends or other circumstances on which our estimates or assumptions were based, or other unanticipated events were to occur that might affect our operations, we may be required under GAAP to adjust our earlier estimates and to reduce the carrying values of the affected assets on our balance sheet, generally by means of charges against income, which could also affect our results of operations in the fiscal periods when those charges are recognized.

Utilization and Valuation of Deferred Income Tax Benefits. We record as a "deferred tax asset" on our balance sheet an amount equal to the tax credit and tax loss carryforwards and tax deductions (collectively "tax benefits") that we believe will be available to us to offset or reduce income taxes in future periods. Under applicable federal and state income tax laws and regulations, tax benefits related to tax loss carryforwards will expire if they cannot be used within specified periods of time. Accordingly, the ability to fully use our deferred tax asset related to tax loss carryforwards to reduce income taxes in the future depends on the amount of taxable income that we generate during those time periods. At least once each year, or more frequently, if warranted, we make estimates of future taxable income that we believe we are likely to generate during those future periods. If we conclude, on the basis of those estimates and the amount of the tax benefits available to us, that it is more likely, than not, that we will be able to fully utilize those tax benefits prior to their expiration, we recognize the deferred tax asset in full on our balance sheet. On the other hand, if we conclude on the basis of those estimates and the amount of the tax benefits available to us that it has become more likely, than not, that we will be unable to utilize those tax benefits in full prior to their expiration, then, we would establish a valuation allowance to reduce the

deferred tax asset on our balance sheet to the amount with respect to which we believe it is still more likely, than not, that we will be able to use to offset or reduce taxes in the future. The establishment of such a valuation allowance, or any increase in an existing valuation allowance, would be effectuated through a charge to the provision for income taxes or a reduction in any income tax credit for the period in which such valuation allowance is established or increased.

Allowance for Loan and Lease Losses. Our ALLL is established through a provision for loan losses charged to expense and may be reduced by a recapture of previously established loss reserves, which are also reflected in the statement of income. Loans are charged against the ALLL when management believes that collectability of the principal is unlikely. The ALLL is an amount that management believes will be adequate to absorb estimated losses on existing loans that may become uncollectible based on an evaluation of the collectability of loans and prior loan loss experience. This evaluation also takes into consideration such factors as changes in the nature and volume of the loan portfolio, overall portfolio quality, review of specific problem loans, current economic conditions and certain other subjective factors that may affect the borrower's ability to pay. While we use the best information available to make this evaluation, future adjustments to our ALLL may be necessary if there are significant changes in economic or other conditions that can affect the collectability in full of loans in our loan portfolio.

Adoption of new or revised accounting standards. We have elected to take advantage of the extended transition period afforded by the JOBS Act, for the implementation of new or revised accounting standards. As a result, we will not be required to comply with new or revised accounting standards that have different effective dates for public and private companies until those standards apply to private companies or we cease to be an "emerging growth" company as defined in the JOBS Act. As a result of this election, our financial statements may not be comparable to the financials statements of companies that comply with public company effective dates.

We have two business segments, "Banking" and "Investment Management, Wealth Planning and Consulting" ("Wealth Management"). Banking includes the operations of FFB and FFIS and Wealth Management includes the operations of FFA. The financial position and operating results of the stand-alone holding company, FFI, are included under the caption "Other" in certain of the tables that fol low, along with any consolidation elimination entries.

Recent Developments and Overview

In the second quarter of 2013, we entered into a loan agreement to borrow \$7.5 million for a term of five years. This note bears interest at a rate of ninety day Libor plus 4.0% per annum. In the first quarter of 2014, we entered into an amendment to this loan agreement pursuant to which we obtained an additional \$15,000,000 of borrowings. As a result, as of March 31, 2014, the outstanding principal amount of the loan was \$21,875,000. This amendment did not alter any of the terms of the loan agreement or the loan, other than the \$15,000,000 increase in the principal amount of the loan and a corresponding increase in the amount of the monthly installments of principal and interest payable on the Loan. The amended loan agreement requires us to make monthly payments of principal of \$0.2 million plus interest, with a final payment of the unpaid principal balance, in the amount of approximately \$12.1 million, plus accrued but unpaid interest, at the maturity date of the loan in May 2018. We have the right, in our discretion, to prepay the loan at any time in whole or, from time to time, in part, without any penalties or premium. We are required to meet certain financial covenants during the term of the loan. As security for our repayment of the loan, we pledged all of the common stock of FFB to the lender. See "Financial Condition—Term Loan" below for additional information regarding this loan.

We have continued to grow both our Banking and Wealth Management operations. Comparing the first quarter of 2014 to the first quarter of 2013, we have increased our revenues (net interest income and noninterest income) by 20%. This growth in revenues is the result of the growth in Bankin g's total interest-earning assets and the growth in Wealth Management's AUM. During the first quarter of 2014, total loans and total deposits in Banking increased 5% and 7%, respectively, while the AUM in Wealth Management increased by \$203 million or 8% and totaled \$2.80 billion as of March 31, 2014. The growth in AUM includes the addition of \$158 million of net new accounts and \$66 million of gains realized in client accounts during the first quarter of 2014.

The results of operations for Banking reflect the benefits of this growth as income before taxes for Banking increased \$0.9 million from \$2.8 million in the first quarter of 2013 to \$3.7 million in the first quarter of 2014. Because we continue to add new staff and locations as part of our business p lan, the increases in our revenues in Wealth Management were partially offset by increases in noninterest expenses. On a consolidated basis, our earnings before taxes increased from \$1.7 million in the first quarter of 2013 to \$2.5 million in the first quarter of 2014.

Results of Operations

Our net income for the first quarter of 2014 was \$1.5 million, as compared to \$1.1 million for first quarter of 2013. Income before taxes was \$2.5 million in the first quarter of 2014 as compared to \$1.7 million in the first quarter of 2013. The effective tax rate increased to 42.0% in the first quarter of 2014 as compared to 38.0% in the first quarter of 2013 due in part to the elimination of certain credits under California tax laws. The following is a comparison of our income before taxes between the first quarter of 2014 and first quarter of 2013.

The following tables show key operating results for each of our business segments for the quarters ended March 31:

(dollars in thousands)	<u>F</u>	Banking	Management		Other		Total	
2014:								
Interest income	\$	10,675	\$	-	\$	-	\$	10,675
Interest expense		851		<u>-</u>		74		925
Net interest income		9,824		_		(74)		9,750
Provision for loan losses		235		-		-		235
Noninterest income		1,042		4,625		(116)		5,551
Noninterest expense		6,942		4,842		762		12,546
Income (loss) before taxes on income	\$	3,689	\$	(217)	\$	(952)	\$	2,520
2013:								
Interest income	\$	9,004	\$	-	\$	-	\$	9,004
Interest expense		812		<u>-</u>		<u>-</u>		812
Net interest income		8,192		_		-		8,192
Provision for loan losses		622		-		-		622
Noninterest income		819		3,816		(102)		4,533
Noninterest expense		5,612		4,325		459		10,396
Income (loss) before taxes on income	\$	2,777	\$	(509)	\$	(561)	\$	1,707

The primary sources of revenue for Banking are net interest income, fees from its deposits, trust and insurance services, and certain loan fees. The primary sources of revenue for Wealth Management are asset management fees assessed on the balance of AUM and fees charged for consulting and administrative services. Compensation and benefit costs, which represent the largest component of noninterest expense accounted for 65% and 77%, respectively, of the total noninterest expense for Banking and Wealth Manage ment in the first quarter of 2014.

General. Consolidated income before taxes increased \$0.8 million in the first quarter of 2014 as compared to the first quarter of 2013 as a result of an increase in income before taxes for Banking and a decrease in loss before taxes for Wealth Management, which were partially offset by increases in corporate expenses. Income before taxes in Banking was \$3.7 million in the first quarter of 2014 as compared to \$2.8 million in the first quarter of 2013 as higher net interest income, a lower provision for loan losses and higher noninterest income was partially offset by higher noninterest expenses. As a result of higher noninterest income, which was only partially offset by higher noninterest expenses, the loss before taxes for Wealth Management was \$0.3 million lower in the first quarter of 2014 as compared to the first quarter of 2013. Our operating losses in Wealth Management are due in part to our continued investment in new relationship managers which are a key component in growing our revenues. Typically, it takes up to three years to realize enough revenues to cover the costs associated with hiring and retaining a new relationship manager. Corporate expenses were \$0.4 million higher in the first quarter of 2014 as compared to the first quarter of 2013 due to interest costs on the term loan entered into in the second quarter of 2013, increased allocations of compensation costs from FFB and increased contributions made under our community support programs.

Net Interest Income. The following tables set forth information regarding (i) the total dollar amount of interest income from interest-earning assets and the resultant average yields on those assets; (ii) the total dollar amount of interest expense and the average rate of interest on our interest-bearing liabilities; (iii) net interest income; (iv) net interest rate spread; and (v) net yield on interest-earning assets for the quarter ended March 31:

	2014				2013

Net Interest Rate Spread					3.	62%					3.97%
Net Yield on Interest-earning Assets					3.	<u>76</u> %					4.13%

Net interest income is impacted by the volume (changes in volume multiplied by prior rate), interest rate (changes in rate multiplied by prior volume) and mix of interest-earning assets and interest-bearing liabilities. The following table provides a breakdown of the changes in net interest income due to volume and rate changes between the first quarter of 2014 as compared to first quarter of 2013.

	1	ncrease (Dec	Net Increase				
(dollars in thousands)	Volume				(Decrease)		
Interest earned on:							
Loans	\$	1,870	\$	(685)	\$	1,185	
Securities and FHLB Stock		307		62		369	
Fed funds and deposits		60		57		117	
Total interest-earning assets		2,237		(566)		1,671	
Interest paid on:							
Demand deposits		141		(13)		128	
Money market and savings		40		5		45	
Certificates of deposit		(88)		(63)		(151)	
Borrowings		67		24		91	
Total interest-bearing liabilities		160		(47)		113	
Net interest income	\$	2,077	\$	(520)	\$	1,558	

Net interest income increased 19% from \$8.2 million in the first quarter of 2013 to \$9.8 million in the first quarter of 2014 because of a 32% increase in interest-earning assets, which was partially offset by a decrease in our net interest rate spread. The decrease in the net interest rate spread from 3.97% in the first quarter of 2013 to 3.62% in the first quarter of 2014 was due to a decrease in yield on total interest-earning assets which was part ially offset by a decrease in rates paid on interest-bearing liabilities. The decrease in yield on interest-earning assets reflected the decrease in interest rates in the overall market, prepayments of higher yielding loans, and an increase in the proportion of lower yielding securities and deposits to total interest-earning assets. The decrease in rates on interest-bearing liabilities from 0.57% in the first quarter of 2013 to 0.50% in in the first quarter of 2014 was due to decreases in market interest rates on deposits and an increase in the proportion of lower rate borrowings, which were partially offset by increased borrowing costs related to interest on the FFI term loan.

Provision for loan losses. The provision for loan losses represents our determin ation of the amount necessary to be charged against the current period's earnings to maintain the ALLL at a level that is considered adequate in relation to the estimated losses inherent in the loan portfolio. The provision for loan losses is impacted by changes in loan balances as well as changes in estimated loss assumptions and charge-offs and recoveries. The amount of our provision also takes into consideration such factors as changes in the nature and volume of the loan portfolio, overall portfolio quality, review of specific problem loans, current economic conditions and certain other subjective factors that may affect the ability of borrowers to meet their repayment obligations to us. The provision for loan losses was \$0.2 million in the first quarter of 2014 as compared to \$0.6 million in the first quarter of 2013. The decrease in the provision for loan losses in the first quarter of 2014 as compared to the first quarter of 2013 was the result of reductions in estimated loss assumptions and the lower amount of chargeoffs. We did not recognized any chargeoffs in the first quarter of 2014, as compared to the \$0.8 million of chargeoffs we recognized in the first quarter of 2013.

Noninterest income. Noninterest income for Banking includes fees charged to clients for trust services and deposit services, prepayment and late fees charged on loans, insurance commissions and intercompany fees charged for services provided to Wealth Management. The following table provides a breakdown of noninterest income for Banking for the quarters ended March 31:

(dollars in thousands)		 2013	
Trust fees	\$	487	\$ 527
Deposit charges		93	92
Prepayment fees		116	54
Other		346	146
Total noninterest income	\$	1,042	\$ 819

The \$0.2 million increase in noninterest income for Banking in the first quarter of 2014 as compared to the first quarter of 2013 was due primarily to a \$0.2 million increase in insurance commissions as there was larger cases closed in the first quarter of 2014 as compared to the first quarter of 2013.

Noninterest income for Wealth Management includes fees charged to high net-worth clients for managing their assets and for providing financial planning consulting services, as well as fees for administration services provided to family foundations and private charitable organizations. The following table provides a breakdown of noninterest income for Wealth Management for the quarters ended March 31:

(dollars in thousands)	 2014	 2013	
Asset management fees	\$ 4,368	\$ 3,552	
Consulting and administration fees	263	270	
Other	(6)	(6)	
Total noninterest income	\$ 4,625	\$ 3,816	

The \$0.8 million increase in noninterest income in Wealth Management in the first quarter of 2014 as compared to the first quarter of 2013 was primarily due to increases in asset management fees of 23%. That increase was primarily due to the 16% increase in the AUM balances used for computing the asset management fees in 2014 as compared to 2013.

Noninterest Expense. The following table provides a breakdown of noninterest expense for Banking and Wealth Management for the quarters ended March 31:

		Ban	king	Wealth Management					
(dollars in thousands)		2014		2013		2014	2013		
Compensation and benefits	\$	4,520	\$	3,844	\$	3,728	\$	3,313	
Occupancy and depreciation		1,284		926		515		393	
Professional services and marketing		503		371		464		456	
Other expenses		635		471		135		163	
Total noninterest expense	\$	6,942	\$	5,612	\$	4,842	\$	4,325	

The \$1.3 million increase in noninterest expense in Banking in the first quarter of 2014 as compared to the first quarter of 2013 was due primarily to increases in staffing and costs associated with FFB's higher balances of loans and deposits and our continuing expansion. Compensation and benefits for Banking increased \$0.7 million during in the first quarter of 2014 as compared to the first quarter of 2013 as the number of full-time equivalent employees, ("FTE") in Banking increased to 136.3 during the first quarter of 2014 from 112.8 during the first quarter of 2013. The \$0.4 million increase in occupancy and depreciation costs for Banking in the first quarter of 2014 as compared to the first quarter of 2013 was due to the one additional office being open during the first quarter of 2014 as compared to the first quarter of 2013 and the expansion into additional space at the administrative office in the second quarter of 2013. For Banking, the combined \$0.3 million increase in professional services and marketing, which includes costs for legal, accounting, consulting and information technology services, as well as management fees paid to FFA for providing asset management services for FFB's trust clients, and other expenses, which includes office related costs, FDIC and other regulatory assessments, director fees, insurance costs, loan related expenses, employee reimbursements and REO expenses, reflect increased costs related to our larger loan and deposit balances, increased staffing and increased number of wealth management offices.

The \$0.5 million increase in noninterest expense in Wealth Management in the first quarter of 2014 as compared to the first quarter of 2013 was primarily due to increases in staffing and costs associated with our continuing expansion and growth. Compensation and benefits for Wealth Management increased \$0.4 million in the first quarter of 2014 as compared to the first quarter of 2013 as the number of FTE in Wealth Management increased to 54.7 during the first quarter of 2014 from 51.0 during the first quarter of 2013.

Financial Condition

The following table shows the financial position for each of our business segments, and of FFI and elimination entries used to arrive at our consolidated totals which are included in the column labeled Other, as of:

(dollars in thousands)	Banking		Wealth Management		_	ther and minations	 Total

Total liabilities and equity	\$	1,033,918	\$	4,945	\$	(1,503)	\$ 1,037,360

Our consolidated balance sheet is primarily affected by changes occurring in our Banking operations as our Wealth Management operations do not maintain significant levels of assets. Banking has experienced and is expected to continue to experience increases in its total assets as a result of our growth strategy.

During the first quarter of 2014, total assets for the Company and FFB increased by \$53 million. For FFB, during the first quarter of 2014, loans and deposits increased \$45.2 million and \$56.6 million, respectively, cash and cash equivalents decreased by \$6.8 million, securities AFS increased by \$14.1 million and FHLB advances decreased by \$15.0 million. Borrowings at FFI increased by \$14.8 million during the first quarter of 2014.

Cash and cash equivalents, certificates of deposit and securities: Cash and cash equivalents, which primarily consist of funds held at the Federal Reserve Bank or at correspondent banks, including fed funds, decreased \$6.8 million during the first quarter of 2014. Changes in cash equivalents are primarily affected by the funding of loans, investments in securities, and changes in our sources of funding: deposits, FHLB advances and FFI borrowings.

Securities available for sale: The following table provides a summary of the Co mpany's AFS securities portfolio as of:

Aı	nortized		Gross U	æd	Estimated		
	Cost	(ains		Losses	Fair Value	
\$	300	\$	-	\$	-	\$	300

The US Treasury Securities are pledged as collateral to the State of California to meet regulatory requirements related to FFB's trust operations.

The \$14.1 million increase in AFS Securities during in the first quarter of 2014 reflected our actions to increase our on-balance sheet sources of liquidity.

The scheduled maturities of securities AFS, other than agency mortgage backed securities, and the related weighted average yield is as follows as of March 31, 2014:

(dollars in thousands)		than ear	1 Through 5 years		Through 0 Years	After 10 Years		Total	
Amortized Cost:									
US Treasury securities	\$	300	\$	-	\$ -	\$	-	\$	300
FNMA and FHLB Agency notes		-		-	10,496		-		10,496
Total	\$	300	\$	-	\$ 10,496	\$		\$	10,796
Weighted average yield		0.21%		0.00%	1.78%		0.00%		1.74%
Estimated Fair Value:									
US Treasury securities	\$	300	\$	-	\$ -	\$	-	\$	300
FNMA and FHLB Agency notes		<u>-</u>			 9,968		<u>-</u>		9,968
Total	\$	300	\$		\$ 9,968	\$		\$	10,268

Agency mortgage backed securities are excluded from the above table because such securities are not due at a single maturity date. The weighted average yield of the agency mortgage backed securities as of March 31, 2014 was 2.57%.

Loans. The following tab le sets forth our loans, by loan category, as of:

	N	March 31, 2014		ecember 31, 2013
Outstanding principal balance:				
Loans secured by real estate:				
Residential properties:				
Multifamily	\$	401,877	\$	405,984
Single family		263,922		227,096
Total real estate loans secured by residential properties		665,799		633,080
Commercial properties		166,290		154,982
Land and construction		2,345		3,794
Total real estate loans		834,434		791,856
Commercial and industrial loans		97,248		93,255
Consumer loans		17,201		18,484
Total loans		948,883		903,595
Premiums, discounts and deferred fees and expenses		(39)		50
Total	\$	948,844	\$	903,645

The scheduled maturities, as of December 31, 2013, of the performing loans categorized as land loans and as commercial and industrial loans, are as follows:

		S	Sched Du		Loans With Maturity A							
(dollars in thousands)						Year Through Five Years Due After Five Years				oans With		oan With stable Rates
Land and construction loans Commercial and industrial loans	\$ \$	2,933 50,272	\$ \$	19 17,968	\$ \$	842 24,671	\$ \$	19 41,775	\$ \$	842 864		

Deposits: The following table sets forth information with respect to our deposits and the average rates paid on deposits, as of:

		March 3	31, 2014	December	31, 2013
			Weighted		Weighted
(dollars in thousands)		Amount	Average Rate	Amount	Average Rate
Demand deposits:					
Noninterest-bearing	\$	225,473	- \$	217,782	-
Interest-bearing		228,587	0.497%	217,129	0.504%
Money market and savings		125,872	0.496%	121,260	0.499%
Certificates of deposits		274,752	0.557%	245,866	0.606%
Total	\$	854,684	0.385%	802,037	0.398%

The \$52.6 million increase in deposits during the first quarter of 2014 reflects the organic growth of our Banking operations.

As market interest rates have continued to decline, FFB has been able to lower the cost of its deposit products. As a result, the weighted average rate of interest-bearing deposits has decreased from 0.65% at December 31, 2012 to 0.55% at December 31, 2013, to 0.52% at March 31, 2014, while the weighted average interest rates of both interest-bearing and noninterest-bearing deposits have decreased from 0.52% at December 31, 2012 to 0.40% at December 31, 2013 to 0.39% at March 31, 2014.

The maturities of our certificates of deposit of \$100,000 or more were as follows as of March 31, 2014:

(dollars in thousands)	
3 months or less	\$ 85,390
Over 3 months through 6 months	86,705
Over 6 months through 12 months	61,081
Over 12 months	25,715
Total	\$ 258,891

FFB utilizes a third party program called CDARs which allows FFB to transfer funds of its clients in excess of the FDIC insurance limit (currently \$250,000) to other institutions in exchange for an equal amount of funds from clients of these other institutions. This has allowed FFB to provide FDIC insurance coverage to its clients. As of March 31, 2014, FFB held \$95.1 million of CDARs deposits. Under certain regulatory guidelines, these deposits are considered brokered deposits. As of March 31, 2014, FFB did not have any other brokered certificates of deposit.

Borrowings: At March 31, 2014, our borrowings consisted of \$119.0 million of overnight FHLB advances at FFB and a \$21.9 million term loan at FFI. At December 31, 2013, our borrowings consisted of \$134.0 million of overnight FHLB advances at FFB and a \$7.1 million term loan at FFI. The FHLB advances were paid in full in the early parts of April 2014 and January 2014, respectively. Because FFB utilizes overnight borrowings, the balance of outstanding borrowings fluctuates on a daily basis. The average balance of overnight borrowings during the first quarter of 2014 was \$144.5 million, as compared to \$79.2 million during 2013. The weighted average interest rate on these overnight borrowings was 0.13% for the first quarter of 2014, as compared to 0.15% during 2013. The maximum amount of overnight borrowings outstanding at any month-end during the first quarter of 2014 and during 2013, was \$161.0 million and \$134.0 million, respectively.

Term Loan. In the second quarter of 2013, we entered into a loan agreement to borrow \$7.5 million for a term of five years. This note bears interest at a rate of ninety day Libor plus 4.0% per annum. In the first quarter of 2014, we entered into an amendment to this loan agreement pursuant to which we obtained an additional \$15,000,000 of borrowings. As a result, as of March 31, 2014, the outstanding principal amount of the loan was \$21,875,000. This amendment did not alter any of the terms of the loan agreement or the loan, other than the \$15,000,000 increase in the principal amount of the loan and a corresponding increase in the amount of the

monthly installments of principal and interest payable on the Loan. The amended loan agreement requires us to make monthly payments of principal of \$0.2 million plus interest, with a final payment of the unpaid principal balance, in the amount of approximately \$12.1 million, plus accrued but unpaid interest, at the maturity date of the loan in May 2018. We have the right, in our discretion, to prepay all or a portion of the loan at any time, without any penalties or premium. We have pledged all of the common stock of FFB to the lender as security for the performance of our payment and other obligations under the loan agreement. The loan agreement obligates us to meet certain financial covenants, including the following:

- a Tier 1 capital (leverage) ratio at FFB of at least 5.0% at the end of each calendar quarter;
- a total risk-based capital ratio at FFB of not less than 10.0% at the end of each calendar quarter;
- a ratio at FFB of nonperforming assets to net tangible capital, as adjusted, plus our ALLL, of not more than 40.0% at the end of each calendar quarter;
- a ratio at FFB of classified assets to tier 1 capital, plus our ALLL, of no more than 50.0% at the end of each calendar quarter;
- a consolidated fixed charge coverage ratio of not less than 1.50 to 1.0, measured quarterly for the immediately preceding 12 months;
- minimum liquidity at all times of not less than \$1.0 million.

As of March 31, 2014, we were in compliance with all of those financial covenants.

The loan agreement also prohibits FFI (but not FFB or FFA) from doing any of the following without the lender's prior approval: (i) paying any cash dividends to our shareholders, (ii) incurring any other indebtedness, (iii) granting any security interests or permitting the imposition of any liens, other than certain permitted liens, on any of FFI's assets, or (iv) entering into significant merger or acquisition transactions outside of our banking operations. The loan agreement provides that if we fail to pay principal or interest when due, or we commit a breach of any of our other obligations or covenants in the loan agreement, or certain events occur that adversely affect us, then, unless we are able to cure such a breach, we will be deemed to be in default of the loan agreement and the lender will become entitled to require us to immediately pay in full the then principal amount of and all unpaid interest on the loan. If in any such event we fail to repay the loan and all accrued but unpaid interest, then the lender would become entitled to sell our FFB shares which we pledged as security for the loan in order to recover the amounts owed to it.

Delinquent Loans, Nonperforming Assets and Provision for Credit Losses

Loans are considered past due following the date when either interest or principal is contractually due and unpaid. Loans on which the accrual of interest has been discontinued are designated as nonaccrual loans. Accrual of interest on loans is discontinued when reasonable doubt exists as to the full, timely collection of interest or principal and, generally, when a loan becomes contractually p ast due for 90 days or more with respect to principal or interest. However, the accrual of interest may be continued on a well-secured loan contractually past due 90 days or more with respect to principal or interest if the loan is in the process of collection or collection of the principal and interest is deemed probable. The following tables provide a summary of past due and nonaccrual loans as of:

		Past Due and Still Accruing 90 Days							 tal Past

The amount of delinquent loans and nonaccrual loans have been adversely impacted by the loans acquired in the DCB Acquisition. As of March 31, 2014, the Company had \$0.1 million of loans classified as troubled debt restructurings, which are included as nonaccrual loans in the table above.

The following is a breakdown of our loan portfolio by the risk category of loans as of:

(dollars in thousands)	(dollars in thousands) Pass		Special Mention		Substandard		Impaired		Total	
March 31, 2014:				_				<u> </u>		_

Total	\$	889,674	\$	43	\$	7,810	\$	6,068	\$	903,595

As of March 31, 2014, \$5.9 million of the loans classified as substandard and \$1.0 million of the loans classified as impaired were loans acquired in the DCB acquisition.

We consider a loan to be impaired when, based upon current information and events, we believe that it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan. We measure impairment using either the present value of the expected future cash flows discounted at the loan's effective interest rate, or the fair value of the properties collateralizing the loan. Impairment losses are included in the allowance for loan losses through a charge to provision for loan losses. Adjustments to impairment losses due to changes in the fair value of the property collateralizing an impaired loan are considered in computing the provision for loan losses. Loans collectively reviewed for impairment include all loans except for loans which are individually reviewed based on specific criteria, such as delinquency, debt coverage, adequacy of collateral and condition of property collateralizing the loans. Impaired loans include nonaccrual loans (excluding those collectively reviewed for impairment), certain restructured loans and certain performing loans less than ninety days delinquent ("other impaired loans") which we believe are not likely to be collected in accordance with contractual terms of the loans.

In 2012, we purchased loans, for which there was, at acquisition, evidence of deterioration of credit quality since origination and it was probable, at acquisition, that all contractually required payments would not be collected. The carrying amount of these purchased credit impaired loans is as follows as of:

(dollars in thousands)	March 31, 2014	December 31, 2013		
Outstanding principal balance:		-		
Loans secured by real estate:				
Residential properties	\$ -	\$ -		
Commercial properties	5,007	5,543

Excluding the loans acquired in the DCB Acquisition, our ALLL as a percentage of total loans was 1.08%, and 1.16% as of March 31, 2014 and December 31, 2013, respectively.

The amount of the ALLL is adjusted periodically by charges to operations (referred to in our income statement as the "provision for loan losses") (i) to replenish the ALLL after it has been reduced due to loan write-downs or charge-offs, (ii) to reflect increases in the volume of outstanding loans, and (iii) to take account of changes in the risk of potential loan losses due to a deterioration in the condition of borrowers or in the value of property securing non–performing loans or adverse changes in economic conditions. The amounts of the provisions we make for loan losses are based on our estimate of losses in our loan portfolio. In estimating such losses, we use economic and loss migration models that are based on bank regulatory guidelines and industry standards, and our historical charge-off experience and loan delinquency rates, local and national economic conditions, a borrower's ability to repay its borrowings, and the value of any property collateralizing the loan, as well as a number of subjective factors. However, these determinations involve judgments about changes and trends in current economic conditions and other events that can affect the ability of borrowers to meet their loan obligations to us and a weighting among the quantitative and qualitative factors we consider in determining the sufficiency of the ALLL. Moreover, the duration and anticipated effects of prevailing economic conditions or trends can be uncertain and can be affected by a number of risks and circumstances that are outside of our control. If changes in economic or market conditions or unexpected subsequent events were to occur, or if changes were made to bank regulatory guidelines or industry standards that are used to assess the sufficiency of the ALLL, it could become necessary for us to incur additional, and possibly significant, charges to increase the ALLL, which would have the effect of reducing our income.

In addition, the FDIC and the DBO, as an integral part of their examination processes, periodically review the adequacy of our ALLL. These agencies may require us to make additional provisions for loan losses, over and above the provisions that we have already made, the effect of which would be to reduce our income.

The following table presents the balance in the ALLL and the recorded investment in loans by impairment method as of:

Interest (all properties) Evaluate (1 → part part) (all properties) Interest (all properties) Cerebit (all properties) Residential properties \$ 6,255 \$

The column labeled "Unaccreted Credit Component Other Loans" represents the amount of unaccreted credit component discount for loans acquired in the DCB acquisition that were not classified as purchased impaired or individually evaluated for impairment as of the dates indicated, and t he stated principal balance of the related loans. The unaccreted credit component discount is equal to 1.12% and 1.23% of the stated principal balance of these loans as of March 31, 2014 and December 31, 2013, respectively. In addition to this unaccreted credit component discount, an additional \$0.2 million of the ALLL has been provided for these loans as of March 31, 2014.

Liquidity

Liquidity management focuses on our ability to generate, on a timely and cost-effective basis, cash sufficient to meet the funding needs of current loan demand, deposit withdrawals, principal and interest payments with respect to outstanding borrowings and to pay operating expenses. Our liquidity management is both a daily and long-term function of funds management. Liquid assets are generally invested in marketable securities or held as cash at the FRB or other financial institutions.

We monitor our liquidity in accordance with guidelines established by our Board of Directors and applicable regulatory requirements. Our need for liquidity is affected by our loan activity, net changes in deposit levels and the maturities of our borrowings. The principal sour ces of our liquidity consist of deposits, loan interest and principal payments and prepayments, investment management and consulting fees, FHLB advances and proceeds from borrowings and sales of shares by FFI. The remaining balances of the Company's lines of credit available to draw down totaled \$193.4 million at March 31, 2014.

Cash Flows Provided by Operating Activities. During the quarter ended March 31, 2014, operating activities provided net cash of \$0.9 million, comprised primarily of our net income of \$1.5 million and \$1.2 million of non-cash charges, including provisions for loan losses, stock based compensation expense and depreciation and amortization and deferred taxes recognized in our net income. These were partially offset by a \$0.3 million increase in other assets and a \$1.5 million decrease in other liabilities. During the year ended December 31, 2013 operating activities provided net cash of \$11.2 million, comprised primarily of our net income of \$7.9 million and \$4.3 million of non-cash charges, including provisions for loan losses, REO losses, stock based compensation expense and depreciation and amortization, offset by \$1.3 million non-cash deferred tax benefit recognized in our net income.

Cash Flows Used in Investing Activities. During the quarter ended March 31, 2014, investing activities used net cash of \$60.0 million, primarily to fund a \$46.7 million net increase in loans and a \$13.4 million net increase in securities AFS. During the year ended December 31, 2013, investing activities used net cash of \$217.0 million, primarily to fund a \$160.8 million net increase in loans and a \$56.1 million net increase in securities AFS.

Cash Flow Provided by Financing Activities. During the quarter ended March 31, 2014, financing activities provided net cash of \$52.5 million, consisting primarily of a net increase of \$52.6 million in deposits and a \$15.0 million borrowing under a term note, offset by a \$15.0 decrease in FHLB advances. During the year ended December 31, 2013, financing activities provided net cash of \$199.7 million, consisting primarily of a net increase of \$152.3 million in deposits, a net increase of \$41.1 million in borrowings and \$6.3 million received from the sale of shares in a private offering.

Ratio of Loans to Deposits. The relationship between gross loans and total deposits can provide a useful measure of a bank's liquidity. Since repayment of loans tends to be less predictable than the maturity of investments and other liquid resources, the higher the loan-to-deposit ratio the less liquid are our assets. On the other hand, since we realize greater yields on loans than we do on other interest-earning assets, a lower loan-to-deposit ratio can adversely affect interest income and earnings. As a result, our goal is to achieve a loan-to-deposit ratio that appropriately balances the requirements of liquidity and the need to generate a fair return on our assets. At March 31, 2014 and December 31, 2013, the loan-to-deposit ratios at FFB were 108.4% and 110.4%, respectively.

Off-Balance Sheet Arrangements

The following table provides the off-balance sheet arrangements of the Company as of March 31, 2014:

(dollars in thousands)

Commitments to fund new loans \$ 27,660

Commitments to fund under existing loans, lines of credit 98,809

Commitments under standby letters of credit 1,327

Some of the commitments to fund existing loans, lines of credit and letters of credit are expected to expire without being drawn upon. Therefore, the total commitments do not necessarily represent future cash re quirements. As of March 31, 2014, FFB was obligated on \$68.5 million of letters of credit to the FHLB which were being used as collateral for public fund deposits, including \$56.0 million of deposits from the State of California.

Capital Resources and Dividends

Under federal banking regulations that apply to all United States based bank holding companies and federally insured banks, the Company (on a consolidated basis) and FFB (on a stand-alone basis) must meet specific capital adequacy requirements that, for the most part, involve quantitative measures, primarily in terms of the ratios of their capital to their assets, liabilities, and certain off-balance sheet items, calculated under regulatory accounting practices. Under those regulations, which are based primarily on those quantitative measures, each bank holding company must meet a minimum capital ratio and each federally insured bank is determined by its primary federal bank regulatory agency to come within one of the following capital adequacy categories on the basis of its capital ratios: (i) well capitalized; (ii) adequately capitalized; (iii) undercapitalized; (iv) significantly undercapitalized; or (v) critically undercapitalized.

Certain qualitative assessments also are made by a banking institution's primary federal regulatory agency that could lead the agency to determine that the banking institution should be assigned to a lower capital category than the one indicated by the quantitative measures used to assess the i nstitution's capital adequacy. At each successive lower capital category, a banking institution is subject to greater operating restrictions and increased regulatory supervision by its federal bank regulatory agency.

The following table sets forth the capital and capital ratios of FFI (on a consolidated basis) and FFB as of the respective dates indicated below, as compared to the respective regulatory requirements applicable to them:

	Actua	al	For Cap Adequacy P		To Be Well Capitalized Under Prompt Corrective Action Provisions		
(dollars in thousands)	Amount	Ratio	Amount	Ratio	Amount	Ratio	
<u>FFI</u>							
March 31, 2014							
Tier 1 leverage ratio	\$ 86,933	8.22%	\$ 42,278	4.00%			
Tier 1 risk-based capital ratio	86,933	12.40%	28,039	4.00%			
Total risk-based capital ratio	95,717	13.65%	56,078	8.00%			
December 31, 2013							
Tier 1 leverage ratio	\$ 85,268	8.67%	\$ 39,321	4.00%			
Tier 1 risk-based capital ratio	85,268	13.04%	26,150	4.00%			
Total risk-based capital ratio	93,465	14.30%	52,300	8.00%			
<u>FFB</u>							
March 31, 2014							
Tier 1 leverage ratio	\$ 96,512	9.17%	\$ 42,100	4.00%	\$ 52,625	5.00%	
Tier 1 risk-based capital ratio	96,512	13.66%	28,263	4.00%	42,394	6.00%	
Total risk-based capital ratio	105,365	14.91%	56,526	8.00%	70,657	10.00%	
December 31, 2013							
Tier 1 leverage ratio	\$ 84,243	8.61%	\$ 39,115	4.00%	\$ 48,894	5.00%	
Tier 1 risk-based capital ratio	84,243	12.95%	26,017	4.00%	39,025	6.00%	
Total risk-based capital ratio	92,399	14.21%	52,034	8.00%	65,042	10.00%	

As of each of the dates set forth in the above table, the Company (on a consolidated basis) exceeded the minimum required capital ratios applicable to it and FFB (on a stand-alone basis) qualified as a well-capitalized depository institution under the capital adequacy guidelines described above. As a condition of approval of the DCB Acquisition by the FDIC, FFB is required to maintain a Tier 1 Leverage Ratio of 8.5% through August 15, 2014.

As of March 31, 2014, the amount of capital at FFB in excess of amounts required to be Well Capitalized was \$43.9 million for the Tier 1 Leverage Ratio, \$54.1 million for the Tier 1 risk-based capital ratio and \$34.7 million for the Total risk-based capital ratio. No conditions or events have occurred since March 31, 2014 which we believe have changed FFI's or FFB's capital adequacy classifications from those set forth in the above table.

During the first quarter of 2014, and during 2013, FFI made capital contributions to FFB of \$10.0 million and \$8.5 million, respectively. As of March 31, 2014, FFI had \$11.1 million of available capital and, therefore, has the ability and financial resources to contribute additional capital to FFB, if needed.

Due to the adoption in June 2013 of the Basel III capital guidelines by the FRB and the FDIC, effective beginning on January 1, 2015, FFI and FFB will be required to meet higher and more stringent capital requirements than those that currently exist.

We did not pay dividends in 2014 or 2013 and we have no plans to pay dividends at least for the foreseeable future. Instead, it is our intention to retain internally generated cash flow to support our growth. Moreover, the payment of dividends is subject to certain regulatory restrictions. In addition, the agreement governing the term loan obtained by FFI in April 2013 provides that we must obtain the prior consent of the lender to pay dividends to our shareholders.

We had no material commitments for capital expenditures as of March 31, 2014.

I TEM 4. CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports under the Securities Exchange Act of 1934, as amended (the "Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including our CEO and CFO, to allow timely decisions regarding required disclosure. In designing and eval uating our disclosure controls and procedures, our management recognized that any system of controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, as ours are designed to do, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

In accordance with SEC rules, an evaluation was performed under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer of the effectiveness, as of March 31 201 4, of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act). Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of March 31, 2014, the Company's disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed in our reports that we file under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

There was no change in our internal control over financial reporting that occurred during the quarter ended March 31, 2014 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II—OTHER INFORMATION

I TEM 1A RISK FACTORS

There have been no material changes in the risk factors that were disclosed in Item 1A, under the caption "Risk Factors" in Part I of our Annual Report on Form 10-K for the year ended December 31, 2013, which we filed with the Commission on March 25, 2014.

I TEM 5. OTHER INFORMATION

None.

CERTIFICATIONS OF CHIEF EXECUTIVE OFFICER UNDER SECTION 302 OF THE SARBANES-OXLEY ACT

I, Scott Kavanaugh, certify that:

- 1. I have reviewed this quarterly report on Form 10-Q of First Foundation Inc. for the quarter ended March 31, 2014;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
