Field survey is set for proposed K-4 replacement in Hoisington

A field survey will begin soon for a proposed pavement replacement on K-4 through Hoisington, from Susank Road to North Cedar Street.

The survey length is about 2,000 feet and is based on the existing alignment.

The field survey is expected to begin around Monday, Oct. 7, and be completed by around Oct. 25.

The survey is needed to gather information for the detailed design of the proposed improvement.

A member of the survey crew first will contact property owners and/or tenants for permission to enter private property if needed. Survey activities will include the use of survey instruments on the ground to determine locations of existing features within the survey corridor.

Tony Crawford, Assistant Survey Project Manager with the Kansas Department of Transportation, will be in charge of this survey.

The map below shows the project location outlined.
