# NightHawk Biosciences to Present at the 4th Annual Treg Directed Therapies Summit on PTX-35

DURHAM, N.C., May 10, 2022 (GLOBE NEWSWIRE) -- [NightHawk Biosciences](#) (NYSE American: **NHWK**), a fully integrated biopharmaceutical company focused on developing first-in-class therapies to modulate the immune system, today announced that Matthew Seavey, Ph.D., MBA, NightHawk's Vice President of Research will be presenting data on PTX-35, and serving on an expert panel discussing modes of Treg activation, at the [4th Annual Treg Directed Therapies Summit](#) being held on May 17-19<sup>th</sup> in Boston.

PTX-35 is a novel, potential first-in-class antibody immunomodulator of TNFRSF25 (death receptor 3), a receptor that is preferentially expressed by antigen-experienced T cells and can be utilized to expand regulatory T-cell subsets for auto/inflammatory indications. PTX-35 is the Company's first antibody-based product and is currently in a Phase 1 clinical trial for the treatment of patients with solid tumors.

**Presentation Date/Time:** Day-1, Wednesday, May 18<sup>th</sup> at 4:30 PM ET

**Presentation Title:** Agonizing Over Treg Expansion to Treat Human Disease: An Update on Our TNFRSF25-Agonist, PTX-35

**Expert Panel Date/Time:** Day-2, Thursday, May 19<sup>th</sup> at 11:30 AM ET

**Expert Panel Title:** Optimizing Routes of Administration & Delivery Mechanisms to Induce Timely Treg Specific Activation

## **Discussion Highlights:**

- Describing a clinical-stage Treg immunomodulator with utility in both oncology and auto/inflammation
- Demonstrating preclinical efficacy in several possible, clinical indications including transplantation, autoimmunity, and metabolic diseases
- Expanding plans for new indications and modalities, as well as opportunities for partnerships

The Hanson Wade 4<sup>th</sup> Annual Treg Directed Therapies Summit is focused on targeting and translating Treg modifying therapies and brings together executives and leading researchers from large pharma, biotech and academia to discuss developments in Treg therapies.

**NightHawk Biosciences, Inc.**

NightHawk Biosciences is a fully integrated biopharmaceutical company focused on the development of new drugs from discovery through commercialization. The Company leverages its integrated ecosystem of subsidiaries to accelerate the development of novel therapies that arm the immune system, breaking through barriers that prolong traditional drug development. This empowers us to bring our ideas to life with efficient control, superior quality, and uncharacteristic agility.
