EXECUTIVE SUMMARY

This 2020 single Solvency and Financial Condition Report (SFCR) provides public qualitative and quantitative Solvency II disclosures for Sirius International Insurance Corporation (“SINT”) and the Sirius International UK Holdings Group (“SIUK” or the “Group”).

All amounts disclosed in this SFCR report are in millions of Swedish Crowns (MSEK), unless stated otherwise.

Section A contains a description of the company’s and the Group’s business and performance.

During August 2020, Sirius International Insurance Group Ltd. (“SIIG”) entered a definitive merger agreement with Third Point Reinsurance Ltd. The transaction was completed on February 26, 2021, after approval from appropriate authorities. Following the merger Third Point Reinsurance Ltd changed its name to SiriusPoint Ltd. As a consequence of the merger China Minsheng Investment Corp now has a minority ownership of the Group. SiriusPoint common shares trade on the NYSE under the symbol SPNT.

For details on the system of governance refer to section B. No material changes during 2020.

The description of the risk profile is presented in section C. No material changes during 2020.

The valuation of assets, technical provisions and other liabilities under Solvency II, and the differences to IFRS, are described in section D. No material changes during 2020.

SINT has available and eligible own funds of MSEK 12,689 (prior year MSEK 14,745) and a solvency capital requirement of MSEK 8,418 (MSEK 8,951). The change in Solvency Capital Requirement is described under section E.2, Solo.

The ratio of eligible own funds to the SCR for SINT has decreased to 151% (165%).

The SIUK Group has available and eligible own funds of MSEK 11,386 (prior year MSEK 13,345) and a solvency capital requirement of MSEK 8,575 (MSEK 8,860). Refer to section E.2, Group.

The ratio of eligible own funds to the Group SCR for SIUK has decreased to 133% (151%).

SINT and SIUK Group are required to submit Quantitative Reporting Templates (QRTs) to the Swedish Financial Supervisory Agency (SFSA), Finansinspektionen.

A subset of QRTs is presented in the appendix to this single SFCR. Amounts in QRTs are in thousands of Swedish Crowns (SEK ‘000).

A. BUSINESS AND PERFORMANCE

A.1 BUSINESS

SOLO

Name and legal form of the undertaking

This report covers the business of Sirius International Försäkringsaktiebolag (publ), ("SINT"), Corporate Identity Number 516401-8136.

Financial supervisor is the Swedish Financial Supervisory Authority:

Finansinspektionen
Box 7821, 103 97 Stockholm, Sweden
+46 8 408 980 00
finansinspektionen@fi.se

External auditors

Ernst & Young AB
Jakobsbergsgatan 24, Box 7850, Stockholm SE-103 99, Sweden
Tel: +46 8 520 590 00

Qualifying owners

At 31 December 2020, Sirius International Försäkringsaktiebolag (publ) was 100% owned by Fund American Holdings AB (Sweden), which was 100% owned by Sirius Insurance Holdings Sweden AB (Sweden), which was 100% owned by Sirius Group International S.à r.l. ("SGI"), in turn 100% owned by Sirius International UK Holdings Ltd.

Sirius International UK Holdings Ltd. ("SIUK") was 100% owned by Sirius Bermuda Insurance Company Ltd. (Bermuda) ("SBDA"), which in turn was 100% owned by Sirius International Group Ltd. (Bermuda).

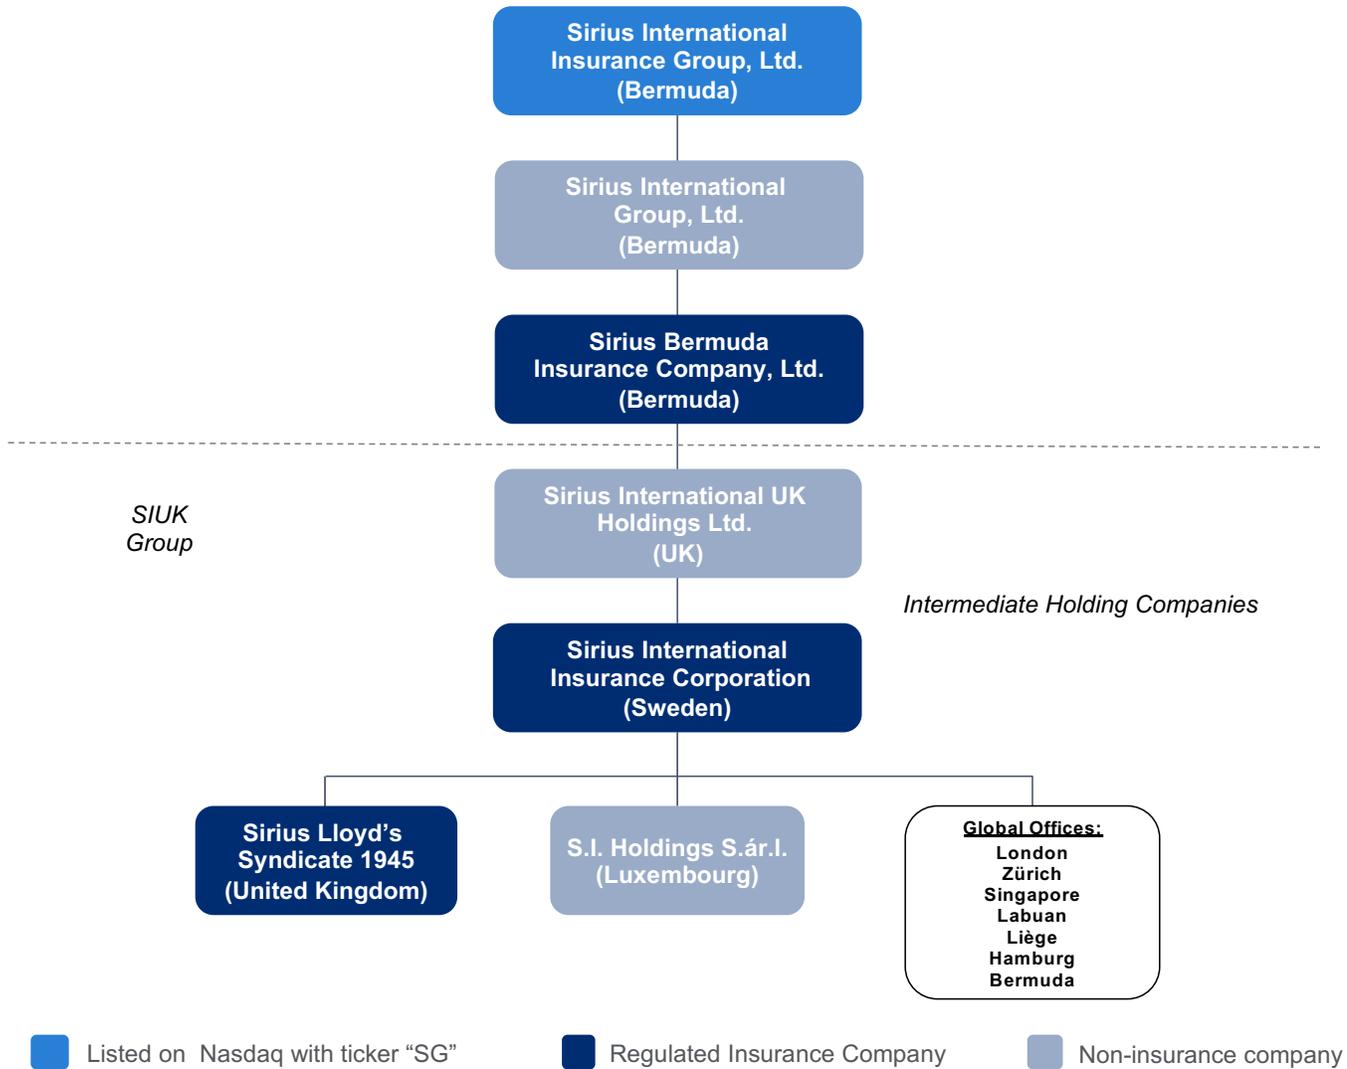

Sirius International Group Ltd. was 100% owned by Sirius International Holdings Ltd. (Bermuda), in turn 100% owned by Sirius International Insurance Group Ltd. (Bermuda).

Sirius International Insurance Group Ltd. ("SIIG") was majority owned by CM Bermuda Ltd. (Bermuda). Effective as of November 2018, SIIG was publicly listed on The Nasdaq Global Select Market. As of December 31, 2020, CM Bermuda Ltd. owned 96% of the Company's issued and outstanding Common Shares. CM Bermuda Ltd. (Bermuda) was 100% owned by CM International Holdings Pte. Ltd. (Singapore) which in turn was owned to 81.8% by China Minsheng Investment Group Corp. Ltd. ("CMIG") (P.R. China) and to less than 10% each by three minority shareholders.

CMIG was owned to 14,9% by Horgos Guoxin Baotai Venture Capital Co., Ltd (P.R. China) and by 60 Corporate Shareholders, each owning less than 5%.

SOLVENCY AND FINANCIAL CONDITION REPORT
A. BUSINESS AND PERFORMANCE

Simplified legal structure:

Material lines of business and geographical areas

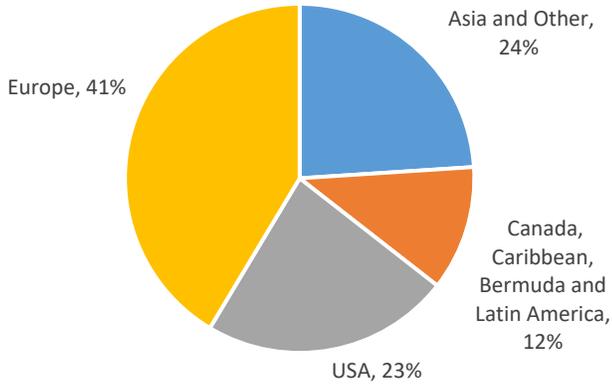

SINT is a global (re)insurer domiciled in Sweden, focused on property and other short-tail lines of business.

The business is well-diversified, both in regard of lines of business and geographical presence.

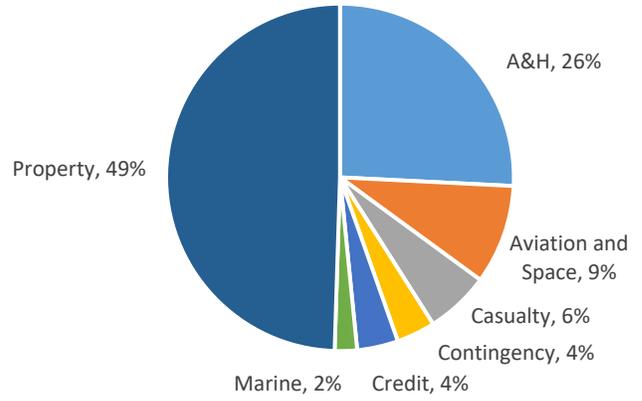

The major lines of business are Property; Life, Accident & Health; Casualty; Aviation & Space; Marine & Energy; and Credit & Bond. Property represents half the portfolio. The major part of the business is reinsurance.

SOLVENCY AND FINANCIAL CONDITION REPORT

A. BUSINESS AND PERFORMANCE

GROUP

The sections of this report that cover the Group relate to the business of the Sirius International UK Holdings Group (“SIUK Group” or the “Group”), which up until 31 December 2020 was headed by the holding company Sirius International UK Holdings Ltd (“SIUK”), corporate identity number 10624541. In this Group, Sirius International Försäkringsaktiebolag (publ), Corporate Identity Number 516401-8136, is the only company being subject to the Solvency II regulations on a solo basis.

Group supervisor is the Swedish Financial Supervisory Authority:

Finansinspektionen
Box 7821, 103 97 Stockholm, Sweden
+46 8 408 980 00
finansinspektionen@fi.se

The SIUK Group is also included in the scope of group supervision carried out by the Bermuda Monetary Authority (BMA) over the Bermuda-based SIIG Group. Because of this, Solvency II equivalent group supervision is exercised at a higher level for the broader SIIG Group, and the Solvency II Group supervision within the European Economic Area (EEA) was until 31 December 2020 capped at SIUK, but is from 1 January 2021 capped at SGI level (see “Significant events during the financial year”).

External auditors

PWC
113 97 Stockholm, Sweden
+46 10 212 4000

For SIUK and other companies in the SIUK Group, external audit is carried out by local PWC offices.

For an overview of related undertakings, see section A.6 below.

SIGNIFICANT EVENTS DURING AND AFTER THE FINANCIAL YEAR

For information on losses emanating from the Covid-19 pandemic refer to A.2 Underwriting Performance.

During August 2020, Sirius Group entered a definitive merger agreement with Third Point Reinsurance Ltd. The transaction was completed on February 26, 2021, after approval from appropriate authorities. Following the merger Third Point Reinsurance Ltd changed its name to SiriusPoint Ltd (“SiriusPoint”). As a consequence of the merger China Minsheng Investment Corp now has a minority ownership of the Group and SiriusPoint is the new parent company of the group. SiriusPoint common shares trade on the NYSE under the symbol SPNT.

As a result of Brexit, SINT has applied with the Prudential Regulation Authority (“PRA”), to convert its UK Branch to a so called third country branch. The company will continue the operations under a temporary permissions regime as legislated by the British government. The Company is expecting to get an approval from the PRA during the transition period.

Sirius Group International S.à r.l. (SGI) is from 1 January 2021 the top-company in the Solvency II Group.

SINT has on February 26, 2021, resolved to change its name to “SiriusPoint International Försäkringsaktiebolag (publ)”. The name change is still subject to approval by the SFSA and the Swedish Companies Registration Office.

A.2 UNDERWRITING PERFORMANCE

The year 2020 will go down in modern history as being one of the most challenging years in the insurance industry. The number of natural catastrophes was higher than the average for the period since year 2000, resulting in great humanitarian and economic losses. This in combination with the most devastating pandemic the world has seen since 1918. A pandemic that will pervasively affect society and the way people live for a long time forward.

Even if the natural catastrophe losses were not record breaking in 2020, they were 40 % higher than the 21st century average. United States was once again the market worst affected in terms of insured losses, where 76% of the global insured natural catastrophe claims incurred. This is above the 21st century average of 56%. The European market on the other hand noted the lowest natural catastrophe claims since 2006. During the unusually active hurricane season over the Atlantic, no less than 30 named storms, 13 hurricanes and 6 major hurricanes were noted. Of these, hurricanes Laura and Sally were the costliest with combined claims estimated to 14 billion USD. Additionally, continuous and powerful consecutive storms, known as the phenomena Derecho, hit and caused claims estimated to 8 billion USD for the whole industry. The global insurance industry's cost for the Covid-19 pandemic cannot yet be reliably estimated.

SINT's insurance portfolio has also been affected by the above events, but the extent varies depending on geographical exposure and net market shares. The largest (re)insurance losses for SINT during 2020 emanate from the Covid-19 pandemic, the weather phenomena Derecho and hurricane Laura. These events combined are estimated to have resulted in claims of approximately MSEK 1,385 for own account. The company's globally diversified insurance portfolio has a dampening effect on the result despite significant losses from specific risks or geographic regions.

Gross premium income amounted to MSEK 9,472 (10,119). The decrease in gross premium income is mainly related to a fronting arrangement, where the premium for own account is 0. The premium income for own account amounted to MSEK 6,150 (3,889), being 58% higher than in the previous year. The increase in premium income for own account is mainly explained by new contracts, previously signed by a sister company. The increase is also partly explained by the insurance contract the Company entered in 2019 with another entity within the Group, which protects the Company from loss development from reinsurance contracts from prior underwriting years.

Claims reserves from previous accident years have been stable during the year, with a positive run-off result in the underlying portfolio of MSEK 0.4. The price levels of the insurance portfolio have been satisfactory during the year for multiple markets and insurance classes, while some segments in the portfolio struggle with profitability. The portion of the insurance portfolio, which was renewed at the beginning of 2021, has noted a stable volume with increased risk adjusted price levels. Overall for the portfolio, the pricing and renewal volume for 2021 is deemed to be satisfactory and in line with expectations.

The loss from insurance operations amounted to MSEK -532 (-479). The combined ratio was 108 % (113%). The weak insurance operating result is mainly due to claims emanating from the Covid-19 pandemic. All business segments are affected, but the majority of claims are found in assumed property reinsurance.

The table below summarizes the company's underwriting performance by major line of business, split by direct insurance and assumed reinsurance. The table is excluding allocated investment return transferred from the non-technical account and non-recurring costs.

SOLVENCY AND FINANCIAL CONDITION REPORT

A. BUSINESS AND PERFORMANCE

The Personal Accident & Health line, direct as well as assumed reinsurance, is mainly written out of the company's London office. This combined line produced a profit of MSEK 54 during 2020 (prior year: 17). The Marine, Aviation and Transport lines are written from all branch offices, with the exception of the Zürich office which exclusively writes Aviation on a direct and reinsurance basis and the office in Bermuda writing Property & Casualty reinsurance. All in all, Marine, Aviation and Transport produced a combined profit of MSEK 51 (loss of -134). The line Fire and Other Property damage is by far the largest line of business and is written from all locations with the exception of the Zürich office, as mentioned above. This line is mostly written on an assumed reinsurance basis. On a combined basis including direct insurance as well as assumed reinsurance, this line represents approximately 57% of the total gross premium income and produced underwriting losses for 2020 of MSEK -371 (-392) due to the major losses mentioned above. The line assumed Credit reinsurance is predominately written out of the Liège office and the book produced an underwriting loss of MSEK -56 (profit of 43) for the year. The Casualty line, predominantly written from the offices in Bermuda, New York and London, produced an underwriting loss of MSEK -105 (-44). The Contingency line, predominantly written from the offices in London, Stockholm and Liège, produced an underwriting loss of MSEK -60 (-11).

The gross premium income as well as the underwriting results are below plan, due to the reasons mentioned above.

The underlying profitability in the insurance operations is satisfactory, despite increased competition in the market. The diversified investment portfolio is expected to provide a stable yield. However, the fierce competition requires stringent pricing and underwriting, continued efficiency improvements and sound balancing of risks between the insurance and investment operations, in order to ensure long-term profitability. The company closely monitors available capital with the goal to have an efficient and forward looking capital management process over the insurance cycle, allowing the company to write the business targeted by its business model. In the planning process, as well as on a quarterly basis, the capital impact from our underwriting and investment strategies are reviewed. The analysis shows that the company is properly capitalized to support the medium term planning process and that the company is capable of sustaining its business model also under both internal and external deviations from the view in the base scenario.

A.3 INVESTMENT PERFORMANCE

Ensuring policyholder security for the policyholders of SINT is fundamental to all company endeavours. SIIG Group’s investment mission is to maximize long-term total returns (after tax) without assuming risk in an amount which might jeopardize the viability of the Group’s insurance franchise. SINT’s and the SIUK Group’s investment missions are aligned with the SIIG Group’s.

Notably, a number of SINT’s investment portfolios are constrained by regulatory requirements, liquidity needs or other unique considerations. Such requirements must always be met.

1. Primary Objective: support Policyholder Liabilities (existing and future) and maintain compliance with regulatory and other requirements.
2. Secondary Objective: maximize long-term total returns on an after-tax basis.

An underlying principle of the SIIG Group is to manage all risks on an enterprise wide basis. Further, as a conceptual framework to simplify and facilitate investment deployment, guidelines provide that the SIIG Group ensures that high quality assets support the Policyholder Liabilities of its Group companies. Investments in excess of this amount, Owners’ Funds, may be invested across asset classes to maximize long-term total returns (after tax) based on the owners’ capital and liquidity requirements and risk appetite.

The table below gives an overview over the portfolio composition:

	SINT		SIUK Group	
	2019	2020	2019	2020
Equities	2,642	1,528	3,341	1,536
Government Bonds	1,918	2,296	2,405	2,864

Credit Quality	AA	AA+	A+	AA+

On December 31, 2020 (2019) the SIUK Group held securitised assets to the value of SEK 1,541,803,074 (615,441,465) and US Agency holdings of SEK 460,077,028 (558,934,720).

Sirius International held securitised assets to the value of SEK 29,588,421 (8,456,041) and US Agency holdings of SEK 459,170,301 (554,664,737) on December 31, 2020 (2019).

The securitisation assets in SINT are vetted at purchase to make sure they are allowable securitisations under Solvency II. The assets for all entities are monitored closely for any change in risk.

A.4 PERFORMANCE OF OTHER ACTIVITIES

There are no other activities to comment.

A.5 ANY OTHER MATERIAL INFORMATION

Following the British parliament ratification of a withdrawal agreement, the UK left the EU on 31 January 2020. This began a transition period that ended on 31 December 2020 when an agreement was entered into between the UK and the EU. During 2019, SINT applied for inclusion in the Prudential Regulation Authority's (PRA) Temporary Permissions Regime on behalf of its UK branch and submitted an application for a so called Third Country Branch (TCB) to the PRA. SINT will operate under the Temporary Permissions Regime until the permission of the TCB is granted.

At the end of the transition period, with effect on January 1, 2021, Sirius Group International S.à r.l. (SGI) replaced SIUK as the top-company in the SINT Solvency II Group.

SINT considers all other material information on the business and performance of the company to have been discussed above and/or in other sections.

A.6 GROUP LEGAL AND ORGANISATIONAL STRUCTURE

For the Group legal and organisational structure, refer to Appendix 1. The ownership of the undertakings is 100% unless otherwise stated in the organisational chart.

Material (Re) Insurance Undertakings and significant branches

Sirius International Insurance Corporation (SINT)

SINT is an international (re)insurer headquartered in Stockholm Sweden, focused on property and other short-tail lines of business. Sirius International is the largest reinsurance company in Scandinavia and a leading reinsurer in the European markets. SINT is licensed to write all classes of non-life Insurance, except class 10 (motor liability insurance), and all classes of reinsurance.

Major offices:

- United Kingdom Branch Office, London: A SINT branch office specialising in insurance, with a complimentary reinsurance offering. The branch writes across a multitude of lines in global markets. Classes of business include Accident & Health, Property Direct, Facultative and Binders, Contingency, Casualty and Energy Insurance. The branch has the license to write the same direct insurance and reinsurance as SINT. In addition, it has the license to sell cross-border direct insurance in the same classes as SINT.
- SINT's Belgian Branch Office in Liège actively writes Property, Marine, Miscellaneous and Agriculture treaties in Benelux, France, Italy, Spain, Portugal, the Mediterranean area, Israel, Africa, Latin America including Mexico, Central and South America, as well as Life, Accident and Health treaties in the above-mentioned European countries. Liège is also the centre of expertise for Credit & Bond reinsurance worldwide. The branch is licensed to write all classes of reinsurance. The branch has the license to write the same direct insurance and reinsurance as SINT. In addition, it has the license to sell cross-border direct insurance in the same classes as SINT.
- Bermuda Branch Office: A SINT branch office writing reinsurance business for US and Global insurance companies, with a focus on property catastrophe and casualty business. The branch is licensed to write all classes of property and casualty insurance and reinsurance business.
- Asia Branch Office: A SINT branch office in Singapore has established a strong foothold in underwriting treaty business in Asia with prominent presence in China, focused mainly on property. The branch offers reinsurance solutions attuned to clients' needs and provides lead capacity for excess of loss programs as well as facultative support in property and engineering classes emanating from Asia. The branch is licensed to write all classes of reinsurance.
- Hamburg: A SINT sole agent underwriting business from the Central European markets, including Germany, Austria and Switzerland as well as selected Southeastern European countries, i.e. Romania, Bulgaria and all former Yugoslavian Countries. The office offers both Treaty and Facultative reinsurance solutions for all lines of business with a strong focus on Property.
- Zürich Branch Office: A SINT branch office writing reinsurance business worldwide, focusing on Aviation and Space. The branch is licensed to write all classes of reinsurance.

Sirius International Managing Agency / Lloyd's Syndicate 1945

The Managing Agency obtained regulatory approval July 1st, 2014 and is 100% owned by SINT. The Managing Agency is responsible for the Syndicate.

Established in 2011 Sirius Syndicate 1945 is authorized to write a multitude of classes on both insurance and reinsurance basis while benefiting from Lloyd's extensive licenses and A+ security. Classes of business include Accident & Health, Property Direct Facultative and Binders, Contingency, Casualty and Energy Insurance.

A.7 GROUP TRANSACTIONS INFORMATION

On 21 Dec 2020 Sirius Group International S.à r.l. (SGI) resolved to put its wholly-owned subsidiary SI Caleta (Gibraltar) Limited (“SI Caleta”) into voluntary liquidation. The liquidation is expected to be effectuated in Q2 2021. In connection with the resolution, it was also resolved to carry out an interim distribution within the framework of the liquidation, of essentially all assets of SI Caleta, save for an amount to cover liquidator fees etc. The only material asset of SI Caleta consisted of a SEK denominated debt instrument (issued by SGI, with SGI as borrower and SI Caleta as lender), with a nominal outstanding value of SEK 2,893,318,745 (Asset Linked Note), together with a minor portion of cash amounting to approximately USD 600,000. The interim distribution was effectuated as per 23 Dec 2020, and the Asset Linked Note was, as an effect of the distribution, cancelled by operation of law.

During the year SINT has transferred MSEK 1,031 in capital contributions to the subsidiary Sirius International Corporate Member Ltd in order to cover losses and meet the capital requirements by Lloyds. An additional contribution of MSEK 100 was made in March 2021.

B. SYSTEM OF GOVERNANCE

B.1 GENERAL INFORMATION ON THE SYSTEM OF GOVERNANCE

SOLO

The Administrative, management or supervisory body (AMSB) and other key persons

The **SINT Board of Directors (Board)** has the ultimate responsibility for operations of the business and the compliance with the laws and regulations. The Board adopts all policies, the statement of risk tolerance and other matters required by the regulator at least annually, including for example approval of the ORSA and supervisory reporting. Further details on the obligations and authorities of the Board are outlined in a Board Authority and the Board Rules of Procedures.

The **Managing Director (MD)** of SINT manages the company's organisation, under the supervision of the Board, and ensures satisfactory organisation of the operations. Further details on the obligations and authorities of the MD are given in an Instruction for the MD.

The **Executive Team** is a forum in which the management supports the MD by providing information and advice in the decision making process. Generally, overall Group related decisions are made by the MD. Each member of the Executive Team is responsible for a function or a department within which the Manager has a decision-making mandate.

The **Chief Underwriting Officer (CUO)** is responsible for the development and monitoring of adherence with global underwriting guidelines. The MD and CUO perform periodic underwriting reviews at the various legal entities and branches to assess adherence with the global underwriting guidelines.

The **Outward Reinsurance manager** is responsible for the development and monitoring of global retrocessional guidelines. The Security Committee regularly reviews and assesses the credit worthiness of existing and potential retrocessional partners. The Outward Reinsurance manager is also responsible for the coordination and placement of all retrocessional covers.

The **Chief Financial Officer (CFO)** is responsible for the control environment and reasonableness of amounts reported in the SINT legal entity financial statements. The CFO approves a chart of accounts and participates in the coordinated close calendar and reporting process throughout the Group.

The **General Counsel** is responsible for SINT's Legal function (including the Syndicate) and Legal policy as well as for working with the SIIG Group General Counsel in monitoring, assessing and mitigating legal risks as they exist and may emerge. Country specific legal risk monitoring, assessment and mitigation activities are the responsibility of local management.

The **Chief Operating Officer (COO)** supports management and the organisation in respect of risk management, investments and strategic projects.

The **Chief Risk Officer (CRO)** is head of the Risk Management function and is responsible for assisting the Board and the Risk Management Committee to ensure an effective operation of the risk management system, in order to identify, measure, monitor, manage and report SINT risk exposure and development of SINT risk profile.

The **Chief Compliance Officer (CCO)** is head of the Compliance department and the manager for the SINT Data Protection Officer. The CCO is responsible for developing compliance programs, reviewing company policies, and advising on compliance risks.

SOLVENCY AND FINANCIAL CONDITION REPORT

B. SYSTEM OF GOVERNANCE

In order for the Board and the MD to make strategic and overall decisions based on relevant information, **committees** are established to assist the Board and the MD. The following Board committees have been established: The Risk Management Committee (RMC), The Investment Committee and The Audit Committee. The following MD Committee has been established: The Security Committee. The Remuneration Committee is placed at SIIG Board level. The committees are established to consider, analyse and act on certain matters and provide advice and recommendations to the Board and the MD ahead of decision making. After the committees have given their advice, decisions related to the overall business and strategies are generally made by the Board and the MD. Decision-making can be delegated according to the mandates described in the Rules of Procedures of each committee. At least one Board member, or a member of the Management Group, is always represented in a committee.

The **four key functions**, Actuarial, Compliance, Risk Management and Internal Audit are described below separately and in chapter B.5 - Internal control system.

Changes in the system of governance during the reporting year

There were no material changes in the system of governance in 2020.

Remuneration policy and practices

The Remuneration Policy aims at mitigating the risk that the remuneration structure would promote excessive risk-taking, which could have a major impact on SINT's financial stability. In addition, the policy aims at securing that the remuneration to employees does not conflict with the interest of customers. The policy thereby contributes to the mitigation of operational and compliance risks. The overriding principle for compensation to SINT employees is that salaries and other remuneration are in line with the market level in the reinsurance industry. There are both fixed and variable components in the remuneration guidelines. The variable remuneration component is based on a combination of the assessment of the individual and the collective performance, such as business area and the overall results of the undertaking or Group. The variable remuneration program contains a flexible, deferred component that considers the nature and time horizon of the undertaking's business in order to align the remuneration practices with the long term interest of shareholders.

SINT applies the basic principle for occupational pension plans that are common for each different jurisdiction within which SINT operates. The MD has a defined contribution based executive pension plan. Certain members of management can be offered to subscribe to a special premium based pension plan. Both plans are safeguarded by insurance.

Material transactions during the reporting period

No material transactions at SINT solo.

SOLVENCY AND FINANCIAL CONDITION REPORT

B. SYSTEM OF GOVERNANCE

GROUP

The SIIG Group, headed by the Bermuda-based holding company SIIG has been subject to Solvency II equivalent group supervision by the Bermuda Monetary Authority (BMA) since 2016. The ultimate insurance undertaking within SIIG, Sirius Bermuda Insurance Company Ltd, is classified as the designated insurer of the SIIG Group.

As a consequence of the BMA group requirements, a group governance structure was established at SIIG level in 2016. Four group key functions (Actuarial, Compliance, Internal Audit and Risk management) have been established at SIIG level in order to set up common processes and procedures as applicable, taking different regulatory frameworks into account. In addition, managers have been appointed with a SIIG Group responsibility for coordination of finance, underwriting, tax, legal and IT issues.

Different committees (Audit & Risk Management, Compensation, Finance, and Nominating & Corporate Governance) have also been established by the SIIG Board of Directors (SIIG Board) to assist in monitoring of performance, risks and governance of the group. Quarterly reports are presented to the SIIG Board.

Group solvency is calculated both at SIIG Group level and SIUK Group level.

SINT is subject to Solvency II Group supervision by the Swedish FSA with SIUK as the ultimate holding company of the European (sub-) Group. SINT has established sound processes and procedures to comply with the group reporting requirements and produces an annual SIUK Group ORSA. Group solvency is calculated annually and intra-group transactions are monitored continuously in order to capture any transaction above the threshold set by the Swedish FSA. The SIUK Board and the Swedish FSA have approved that SINT is responsible for the Solvency II Group reporting package to the Swedish FSA.

The BMA initiated a group supervisory college in 2016 including supervisors from Bermuda, Sweden, New York and UK. In 2018 the college became operational with the signing of a Memorandum of Understanding. The BMA group supervisory reporting includes information such as group statutory financial returns, capital and solvency return, financial statements, solvency self-assessment and intra-group transactions, retrocession and risk exposures.

Changes in the system of governance during the reporting year

There have been no changes to the system of governance.

Material transactions during the reporting period

SIUK paid a dividend of MUSD 60 in 2020 and declared a foreseeable dividend of MUSD 18, to be paid in 2021.

B.2 FIT AND PROPER REQUIREMENTS

SOLO

Fit and proper policy

SINT has a Fit and Proper Policy and Guidelines in place to ensure that identified key persons and employees directly involved in insurance distribution fulfil requirements of adequate professional qualifications, knowledge and experience to enable sound and prudent management (fit), and honesty, good reputation and integrity (proper).

Key persons are the Board, MD, management team, branch managers and the four key functions (Actuarial, Compliance, Risk Management and Internal Audit).

SINT further has procedures covering requirements from the Insurance Distribution Directive (IDD).

Process for assessing fitness and propriety

The HR Director is responsible for the Fit & Proper process. The HR Director shall when appropriate liaise with the Legal and Compliance functions. The HR Director registers the Fit & Proper assessments. Key persons and employees directly involved in insurance distribution are assessed prior to their initial appointment; and reassessed annually or every third year depending on category of personnel. The assessment is based on a CV, a questionnaire, extract from criminal record and credit reference.

GROUP

The SINT Solvency II fit and proper procedures are described in the SFCR solo section above. For other insurance companies in the SIUK Group, local legislations apply. Board directors/members of SINT's owner companies are fit and proper tested by the Swedish FSA.

B.3 RISK MANAGEMENT SYSTEM

SOLO

Risk management is an ongoing process with the objective of creating a risk management culture that starts from top management and spreads throughout the entire organisation. The risk management system within SINT and its subsidiaries is built upon the three lines of control concept (as detailed in section B.5 - Internal control system). The Board is ultimately responsible for the company's risk management strategy, risk tolerances and policies.

The Board deploys the responsibility through different risk committees. One such committee is the Risk Management Committee, which is a committee to the SINT Board. The Risk Management Committee formalizes the corporate management of critical risks across the Group, consistent with the overall risk appetite. The Risk Management Committee meets quarterly.

The Board approved Statement of Risk Tolerance (SoRT) sets SINT's overall approach and attitude towards risk, based on current market conditions and strategic opportunities to deploy capital. It provides the framework for risk guidelines and risk limits governing the day-to-day business operations. The SoRT aims at ensuring that SINT controls its risk taking to acceptable tolerance levels when implementing strategies to yield shareholder return. For risk quantification, SINT utilizes various internal aggregate exposure systems, and regulatory and rating agency capital models.

The Risk Management function is responsible for assisting the Board and the Risk Management Committee in the effective operation of the risk management system. The function assists with identification, measurement, monitoring, management and reporting of SINT risk exposure and analysis of the development of the risk profile. The Risk Management function is headed by the Chief Risk Officer (CRO). The CRO, the Risk Control Officer (RCO) and Risk Managers effectuate the responsibilities of the Risk Management function.

GROUP

The Risk management system in SINT, the operating insurance company in the SIUK Group, is described in the solo section above. The SINT Risk Management function is also calculating Group SCR, managing the Group ORSA and monitoring risk at the SIUK Group-wide level, and reporting an independent and comprehensive view of these risks.

The SINT Risk Management function assists the SIIG level Risk Management key function in coordination of risk management activities in the wider Group.

B.4 ORSA

SOLO

The objective of the ORSA is to assess the overall short-term and long-term solvency needs of SINT, consistent with the financial planning period.

An ORSA policy describes the governance and the scope of the ORSA. The Board approves the ORSA policy and ensures that the ORSA process is appropriately designed, implemented and documented. The ORSA report is reviewed, challenged and approved at least yearly before the submission to the regulator. The Board can also request a non-regular ORSA, which will be considered by the Board following any significant change in the risk profile or in the company legal structure.

The ORSA process is based on risk assessments, business reviews and risk monitoring processes both in the first and the second line of control. These activities are integrated in the normal business cycle of the organisation, and the risk management and ORSA process is therefore continuous. The Risk Management function works closely with capital management, the planning function, and the Board to identify scenarios to use in the multi-year ORSA analysis of solvency needs. The scenario selection and projection analysis is part of the company's planning process. Multiple capital requirement perspectives are analysed to determine the own solvency needs. The risk profile, approved risk tolerances and the business strategy are considered. The risk profile is analysed and projected with the Solvency II standard formula and the internal Economic Risk Capital model. The own solvency need is based on the internal Economic Risk Capital model. Insight from the ORSA is used by the Board to assess the feasibility of the Business Plan.

The Risk Management function manages the ORSA report. The assumptions and the conclusions in the ORSA report are challenged and approved in multiple steps; by the CRO, by the Risk Management Committee and ultimately by the Board. The Board approved ORSA report is sent to supervisory authorities and it provides a comprehensive view of the ORSA process, highlights key observations from the analysis performed during the ORSA period, and focuses on the multi-year solvency. The finalization of the ORSA report is undertaken as part of the annual planning cycle, or as part of an evaluation of strategic initiatives, and the ORSA is input to the Board's approval of the business plan.

GROUP

The SIUK Group ORSA process is integrated with the SINT Solo ORSA process, and focuses on group specific risks. The SINT Risk Management function manages the Group ORSA process.

The SINT Risk Management function assists the SIIG level Risk Management key function in coordination of ORSA activities in the wider Group for the corresponding BMA requirement of undertaking a Group Insurer's Solvency Self-Assessment (GISSA).

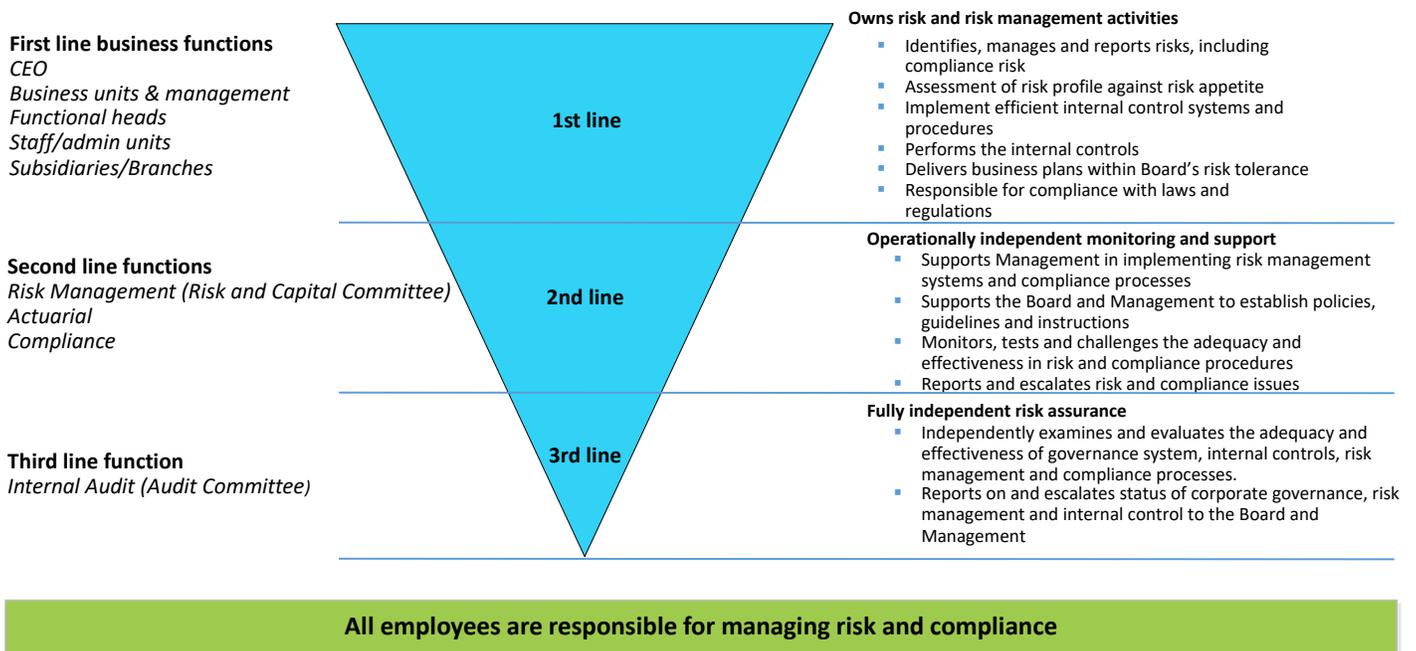

B.5 INTERNAL CONTROL SYSTEM

SOLO

Internal control is a process within SINT defined to assure effectiveness and efficiency of operations, reliability of financial reporting and compliance with laws and regulations. The Board is ultimately responsible for the internal control system, which consists of the three lines of control structure and various internal control procedures.

Three lines of internal control

The three lines of control ensure that roles and responsibilities are clearly defined and separated:

The 1st line of control consists of the management, the business units and branches, the accounting and control functions as well as the support and administrative functions. This is where the risks are identified and managed and where the major responsibility for internal control and compliance lies. A clear control structure has been established including regular reviews of underwriting, claims, financial and insurance accounting.

The 2nd line of control consists of the Risk Management, Compliance and Actuarial functions performing operationally independent risk and compliance monitoring. These functions report directly to the MD and the Board and do not take part in operational decision making. They are entitled to have access to all information, records and meetings relevant to carrying out their duties and controls. The Actuarial function is established to monitor and coordinate the calculation of technical provisions.

The 3rd line of control is the Internal Audit function which performs fully independent reviews of all areas, including the Risk Management, Compliance, Actuarial and Management functions. Independence is secured by a straight reporting line to the SINT Audit Committee and Board.

SOLVENCY AND FINANCIAL CONDITION REPORT

B. SYSTEM OF GOVERNANCE

Strengthened internal control over the financial reporting procedures

SINT has identified a number of key processes with a material impact on the result of the financial reporting. These processes have clearly defined narratives and flowcharts, from which the internal control procedures can be derived, per Sarbanes Oxley (SOX) regulation. The controls are regularly being tested by the internal audit department and external audit to ensure effectiveness and efficiency. The result of the testing is reported to the Audit Committee and the Board.

Internal Framework

In order to ensure clear and well-structured governing documents, SINT has set up an internal framework. The governing documents set out the principles, roles and responsibilities, main processes and procedures as well as reporting to Board and management for different areas of the business.

Management meetings

Important parts of SINT governance are the underwriting reviews, business planning, reserve meetings and the result meetings, as well as the reviews and other regular information meetings performed throughout the organisation.

COMPLIANCE FUNCTION

The operationally independent Compliance function is headed by the Chief Compliance Officer (CCO), who is responsible for assisting the Board in assuring that a proper written framework is in place as required by laws and regulations and adopted to the business conditions. The Compliance function supports the Board and business in identifying, measuring, monitoring and managing regulatory risks that may occur. The CCO reports on the compliance status to the Board, MD and management. Compliance coordinators (in the first line) are appointed in the subsidiaries and branches to support the CCO and to take specific account of applicable local requirements. There is a risk-based annual compliance plan outlining the major activities of the function. The Compliance function's work is governed by a Compliance Policy and Compliance Function Guideline, which has been adopted by the Board and MD respectively. The Compliance function has continued its focus on GDPR and IDD in 2020. The Compliance department includes the Data Protection Officer (DPO) role.

GROUP

Every insurance undertaking of the SIUK Group has an internal control system that is fit for each business and which is in compliance with local legislations. These systems include Boards of Directors (Boards), management, control functions, administrative and accounting procedures, and an internal control framework and appropriate reporting arrangements at all levels of the undertakings.

Strengthened internal control over the financial reporting procedures

The major insurance companies throughout the SIIG Group apply the same SOX internal control over the financial reporting procedures as described above. Major deficiencies are reported to the SIIG Audit and Risk Management Committee.

Management meetings

Management meetings as described above are carried out in the insurance companies and coordinated at SIIG Group level as appropriate.

Compliance

During 2020 the Sirius Group compliance team has continued the projects to harmonise certain compliance processes and procedures throughout the group. These include for example sanctions screening procedures and certain harmonised policies.

B.6 INTERNAL AUDIT FUNCTION

Internal Audit assists Management and the Board in achieving corporate objectives and discharging their duties and responsibilities by bringing a systematic and disciplined approach to evaluating and improving the effectiveness of the Company's risk management activities, internal controls, and governance processes. Internal Audit functions as an independent, objective assurance and advisory activity designed to add value and assist in improving operations. Internal Audit provides the Audit Committee of the Board of Directors (Audit Committee) and the Company with an independent appraisal function to assess the Company's internal control and operating environment.

Internal Audit has the responsibility to:

- Develop a flexible annual audit plan using appropriate risk-based methodology, including any risks or control concerns identified by management, and submit that plan to the Audit Committee for review and confirmation. The plan shall be developed in consultation with the Group Head of Internal Audit (GHIA) as part of the annual SIIG Internal Audit plan.
- Implement the annual audit plan, as approved, including, and as appropriate, any special tasks or projects requested by Management, the GHIA and the Audit Committee.
- Maintain a professional audit staff with sufficient knowledge, skills, experience, and professional certifications to meet the requirements of this charter.
- Implement a quality assurance program by which the GHIA assures the operation of internal auditing activities and report the results to the Audit Committee.
- Perform advisory services, beyond Internal Audit's assurance services, to assist Management or the Audit Committee in meeting its objectives.
- Evaluate and assess significant merging/consolidating functions and new or changing services, processes, operations, and control processes coincident with their development, implementation, and/or expansion so as to ensure that the resulting control environment is appropriate as to design and operating effectiveness.
- Issue written reports at the conclusion of each internal audit engagement and distribute such reports to appropriate members of operating and Executive Management, as well as the GHIA. Internal Audit reports will include management's response and corrective action to be taken in regard to specific observations and recommendations.
- Follow up on management's corrective action to ensure that issues arising from recommendations arising from internal audits have been appropriately resolved.
- Issue periodic reports to the Audit Committee, the GHIA and Management summarizing results of audit activities.
- Keep the Audit Committee informed of emerging trends and best practices in internal auditing.
- Provide a list of significant measurement goals and results to the Audit Committee and GHIA.
- Assist in the investigation of significant suspected fraudulent activities within the Company and notify the Audit Committee, and the GHIA of the results.
- Coordinate activities with the other members of the SIIG IA function, as well as external auditors and provide assistance as deemed necessary so as to best ensure an efficient audit and to allow for the maximum level of reliance on IA's work.
- Conduct, support and/or review investigations of potential violations of the Company's Code of Conduct.

B.7 ACTUARIAL FUNCTION

General

The activities of the Actuarial Departments in SINT and the SIUK Group are split between those involved in performing analyses regarding premium calculation, profitability, and sufficiency of the company's reserve provisions, and the Actuarial function that provides independent oversight and validation. The reserve provisions (often referred to as technical provisions) are calculated by reserving specialists using mathematical methods. The Actuarial function is responsible for independent reviews of the work of the reserving specialists, and performs a yearly control of the technical provision calculation.

The Actuarial function's control contains an independent assessment of the reserving needs, but also a check that the calculation is performed consistent with the Solvency II regulation. The control will thus cover not just the results, but also the information used in the calculation together with assumptions, approximations, and used methods. In addition, the Actuarial function explains the results, and material changes in the reporting period, compares these changes to the predicted development, and shares its view on the uncertainties embedded in the calculation. The Actuarial function also performs a yearly review of the underwriting performance, and the SIUK Group's own reinsurance protection (retrocession).

Furthermore, the Actuarial function is responsible for parts of the yearly qualitative reporting to the financial supervisory authority, and contributes to the company's risk control.

The recommendations of the Actuarial function are presented yearly in the Actuarial Function Report to the SINT and SIUK Group Board.

Independence of the actuarial function

The calculation of the reserve provisions is carried out by the actuarial reserving team. The Actuarial function is not involved in any of the steps, but carries out an independent review of the results, at least once a year.

The Actuarial function is not involved in the decision processes for the underwriting policy or the retrocession strategy.

B.8 OUTSOURCING

SOLO

SINT has an Outsourcing Policy to ensure that the development and implementation of any outsourcing activity is carried out in a rigorous and transparent way that maintains the interests of the company and sound internal control. The policy aims at governing the way SINT enters into outsourcing agreements and how these shall be monitored. The objective is to maintain the same internal control over the outsourced operations as if the operations were still performed in-house. SINT has a conservative approach to outsourcing of critical or important functions or activities and only outsources operations after a careful and objective analysis. All potential outsourcing is assessed to assure that important or critical outsourcing complies with the Outsourcing Policy and that relevant contracts are notified to the supervisory authority.

SINT has outsourced parts of the IT operations to a group internal service provider, as well as to an external IT service provider. Investment management is outsourced to four external providers (of which three are based in the US) who operate under the oversight of the Investment Committee as well as in accordance with the SINT Investment Guidelines. SINT has an external provider of a system for accounting and analysis of investments, also based in the US. Underwriting and claims authority for direct Accident & Health insurance, medical short term travel and health insurance for risks located is outsourced to International Medical Group, Inc. (IMG), which is a managing agent within the SIIG Group. At the end of 2019 as part of the reorganisation within the SIIG group, SINT outsourced reinsurance underwriting world-wide in relation to Property, Casualty, Marine and Accident & Health to Sirius Bermuda Insurance Company, Ltd and to Sirius International Managers LLC.

GROUP

The outsourcing policy and procedures of SINT are described in the solo section above. The policy applies to both external and internal outsourcing agreements.

There are outsourcing arrangements in place between SINT and the Sirius International Managing Agency, where SINT supplies the agency with certain services. Various companies in the SIIG Group either provide or receive services, resources or other support (the “services”) pursuant to intercompany service agreements. For example, under these service agreements, Sirius Global Services provides certain bookkeeping, accounting, financial reporting, actuarial support, risk management, legal and IT services to various affiliated companies. Sirius America Insurance Company provides certain catastrophe modelling, human resources support, network support and facilities usage. Certain claims management is also outsourced among affiliates. Some legal and administrative issues of the Luxembourg holding companies within the SIUK Group are outsourced to a corporate service provider.

B.9 ASSESSMENT OF THE ADEQUACY OF THE SYSTEM OF GOVERNANCE

SINT is assessed to have an efficient system of governance that provides for sound and prudent management of the business. The system of governance is adapted to the nature, scale and complexity of the risks inherent in its business. The Board of Directors and management are well aware of and handle both risks inherent in the business and regulatory requirements. Key functions are sufficiently equipped in terms of their role in the organisation, resources and competence. Processes are in place for fit and proper assessments and management of outsourcing. The risk management system is well developed and the ORSA is an integral part of the strategic business cycle. The internal control system promotes segregation of responsibilities and effective transmission of information within the business. Segregation of responsibilities has been implemented in the operations in order to avoid conflicts of interest.

B.10 ANY OTHER MATERIAL INFORMATION

There is no other material information on the system of governance apart from what is described in the sections above.

C. RISK PROFILE

C.1 UNDERWRITING RISK

Measures used to assess the risks, including risk mitigation

Underwriting risk is the risk of loss, resulting from fluctuations in the frequency and severity of insured events, including uncertain or inadequate pricing assumptions and extreme or exceptional events (catastrophe risk).

The guiding principles for SINT underwriters are profitability, professionalism, consistency and prudence – with the purpose of maximizing the profit at a given level of risk.

- Every underwriting decision shall be taken with the purpose of improving the overall profit, while using the latest underwriting techniques and tools and balancing with experience and common sense.
- Diversification, strong accumulation controls and an active use of reinsurance are important to adjust risks to acceptable tolerance levels.
- Development and maintenance of long-term relationships with brokers and other counterparties is paramount.
- All agreements shall be honoured and claims shall be settled promptly and fairly.
- Underwriters should take advantage of opportunities that arise, provided that such opportunities fall within underwriting guidelines.

SINT writes a variety of classes of business in accordance with its license and focuses on business within the following areas:

- Property
- Life, Accident & Health
- Credit & Bond
- Aviation & Space
- Marine & Energy
- Casualty

Catastrophe risks (losses caused by natural perils or terrorism) within property insurance constitute SINT's largest underwriting risks.

The overall limits and aggregate limits for an event are specified in the Underwriting Guidelines. Specific risk or treaty limits are specified in the detailed guidelines for each class or type of business.

In order to ensure consistency and quality in the underwriting process, all underwriting within SINT shall comply with specific routines. One of the cornerstones of the underwriting process is the four eyes system. This means that the vast majority of the business shall be written by at least two underwriters (usually a Market Underwriter and a Technical Underwriter) who agree to the price and conditions of a potential business before it is signed. By this process, the risk of misjudgements and/or errors is mitigated.

Risk mitigation

Underwriting risk, and thereby result volatility, is mitigated by diversification when it comes to inter alia territories and lines of business. SINT has cedants globally and writes most classes of non-life reinsurance in order to diversify the portfolio and mitigate risk concentration.

Result volatility is further mitigated by retrocession programs. The implementation of retrocession purchases is based on the strategic direction of the inwards portfolio, overall risk tolerances and the search for an optimal portfolio mix.

SOLVENCY AND FINANCIAL CONDITION REPORT

C. RISK PROFILE

There are several levels of control functions as well as technical systems, which are in place to monitor and control that underwriting guidelines, policies and procedures are followed. At SINT, there is an underwriting control unit reporting to the Chief Underwriting Officer. This group focuses in detail on how the business is underwritten and that the underwriters follow issued policies and procedures. This is primarily carried out by means of annual Underwriting Reviews. Another group controls the underwriting system and ensures it is used correctly and that input data is accurate. Finally, Risk Control, Compliance and Internal Audit also monitor these control groups, carrying out random inspections/tests, in detail ensuring they use sufficient control.

Reserve risk

The reserve risk, i.e. the risk that insurance technical provisions will be insufficient to meet incurred claims, is mainly handled by actuarial methods and a careful continuous review of reported claims.

Provisions are made to obtain a correct balance sheet and match revenues and costs with the period in which they emerged. The amount of the provisions shall correspond to the amount that is required to fulfil all expected obligations and reflect the best knowledge available to SINT. Acknowledged and appropriate methods are used in these estimations.

Material risks

Catastrophe (re)insurance is one of SINT's core businesses and its largest risk. The catastrophe portfolio and any (known) interdependencies and correlations in its total portfolio are captured in the monitoring.

In Non-catastrophe underwriting, SINT continues to focus on short-tailed lines, and diversification of the Property Catastrophe book with the relatively uncorrelated lines of business of Life, Accident & Health, Credit & Bond, Aviation & Space, Marine & Energy, and Casualty.

As SINT is a Non-Life (re)insurer, lapse risk is not a significant risk for the company.

Concentrations and sensitivity analysis

In underwriting, natural perils exposure (wind, flooding and earthquakes) constitutes the company's largest risk. Through the use of simulation models, the company obtains an estimation of catastrophe risk, both prior to and after retrocession. For an example on how the company and the Group analyse catastrophe risks refer to the SINT annual report, Note 2, Underwriting Risk.

Also refer to section C.7 - Risk Sensitivity.

C.2 MARKET RISK

Measures used to assess the risks

The Investment Guidelines state that the overall investment objective of SINT is to maximise long-term total returns (after-tax,) without assuming risk to an amount that might jeopardise the viability of the Group's insurance franchise. The compositions of the investment portfolio must at all times comply with supervisory authorities' regulations and approved investments guidelines.

The structure of SINT's technical provisions, risk bearing capacities, regulatory requirements, rating targets and risk tolerance are taken into account when defining asset allocation decisions and limits and setting return and liquidity targets.

SINT outsources the investment management to Sirius Investment Advisors (SIA), the Investment Manager, who acts as a discretionary advisor. Investment decisions are overseen by the Investment Committee.

SINT, as well as the Investment Manager, are obliged to ensure compliance with the Investment Management Agreement, the investment strategy as described above, the Investment Guidelines and any local regulatory requirements.

The Investment Manager manages the market risks defined in the Investment Guidelines on a day-to-day basis, whereas the Investment and Accounting function is responsible for the day-to-day operative handling of currency exposures according to the Market Risk Policy. The SINT Investment Committee reviews the investment portfolio, compliance with investment guidelines and regulatory restrictions and cash flows. It also reviews and provides feedback on Investment risks in line with the SoRT on a regular basis. The SINT Investment Committee reports their work to the SINT Board at the regular Board meetings. The SINT Investment Committee reports to the SINT Board and other relevant organisational units any major items or breaches in accordance with the Investment Policy. Further, the SINT RMC monitors compliance with the SoRT and reviews the outcome of a number of predefined stress- and scenario-tests on a quarterly basis.

Material risks

- Under Solvency II's standard formula, market risk can be divided between the following sub-risks:
- Interest Rate risk – The risk of assets or liabilities being adversely affected by changes in current risk-free interest rates.
- Property risk – market risk from changes in the level or in the volatility of market prices of real estate
- Equity Risk – The risk of losses related to the level and volatility of market prices for equities and other risk assets.
- Spread and default risk – The risk of loss related to the level and volatility of the credit spreads above the risk-free rate, including any losses related to default events of investment asset counterparties.
- Currency risk –The risk of financial loss resulting from movements in foreign currency exchange rates.
- Concentration risk – The risk of exposure to losses associated with inadequate diversification of portfolios of assets.
- Macroeconomic Environment Risk - Fluctuations in the global economy and capital markets could impair our investment portfolio and financial position.

All market risks are monitored on an ongoing basis by the SINT Investment Committee and Risk Management Committee.

SOLVENCY AND FINANCIAL CONDITION REPORT

C. RISK PROFILE

Prudent person principle

The SINT investment process is set up to support the prudent person principle. This includes, but is not limited to, the management and committees being staffed to ensure that SINT has the appropriate skills and resources, continuous independent control, appropriate procedures and appropriate reporting procedures to manage the SINT investment portfolio.

The Company forecasts the cash needed based on existing insurance contracts. The bond portfolio is invested in combination with the cash and cash equivalents to align the nature and duration of the insurance liabilities.

Risk concentration

1. The Investment Committee reviews the investment portfolio and assesses the concentration risk that the Company is exposed to in order to ensure that it is within the risk tolerance and in accordance with the investment policy.
2. The risk concentration in the bond portfolio is mitigated by limiting exposure to any one single name in the investment portfolio as set out in the investment policy. Ongoing monitoring of the concentration risk is undertaken by the Investment Committee which monitors investment holdings against the Investment Policy, which is reviewed at least annually.

Risk mitigation

The Investment Committee and the Risk Management Committee assess the different market risks and review the effectiveness of the mitigating measures in accordance with the Investment Policy.

Risk sensitivity

For exhibits on the portfolio's risk sensitivity refer to the SINT annual report, Note 2, market risk. Also refer to section C.7 - Risk Sensitivity

C.3 CREDIT RISK

Credit risk is the risk of incurring a financial loss due to counterparties failing to meet their financial obligations.

Material sources of credit risk stem from business ceded to reinsurers and from investment assets, further described below. Other minor sources of credit risk arise from amounts that are due (receivables) related to direct insurance, assumed and ceded reinsurance and from intermediaries.

Retrocession Credit Risk

Reinsurance/retrocession is used as a tool to actively mitigate insurance risk. This transfer of insurance risk brings credit risk exposures, which are carefully managed.

SINT and the SIUK Group do not strive to take on credit risk and therefore the tolerance for reinsurance/retrocession credit risk is low.

The implementation of the reinsurance purchase is based on the strategic direction of the inwards portfolio, overall risk tolerance and the search for an optimal portfolio mix.

SINT's Security Committee is responsible for managing the risk of reinsurer insolvency. To mitigate this risk, the financial condition of the Company's retrocessionaires is reviewed semi-annually, and periodically monitored.

Counterparty ratings and changes are continuously updated for all retrocessionaires.

The Security Committee uses an internal SINT rating scale that assigns an internal counterparty rating for each insurance/reinsurance company, based on internal credit analysis. External information, such as rating agencies, is used as input.

Twice a year, the liability per reinsurer is reviewed by the Outwards Reinsurance Department against the rating and limits approved by the Security Committee. The report is reviewed by the manager of the Outwards Reinsurance Department and signed off by the company's MD.

For exhibits on the credit rating distribution of the reinsurers' share of technical provisions, refer to the SINT annual report, Note 2, credit risk.

Credit Risk in Investments

SINT places its investments in securities with high credit quality. SINT's investment policy stipulates that 90% of the Policyholders Funds shall be rated no less than Investment Grade. It further stipulates limits for concentration to single issuers. The Investment Manager and the Investment Accounting and Control function monitor limits and exposures on a day-to-day basis. These are reported regularly to the Investment Committee.

For exhibits on the credit rating distribution of fixed income investments, refer to the SINT annual report, Note 2, credit risk.

C.4 LIQUIDITY RISK

The risk that the company is unable to realise investments and other assets in order to settle financial obligations when they fall due, or can only do so on unfavourable terms. The risk is also due to failure to meet regulatory requirements for liquidity levels. Liquidity is assessed centrally on a daily basis within SINT, ensuring that there are sufficient funds to cover immediate, foreseeable and unexpected cash flow requirements.

Reviews of bank accounts are made on a daily basis assuring that SINT can comply with their obligations on a day-to-day basis.

Bank accounts and investment accounts are reviewed weekly to ensure that there are sufficient funds in cash and invested in easily accessible investments should there be any need for unexpected payments to cover large claims.

All balances are reviewed on a monthly basis by the Investment Committee to ensure that all cash balances are kept at a sufficient, but not excessive, level to comply with the Company's policies and to ensure that all investments are held according to the Investment Committee Rules of Procedure with regards to risk and duration.

Banks and institutions are a counterparty risk and all banks and institutions that SINT has any dealings with must be approved by the Investment Committee before any relations are initiated.

SINT does not deem Liquidity Risk as a major risk as it maintains a high level of liquid assets to meet its liabilities.

Total amount of expected profit in future premiums

Expected profit in future premiums (EPIFP) as at 2020 Q4 and 2019 Q4 in SEK:

20Q4	EPIFP	19Q4	EPIFP
Gross	1 444 565 859	Gross	1 443 903 431
Ceded	612 395 660	Ceded	627 967 715
Net	832 170 199	Net	815 935 716

The net EPIFP for SINT has only increased marginally from 2019 Q4.

C.5 OPERATIONAL RISK

Measures used to assess risks

Operational risk is the risk of loss arising from inadequate or failed internal processes, personnel or systems, or from external events. It is inherent in all business operations.

As the risk tolerance for operational risks is low, there are systems, processes and procedures in place to identify, analyse and report on operational risks. Preventive and detective controls are in place to reduce operational risk exposure. Mitigating actions are continuously followed up by the organisation and by risk management, and reported regularly to the Executive Management Team and to the RMC who decides on further actions, if required.

As part of the company's enterprise risk management (ERM), operational risks are identified, measured and assessed by the organisation through a self-assessment process. Possible operational risks in the daily operations are identified and summarised into a risk register. The organisation also rates the identified risks on an impact and likelihood scale and creates an operational risk heat map showing the severity of all identified risks.

Risk mitigation

Risk mitigation is an outcome from the continued self-assessment processes performed by the organisation. Both the organisation, the RMC and management place a strong focus on risk mitigation.

The organisation uses incident reporting to collect information about incidents and near misses. This information is used for statistical reasons - but it is also a preventive measure for the organisation to adopt new controls in the operation and to set KRIs.

Furthermore, a Business Continuity Policy, including a Business Continuity Plan and Disaster Recovery Plan are well implemented.

Risk sensitivity

Stress tests are performed to validate material risks and events that could have a material effect on the operations and viability of the company.

The current pandemic situation in the world, the spread of the new corona virus, has put the company in a real situation where the company's Business Continuity Plan has been put into action. This event has given proof that the company's Business Continuity Plan is working as intended.

Also refer to section C.7 - Risk Sensitivity.

C.6 OTHER MATERIAL RISKS

Other material risks the company faces are Model Risk, Rating Agency Risk and Macroeconomic Environment Risk. They have been graded High by the RMC in the annual risk identification and risk ranking.

C.7 RISK SENSITIVITY

Additional Risk Sensitivity and Stress Testing of the most material risk categories in the aggregated perspective for the Solo and Group perspective is undertaken as part of the ORSA process.

C.8 ANY OTHER INFORMATION

There is no other material information regarding the risk profile.

D. VALUATION FOR SOLVENCY PURPOSES

SOLVENCY AND FINANCIAL CONDITION REPORT
D. VALUATION FOR SOLVENCY PURPOSES

D.1 ASSETS

The valuation principles applied to the assets are consistent with those used for IFRS with the following exceptions:

Property - Property, plant and equipment that are not measured at economic values should be re-measured at fair value for solvency purposes. The revaluation model under the IFRS on Property, Plant and Equipment could be considered as a reasonable proxy for solvency purposes.

Participations – Participations are valued at cost in IFRS for SINT. This is adjusted to Solvency II valuation for participations. For the SIUK Group, the adjustment for this category mainly represents the deconsolidation of the Lloyd’s Syndicate S1945. Syndicates at Lloyd’s are not considered insurance companies but the fair value of the Corporate Member holding the Lloyd’s Syndicate is included as a strategic holding, according to EIOPA guidance

No valuation adjustment has been made to Other Assets (typically receivables and deposits to cedants) with an expected duration of one year or shorter; hence the valuation for Solvency II purpose equals the valuation used in the financial statements. Other Assets with an expected duration longer than one year are valued based on discounting of future expected cash flows, which is deemed to approximate fair value. Discounting is made with the EIOPA official interest rate curves.

Total adjustments before tax per main asset category are summarized in the table below (in MSEK). Please refer to section D.2 for details related to the adjustments for technical provisions.

Adjustment to assets	SOLO		GROUP	
	2020	2019	2020	2019

SOLVENCY AND FINANCIAL CONDITION REPORT

D. VALUATION FOR SOLVENCY PURPOSES

METHODS AND BASES USED IN THE VALUATION OF THE TECHNICAL PROVISIONS USED FOR SOLVENCY PURPOSES

Technical provisions are estimated as part of the calculation of the company book closing result and liability statements. This estimate (referred to below as the IFRS reserves) is not consistent with the requirements for the valuation used for solvency purposes. A series of adjustments needs to be added in order to assess the provision used for solvency calculations.

The IFRS technical reserves consist of reserves for losses and expenses already incurred, but not necessarily reported yet, estimated by claims and reserving specialists. There are also provisions booked for future losses and related expenses from active contracts (premium reserves). These provisions are booked by not releasing any profit from the premium income relating to the future coverage.

Incoming business: The IFRS reserves for the incoming business are calculated using premium and claims information as registered by the SIUK Group underwriting and claims handling teams. Premium reserves are calculated in an automated process from information for each contract provided by underwriters and accountants. The claims specialists decide on reserves for individual claims (case reserves), but these reserves need to be adjusted for additional expected development of reported claims, and for claims not yet reported (but incurred). This adjustment is normally referred to as IBNR (Incurred But Not Reported) and is estimated by reserving specialists. Reserves for very large claims are regarded as exceptions. The development of these claims is normally assessed by the underwriters and the claims specialists.

The adjustment estimated by the reserving specialists is calculated using standard actuarial reserving and estimation techniques. The valuation of the IBNR reserves is based on underwriting year and development quarter information, with the segmentation considering individual regional and insurance class and type differences, with sometimes data separated by claims causes. The reserves for the very large claims are reviewed regularly by the reserving specialists. Reserves for future claims administration (referred to as ULAE, "Unallocated Loss Adjustment Expenses") are booked in proportion to case reserves and IBNR using factors set by the reserving specialists.

The premium reserves are checked by the reserving specialists. The process is regulated and described in the Reserving policy document and the more detailed documentation referred to in this document. The process and results for the IFRS technical reserves are subject to internal and external audits, on at least an annual basis.

Retrocession: The process for the retrocession is similar to that of the incoming business, but with some differences:

- The retrocession team is responsible for the registration of retrocession premiums, and claims amounts, including the IBNR for very large claims.
- For proportional retrocession agreements (where the reinsurer pays a pre-agreed percentage of the losses, and pays for this by offering the same pre-agreed percentage of the premium), the retrocession IBNR is calculated from the incoming business IBNR using premium proportions.
- For non-proportional retrocession agreements (all other types of agreements, normally the reinsurer pays a part of a large claim or disaster loss), IBNR is only booked in relation to reported individual losses.

Reserve adjustments for solvency purposes:

According to the regulation, the technical provisions used for solvency purposes shall be equal to the sum of a best estimate and a risk margin. The best estimate shall correspond to the average of all future cash-flows (premiums, claim payments, expenses), discounted for the expected time to the payment, relating to business where the insurance company has a legal obligation at the time of the book closing. The risk margin should be the additional amount that a potential buyer (of the insurance company) would be expected to require in order to take over and meet the insurance obligations. It is allocated in accordance with rules specified in the solvency regulation.

SOLVENCY AND FINANCIAL CONDITION REPORT

D. VALUATION FOR SOLVENCY PURPOSES

Not all types of future premium, loss and expenses development are represented in the IFRS reserves, which together with the discounting of the reserves and the risk margin is why the adjustments are necessary. The reserve adjustments are set in order to remove provisions in excess of average cash flows, and makes allowance for future cash flows not accounted for in the calculation of the IFRS reserves. The reporting of the reserves for solvency purposes requires detailed estimation on currency and country level. Since SINT accepts premium and pay claims in many different countries and currencies, and in order to avoid unnecessary approximations and simplification, the adjustments are calculated separately for each contract. For the other companies in the SIUK Group, adjustments are calculated by a combination of homogeneous risk groups (reserving classes) and underwriting year. The adjustments can be categorized as follows:

1. Removal of excess reserves
2. Allocation of bulk reserves (SINT only)
3. Inclusion of future cash flows not accounted for in the IFRS reserves
4. Accounting for discounting because of payment delay
 - Discounting of reserves
5. Adding the risk margin
 - Inclusion of Solvency II risk margin

ASSUMPTIONS USED IN THE VALUATION FOR TECHNICAL PROVISIONS FOR SOLVENCY PURPOSES

Since decisions about used methods and data segmentation are necessary for the analysis, there are several underlying assumptions used in the technical provision estimation process. The list below states the significant assumptions.

- Impact from method/model choices, factor selections and data exclusions in the process of estimating the IFRS premium and claims provisions.
- Classification of data in the IFRS reserve analysis
- Choice of premium earning patterns and profitability for recent contracts
- External expert judgement estimates of ENIDs
- Assumptions regarding future new or unwritten insurance and reinsurance contracts
- Using previous year claims, administration and investment expenses to estimate future expenses.

SIGNIFICANT SIMPLIFICATION USED IN THE CALCULATION OF THE TECHNICAL PROVISIONS USED FOR SOLVENCY PURPOSES

A number of simplifications are required in the calculation of the technical provisions for solvency purposes. The significant simplifications are:

1. The best estimate is based not on a probabilistic model, but a standard deterministic calculation using the same actuarial technique that an overwhelming majority of all insurance companies use. Even though this approach is not consistent with the solvency regulation, it is motivated by other wordings in solvency technical provisions guidelines.
1. The ULAE and the premium reserves are calculated using simplified methods that are commonly used across the insurance market
1. The non-claim specific IBNR for every non-proportional retrocession recovery is set to 0.
1. In the calculation of the Solvency II risk margin, method 2 (from the simplification hierarchy in guideline 61 of Guideline on the valuation of technical provision) is used in order to estimate the depreciation of the SCR.

SOLVENCY AND FINANCIAL CONDITION REPORT

D. VALUATION FOR SOLVENCY PURPOSES

B) LEVEL OF UNCERTAINTY IN THE TECHNICAL PROVISIONS USED FOR SOLVENCY PURPOSES

The uncertainty evaluation for the Solvency II technical provisions stated at year-end is performed as a combination of results from the SIUK Group internal capital model, and alternative calculations and tests of the various cash flows included in the Solvency II technical provisions.

The SIUK Group internal capital model is a stochastic tool for the estimation of the income statement uncertainty, and is used for the reserve uncertainty evaluation. The internal capital model does not consider all the Solvency II reserve adjustments, but gives a reasonable proxy for the reserve uncertainty. Currently uncertainty arising from premium payments, expenses other than claims related, contractual options and the risk margin calculation are not considered. There are also differences between how the internal model and the technical provision calculation includes some of the cash flows, but since underwriting and reserve risk are modelled in accordance with a mature process, and yearly updated volatility assumptions, the model results are considered realistic. The results below show standard deviations for the total insurance risk, and the reserve risk for SINT, and for the SIUK Group, as at December 31, 2020.

SINT Solo/SIUK Group Internal model end-of-year results (Standard deviation)

Insurance risk: 1,201 MSEK of which Reserve risk: 751 MSEK

Comments: The calculation of insurance risk includes all exposed risk for the calendar year 2020, and covers both underwriting and reserve risk. The reserve risk calculation is based on underwriting year triangles, and estimated with bootstrap technique.

Additional comments on the technical provision uncertainty:

2. The IFRS gross and ceded benefit reserves as at end-of-year 2020 have been estimated in the SINT Actuarial function review, and are deemed to be adequate.
3. Two independent audits of the IFRS gross benefit reserve as of end-of-year including SINT and the Lloyd's Syndicate 1945, but excluding large event claims, and runoff and special accounts have deemed the reserves to be adequate.
4. Historically the SINT IFRS run-off reserves have developed favourably.
5. The Actuarial function review indicates a positive margin in the SINT IFRS premium reserves.
6. Because of the low duration of both insurance periods and loss portfolios for new business, the risks associated with ENID and contractual options are moderate compared to insurance companies with a larger share of long-term commitments.
7. Historically there are very little deviations resulting from the various deduction (commission/brokerage) arrangements, and administration expenses.
8. Investment expenses vary by reserve size and duration, but add to relatively low amounts compared to other types of cash flows, and the volatility contributions are low.
9. A stress test has been performed for the risk margin calculation. The results show that the risk margin will shift proportionally to changes in the SCR estimate, and that changes in the duration increases have relatively small impact on the overall risk margin level.

SOLVENCY AND FINANCIAL CONDITION REPORT

D. VALUATION FOR SOLVENCY PURPOSES

Explanation of the valuation differences

Comments to the valuation differences:

In the table above, the Solvency II technical provisions are compared to the net IFRS provisions after considering all assets and liabilities included in the Solvency II calculation.

Inclusion of DAC and UPR: The remaining part of the UPR (the DAC is already considered as an asset in IFRS) is removed, and later in the calculation associated cash flows (benefits and expenses) are added.

Removal of Management IBNR: The management IBNR is the difference between the booked IFRS claims reserve and the actuaries' best estimate. There is currently no management IBNR.

Inclusion of unaccepted legally obliged business: Profit from unaccepted legally bound business normally has a reducing impact on the Solvency II best estimate.

Premiums related to difference between estimates and written: Premium stemming from incepted but not yet written premium is not included in the IFRS result. This premium would typically be additional premium from assumed proportional reinsurance contracts.

Cost and benefits related to unearned and unwritten premiums:

Estimated costs and benefits relating to the difference between estimated and written premium must be added in order to include all future cash flows.

Inclusion of future management action: Adjustments for future retrocession purchase in order to ensure consistency in the retrocession costs across the earning period of the legally bound business. The inclusion of future management action should also include expected but not yet booked adjustments relating to planned internal retrocession agreements.

Inclusion of provisions for additional expenses: The earned part of the commission, and the investment expenses are not covered by the IFRS technical provisions.

Inclusion for provision for Events Not In Data (BE): Provisions for Events Not in Data are added in accordance with industry benchmarks (3-5% depending on line of business).

Inclusion of provision for Contractual Options (CO): Estimated cash flow impact from cancellation rights after downwards shifted rating or reduced solvency margin. Since most treaties are one-year treaties, there are very small customer incentives to exercise the contractual options.

Consideration of Retrocession Bad Debt: The effect of counterparty default is estimated from market default rates.

Discounting of reserves: The difference between the undiscounted best estimate (after consideration of retrocession bad debt) and the present value of the best estimate after applying benefit, premium and expense payment patterns, and the EIOPA currency specific yield curves.

Risk Margin: Risk margin is added in accordance with the Solvency II regulation.

SOLVENCY AND FINANCIAL CONDITION REPORT

D. VALUATION FOR SOLVENCY PURPOSES

D) MATCHING ADJUSTMENT APPLIED IN THE VALUATION OF THE SOLVENCY II TECHNICAL PROVISIONS

No matching adjustment is applied in the valuation of the Solvency II technical provisions for Sirius and for the SIUK Group.

E) VOLATILITY ADJUSTMENT APPLIED IN THE VALUATION OF THE SOLVENCY II TECHNICAL PROVISIONS

No volatility adjustment is applied in the valuation of the Solvency II technical provisions for Sirius and for the SIUK Group.

F) TRANSITIONAL RISK-FREE INTEREST RATE-TERM STRUCTURE APPLIED IN THE VALUATION OF THE SOLVENCY II TECHNICAL PROVISIONS

No transitional risk-free interest rate-term structure is applied in the valuation of the Solvency II technical provisions for Sirius and for the SIUK Group.

G) TRANSITIONAL DEDUCTION APPLIED IN THE VALUATION OF THE SOLVENCY II TECHNICAL PROVISIONS

No transitional deduction is applied in the valuation of the Solvency II technical provisions for Sirius and for the SIUK Group.

(i) Recoverables from reinsurance contracts and special purpose vehicles

The companies in the SIUK Group purchase retrocession outlined in the Outwards Reinsurance Retrocession Risk Policy. The retroceded reserve is currently 46% of the gross reserve for SINT.

There are no recoverables from special purpose vehicles affecting the SIUK Group technical provisions.

(ii) Material changes in the assumptions made in the calculation of the technical provisions compared to the previous reporting period.

No material changes to the underlying assumptions of the calculation of the technical provision used for solvency purposes have been made since the Day 1 reporting.

D.3 OTHER LIABILITIES

No valuation adjustment has been made to Other Liabilities (typically payables, deposits from reinsurers and other provisions) with an expected duration of one year or shorter; hence the valuation for Solvency II purpose equals the valuation used in the financial statements. Other Liabilities with an expected duration longer than one year are valued based on discounting of future expected cash flows, which is deemed to approximate fair value. Discounting is made with the EIPOA official interest rate curves.

Pension benefit obligations are valued in accordance with IAS 19 for Solvency II purposes.

SINT's local ledger contains a safety reserve and other untaxed reserves not allowed in Solvency II. The safety reserve is in its entirety included in own funds, whereas other untaxed reserves are allocated to own funds for 79,4% and 20,6% to deferred tax liabilities.

Total adjustments before tax per main liability category are summarized in the table below (in MSEK). Please refer to section D2 for details related to the adjustments for technical provisions.

Adjustments to liabilities	SOLO		GROUP	
	2020	2019	2020	2019
revaluation of technical provisions	5 606	6 673	5 606	8 529

total adjustments before tax	15 378	17 114	7 633	10 810

D.4 ALTERNATIVE METHODS FOR VALUATION

No alternative methods of valuation have been used.

D.5 ANY OTHER MATERIAL INFORMATION

There is no other material information about the valuation of Asset and Liabilities.

E. CAPITAL MANAGEMENT

E.1 OWN FUNDS

SOLO

The company closely monitors available capital. The goal is to have an efficient and forward looking capital management process over longer periods of time/insurance cycle, allowing the company to write the business targeted by its business model. In the planning process, as well as on a quarterly basis, the capital impact from our underwriting and investment strategies are reviewed. The analysis shows that the company is properly capitalised to support the medium term planning process and that the company is capable of sustaining its business model also under both internal and external deviations from the view in the base plan. According to the ORSA analysis, the level of own funds is considered adequate to cater for both growth and adverse results without any further need for capital.

The basic own funds are comprised of tier 1 paid up capital, a tier 1 reconciliation reserve and a tier 3 amount equal to the value of net deferred tax assets. The reconciliation reserve is comprised of the excess of assets over liabilities based on Solvency II valuations, after applicable tax adjustments. The safety reserve is included in the reconciliation reserve. The company has no ancillary own funds; hence the basic own funds equals total available own funds.

Available own funds items classified as tier 1 and tier 3 constitute eligible own funds to meet the Solvency Capital Requirement (SCR). Available Own Fund items classified as tier 1 constitute eligible own funds to meet the Minimum Capital Requirement (MCR).

The own funds composition is summarised below for the reporting periods ending 2020 Q4 and 2019 Q4, respectively (in SEK '000). For further details, refer to the QRTs in Appendix 2.

Own Funds per 2020 Q4

Basic own funds before deduction for participations in other financial sector as foreseen in article 68 of Delegated Regulation (EU) 2015/35

Ordinary share capital (gross of own shares)

Reconciliation reserve

R0550	14 700 115	14 700 115	
R0580	8 951 459		
R0600	2 237 865		
R0620	165%		
R0640	657%		

The ratio of eligible own funds to the solvency capital requirement was 151% per 2020 Q4 (165% per 2019 Q4). The ratio of total eligible own funds to the minimum capital requirement was 599% per 2020 Q4 (657% per 2019 Q4).

The decrease in eligible own funds by 2,056 MSEK to 12,689 MSEK was driven by a decrease in assets over liabilities following underwriting losses from Covid-19 and unfavourable foreign exchange development.

SOLVENCY AND FINANCIAL CONDITION REPORT

D. CAPITAL MANAGEMENT

GROUP

The SIUK Group closely monitors available capital. The goal is to have an efficient and forward looking capital management process over longer periods of time/insurance cycle, allowing the Group to write the business targeted by its business model. In the planning process, as well as on a quarterly basis, the capital impact from our underwriting and investment strategies are reviewed. The analysis shows that the Group is properly capitalised to support the medium term planning process and that the Group is capable of sustaining its business model also under both internal and external deviations from the view in the base plan. According to the ORSA analysis, the level of own funds is considered adequate to cater for both growth and adverse results without any further need for capital.

The basic own funds are comprised of tier 1 paid up capital, a tier 1 reconciliation reserve and a tier 3 amount equal to the value of net deferred tax assets. The majority of the net deferred tax assets are deemed to be not available at the Group level. The reconciliation reserve is comprised of the excess of assets over liabilities based on Solvency II valuations, after applicable tax adjustments. The reconciliation reserve has also been adjusted with foreseeable dividends. Furthermore, the reconciliation reserve has been adjusted for other non-available own funds representing the non-available part of the Swedish safety reserve stemming from SINT (See further details under section E.6 below). The Group has no ancillary own funds; hence the total basic own funds equals total available and eligible own funds.

For Group SCR calculations, the default Method 1 (accounting consolidation-based) has been used.

The own funds composition is summarised below for the reporting periods ending 2020 Q4 and 2019 Q4, respectively (in SEK '000). For further details, refer to the QRTs in Appendix 2.

Own Funds 2020-12-31

		Total	Tier 1 - unrestricted	Tier 3
		C0010	C0020	C0050
Total basic own funds after deductions	R0290	11 386 321	11 305 206	81 115
Total eligible own funds to meet the consolidated group SCR (excluding own funds from other financial sector and from the undertakings included via D&A)	R0560	11 386 321	11 305 206	81 115
Total eligible own funds to meet the minimum consolidated group SCR	R0570	11 305 206	11 305 206	0
Consolidated Group SCR	R0590	8 575 418		
Minimum consolidated Group SCR	R0610	2 104 615		
Ratio of Eligible own funds to the consolidated Group SCR (excluding other financial sectors and the undertakings included via D&A)	R0630	133%		
Ratio of Eligible own funds to Minimum Consolidated Group SCR	R0650	537%		

Own Funds 2019-12-31

		Total	Tier 1 - unrestricted	Tier 3
		C0010	C0020	C0050
Total basic own funds after deductions	R0290	13 344 920	13 068 554	276 366
Total eligible own funds to meet the consolidated group SCR (excluding own funds from other financial sector and from the undertakings included via D&A)	R0560	13 344 920	13 068 554	276 366
Total eligible own funds to meet the minimum consolidated group SCR	R0570	13 068 554	13 068 554	
Consolidated Group SCR	R0590	8 859 796		
Minimum consolidated Group SCR	R0610	2 237 865		
Ratio of Eligible own funds to the consolidated Group SCR (excluding other financial sectors and the undertakings included via D&A)	R0630	151%		
Ratio of Eligible own funds to Minimum Consolidated Group SCR	R0650	584%		

The group's ratio of eligible own funds to the solvency capital requirement was 133% per 2020 Q4 (151% per 2019 Q4). The ratio of total eligible own funds to the minimum capital requirement was 537% per 2020 Q4 (584% per 2019 Q4).

The decrease in eligible own funds by 1,959 MSEK to 11,386 MSEK was driven by a decrease in assets over liabilities by 2,544 MSEK from a dividend of 559 MSEK during the first quarter followed by underwriting losses from Covid-19 and unfavourable foreign exchange development. The reduction in assets over liabilities was offset by 585 MSEK from a reduction of expected dividends by 412 MSEK to 147 MSEK and from a reduction in non-available own funds items by 173 MSEK.

E.2 SOLVENCY CAPITAL REQUIREMENT AND MINIMUM CAPITAL REQUIREMENT

SOLO

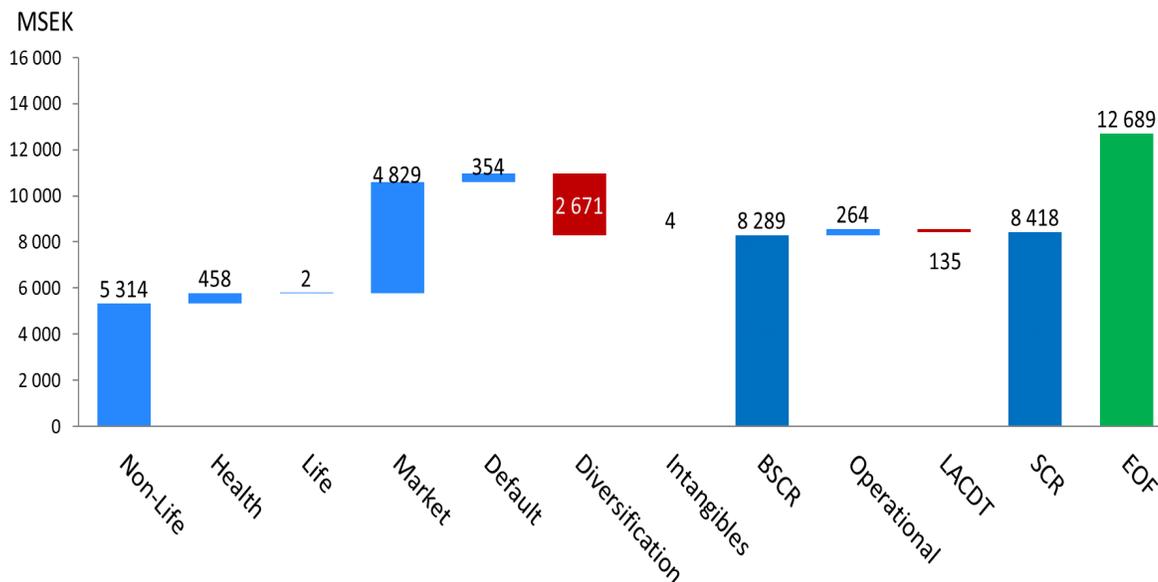

The regulatory SCR and the MCR are calculated based on the Solvency II standard formula, for all risk categories. The MCR is defined as the largest of either a factor based approach applied to net earned premium and net technical provisions, or as an amount equal to 25% of the SCR. Based on the current risk profile the MCR becomes 25% of the SCR.

The SCR at 2020 Q4 is MSEK 8,418. The Minimum Capital Requirement (MCR) is MSEK 2,105. SINT is not required to hold a capital add-on in addition to the SCR.

SINT has from the start acknowledged the full impact of the Solvency II standard formula and does not apply any of the transitional measures that could have decreased the solvency requirement to a lower level during a transitional period. SINT’s application of the standard formula does not use any undertaking-specific parameters, and the regulator has not requested SINT to do so. The application of the standard formula uses simplifications, consistent with the principle of proportionality. Articles 89 – 112 specify different possible simplifications when applying the standard formula. SINT applies simplifications for Article 91 “Simplified calculation of the capital requirement for life mortality risk”, Article 96 “Simplified calculation of the capital requirement for life-catastrophe risk” and Article 107 “Simplifications - risk mitigation for reinsurance or securitisation”.

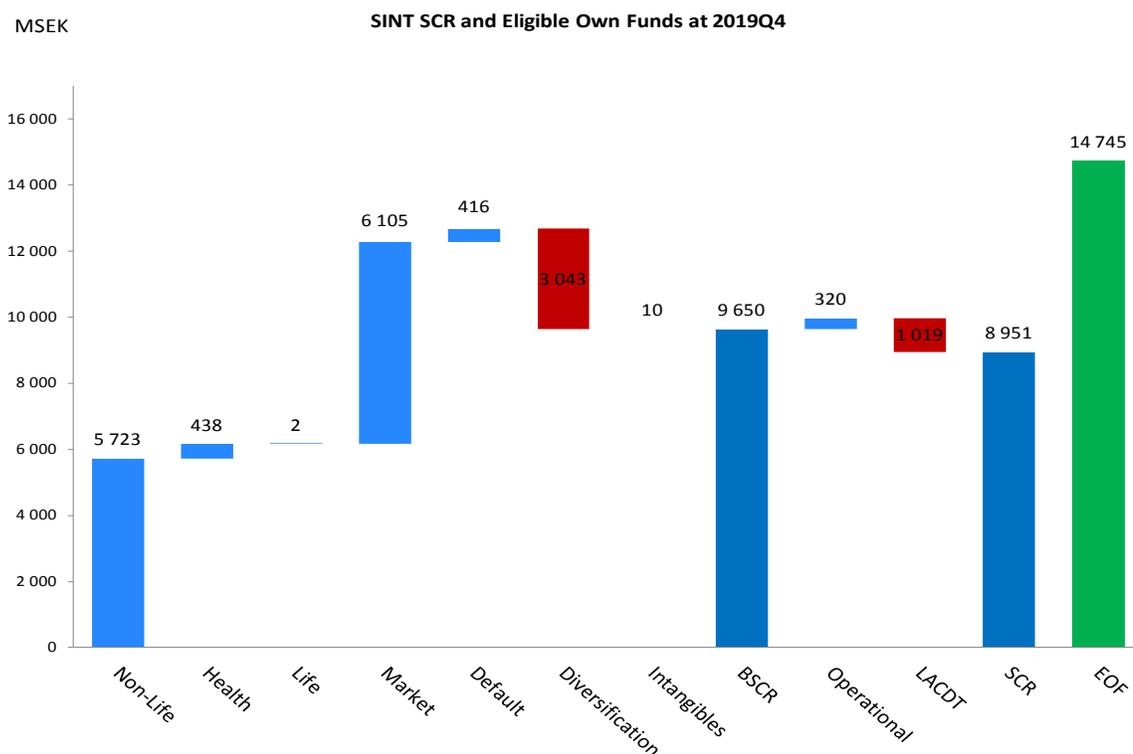

Split by risk module to which SINT has exposure, the SCR is based on the following components:

SINT SCR and Eligible Own Funds at 2020Q4:

SOLVENCY AND FINANCIAL CONDITION REPORT

D. CAPITAL MANAGEMENT

The SCR of MSEK 8,418 decreased by 6% or MSEK 533 from the 2019 Q4 annual calculation. The largest drivers are the reductions for Currency Risk by MSEK 1,188 and Non-Life Catastrophe Risk by MSEK 635, offset by a reduction of the Loss Absorbing Capacity of Deferred Taxes (LACDT) of MSEK 883.

The MCR of MSEK 2,105, which corresponds to 25% of the SCR has decreased by MSEK 133 or 6% from the 2019 Q4 calculation.

GROUP

The regulatory Group SCR standard formula is calculated based on the Solvency II standard formula for all risk categories. The accounting consolidation basis is applied. Hence the minimum consolidated Group SCR is equal to the sum of the MCRs for the participating insurance or reinsurance undertakings, i.e. equal to SINT's MCR.

The Group SCR at 2020 Q4 is SEK 8,575 million. The minimum consolidated Group SCR is SEK 2,105 million. SIUK Group is not required to hold a capital add-on in addition to the Group SCR.

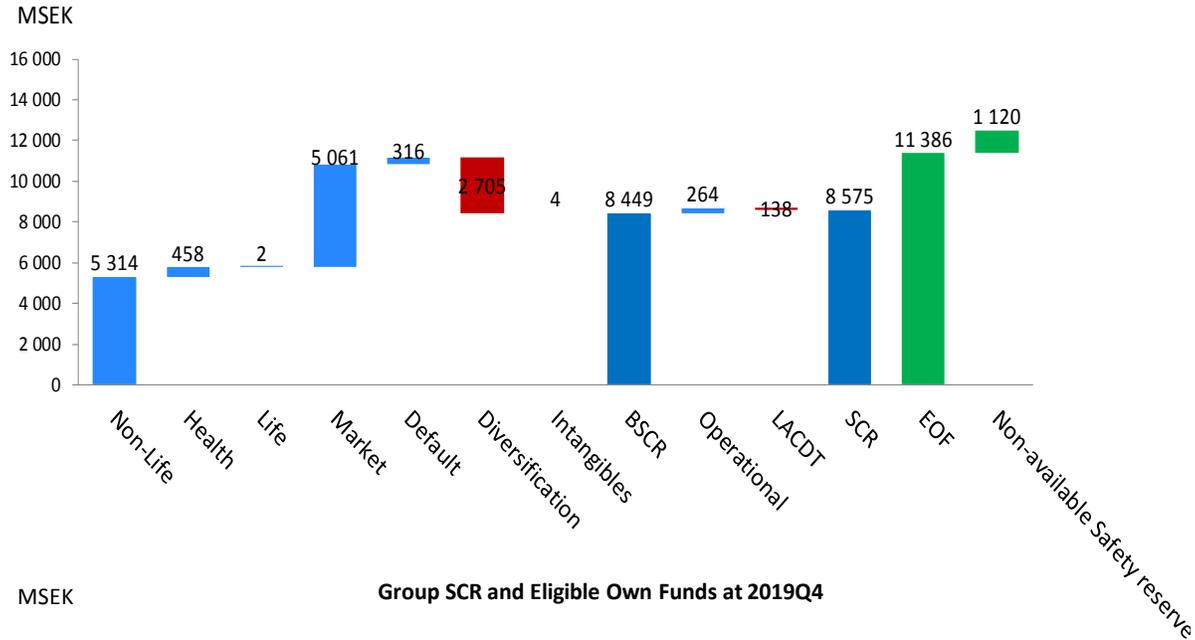

SIUK Group has from the start acknowledged the full impact of the Solvency II standard formula and does not apply any of the transitional measures that could have decreased the solvency requirement to a lower level during a transitional period. SIUK Group's application of the standard formula does not use any undertaking-specific parameters, and the regulator has not requested SIUK Group to do so. The application of the standard formula uses simplifications, consistent with the principle of proportionality. Articles 89 – 112 specify different possible simplifications when applying the standard formula. SIUK Group applies simplifications for Article 91 "Simplified calculation of the capital requirement for life mortality risk", Article 96 "Simplified calculation of the capital requirement for life-catastrophe risk" and Article 107 "Simplifications - risk mitigation for reinsurance or securitisation".

SOLVENCY AND FINANCIAL CONDITION REPORT

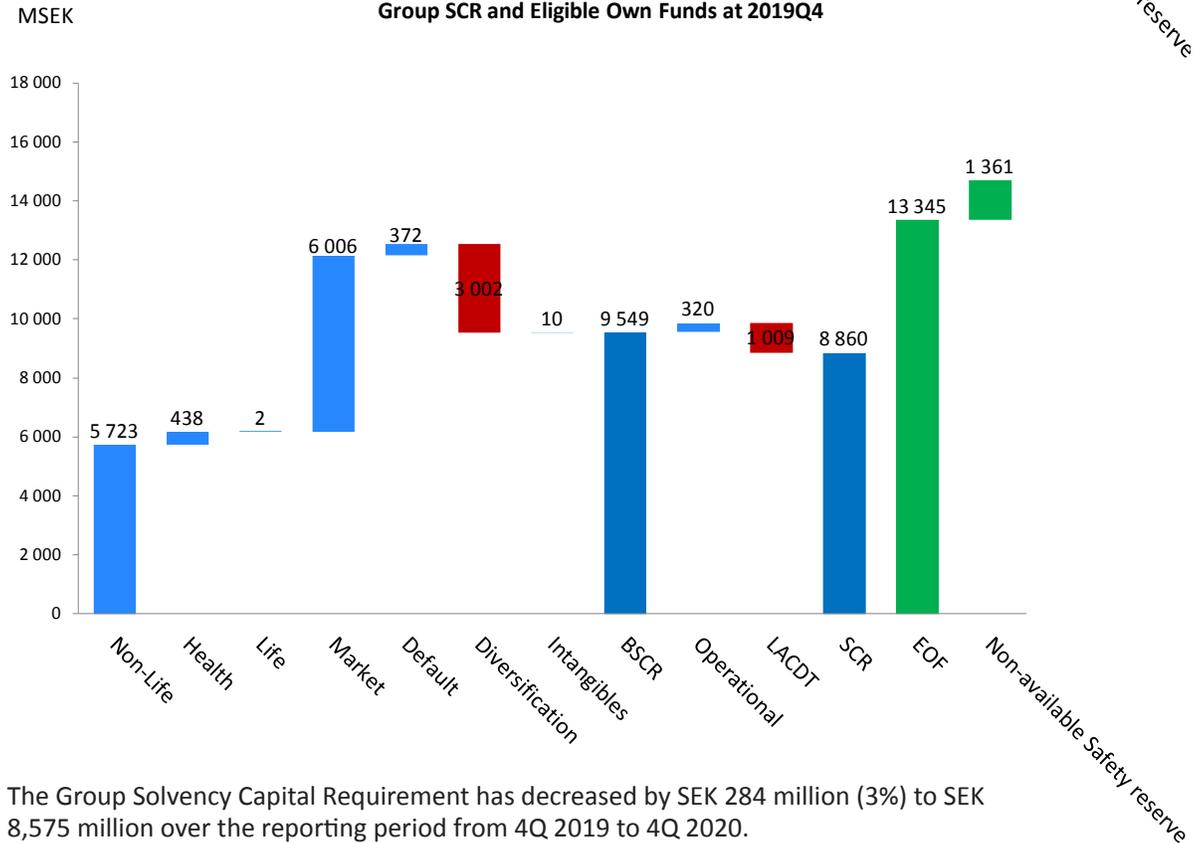

D. CAPITAL MANAGEMENT

Split by risk module to which SIUK Group has exposure, the SIUK Group SCR is based on the following components in MSEK:

Group SCR and Eligible Own Funds at 2020Q4:

Group SCR and Eligible Own Funds at 2019Q4

The Group Solvency Capital Requirement has decreased by SEK 284 million (3%) to SEK 8,575 million over the reporting period from 4Q 2019 to 4Q 2020.

The largest drivers to the decrease are the reductions of Non-Life Catastrophe Risk, Spread Risk, and Equity Risk, offset by a lower mitigating effect from LACDT.

E.3 USE OF THE DURATION-BASED EQUITY RISK SUB-MODULE IN THE CALCULATION OF THE SCR

SINT and the SIUK Group do not use the duration-based equity risk sub-module in the calculation of the SCR.

E.4 DIFFERENCES BETWEEN THE STANDARD FORMULA AND ANY INTERNAL MODEL USED

SINT and the SIUK Group do not use an approved internal model.

E.5 NON-COMPLIANCE WITH THE MCR AND NON-COMPLIANCE WITH THE SCR

SINT has been in full compliance with the MCR and the SCR requirements during the reporting period. SIUK Group has been in full compliance with the minimum consolidated Group SCR and the Group SCR requirements during the reporting period.

E.6 ANY OTHER MATERIAL INFORMATION

SINT and SIUK Group consider all material information on the capital management of the company to have been discussed in other sections.

METHOD 1 OR 2 USED FOR GROUP SOLVENCY CALCULATION

For SIUK Group SCR calculations, the default Method 1 (accounting consolidation-based) was used.

FUNGIBILITY AND TRANSFERABILITY OF OWN FUNDS

The own funds at SIUK Group level discussed in section E.1 above were assessed against restrictions on the fungibility and transferability of own funds that may exist as a consequence of the underlying nature of own funds elements and of the legal and regulatory environments in which the undertakings of the SIUK Group operate. Total own funds have been reduced by MSEK 2,516 due to fungibility and transferability constraints related to net deferred tax assets at SIUK Group level and the Swedish safety reserve in SINT of MSEK 1,396 and MSEK 1,120 respectively.

CONSOLIDATED GROUP SCR

The full amount of the SIUK Group SCR at 2020 Q4 of MSEK 8,575 is calculated based on the basis of consolidated data referred to in Article 335(1)(a) of the Delegated Acts Regulation.

MATERIAL SOURCES OF GROUP DIVERSIFICATION BENEFITS

The main sources of SIUK Group diversification benefits are recognized in non-life risk and market risk. Non-life risk benefits stem from the SIUK Group portfolio being more diversified between lines of business and geographical regions. Market risk benefits at SIUK Group level are driven by the treatment of subsidiaries in the solo and Group calculations. In the solo calculations subsidiaries are treated as equity risk, hence the equity risk category includes the volatility from all risk categories in respective subsidiary's business. In the SIUK Group SCR, the risk from the subsidiaries are consolidated into respective Group risk area, leaving only the other equity investments as equity risk exposure.

ADDITIONAL VOLUNTARY INFORMATION

SINT and SIUK Group consider all material information on the capital management of the company to have been discussed in other sections.

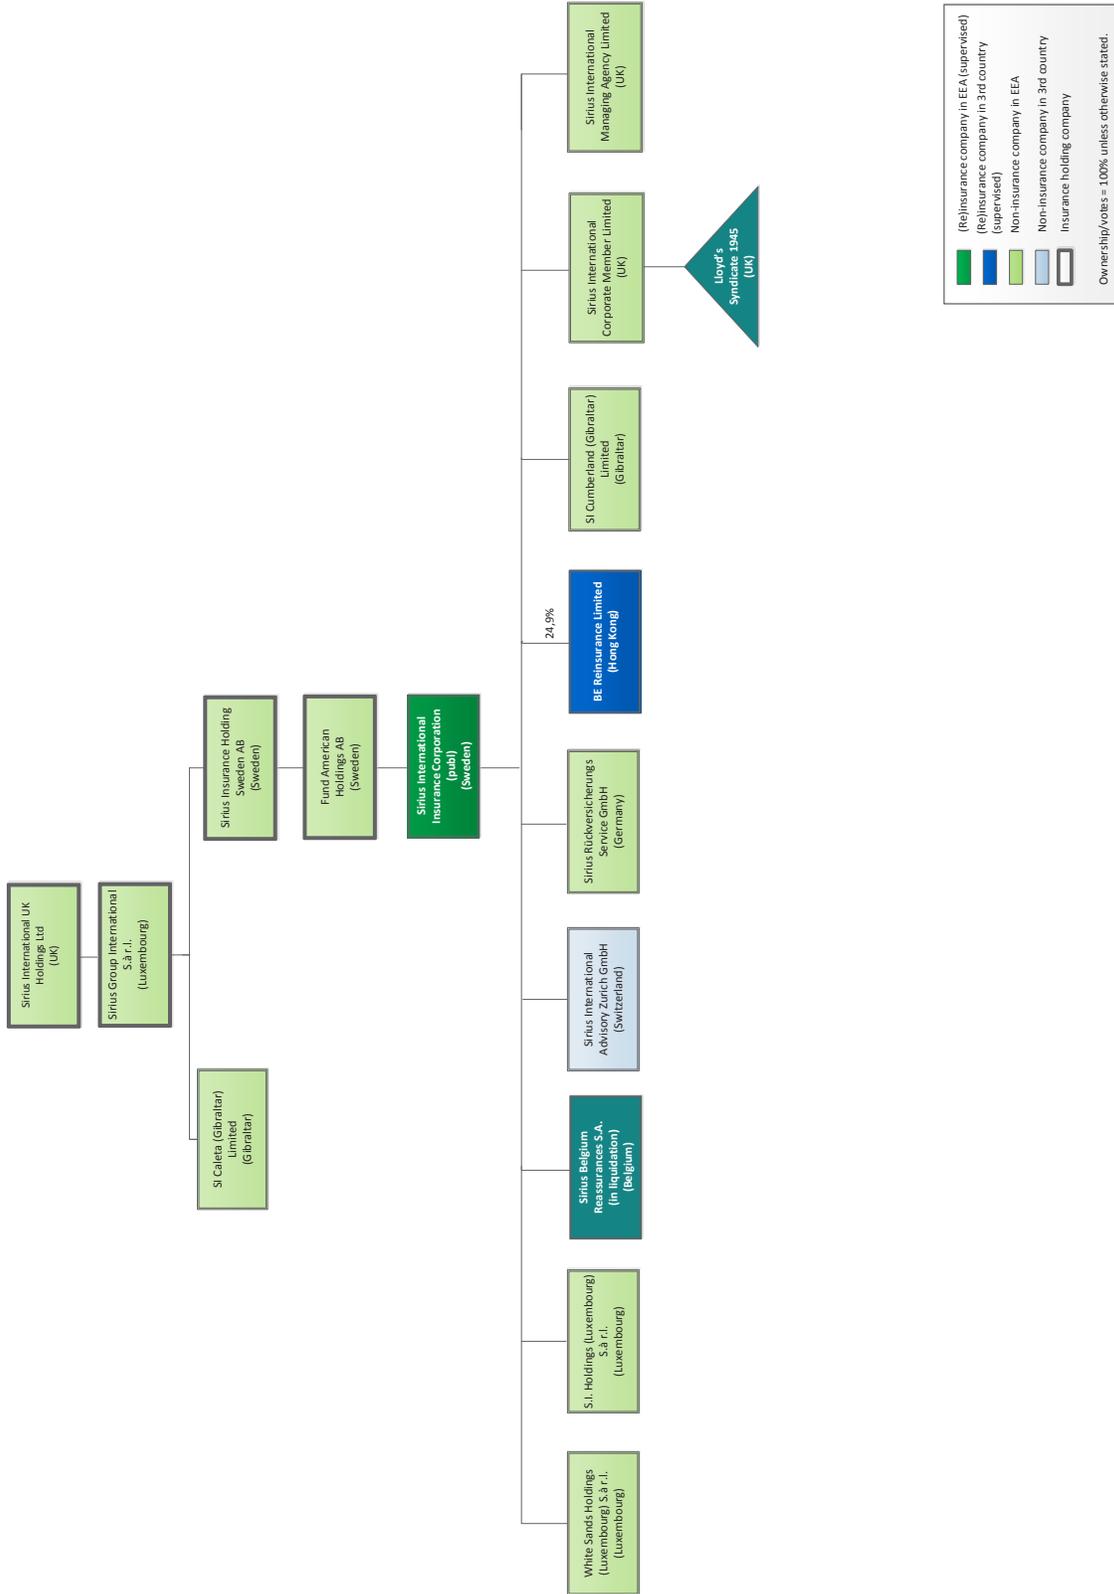

GLOSSARY OF TERMS AND ABBREVIATIONS

AMSB	Administrative, management or supervisory body

SOLVENCY AND FINANCIAL CONDITION REPORT

APPENDIX 3: SFCR GROUP QUANTITATIVE REPORTING TEMPLATES

S.23.01.j

Own funds

Basic own funds before deduction for participations in other financial sector

Ordinary share capital (gross of own shares)
 Non-available called but not paid in ordinary share capital at group level
 Share premium account related to ordinary share capital
 Initial funds, members' contributions or the equivalent basic own - fund item for mutual and mutual-type undertakings
 Subordinated mutual member accounts
 Non-available subordinated mutual member accounts at group level
 Surplus funds
 Non-available surplus funds at group level
 Preference shares
 Non-available preference shares at group level
 Share premium account related to preference shares
 Non-available share premium account related to preference shares at group level
 Reconciliation reserve
 Subordinated liabilities
 Non-available subordinated liabilities at group level
 An amount equal to the value of net deferred tax assets
 The amount equal to the value of net deferred tax assets not available at the group level
 Other items approved by supervisory authority as basic own funds not specified above
 Non available own funds related to other own funds items approved by supervisory authority
 Minority interests (if not reported as part of a specific own fund item)
 Non-available minority interests at group level

Own funds from the financial statements that shall not be represented by the reconciliation reserve and do not meet the criteria to be classified as Solvency II own funds

Own funds from the financial statements that shall not be represented by the reconciliation reserve and do not meet the criteria to be classified as Solvency II own funds

Deductions

Deductions for participations in other financial undertakings, including non-regulated undertakings carrying out financial activities
 whereof deducted according to art 228 of the Directive 2009/138/EC
 Deductions for participations where there is non-availability of information (Article 229)
 Deduction for participations included by using D&A when a combination of methods is used
 Total of non-available own fund items

Total deductions

Total basic own funds after deductions

Ancillary own funds

Unpaid and uncalled ordinary share capital callable on demand
 Unpaid and uncalled initial funds, members' contributions or the equivalent basic own fund item for mutual and mutual-type undertakings, callable on demand
 Unpaid and uncalled preference shares callable on demand
 A legally binding commitment to subscribe and pay for subordinated liabilities on demand
 Letters of credit and guarantees under Article 96(2) of the Directive 2009/138/EC
 Letters of credit and guarantees other than under Article 96(2) of the Directive 2009/138/EC

Supplementary members calls under first subparagraph of Article 96(3) of the Directive 2009/138/EC

Supplementary members calls - other than under first subparagraph of Article 96(3) of the Directive 2009/138/EC
 Non available ancillary own funds at group level

Other ancillary own funds

Total ancillary own funds

Own funds of other financial sectors

Credit institutions, investment firms, financial institutions, alternative investment fund managers, UCITS management companies – total
 Institutions for occupational retirement provision
 Non regulated entities carrying out financial activities
 Total own funds of other financial sectors

Own funds when using the D&A, exclusively or in combination of method 1

Own funds aggregated when using the D&A and combination of method
 Own funds aggregated when using the D&A and combination of method net of IGT

Total available own funds to meet the consolidated group SCR (excluding own funds from other financial sector and from the undertakings included via D&A)

Total available own funds to meet the minimum consolidated group SCR

Total eligible own funds to meet the consolidated group SCR (excluding own funds from other financial sector and from the undertakings included via D&A)

Total eligible own funds to meet the minimum consolidated group SCR

Minimum consolidated Group SCR

Ratio of Eligible own funds to Minimum Consolidated Group SCR

Total eligible own funds to meet the group SCR (including own funds from other financial sector and from the undertakings included via D&A)

Group SCR

Ratio of Eligible own funds to group SCR including other financial sectors and the undertakings included via D&A

Reconciliation reserve

Excess of assets over liabilities
 Own shares (held directly and indirectly)
 Foreseeable dividends, distributions and charges
 Other basic own fund items
 Adjustment for restricted own fund items in respect of matching adjustment portfolios and ring fenced funds
 Other non available own funds

Reconciliation reserve before deduction for participations in other financial sector

Expected profits

Expected profits included in future premiums (EPIFP) - Life business
